

Transportation Committee

For the Metropolitan Council meeting of January 23, 2013

ADVISORY INFORMATION

Date Prepared: January 15, 2013

Subject: Approval of Metropolitan Airports Commission (MAC) 2013-2019 Capital Improvement Program (CIP)

Proposed Action:

That the Metropolitan Council:

- 1) Find that the Metropolitan Airports Commission (MAC) has an adequate public participation process for the development and review of its 2013-2019 Capital Improvement Program (CIP), including preparation of an assessment of environmental effects (AOEE) for 2013 projects with potential environmental effects.
- 2) Find that the 2013 CIP projects have adequate funding and are in conformance with the region's Aviation System Plan and consistent with Council policy.
- 3) Recommend approval of the following projects: Custom Border Patrol Primary Expansion (G8 Hold Room), Checked Baggage Inspection System (CBIS) – Terminal 2, Rental Auto Company (RAC)/Ready Return Expansion.
- 4) Recommend contingent approval of the following projects to be built in 2013 upon receiving environmental approval of the MSP 2020 EA: RAC Customer Building, RAC Quick Turnaround (QTA) Facility, T2 Humphrey North Apron Expansion, I-494/34th Avenue Diverging Diamond Interchange.

Summary of Committee Discussion / Questions:

MTS Senior Planner Russ Owen presented this item. Garry Warren from MAC was also present to answer questions. Councilmember Munt asked a question about how residents in Edina felt they didn't have time to comment on recent noise issues. It was explained that Edina has petitioned MAC to be an "at large member" of the Noise Oversight Committee (NOC). The membership application will be addressed by the NOC this week (1/16). Councilmember Brimeyer asked if the Council issues bonds for the airport. Gary Warren explained that the MAC issues its own bonds. There were no comments or questions on the CIP itself.

Motion by Brimeyer, seconded by Munt and passed. Hearing no objection, Chair Elkins stated that this item could proceed to the full Council as a Consent Item.

Transportation Committee

Meeting date: January 14, 2013,

For the Council Meeting of January 23, 2013

ADVISORY INFORMATION

Date: January 8, 2013

Subject: Approval of Metropolitan Airports Commission (MAC) 2013-2019 Capital Improvement Program (CIP)

District(s), Member(s): All Districts & Members

Policy/Legal Reference: MS 473.145, 473.165, 473.621 Sec. 6&7

Staff Prepared/Presented: Arlene McCarthy, MTS Director (651-602-1754)
Amy Vennewitz, MTS Dep. Dir. Finance & Planning (651-602-1058)
Connie Kozlak, MTS Planning Manager (651-602-1720)
Russ Owen, Senior Planner (651-602-1724)

Division/Department: Metropolitan Transportation Services

Proposed Action:

That the Metropolitan Council:

- 1) Find that the Metropolitan Airports Commission (MAC) has an adequate public participation process for the development and review of its 2013-2019 Capital Improvement Program (CIP), including preparation of an assessment of environmental effects (AOEE) for 2013 projects with potential environmental effects.
- 2) Find that the 2013 CIP projects have adequate funding and are in conformance with the region's Aviation System Plan and consistent with Council policy.
- 3) Recommend approval of the following projects: Custom Border Patrol Primary Expansion (G8 Hold Room), Checked Baggage Inspection System (CBIS) – Terminal 2, Rental Auto Company (RAC)/Ready Return Expansion.
- 4) Recommend contingent approval of the following projects to be built in 2013 upon receiving environmental approval of the MSP 2020 EA: RAC Customer Building, RAC Quick Turnaround (QTA) Facility, T2 Humphrey North Apron Expansion, I-494/34th Avenue Diverging Diamond Interchange.

Background

Under MN statutes 473.621 the Council is required to annually review the MAC's proposed CIP and take the following actions:

- Determine the adequacy of the MAC CIP public participation process,
- Review and comment on all projects for consistency with regional policy plans, and
- Approve proposed projects which meet "significant effects" criteria described below.

The attached **Review Findings for MAC 2013-2019 CIP** provides additional background supporting the proposed action.

Rationale

Annual oversight review is needed to meet statutory requirements and to ensure that proposed project scopes and costs are responsive to system needs and conditions. Seven “significant effects” criteria (see criteria A-H in Table 1) determine projects that affect the orderly and economic development of the metropolitan area. The following projects exceed the financial threshold and require Council approval under criteria F:

- Custom Border Patrol Primary Expansion
- Checked Baggage Inspection System
- Rental Auto Company Ready Return Expansion

The following four projects also exceed the financial threshold and require Council approval under criteria F. They have been identified as 2014 projects but the MAC will move these projects to 2013 upon receiving environmental approval from the FAA which is expected in March, 2013.

- RAC Customer Service Building
- RAC Quick Turnaround (QTA) Facility
- I-494/34th Avenue Diverging Diamond Interchange (DDI)
- T2-Humphrey North Expansion – Apron/Fueling Expansion

Funding

No funding implications for the Council. The MAC has identified federal, state, and local funding sources for all of its 2013 CIP projects.

Known Support / Opposition

On December 19, 2012 the TAB recommended approval of the CIP. During the MAC Public Hearing on November 5, 2012, some opposition was expressed with comment pertaining to the environmental effects of projects in the MAC’s CIP.

REVIEW FINDINGS for MAC 2013-2019 CIP

Findings for the various review categories are discussed below.

1. Adequacy of public participation in the CIP review process:

Under state law the Council must make a determination as to adequacy of the process for public participation in the MAC capital improvement program. The 2013-2019 capital improvement process involved scheduled meetings, public notices and public hearings for discussion of the projects. Many of these meetings were advertised in the local newspapers and had a 30-day comment period. The public hearings were held during the MAC committee meetings. The process included distribution of financial and environmental information that was both mailed and made available electronically. CIP materials were mailed to "affected communities", which are defined as communities that border a MAC-owned airport, as well as communities that contact the MAC to be added to the distribution list. Potential cumulative environmental effects of the proposed projects were the subject of a public hearing and comments were responded to by the Commission. These actions are consistent with the TPP Policy 6, *Public Participation in Transportation Planning and Investment Decision* and Policy 23 *Agency and Public Coordination*.

Finding: The MAC has conducted an adequate public participation process for development and review of its Capital Improvement Program.

2. Project Funding

The 2013 projects are funded from a variety of sources including passenger facility charges (fees), federal grants, state grants, internally generated funds and bond proceeds (see Table 1). MAC has sufficient funds to implement the capital program, including revenues generated by a bond sale MAC conducted in 2010. Project funding is consistent with TPP Policy 26, *Adequate Aviation Resources*, which states public investments in air transportation facilities should respond to forecast needs and the region's ability to support the investment over time.

Finding: That adequate federal, state and local funding for the 2013-2019 CIP has been identified by the MAC, including approximately \$15 million from the 2010 bond issue.

3. Review and Comment on all 2013 projects:

The Council reviews and comments on the consistency of all CIP projects at the MAC airports with airport plans, with the Council's Metropolitan Development Guide and other regional systems, and with local plans. Table 4 lists all of the 2013 projects. Most of the projects proposed in the CIP are on-site and involve general maintenance, service upgrades, operational improvements, and efforts to meet environmental and safety requirements. Consideration of these elements is consistent with TPP Policy 19, *Aviation and the Region's Economy*, Policy 21, *Consistency with Federal and State Plans/Programs*, Policy 22, *Airport Development Plans*, and Policy 25, *Airports and Land Use Compatibility*.

Finding: All of the 2013 projects are in conformance with the TPP and consistent with Council policy.

4. 2013 Projects Requiring Council Approval:

Under MN statute 473.621, Subd. 6 and Subd. 7, the Council must review the capital improvement projects and make a determination if any project has a significant effect on the orderly and economic development of the metropolitan area. No such project may be commenced without the approval of the Metropolitan Council. The 2013 projects have been reviewed for consistency against the seven legislatively defined criteria (shown in Table 2 as review criteria A-H) and applicable TPP policies. Three 2013 projects, the Custom Border Patrol Primary Expansion, Checked Baggage Inspection System, RAC Ready Return Expansion, were identified as requiring Council approval due to their cost exceeding the \$5 million threshold and their potential of accommodating increased passenger handling. The following four projects which also require approval are currently in the 2014 CIP but will move into year 2013 if the MAC receives timely FAA environmental approval (FONSI) on the MSP 2020 EA. In addition Table 3 identifies potential projects in 2014-2019 which may meet the financial and significant effects criteria in the future.

Finding: Review of the CIP identified seven projects requiring approval for 2013: Custom Border Patrol Primary Expansion (CBP), Checked Baggage Inspection System (CBIS), T2 North Expansion Apron, I-494/34th St. Interchange – DDI, RAC QTA, RAC Customer Service Building and RAC Ready Return Expansion.
