Rate Setting Principles - #1

Total premiums must ensure that risk is shared by those enrollees with the same plan choices

- Open Access premiums should cover all anticipated Open Access claims
- Combined premiums for Distinctions and HRA should cover all anticipated combined claims for those programs

Rate Setting Principles

Rate Setting Principles - #2

Premiums for each individual plan should be evaluated annually and calibrated to the projected claims expense of that plan.

 Calibration of premiums can and should be managed over time to avoid significant year to year premium fluctuations (once the first principle is set)

Self-Insured HealthCare Plans

Risk Mitigation

Reserves

- Cash flow monthly variability between premiums and claims
- Mitigate uninsured losses for claims exceeding premium coverage and provide stability in rate setting

Insurance Coverage

- \$750K Specific stop loss
- 125% Aggregate stop loss

Rate Setting Principles - #3

A Minimum Reserve Target should be maintained

Reserve balances may be available to:

- Mitigate risk of unanticipated gaps between premium collections and claims expenses.
- Mitigate risk impact of participant migration among plans
- Avoid significant year to year premium fluctuations (once the first principle is met)
- One-time uses with priority to uses that mitigate future claims costs
