It was moved by Lilligren and seconded by Barber, Consent to Council

Management Committee

Meeting date: October 23, 2019

For the Metropolitan Council meeting of November 13, 2019

Subject: Annual Sole Source Hardware/Software Maintenance Services

District(s), Member(s): All

Policy/Legal Reference: Council Policy 3-3 Expenditures – Procurement of Goods and Services over \$500,000.

Staff Prepared/Presented: Theresa Nistler, Assistant Director, 602-1504; Jody Jacoby, Procurement Department, 651-602-1144

Division/Department: RA - Information Services

Proposed Action

That the Metropolitan Council authorize the Regional Administrator to make ongoing maintenance, hosted services and support service payments as Sole Source purchase orders in an amount not to exceed \$7,382,603. This includes installed software and hardware as listed on the attached 2020 Information Services Sole Source Vendor list.

Background

Computer hardware and software purchased by the Council require ongoing maintenance, hosted services and support. Competitive procurements for the hardware and software have already been completed; this item addresses ongoing maintenance and support services resulting from these competitive procurements.

Council Procurement Procedure 10.4.1 addresses Sole Source procurements and provides the following guidance: “Sole source procurement of Original Equipment Manufacturer (OEM) repairs, parts, equipment and systems, software maintenance and support, or other services that are required on a continuous basis may be authorized on an ongoing basis.”

The 2020 Information Services Sole Source Vendor list was thoroughly reviewed by the Procurement staff for accuracy and reasonableness.

Rationale

It is Council practice to annually update the list of vendors and request approval to authorize the vendor payments throughout the subsequent year. This allows for ongoing authorization, transparency, and efficient administration.

Thrive Lens Analysis

Maintenance services for software and hardware are needed to address the reliability, resilience, security and cost-effectiveness of the Council’s technology systems which support the Thrive outcomes of stewardship and sustainability. By integrating maintenance across the Council, we are able to efficiently track efforts, which supports the Thrive accountability principle.

Funding

Funding for these software and hardware services is included in the Council’s operating budget.

Known Support / Opposition

Authorization for IS Sole Source purchases has been requested and approved annually. This request provides for the authorization of an updated list of Information Services Sole Source vendors for 2020.
