Council Member Cummings asked what concerns were raised by the Metropolitan Parks and Open Space Commission members who did not support the proposed action. Kelly responded that the concerns centered on the natural resource project being considered a facility and the potential for additional pollutants entering the park from the reconstructed roadway, and the perception that any removal of land from a regional park is a negative.

Council Member Wulff noted that there are precedents for equally valuable land-for-facility exchanges in the Regional Parks System, the reconstructed roadway will improve trail access in the area, and that she supported the plan amendment and land conversion.

Council Member Lee inquired about the public plaza at the 2415 – 2017 West Broadway project from the City of Minneapolis. Ms. Gary described the goal of public plazas as being to create more community gathering space to facilitate both physical and social connections. She also noted that these are common components of LCDA projects as they earn points in the scoring process and are eligible for funding through the LCDA Development program.

Council Member Wulff asked about the affordability levels and wealth building component of The Villas Townhomes project. Breanne Rothstein, Economic Development and Housing Director from the City of Brooklyn Park, explained that the project is early in the process and affordability levels have not yet been determined. She stated that affordable housing is a priority for Brooklyn Park and will be a point of discussion with the developer. Council Member Chamblis expressed her support for the projects in Brooklyn Park noting that development in the project areas has been challenging in the past and that the new developments will be beneficial for the community.

Council Member Lilligren shared his support for awarding public funds to a small developer working on a smaller project. He explained that accessing public dollars is especially challenging for new developers working on smaller projects.
