Proposed Action

That the Metropolitan Council adopt Resolution 27 authorizing the acquisition and condemnation of permanent and temporary easements for Emergency Relief Structure 04 & 1MN344 Tunnel Rehabilitation, MCES Project No. 807629.

Background

The Minneapolis emergency relief structure and interceptor 1-MN-344 tunnel project will rehabilitate approximately 1000 linear feet of interceptor and associated structures that are over 60-foot deep as well as cleaning 2000 linear feet of interceptor.

The Metropolitan Council staff have been working with the Minneapolis Park and Recreation Board to acquire permanent easements through park property for existing interceptors through Minnehaha Park. Staff are also establishing temporary easements within the park to rehabilitate and convert the Regulator R04 into an Emergency Relief Structure and to slip-line the existing tunnel 1-MN-344.

The Metropolitan Council will also need a temporary easement from one property owner for temporary conveyance of wastewater around the facilities being rehabilitated. The privately-owned business located on this property is currently closed. The property is adjacent to the 50th Street light rail station of the Blue Line Light Rail. Numerous attempts have been made to contact the property owner, all of which have been unsuccessful.

Rationale

Land acquisition is necessary for implementation of this project. This action delegates authority to staff to acquire property for the project and to use the condemnation process if necessary to ensure timely project delivery.

Thrive Lens Analysis

This action advances the Thrive Outcome of Stewardship. Public financial resources will be invested efficiently and effectively to maintain and restore existing wastewater infrastructure, which protects the region's natural resources.

Funding

Funding for this project is included in the 2019 Capital Program.
