

Environment Committee

Meeting date: October 23, 2018

For the Metropolitan Council meeting of November 14, 2018

Subject: Disposition of Surplus Property in South St. Paul

District(s), Member(s): Richard Kramer, District 13

Policy/Legal Reference: Minnesota Statute 473.504 Subd 11

Staff Prepared/Presented: Daniel Fick, 651-602-1061; Jeannine Clancy, 651-602-1210

Division/Department: MCES c/o Leisa Thompson, 651-602-8101

Proposed Action

That the Metropolitan Council authorize the Regional Administrator to re-convey property that was part of the original South Saint Paul Wastewater Treatment Plant site to the City of South St. Paul in accordance with the original acquisition agreement.

Background

In 1969 the Metropolitan Sewer Board acquired the South St. Paul Wastewater Treatment Plant as part of the development of a regional wastewater disposal system. Section 2.03 of the transfer Agreement (Attached) between the Metropolitan Sewer Board (Board) and the City of South St. Paul (Municipality) stated that:

The Board agrees to re-convey to the Municipality the treatment works property or any part of it when the Board determines it is no longer needed for the metropolitan disposal system.

On February 22, 2017, the Council approved the reconveyance of a parcel of property at the L-65 site in South St. Paul to the City (Business Item 2017-48). In response to a request by the city, another parcel of land was evaluated for reconveyance. It has been determined that the requested parcel is also no longer needed for the metropolitan disposal system. This item expands the previously approved area of reconveyance.

Rationale

Reconveyance of this property is a fulfillment of the Council's commitments under the original transfer agreement.

Thrive Lens Analysis

This action advances the Thrive outcomes of stewardship and prosperity by responsibly managing our existing investments and supporting orderly and economic growth by returning land back to local government where it will be made available for redevelopment in accordance with the City's approved Comprehensive Plan. Further, by releasing the land back to the City of South St. Paul, the land can be utilized for future development that will grow the region's economic strengths by providing an opportunity for a business to succeed.

Funding

None required.

Known Support / Opposition

The City of South St. Paul supports this action. No known opposition.

Environment Committee

Meeting date: February 14, 2017

For the Metropolitan Council meeting of February 22, 2017

Subject: Disposition of Surplus Property in South Saint Paul

District(s), Member(s): Richard Kramer, District 13

Policy/Legal Reference: Minnesota Statute 473.504 Subd 11

Staff Prepared/Presented: Daniel Fick, 651-602-1061; Bryce Pickart, 651-602-1091

Division/Department: MCES c/o Leisa Thompson, 651-602-8101

Proposed Action

That the Metropolitan Council authorize the Regional Administrator to re-convey property that was part of the original South Saint Paul Wastewater Treatment Plant site to the City of South Saint Paul at no cost in accordance with the original acquisition agreement.

Background

In 1969 the Metropolitan Sewer Board acquired the South St. Paul Wastewater Treatment Plant as part of the development of a regional wastewater disposal system. Section 2.03 of the transfer Agreement between the Metropolitan Sewer Board (Board) and the City of South Saint Paul (Municipality) stated that:

The Board agrees to re-convey to the Municipality the treatment works property or any part of it when the Board determines it is no longer needed for the metropolitan disposal system.

With the decommissioning of the South Saint Paul Wastewater Treatment Plant during the 1980s and completion of the Lift Station L-65 facility improvements in 2015, certain portions the original property are no longer required for the regional wastewater disposal system.

Rationale

Reconveyance of this surplus property is a fulfillment of the Council's commitments under the original transfer agreement.

Thrive Lens Analysis

This action advances the Thrive outcomes of stewardship and prosperity by responsibly managing our existing investments and supporting orderly and economic growth by returning land back to local government where it will be made available for redevelopment in accordance with the City's approved Comprehensive Plan. Further, by releasing the land back to the City of South St. Paul, the land can be utilized for future development that will grow the region's economic strengths by providing an opportunity for a business to succeed.

Funding

None required.

Known Support / Opposition

The City of South Saint Paul supports this action. No known opposition.

AGREEMENT

SEE P. 4-7
AND P. 17 of
exhibits

This Agreement, made and entered into by and between the Metropolitan Sewer Board (hereinafter called the Board), and the City of South St. Paul (hereinafter called the Municipality);

WITNESSETH THAT, in the joint and mutual exercise of their powers and in consideration of the mutual covenants herein contained, the parties hereto recite and agree as follows:

Section 1. Recitals. Minnesota Laws 1969, Chapter 449, Section 5, authorizes the Board, at any time after January 1, 1970, to assume ownership of and require any local government unit to transfer to it, any existing interceptors or treatment works needed to implement the Metropolitan Council's comprehensive plan for the collection, treatment and disposal of sewage in the metropolitan area. The Board, by its Resolution No. 70-72, determined to assume the ownership of the treatment works and necessary appurtenances thereto described in Section 2.01 hereof and owned and operated by the Municipality, and directed the Municipality to transfer to the Board all of its right, title and interest in and to such treatment works and appurtenances. The Metropolitan Council, by its Resolution No. 70-26, has approved the acquisition of the treatment works and necessary appurtenances by the Sewer Board.

Section 2. Transfer and Return of Treatment Works.

2.01. Treatment Works and Appurtenances. The Municipality will transfer to the "Metropolitan Sewer Board established by Laws 1969, Chapter 449" by quit claim deed on or before October 1, 1970, all of its right, title and interest in and to its sewage treatment works and all necessary appurtenances thereto, and the property on which such treatment works and appurtenances are located and its easement for access to the property, the legal description of which is attached hereto and marked Exhibit A. All property described in Exhibit A is hereinafter referred to as the "treatment works".

2.02. Personal Property. The Municipality will also transfer to the Sewer Board by appropriate instruments of conveyance, on or before October 1, 1970, that personal property used for the operation of the treatment works which is described in the list attached hereto and marked Exhibit B.

2.03. Return of Treatment Works. The Board agrees to reconvey to the Municipality the treatment works property or any part of it when the Board determines it is no longer needed for the metropolitan disposal system. Prior to the reconveyance the Board may remove for its own use any structures or equipment located on the property, and shall dismantle, remove or demolish all remaining buildings, structures and equipment which remain on the property and which the Municipality has not requested to be left intact. Upon the date of any such reconveyance, the Municipality shall become obligated to pay to the Board an amount equal to the credit previously allowed to the Municipality for the land reconveyed pursuant to Chapter 449, Section 5, Subdivision 4; provided that if the Municipality is entitled to additional credit which has not yet been allowed by the Board, the Municipality shall not be required to pay such amount to the Board in cash to the extent that the Municipality's credit not yet allowed can be reduced by the amount owed to the Board.

Section 3. Operation of Treatment Works; Payment of Cost.

3.01. Costs Incurred In 1970. The Board will operate and maintain the treatment works of the Municipality and provide treatment for sewage discharged into it by the Municipality and its contracting municipalities, until such time as the sewage discharged into the treatment works is diverted to another treatment works through an interceptor or by other means. The Municipality will pay all costs incurred by the Board from October 1, 1970 through December 31, 1970, which under accepted accounting principles constitute normal and reasonable

costs of operation and maintenance of the treatment works. Such costs shall not include general administrative costs of the Board or costs which, under accepted accounting principles, are properly regarded as capital costs. The Board intends that the operation and maintenance costs to be billed to the Municipality be of the same nature and amount as would have been paid by the Municipality under the same circumstances. The Municipality will pay directly all such costs incurred by it prior to October 1. Thereafter the Board will submit a statement to the Municipality on the first day of each month commencing on October 1 and ending on December 1, 1970, for the cost of operation and maintenance which it estimates will be incurred in operating the treatment works for that month, less any excess or plus any deficiency in previous payments by the Municipality for this purpose. The Municipality will pay the amount due as shown on the statement to the Board within ten days after receipt of the statement. On or before February 1, 1971, the Board will submit to the Municipality the Board's determination of the actual costs of operation and maintenance of the treatment works during such period, and will remit to the Municipality any amount in excess of such costs collected from it. If the total amount previously paid by the Municipality to the Board for costs of operation and maintenance of the treatment works during such period is less than the actual amount of such costs, the Municipality shall pay to the Board on or before February 15, 1971 an amount equal to the difference between the actual costs and the amount previously paid by the Municipality for this purpose.

3.02. Inventory; Purchase of. On or before February 1 the Board will also submit to the Municipality an inventory of all expendable supplies and materials used in the operation of the treatment works which were on hand on or about January 1, 1971, and which have been paid for by the Municipality. The Board agrees to pay to the Municipality by February 1 an amount equal to the cost to the Municipality of such supplies and materials, if any.

3.03. Costs Incurred After 1970. The Board will include in its annual budget for 1971 and each year thereafter the costs of operation and maintenance of

incurred on or after January 1, 1971, and will allocate such costs to the Municipality and other local government units in the metropolitan area in accordance with Chapter 449.

Section 4. Uncompleted Construction Contracts.

4.01. Contracts Outstanding. The Municipality has entered into the contract described below for the engineering, design and construction of certain improvements to the treatment works:

- a. Engineering Services Contract, with Greeley and Hansen Engineers, Chicago, Illinois, and Bannister Engineering Company, St. Paul, Minnesota, dated July 21, 1964.
- b. Sewage Works Additions and Improvements Contract, Division A, with Lametti & Sons, Inc., St. Paul, Minnesota, dated December 12, 1967.
- ✓ c. Sewage Works Additions and Improvements Contract, Division B, with Barso Construction, Inc., dated December 19, 1967.
- d. Sewage Works Additions and Improvements Contract, Division C, with Acton Construction Company, Inc., Hugo, Minnesota, dated April 1, 1968.

Said contracts have not been completed and each contractor and the Municipality still have obligations to perform under each contract.

4.02. Assignment of Contracts. The Municipality agrees to assign to the Sewer Board on or before October 1, 1970 all of its rights and obligations under each of said contracts, provided that when each such assignment is made the Municipality is not in default under the contract to be assigned, in which event the Sewer Board shall not be required to accept the assignment.

Section 5. Financing of Capital Costs.

5.01. Federal Grant. The Municipality made application to the Federal Water Pollution Control Administration of the United States Department of Interior (now FWQA) for a grant of not to exceed \$450,000 to be used to pay costs of improvements to the treatment works and certain other demonstration project costs. Such application was approved on May 24, 1967 by the FWQA, and the grant is designated Federal Sewage Works Grant, WPC-Minn.-507. The Sewer Board will complete the improvements

and demonstration project for which such grant was made, will file all reports thereon requested by FWQA, and will pay all remaining costs of the foregoing. The Municipality assigns and transfers to the Sewer Board on October 1, 1970, all of its rights in and to such application and grant, and any moneys received or to be received thereunder. As of October 1, 1970 the Municipality had received \$ 377,238.44, and requested payment of an additional \$ 6448.51, of which \$ 216,890.00 is now on hand in its Sewage Treatment Facilities Construction Fund.

5.02. Bonds Issued. The Municipality has issued all or a portion of each issue of general obligation bonds described in the list attached hereto and marked Exhibit C, to provide funds to pay costs of acquisition and betterment of the treatment works.

5.03. Municipality's Obligation. The Municipality agrees to continue to pay all principal of and interest on all outstanding bonds of the issues described in Exhibit C when due. The principal amount so paid prior to January 1, 1971 shall be included in the construction cost of the treatment works paid by the Municipality, for the purpose of computing the current value of such facilities to be credited to local government units pursuant to Chapter 449, Section 5, Subdivision 4.

5.04. Sewer Board's Obligation. The Sewer Board, upon assuming ownership of the treatment works, shall become obligated to pay to the Municipality amounts sufficient to pay a percentage of the principal and interest coming due on or after January 1, 1971, on each of the bond issues described in Exhibit C. Subject to adjustment as hereinafter provided, the parties agree that such percentages are: 100% for the Sewer Bonds dated October 1, 1962, 48.55% for the Flood Control Bonds dated January 1, 1966, 100% for the Sewage Treatment Facilities Bonds dated February 1, 1968, and 100% for the Sewage Treatment Facilities Bonds dated September 1, 1968; and that such percentages of principal and interest come due in the years and in the amounts set forth in the schedule attached hereto and marked Exhibit D. These percentages are intended to be equal to that percentage of the proceeds of each bond issue

either party that a greater or lesser percentage of such proceeds were expended on the treatment works, the percentages in this section and the principal and interest amounts set forth in Exhibit D shall be adjusted accordingly by a written amendment to this Agreement. The Sewer Board may offset amounts due to the Municipality in any year under this Section against amounts allocated to and due from the Municipality to the Sewer Board in accordance with its annual budget prepared in accordance with Chapter 449, Section 10.

Section 6. Personnel and Permits.

6.01. Personnel. The Municipality agrees to identify, on or before October 1, 1970, all persons who are its employees and who will become employees of the Sewer Board pursuant to Chapter 449, and to prepare a statement of the salary or wages currently paid to each such employee, and a statement of the retirement, health, welfare and other benefits to which each such employee is entitled.

6.02. Permits. The Municipality agrees to transfer to the Sewer Board on or before October 1, 1970, all permits or licenses issued to it by any government agency for the construction and operation of the treatment works.

Section 7. Treatment Works Pumping Capacity. At present, sanitary sewage and storm water are conveyed into the treatment works through the sewer collection system of the Municipality. During rainfalls the amount of combined sewage and storm water conveyed into the treatment works exceeds its capacity and must be bypassed into the Mississippi River to avoid flooding in the Municipality. During periods of high water levels in the Mississippi River, such bypassing can only be accomplished through the use of pumping facilities at the treatment works. The Board agrees to maintain not less than the present South St. Paul reserve pumping capacity for the purpose above stated at the treatment works, and, during such periods, to operate such pumping facilities for this purpose, upon request of the Municipality's Engineer. The Municipality has commenced a program for the separation of its sanitary sewer system and its storm sewer system, and will complete such separation program as soon as is practical and economically feasible. Costs

of providing such reserve capacity shall be included in the Board's annual budget and allocated in accordance with Chapter 449.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement this 1st day of October, 1970.

EXHIBIT A

TREATMENT WORKS REAL PROPERTY

The general description of the treatment works site is as follows:

An area of land generally within the following boundary:

Bounded on the south by the north right-of-way line of Maltby Street, on the west by a line extending approximately 965 feet in a northerly direction from a point on the north right-of-way line of Maltby Street 316 feet east of the east right-of-way line of Forest Avenue, and thence extending approximately 820 feet in a northwesterly direction to a point of intersection with the south right-of-way line of Interstate Highway No. 494, on the north by the south right-of-way line of Interstate Highway No. 494, and on the east by the Mississippi River.

The exact description of the treatment works site will be determined by a registered survey of the property to be made and paid for by the Board, with the assistance of the Municipality.

The surveyed description, when completed, shall be substituted for this Exhibit A.

Laboratory Items Purchased Without Government
Assistance In the Last Couple of Years

General Items of Glassware 500.00

Laboratory Items Especially Costly Items Purchased
Without Government Assistance In the Last Couple of Years

Imhoff Cones	17	1968 & 69 & 70	238.00
BOD Bottles (Other than above)	150		300.00
Evaporating Dishes	150		150.00
Pipettes	125		156.00

Items Purchased Under Demonstration Not Necessarily
Laboratory Equipment to be Found as Part of or in the Chemical
Building and in and Around the Old Main Laboratory but
not Included in Above Listed Items.

CHEMICAL BUILDING ITEMS

DESCRIPTION	DATE	COST
Pullies for digestors	1967	1.50
Rheostat for digestors	1967	15.00
Cold roll stainless steel rod	1967	14.93
Lumber, shovel, nails, etc.	1967	21.93
Five gallon jugs for digestors (glass)	1967	47.34
Five gallon plastic jugs for digestors	1967	42.35
12-3 SO Cord	1967	19.50
Three 5 gallon carboys	1967	23.72
Eductor for bentonite	1968	25.00
Second Eductor	1968	25.00
Pipe, rain cap, solvent cement	1968	113.34
Rubber hose for sludge studies	1968	96.00
1- $\frac{1}{2}$ " x 100" a BRD L-26 CPLD F & F, Misc.	1968	141.80
Sewer Pipe, Fittings	1968	25.07
2 Myers trucks (\$112.00) 2 push bars and rubber tires	1968	141.53
Misc. supplies, pipe fittings	1968	12.74
Pipe Fittings (Special)	1968	26.57
Sewer Pipe, drain tile	1968	15.59
Post Hole Digger and extension; plastic	1968	32.73
Two oak barrels	1968	31.90
Square elec. weld	1968	29.84
Grout for platform and pumps (100 lbs.)	1968	15.45
Sewer tile	1968	27.81
Repair stand. Pump unit with motor	1968	5.75
Pieces of misc. types of metal	1968	8.25
Braces for flash mixers	1968	88.37
Flanges, bushings, tees, washers, couplings	1968	29.49
Misc. Pipe fittings	1968	78.69
Valve, pulley	1968	4.84
100' Hose, couplings	1968	239.55
Overload Heaters	1968	25.41
Ells, tees, sweat gate valve	1968	19.43
Plastic piping	1968	41.80
Material for Fed. parshall flume	1968	67.55
Stringers	1968	20.74
Harrington Hoist	1968	28.50
Hoppers	1968	51.50
Float valves, copper floats, brass rods, tees	1968	57.84
Pulley	1968	6.67
Relay switch for air comp. for blowing out feed lines	1968	26.73
Steel for mixers	1968	6.12
Mortar Box	1968	12.99
20' Mesh	1968	4.00
Splash shield for motors	1969	7.50
Pipe fittings	1969	3.72

CHEMICAL BUILDING ITEMS CONT:

Century DC Motor - repair kit	1969-	50.00
Eductor	1969	25.00
Steel shaft, propellor 7/8" Bore	1969	70.00
Gates, tees, copper, ells, adaptors	1969	23.72
8½" x 50' N-1440 CPLD M & F, Fig 89 Brass	1969	96.00
Check Valve	1969	12.73
Galvanized Iron	1969	28.50
Chemical resistant propellor	1969	28.80
Rearrange wiring, material, labor, ins. (in lab.)	1969	42.19

OLD MAIN LABORATORY ITEMS.

Misc. Electrical Equipment	1967	8.60
Stainless Steel	1967	2.02
Hot Water Tank for air flotation tests	1967	7.50
Electric Mixer	1968	5.00
Condensers, pipettes, & centrifuge tubes	1968	112.34
2 aluminum collars for nitrogen machine	1968	4.75
Switch plate, plumbing to make up BOD tank	1968	43.05
Piping for nitrogen machine	1968	31.26
1" x 50 Ft. 2 BRD 1-26 Red CPLD M & F 1PT	1968	73.80
Stock tank for BOD bottles	1968	16.25
Cork borer set	1968	11.00
Glassware	1968	163.82
Eighteen Kjledahl Flasks	1968	33.66
Ladder	1968	13.46
Pipe fittings	1968	13.16
Milk bottles for samples	1968	15.34
Imhoff Cones	1968	47.82
BOD bottles	1969	94.60
Crucibles	1969	57.60
Equip. 50% cost of pipettes	1969	62.68
