

# Business Item 2025-213

Authorization to Hold a Public Hearing on the Draft Facility Plan for the Interceptor 8253-327 Improvements Phase 2

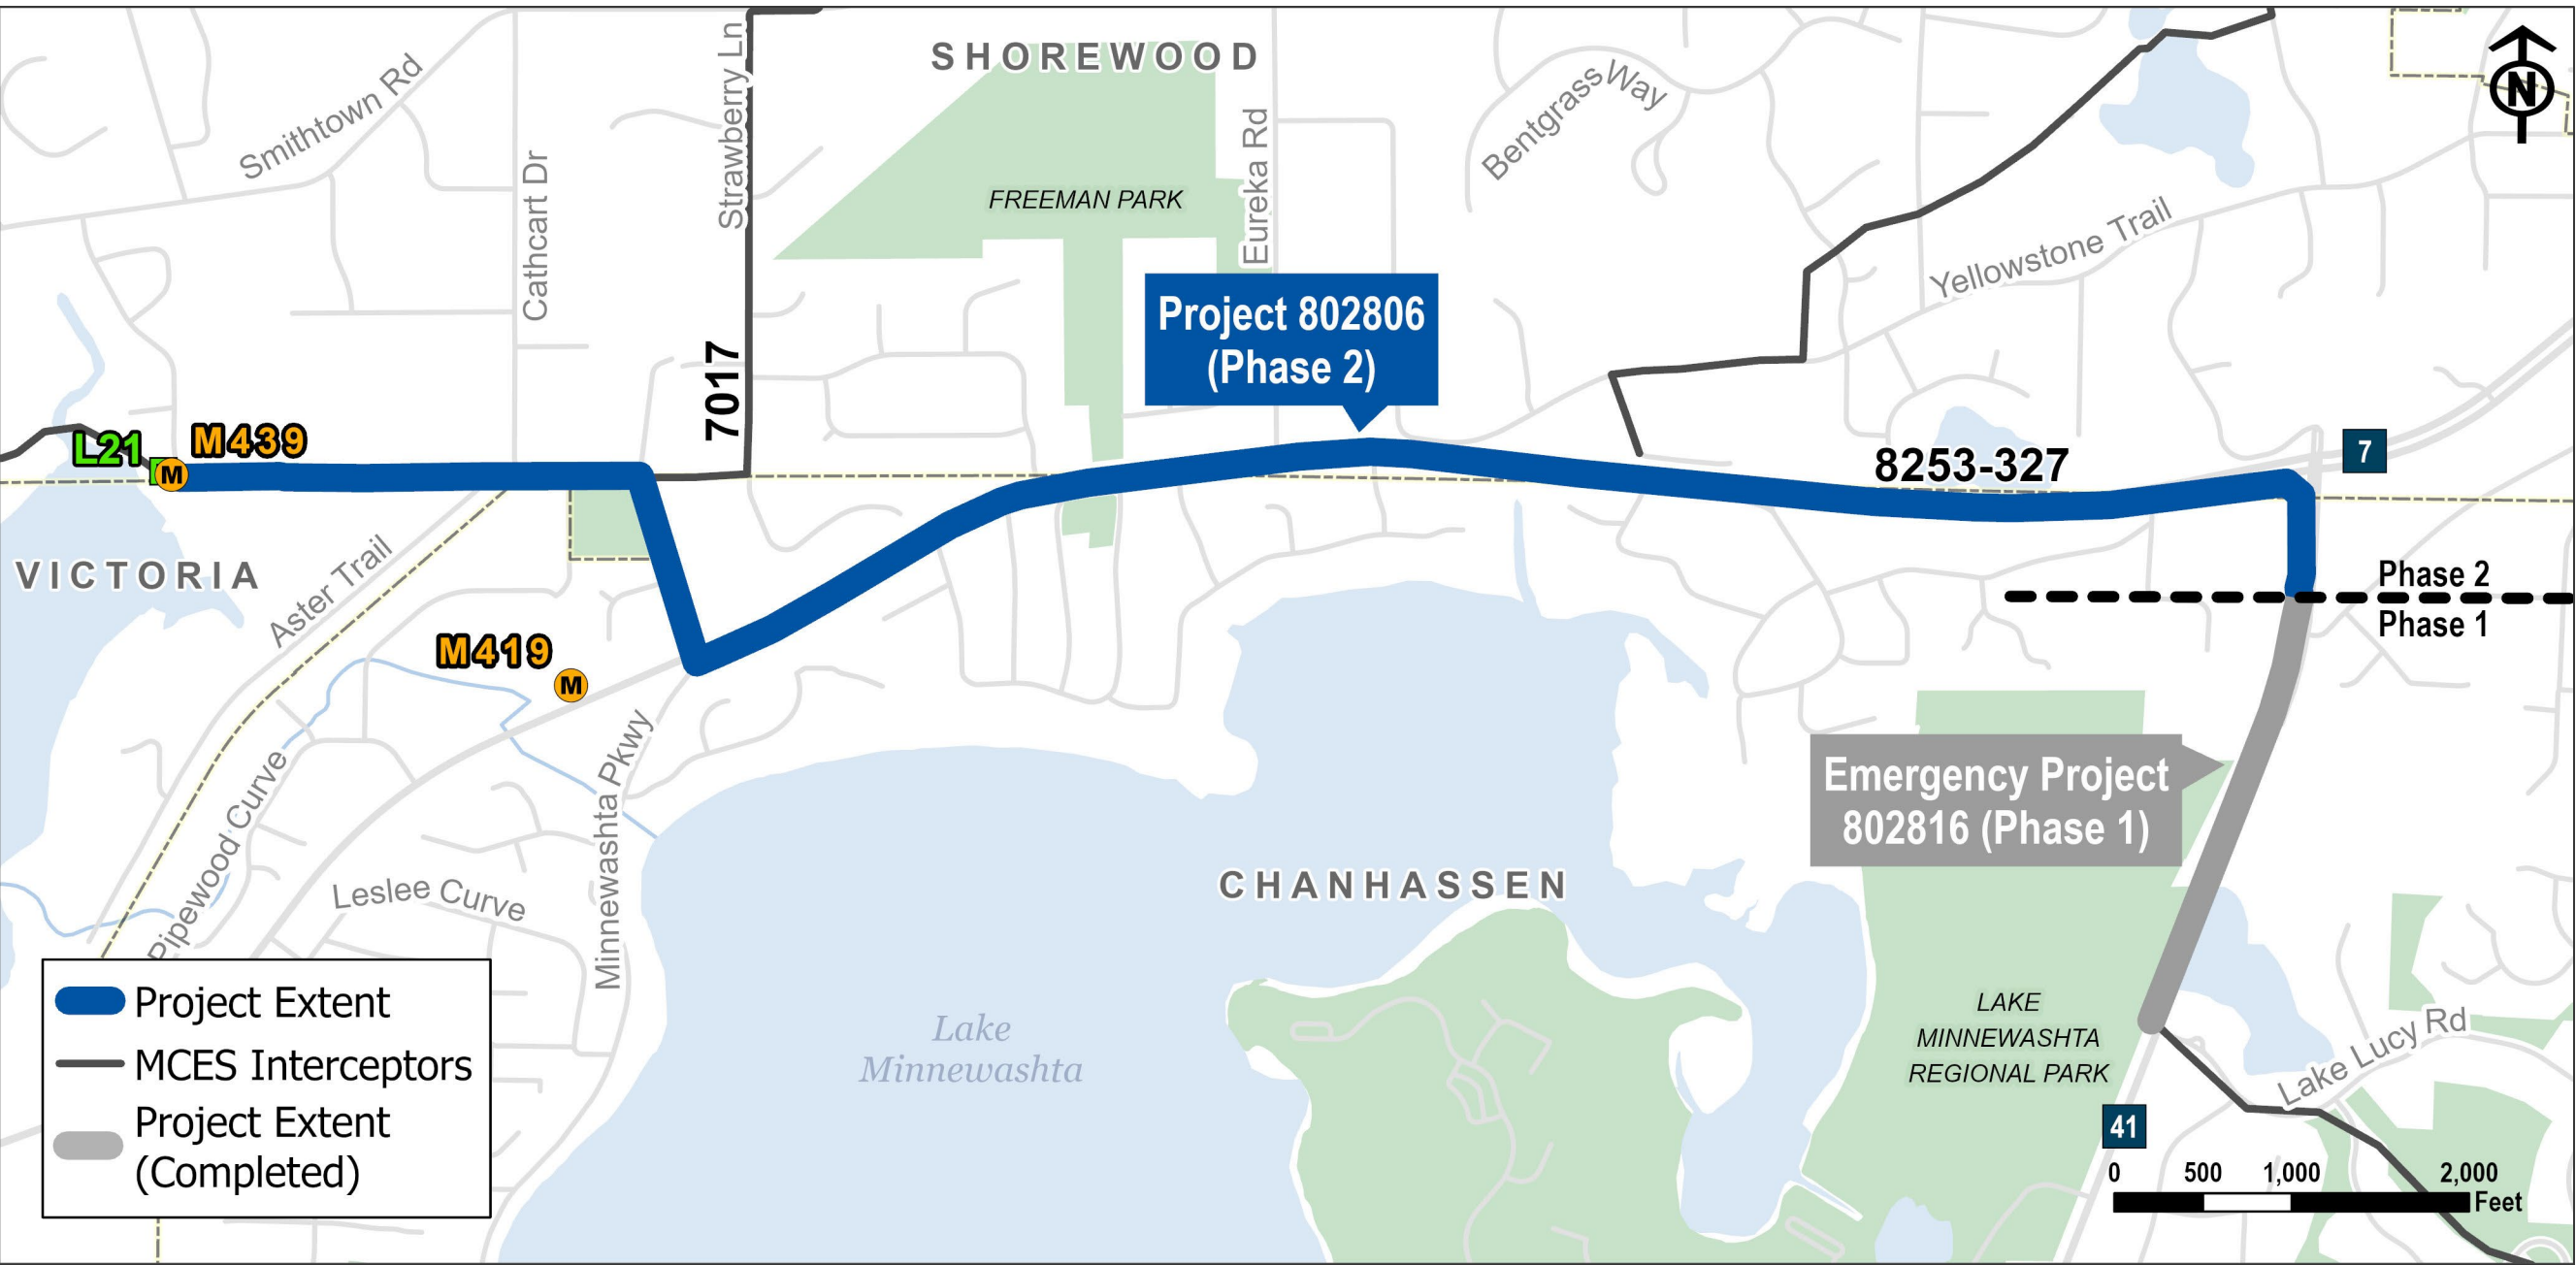

Environment Committee: September 23, 2025

Dan Fick

# Project Location

# 8253-327 and 7017 History and Condition

- Interceptor 8253-327 and 7017 were originally constructed in 1988 and 1971, respectively.
  - 8253-327: 3-mile, 30-inch forcemain
  - Downstream 2,000 feet of 8253-327 was replaced in 2024 (Phase 1).
  - 7017: 700-foot, 24-inch forcemain
- Condition assessments of these facilities in 2021 and 2024 determined the need for a project based on their overall condition.
- Due to the high flows in 8253-327, a redundant pipe is needed to maintain flow in the event of an outage on 8253-327.
- Rehabilitation of existing 8253-327 is required to extend its service life.

# Next Steps

Tentative dates for the facility plan public hearing process (subject to change):

- October 8, 2025: Authorization from Metropolitan Council to hold public hearing
- November 20, 2025: Open House
- December 4, 2025: Public Hearing
- January-February 2026: Council Adoption
- March 6, 2026: Submittal to MPCA

# Proposed Action

That the Metropolitan Council authorize a public hearing in December 2025 to gather input on the draft Facility Plan for the Interceptor 8253-327 Forcemain Improvements, Phase 2, ES Project No. 802806.
