# METROPOLITAN COUNCIL'S AUTHORITY AND MISSION

For more than 50 years, the Metropolitan Council has helped coordinate regional growth and planning in the Twin Cities metropolitan area. We provide essential services such as transit and wastewater treatment and convene partners to accomplish ambitious goals that may be unrealistic for a single community but possible as a region.

In 1967, the Minnesota Legislature charged the Met Council with fostering efficient and economic growth for a prosperous region and coordinating the delivery of services that couldn't be provided by any one city or county. Between 1967 and 1974, additional legislation created the Metropolitan Transit Commission (now Metro Transit), a regional sewer system, a unique tax-base sharing system, the regional park system, and the Metropolitan Housing and Redevelopment Authority (Metro HRA).

Our governing body has 17 members who are appointed by and serve at the pleasure of the governor. Sixteen members represent geographic districts of roughly equal population across the region. The Metropolitan Council chair, the 17th member, serves at large.

The state's Legislative Commission on Metropolitan Government reviews and provides feedback on the Met Council's operating and capital budgets, including the capital program.

Today, the Twin Cities metropolitan area is a region of more than 3.16 million people (2020 Census) living in 180 communities across the seven counties of Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington. The Met Council carries out its mission of fostering a prosperous region in partnership with these communities.

The region has emerged as a world-class metropolitan area – a great place to live, work, and do business. The metro area is home to 16 Fortune 500 companies and several of the largest private companies in United States. More than 60% of the population lives within 30 minutes of their job.

# STRATEGIC VISION

Under state law, we prepare a long-range plan for the Twin Cities region every 10 years. *Thrive MSP 2040* is the region's 30-year vision and plan. It sets the policy foundation for regional systems and policy plans the Met Council is responsible for developing.

### **COVID-19 PANDEMIC**

The 2022 budget will reflect the significant impacts of the COVID-19 pandemic, including the material impact and uncertainty of revenues and expenditures and assumptions built into the projections within the budget.

### 2040 PROJECTIONS

The Twin Cities region is changing. Met Council forecasts show that compared to 2010, the region will have nearly 900,000 additional residents by 2040 and 500,000 more jobs. Our population is also aging and growing more diverse. More than one in five residents will be age 65 and older in 2040, compared with one in nine in 2010. By 2040, 40% of the population will be people of color, compared with 24% in 2010.

To address the changing needs of our communities, our regional development framework, *Thrive MSP 2040*, identifies five key outcomes to guide the vision for the region.

#### STEWARDSHIP

Responsibly managing the region's finite resources, including natural and financial resources, and its existing investments in infrastructure.

#### PROSPERITY

Investing in infrastructure and amenities that create regional economic competitiveness.

### EQUITY

Connecting all residents to opportunity and creating viable housing, transportation, and recreation options for all races, ethnicities, incomes, and abilities. The 2022 Unified Budget sets aside \$3.2 million to invest in the Council's Thrive initiatives. Additional funding for equity related work is embedded throughout division budgets.

#### LIVABILITY

Focusing on enhancing the quality of residents' lives and experiences in the region.

#### SUSTAINABILITY

Protecting our regional vitality for generations to come.

### PRINCIPLES FOR REGIONAL PLANNING

*Thrive MSP 2040* also identifies three principles to guide how the Met Council implements its policies:

- Integration: Leveraging multiple policy tools cooperatively to address complex regional challenges.
- Collaboration: Combining efforts of multiple actors to effectively achieve shared outcomes.
- Accountability: Evaluating the effectiveness of our policies and programs and being willing to adjust course.

These five outcomes and three principles guide our 2022 Unified Operating Budget and Property Tax Levy.

# SERVICES WE PROVIDE

Our planning and services provide a foundation for regional economic vitality.

- We operate Metro Transit, light rail, commuter rail, Metro Mobility, and contracted transit services, which provided nearly 38.4 million rides in 2020, significantly down from 2019 levels of 82.5 million due to the pandemic. This is more than 94% of the total regional ridership of 41 million rides.
- Our transportation planners collaborate with local communities to create our vision for roads and transit to ensure effective and cost-efficient transportation investments.
- Our strategic investments in a growing network of bus and rail transitways increase transportation choices for Twin Cities residents. They encourage transit-oriented development that creates residential and business opportunities.
- Transit infrastructure and services create access to jobs, education, housing, and businesses, via regular-route bus, light rail, and bus rapid transit.
- Our additions and improvements to transit shelters, facilities, and transit information enhances accessibility, safety, and comfort for transit customers.
- We collect and treat wastewater for 90% of the region's population at rates 40% lower than peer regions and earn state and national awards for environmental achievements.
- We partner with 10 regional parks implementing agencies to plan, acquire land, and develop facilities for regional parks and trails that draw more than 63 million visitors annually, preserving natural resources, and providing recreational opportunities.

### SUSTAINING OUR REGIONAL RESOURCES

Clean water and a clean environment are essential for a healthy region, and the Met Council is committed to both.

The Met Council, in partnership with researchers at Princeton, the University of Texas, and the University of Minnesota – will finalize the regional greenhouse gas inventory and release a scenario planning tool. This tool will enable all communities in the Twin Cities region to measure their greenhouse gas emissions across multiple sectors and identify the effects of a variety of greenhouse gas mitigation strategies.

Metro Climate Stats will provide high-quality data and analytics to help in mitigating climate change. This information can inform and support local and regional planning efforts. The study is a unique and innovative approach to providing technical assistance to communities by a metropolitan agency.

The Met Council is nationally renowned for its superior work treating wastewater, monitoring water quality, and partnering in the region to ensure a long-range water supply to meet future demand.

We are dedicated to fostering economic development, protecting the environment, and protecting public health.

In 2022, Environmental Services plans to undertake \$227 million in capital investment to preserve existing wastewater treatment and collection facilities, improve efficiency, and provide needed capacity for growth.

In addition to projects at our facilities, we've worked with communities and awarded grants for projects providing benefits for storm water management, water supply, and stormwater reuse projects. And we continue to engage local communities to build a collaborative regional Water Supply Plan.

#### PROMOTING COLLABORATION AND EQUITY

The 2022 Unified Budget sets aside \$3.2 million for investing in the Council's Thrive initiatives.

The Met Council's regional parks bonds provides financial support to regional park implementing agencies, which undertake capital projects that strengthen equitable use of regional parks and trails by all our region's residents – across age, race, ethnicity, income, national origin, and ability.

The Metro Transit Police Homeless Action Team provides their expertise to meet the difficult challenge of connecting people experiencing homelessness who are sheltering on transit with housing and support services.

The City of Edina and Met Council are collaborating to identify and purchase homes for the Met Council's Family Affordable Housing Program. Homes will be leased to eligible families with low incomes. The City of Edina has committed \$2 million for this initiative.

Our Housing Choice Voucher program provides stable, safe, and affordable housing opportunities all, across the region, allowing residents more choice in where they live.

Our Underutilized Business program is expanding to create a sheltered-market program, increase the pool of eligible firms, and increase access to resources to expand business opportunities with the Met Council for firms owned by women, people of color and indigenous people, and people living with disabilities. We continue to advance the outcomes of Thrive MSP 2040 with our 2022 budget. Every Met Council division uses a "lens" based on Thrive MSP 2040 to assess existing services and to determine what new services and capital investments the region may need.

# **ORGANIZATION OVERVIEW**

The Metropolitan Council organization consists of three operating divisions and supporting central administrative units within Regional Administration. The operating divisions report to the Regional Administrator, who reports to the 17-member Metropolitan Council. The Regional Administrator is responsible for ensuring priorities and policy decisions of the Met Council are carried out.

Each year the Met Council prepares a Unified Budget that includes an operating budget and capital budget. The operating budget shows expenditures to support the Met Council's operations, such as employee salaries, debt service (payments on borrowed money), and funds that the Met Council "passes through" to others in the form of grants and loans.

The capital budget shows expenditures that involve major capital assets, such as building light-rail transitways, improvements to wastewater treatment plants, and funds to purchase land and make improvements for regional parks.

Both budgets indicate the funding sources to pay for the expenses, and together, they make up the Metropolitan Council's 2022 Unified Budget. The Met Council's 2022 Unified Budget fulfills the Council's commitment to good stewardship of public resources.

#### **REGIONAL ADMINISTRATION**

Regional Administration includes Met Council leadership and centralized administrative services that support the operating divisions. These include Information Services, Human Resources, General Counsel, Government Affairs, Communications, Risk Management, Program Evaluation and Audit, Procurement, Office of Equal Opportunity, Community Relations, Real Estate, and Finance and Budget. Most of the Regional Administration budget is allocated to the operating divisions.

#### **ENVIRONMENTAL SERVICES**

The Met Council's Environmental Services Division provides high-quality, cost-efficient service that fosters economic development and protects public health and the environment. Our wastewater treatment services consistently receive near-perfect compliance with federal and state water standards, while holding rates well below the national average for similar-sized systems.

The capital program for Environmental Services includes funding to preserve wastewater facilities by rehabilitating or replacing existing treatment plant and sewer facilities and equipment. A majority of the capital program is focused on preservation activities.

#### **TRANSPORTATION**

Transportation planning and regional transit play an essential role in the regional economy. Transit provides a sustainable, efficient, and effective option to mitigate increasing roadway congestion, improve air quality, and provide mobility options for those who can't or choose not to drive.

The Met Council's 2022 budget for the Transportation Division programs bus service levels at 95%, Light Rail and Metro Mobility at 100%, and Northstar Commuter Rail at 55% of pre-pandemic levels (four trips daily and no weekend service). The 2022 budget maintains social distancing, continues maintenance and cleaning of vehicles, stations and facilities, and meets demands for Metro Mobility service. The 8.5-mile METRO C Line began service in June 2019 with the region's first electric buses, providing faster and more frequent service between Brooklyn Center and downtown Minneapolis. The 17mile METRO Orange Line is planned to begin service in December 2021 between Minneapolis and Burnsville.

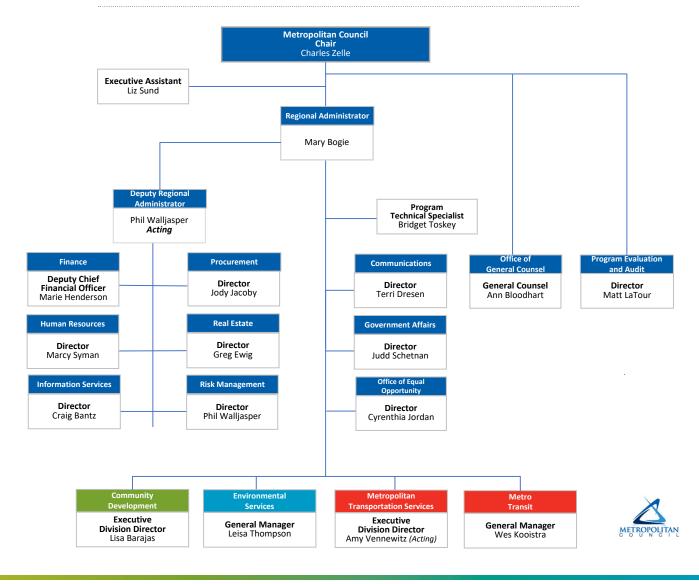

Capital investments include the preservation of the region's vehicle fleet, customer facilities, support facilities, technological improvements, and rail projects. The capital plan also supports transitway development through completion of the METRO Green Line Extension light rail (Southwest Corridor) and future bus rapid transit lines.

### COMMUNITY DEVELOPMENT

The Community Development Division leads the regional planning process to develop the region's 30-year plan. The Community Development operating budget also includes funding for the following programs:

- The Local Planning Assistance unit leads the review and authorization of community comprehensive plans for impacts on the region's transportation, sewer and parks systems, as well as consistency with Met Council policies.
- The Metro HRA serves over 7,200 low-and moderateincome households monthly through rental assistance and provides other housing services to additional clients.
- The Livable Communities program provides funding for communities to invest in local economic revitalization, affordable housing initiatives, and development or redevelopment that creates interconnected, walkable communities.

- The Regional Parks unit plans for and supports a regional system of parks and trails through grants to 10 regional park implementing agencies. Grants support the acquisition of land, park improvements, and rehabilitation. The Met Council also passes through state funds to the regional park implementing agencies to support operations and maintenance of the regional parks system.
- The Research unit collects data and analyzes trends in regional demographics, building and development patterns, the economy and workforce, climate change, housing, income and poverty, land use, parks, and regional disparities. The team is also responsible for developing long-range regional and local forecasts of population and employment.

# **METROPOLITAN COUNCIL ORGANIZATION** - How the Metropolitan Council is organized

# **BUDGET PROCESS**

### **DEVELOPING AND REVIEWING**

The 2022 budget will continue to reflect the tremendous impact of the COVID-19 pandemic, including the significant impact on revenues and expenditures and assumptions built into the projections within the budget.

#### January - June

The Regional Administrator has responsibility to prepare and submit an annual budget that reflects policy guidance from the Met Council.

#### July - August

The Met Council's standing committees review and refine the divisions' budget proposals, priorities, and funding options. Refined division budget proposals are presented to the full Met Councilin August.

The Met Council must adopt a preliminary operating budget and property tax levy by September 1 each year.

#### August - November

The Met Council's standing committees also review proposed changes to the capital program. The capital program includes active and authorized projects, as well as a six-year plan for future capital investment.

The Met Council approves the Unified Budget draft for public comment in late October. The public comment budget captures what we know now and areas where changes may have an impact on the final budget. In 2022, we anticipate changes between the public comment budget proposed in October and the final budget adopted in December, as we continue to respond to the changing circumstances created by the pandemic.

Metro area counties mail "Truth in Taxation" notices to property owners showing the proposed amount of property tax they will be required to pay during the coming year from all taxing jurisdictions. These notices also indicate the date when the Met Council will hold its public meeting to consider and adopt its final budget and levies.

### **RECEIVING PUBLIC COMMENT**

#### **November - December**

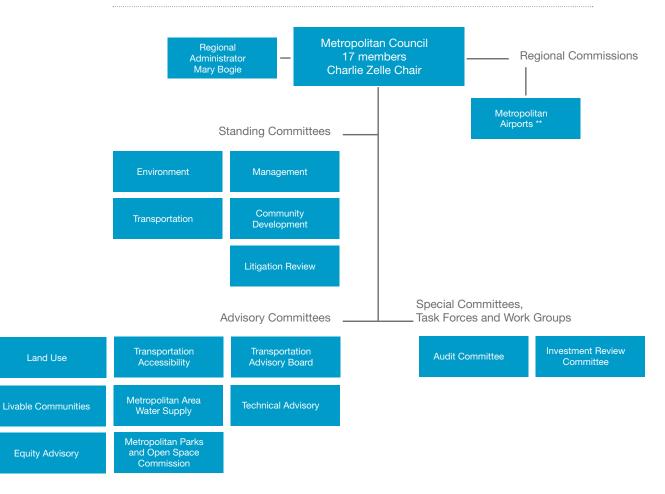

The Met Council receives public comments on its proposed budget until final adoption in December.

### ADOPTING THE BUDGET

At its meeting on December 8, 2021, the Met Council will adopt a final budget that reflects any changes made to the draft budget for public comment. The property tax levy adopted with the preliminary operating budget in August has not changed.

### HOW TO COMMENT ON THE BUDGET

- Write to Metropolitan Council Public Information at 390 Robert St. N., Saint Paul, Minnesota 55101.
- Email Metropolitan Council Public Information at public.info@metc.state.mn.us.
- Record a comment on the Public Comment Line at 651.602.1500 (TTY 651.291.0904).

# Policymaking Structure - Metropolitan Council Policymaking Structure

\*\* The Metropolitan Council reviews the capital budget and approves certain projects.

October 2021

# 2022 OPERATING BUDGET

The Metropolitan Council budget for operations, pass-through programs, and debt service (loan repayments) is \$1.235 billion.

#### HOW THE MET COUNCIL IS FUNDED (SEE CHART 1 & 2)

#### **CHARGES FOR SERVICES**

More than one-third of our funding comes from services that customers pay for. Our primary "paying" customers are transit riders and local municipalities served by Met Council wastewater services.

#### **Transit Fares**

COVID-19 has had a striking impact on ridership and fare revenue. Met Council ridership is projected to be more than 42 million rides, down from pre-pandemic ridership of 82.5 million. Ridership on most of our services is forecast to remain lower due to the pandemic. Ridership on express and local bus, light rail, and dial-a-ride is projected at 55% of pre-pandemic levels. However, ridership is forecasted to return to pre-pandemic levels on Metro Mobility. Federal relief funds will replace lost transit fare revenues in the 2022 budget.

#### **Wastewater Charges**

The 2022 budget includes an adopted increase in the wastewater charge of 4.0%. With this increase, the the average metro household will pay approximately \$29 retail sewer charges. Approximately 55% of that payment is charged by the local municipality. For the ninth year in a row, the one-time sewer availability charge imposed on development remains \$2,485 per residential equivalent unit.

On a typical day, Environmental Services collects and treats an average of 250 million gallons of wastewater from more than 2 million residents in 111 communities across the region.

#### STATE REVENUES

The Met Council receives revenue from the State of Minnesota, primarily from motor vehicle sales.

Thirty-six percent of state Motor Vehicle Sales Tax (MVST) revenues are constitutionally dedicated to metropolitan area transit. The budget includes pass-through funds of \$45 million in MVST revenues to Suburban Transit Providers.

#### FEDERAL REVENUES

The 2022 operating budget includes \$196 million in federal revenue. Federal revenues budgeted in the Metro HRA are \$84 million. A total of \$78 million is passed through as rental assistance payments directly to landlords. Transportation receives \$33 million to support operations

and \$76 million in federal pandemic relief funds and \$2.7 million in passthrough for Suburban Transit Providers.

#### **PROPERTY TAXES**

Revenue from metro area property taxes is split among several different governmental entities. Counties, cities, and school receive the largest share. The Met Council typically receives about 1.4% of the revenue from property taxes paid by metro area residents.

#### Where your property tax dollar goes

#### **PROPERTY TAX LEVY**

Property taxes are primarily used to pay debt service on bonds issued to support the transit and parks capital programs and to provide pass-through grants to local communities under the Livable Communities Act.

#### LEVY

The payable 2022 levy represents a 2% increase over the amount payable in 2021. Under the levy, a metro area home with an estimated value of \$250,000 will pay a Met Council-related property tax of approximately \$47.89 within the transit taxing communities and \$17.12 outside the transit taxing communities. (SEE CHART 3)

The Met Council's statutory limit for general purposes and other non-debt service levies is \$39.1 million for taxes payable in 2022, compared to the levy of \$34.6 million (about 11% below the levy cap).

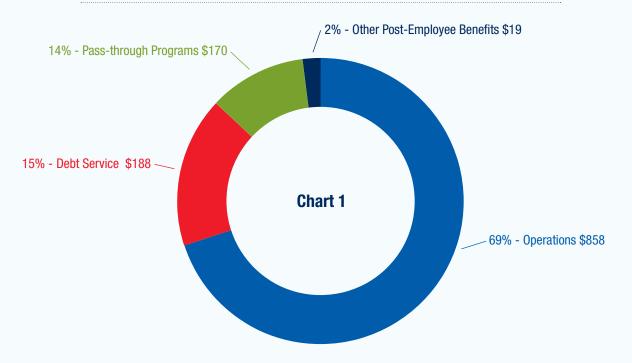

Levies for debt service are not directly limited, but the levies for parks and transit are, in effect, restricted to the Met Council's bonding authority (the dollar amount of bonds we can issue) as defined in statute.

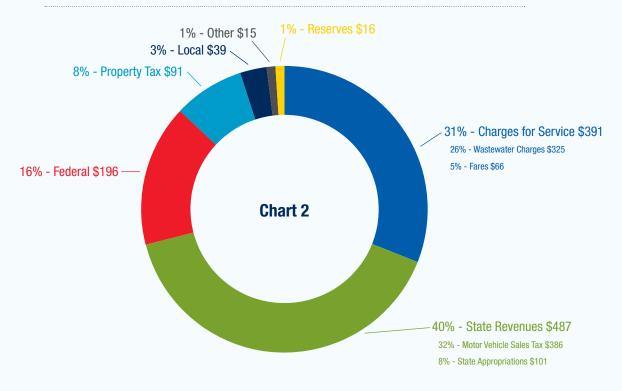

#### DEBT SERVICE AND BONDS

Nearly 62% of the revenue from the Met Council's total property tax levy is dedicated to paying debt service on bonds the Met Council issued to support preserving and investing in capital assets for transit and parks.

# 2022 NUMBERS

**2022 Metropolitan Council Operating Budget –** by function: \$1.235 Billion

# **2022 Metropolitan Council Operating Budget –** by sources of funds: \$1.235 Billion

The Met Council's total general obligation debt outstanding as of December 31, 2020, was \$1.69 billion. General obligation debt is backed by the full faith and taxing authority of the Metropolitan Council. Approximately 78% of this debt is for wastewater assets and is paid for by fees collected from wastewater services.

Our bonds receive the highest possible ratings from Moody's and Standard and Poor's credit ratings agencies. The Met Council's top ratings reflect the sound financial management of the Met Council and allow us to borrow money at the lowest market interest rates.

#### LIVABLE COMMUNITIES FUND

This fund consists of three active accounts: The Livable Communities Demonstration Account (LCDA), the Tax Base Revitalization Account (TBRA), and the Local Housing Incentives Account (LHIA). Together, they support community investments that revitalize economies, create affordable housing, and connect land uses and transportation. State statutes authorize property tax levies to fund the LCDA and TBRA. Statutes also direct \$1 million from the general purpose levy and \$500,000 from the LCDA levy be transferred to the LHIA.

#### **RIGHT OF WAY ACQUISITION LOAN FUND**

The levy does not include an amount for the Right-of-Way Acquisition Loan Fund (RALF), which has sufficient funds available to meet program needs for 2022. The RALF program provides zero-interest loans to local governments to acquire right-of-way along highway corridors. In 2016 the Met Council modified its loan policy to include properties that may be considered on a case-by-case basis, in addition to requests for right-of-way threatened by development or to hardship acquisitions of homestead properties.

### SPENDING BY DIVISION

#### MET COUNCIL FUND ACCOUNTING

Revenue collected by the Met Council is directed into separate funds. These funds allow the Met Council to manage spending by directing the revenue to accounts dedicated to related activities or objectives to a group of related accounts.

By maintaining separate funds, the Met Council is able to comply with laws that require funds to be spent for a specific purpose. For example, the Met Council may not raise transit fares to pay for wastewater services.

About 98% of the Met Council's revenue and other funding sources is dedicated for a specific use and is directed to a corresponding fund.

The General Fund is used for administration functions of the Met Council's Regional Administration and Community Development divisions. The Met Council has the most discretion in the use of General Fund dollars. The General Fund comprises about 7% of the Met Council budget and is primarily funded by the general purpose property tax levy and interdivisional allocations. (SEE CHART 4)

#### STEWARDSHIP AND ACCOUNTABILITY

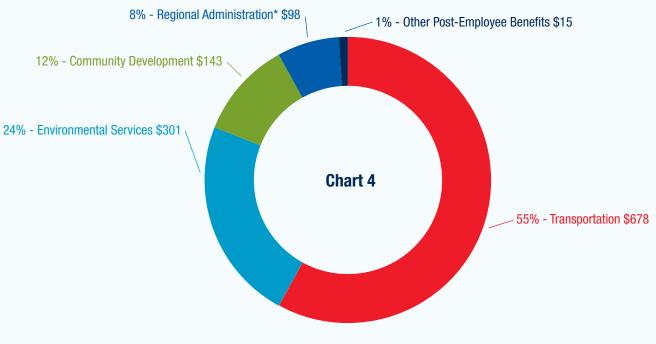

**Other Post-Employment Benefits.** OPEB is a health care plan for eligible retirees and their dependents. This is a closed plan. The Met Council has set aside enough money to pay all future benefits.

**Self Insurance.** To help control rising medical and dental premiums, the Met Council self-insures its plans for employees and retirees.

For additional information about OPEB and Self Insurance, see Appendix F.

# 2022 NUMBERS

\* Regional Administration budget is \$86.8 million prior to interdivisional allocation

# OPERATING BUDGET TABLES

#### TABLE 1

Unified Operating Budget: Provides a comparison of revenues, expenses and other sources and uses from 2020, 2021, and 2022.

#### TABLE 2

Summary Budget: Operations, Pass-Through, Debt Service and OPEB – Expands the budget into the four categories that make up the Unified Operating Budget.

#### TABLE 3

Summary Budget: Operations by Fund – Expands the Council Operations Column from Table 2 into fund groups.

#### TABLE 4

Summary Budget: Pass-Through Grants and Loans – Expands the Pass-Through Grants and Loans Column from Table 2 into the individual programs.

#### TABLE 5

Summary Budget: Debt Service – Expands the Debt Service Column from Table 2 into the three divisions.

# A growing region in the next 18 years

# 2022 CAPITAL PROGRAM

The Capital Program is a multi-year plan for the preservation, expansion, and improvement of the regional transit, wastewater, and Community Development. The Met Council adopts a program-level budget for each division (Tables 9, 10 and 11).

Projects are grouped into "programs" based on their similarities (for example, bus replacement, wastewater treatment facility, or Community Development implementing agency). Individual projects within a program can be found in Appendices G-1, G-2, and G-3. Projects carry forward from year to year and are added, removed and changed through the Met Council's amendment process.

Transportation (transitways and other transit) is the largest portion of the capital program. Authorized and planned projects totals \$6.9 billion of the capital program. Appendix I includes important Transit Projects that are not included in the 2022-2027 Capital Improvement Program but are identified if future funding becomes available.

Preserving regional capital investments is the highest priority of the capital program. Excluding transitway projects, preserving assets makes up over 71% of

the capital program. Expansion projects include land acquisition, increased capacity in wastewater collection and treatment, and new transit service. Improvement projects include improving water quality or increasing energy efficiency at wastewater treatment plants. (SEE CHART 6)

The 2022 Capital Program totals \$9.00 billion and includes authorized (active) and planned (future) projects. (SEE CHART 5)

# THREE COMPONENTS OF THE CAPITAL PROGRAM

#### AUTHORIZED CAPITAL PROGRAM (ACP)

The ACP provides multi-year authorization to spend on project costs where funding has been secured and the Met Council has given final approval to proceed. It is the total amount of all past and present approvals from the Met Council for all active projects and phases of projects. The ACP total will change during 2022 as capital projects are completed and removed from the ACP and as capital projects in the Capital Improvement Plan (CIP) secure funding and are moved into the ACP. (SEE CHART 7 & 8)

Because capital projects remain in the program until completed and closed, the ACP does not cover a particular period of time.

#### **CAPITAL BUDGET**

The Capital Budget represents the amount from the ACP that is expected to be spent in 2022. As capital projects in the Capital Improvement Plan (CIP) secure funding and receive final approval from the Met Council, the Capital Budget will be amended throughout the year. (SEE CHART 9)

#### CAPITAL IMPROVEMENT PLAN (CIP)

The CIP is a six-year capital investment plan. Projects in the CIP have funding sources identified but not yet secured and the Met Council has not given final approval. Amounts shown in the capital tables beginning on page 28 represent the year it is anticipated that the Met Council will be asked to move the project to the ACP. (SEE CHART 10)

### HOW THE CAPITAL PROGRAM IS FUNDED

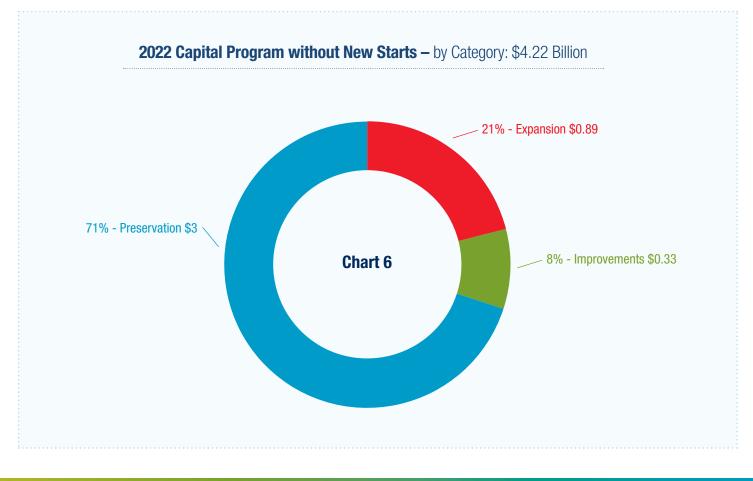

Financing for the Capital Program comes from federal, state, and local capital grants; regional borrowing; and other sources.

Each division has its own funding sources (see Table 8), which may not be intermingled.

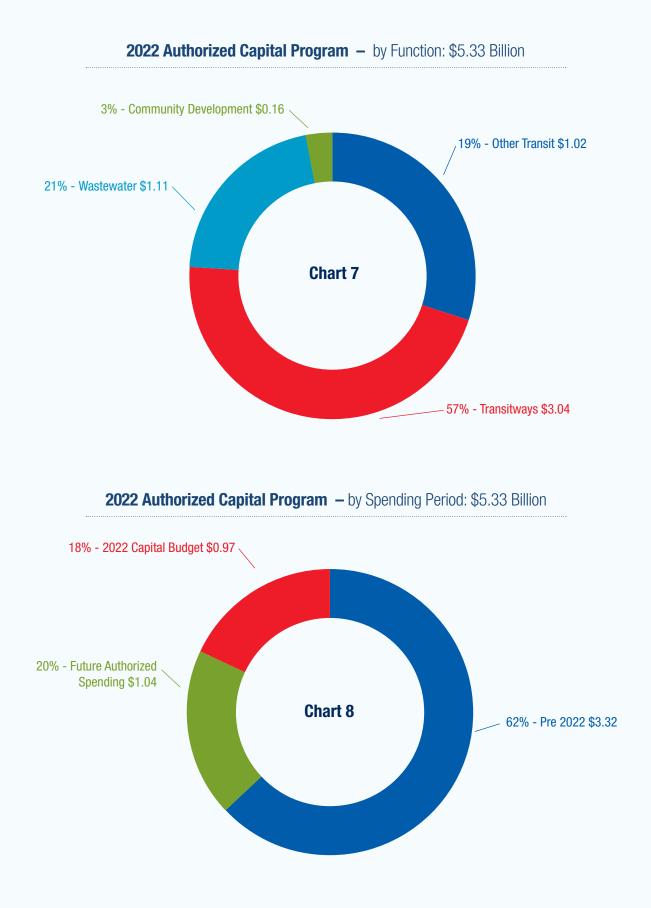

The Community Development capital program includes significant state funding and approximately 15% from regional borrowing.

The Transportation Division capital program has a mix of funding sources, including significant grants from federal, state, local authorities, and counties with approximately 10% funded through regional borrowing.

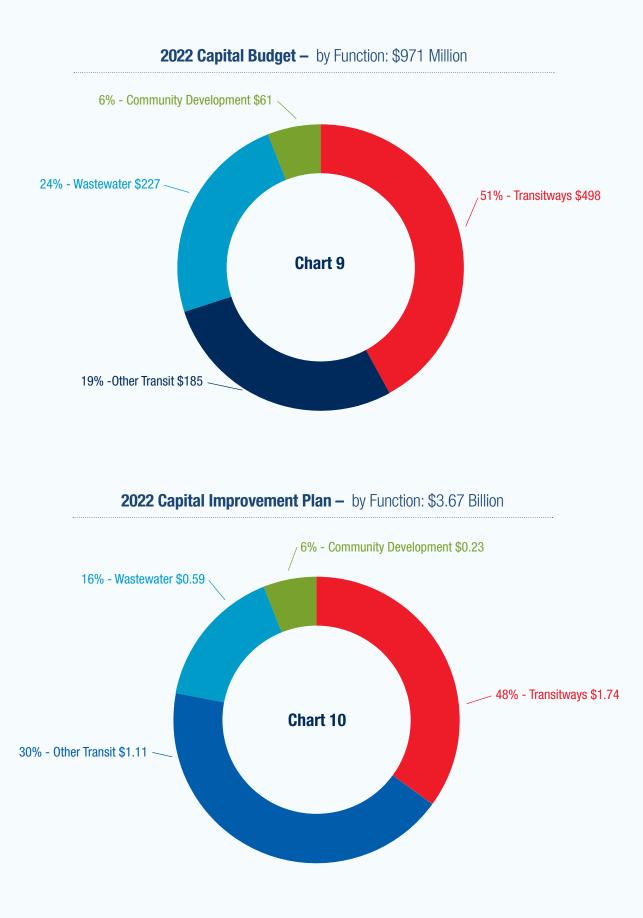

The Environmental Services Division capital program is financed almost entirely (89%) through regional borrowing. More information on regional borrowing can be found in the "Fiscal Impacts" section. (SEE CHART 11)

## FISCAL IMPACTS

This section provides a look at how the Met Council impacts the residents of the region through fees for services and property tax levies.

#### FEES AND FARES FOR SERVICES

The Met Council's Operating Budget includes \$391 million in fees charged directly to those using our services.

#### WASTEWATER FEES

The Environmental Services Division collects \$265 million in municipal and industry-specific wastewater charges paid by the homes and businesses that are connected to the regional sewer system. These revenues are used for operations, debt service, and capital project costs.

In addition, the Environmental Services budget includes the use of \$60 million of sewer availability charges (SAC) that was collected from developers when they applied for building permits for new or expanded capacity projects. SAC may only be used to pay for debt service and its own administrative costs.

#### TRANSPORTATION FARES

Passenger fares, contracts, and special-event revenues, paid by transit riders, provide \$66 million to the Transportation Division's operating budget. There are several fare programs and discounts available based on individual circumstances. Fares were increased by the Met Council on October 1, 2017. Standard fares for adults are shown in the following table.

#### **Transportation Fares**

	Non-Rush	Rush Hour					
Bus & Light Rail	2.00	2.50					
Express Bus	2.50	3.25					
Downtown Zone	0.50	0.50					
Metro Mobility	3.50	4.50					
NorthStar fares are \$3.25-6.25 based on distance							

Downtown Zone fares are for short rides that begin and end in either the Minneapolis or Saint Paul zones. Additional information about transit fares can be found at https://www.metrotransit.org/fares

#### **PROPERTY TAX LEVIES**

The Met Council's Operating Budget includes \$90.5 million in regional property tax levies, a 2% increase from 2021. An explanation of the individual levies that make up the \$90.5 million can be found in the "2022 Operating Budget" section. (SEE CHART 12)

For 2022, the general purpose, Livable Communities Demonstration Account and parks debt service levies total \$33.1 million. Each piece of property in the metropolitan area pays a part of the levy based on how much the property is worth. The metropolitan area is defined in state law as the seven metro counties except for the cities of Northfield, Cannon Falls, Hanover, Rockford, and New Prague. (Minnesota Statutes, Section 473.121).

The \$52.4 million transit debt service levy is paid by a slightly smaller area called the Transit Taxing Communities. It includes all of the cities in the Transit Taxing District as defined in state law, plus any cities that voluntarily join. (Minn. Stat., Sec. 473.446). To date, the cities of Columbus, Forest Lake, Lakeville, Maple Plain and Ramsey have joined.

The remaining levy – Tax Base Revitalization-Fiscal Disparities – is \$5 million, received from the Fiscal Disparities Program. The Fiscal Disparities Program is a tax-base sharing program within the metropolitan area and is funded by commercial and industrial property.

#### IMPACT PER HOUSEHOLD

The estimated total cost of Metropolitan Council services for a homeowner who owns a \$250,000 home in a city within the metropolitan area and Transit Taxing District is \$261.92 for 2022. This represents a 1.5% increase from 2021.

#### Cost Impact per Household, 2021 and 2022

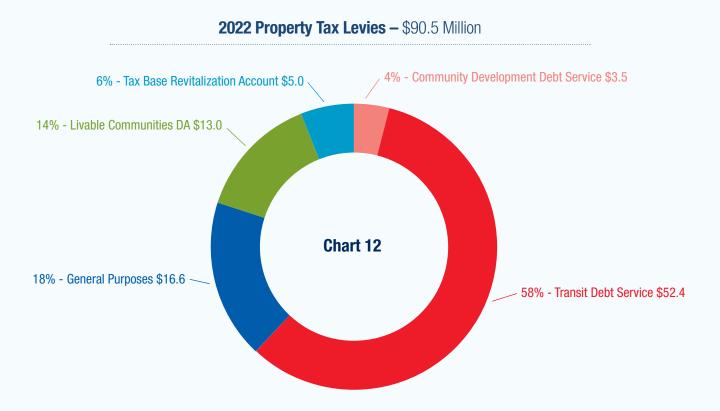

#### **REGIONAL BORROWING**

Regional borrowing includes the issuance of long-term general obligation bonds and loans from the state Public Facilities Authority (PFA). This long- term debt becomes an obligation of the Met Council and is repaid in the operating budget (Table 1) through wastewater charges and property tax levies.

#### WASTEWATER

The Environmental Services capital program is financed almost entirely through regional borrowing. The Met Council has the authority to issue wastewater debt as

necessary to support the capital program. It issues general obligation revenue bonds and utilizes general obligation-backed revenue loans from the state PFA.

PFA loans are secured to the maximum extent possible to take advantage of the below-market interest rates of the PFA program.

#### TRANSIT

Bonds issued for the transportation capital program leverage other funding sources by providing required matching funds. Transit bonding authority must be requested from the Legislature and lapses when the bonds are issued. Transit has also utilized loans from the state PFA when available. Transit debt is repaid with the transit debt service levy.

#### COMMUNITY DEVELOPMENT

Bonds are issued for parks as a match for state funding and to acquire land for the regional park system. Bonding authority for parks is revolving, with no more than \$40 million outstanding at any time, and can be reused as existing bonds are retired. This debt is repaid with the park's debt service levy.

### Current and Available Debt Authority for Community Development, Transit, and Wastewater Services

	Current Authority	Available 12/31/21
Parks	40.0 M	33.9 M
Transit	212.2 M	212.2 M
Wastewater	Unlimited	Unlimited

#### **FUTURE BORROWING**

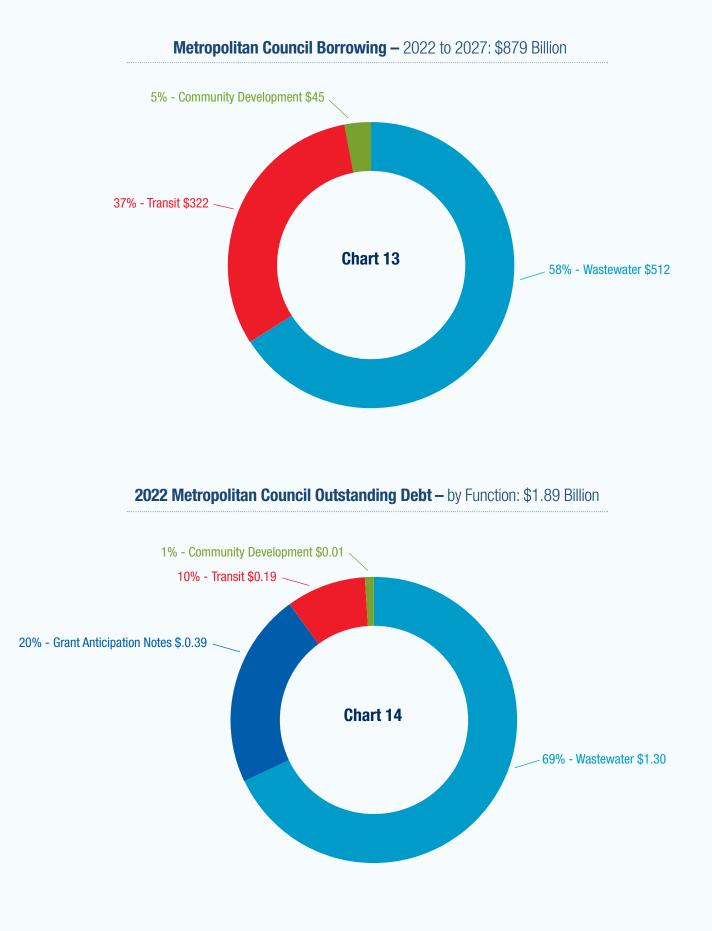

The Met Council anticipates borrowing \$879 million over the next six years to fund the projects that are anticipated to be authorized in the capital improvement plan. (SEE CHART 13)

#### **OUTSTANDING DEBT**

Outstanding debt for 2022 is projected to be approximately \$1.89 billion. (SEE CHART 14)

For additional information about OPEB and Self Insurance, see Appendix F.

## **APPENDIX**

# **REGIONAL ADMINISTRATION**

#### SERVICES

Regional Administration, which includes the offices of the Chair and Regional Administrator, provides leadership and support services for the entire Met Council. The division is divided into three service areas.

Administrative Services includes the Regional Administrator and Chair's offices and, to ensure objectivity, reports directly to the Met Council or Regional Administrator.

- The Office of General Counsel provides advice and preventative legal services to the organization to assist in compliance with all appropriate federal and state requirements.
- Governmental Affairs coordinates Met Council-related public policy issues with state and local government policymakers.
- The Office of Equal Opportunity is responsible for small-business development programs that include the Disadvantaged Business Enterprise, Women and Minority Business Enterprise, and Small Business in Rural Areas programs. This unit also administers the Met Council's Affirmative Action Plan and Equal Opportunity policies and programs, and it investigates discrimination complaints.

- Communications is responsible for Met Council-wide communications, including media relations, social media, internal communications, and communication strategy. The unit is also responsible for public engagement. The unit manages the public-facing website, and provides photography, writing, editing, design, and videography services to Met Council divisions.
- Evaluation and Audit conducts audits, program evaluations, and internal controls.

**Business Services** reports to the Deputy Regional Administrator to provide a consistent and integrated approach to shared services in a cost-effective manner.

- The Human Resources unit is responsible for collective bargaining, grievance and arbitration, recruitment and selection, compensation administration, and group benefit programs for the Met Council's employees and retirees. The unit also coordinates learning and organizational development activities and provides training and development services.
- Information Services provides the Met Council's core computer expertise and information management, including the organization's entire network of computer resources, Geographic Information System, and the Metro GIS consortium.

See Table A-1 for full breakdown of numbers on pages 45 and 46.

- Real Estate provides the services and expertise necessary to meet the Met Council's real estate needs involving development, acquisitions, dispositions, leases and licenses.
- Contracts and Procurement assists all divisions in procuring goods and services and performs and documents procurements in compliance with Met Council policies and procedures, as well as federal, state and local laws, and grant-funding requirements.
- Risk Management identifies, evaluates, and manages the Met Council's exposure to loss through risk-control and risk-financing methods.

**Financial Services** reports to the Deputy Chief Financial Officer and provides financial strategy and direction, stewardship, and accountability.

• Finance and Budget is responsible for payroll and budget functions, financial analysis, capital finance strategy, treasury, purchasing cards, cash and debt management, and accounts receivable/payable, and provides central services for the Robert Street and Jackson Street locations.

#### PRIORITIES, GOALS AND OBJECTIVES

Goals and objectives for Regional Administration include:

• Supporting the Met Council mission, priorities, and policies.

- Providing high-quality support services cost- effectively.
- Providing strong customer service to operating divisions.
- Providing strong financial management for the organization.
- Attracting and maintaining a skilled workforce.
- Providing technology that supports the Met Council's operations.

#### CHALLENGES AND OPPORTUNITIES

The 2022 Unified Budget provides significant additional investment in Information Services, Procurement, and Human Resources. These investments will help address much-needed support in business services, data security, procurement efforts on transit projects, and staff recruitment.

The Met Council's operating divisions increasingly rely on information technology to perform their functions efficiently, quickly, and accurately. The Information Services department works closely with the operating divisions to develop and carry out technology solutions to achieve that goal. The challenge is to maintain the Met Council's complex information systems and respond appropriately to new technology.

The Information Services Department has faced the major challenge of enabling some employees to work remotely during the COVID-19 pandemic, providing hundreds of units of hardware to support employees working remotely.

The challenge of the pandemic has included enabling and supporting Met Council executives and Met Council members as they have transitioned their public meetings from in-person to virtual meetings. We hope to transition back to in-person meetings in 2022.

The pandemic and subsequent stay-at-home order continues to have an outsized impact on compliance with the Minnesota Government Data Practices Act. In its state-mandated data-compliance role, the Met Council has experienced increased data requests related to the Met Council's pandemic response, as well as questions from employees regarding release of data in accordance with state data-practices guidelines.

The department has supported the shift of employee work toward telework after the start of the pandemic and assists with implementing procedures as employees return from telework. We have established procedures to track, test, and communicate the Council's vaccine policies to our employees as the Council navigates the lasting impact of the pandemic.

Attracting and retaining skilled employees are critical to providing efficient and cost-effective regional services. Like other organizations today, the Met Council has many employees approaching retirement age, and the Met Council needs to carry out strong recruiting and training programs to maintain its high-quality, diverse workforce. The pandemic has also caused the Met Council to look for ways to recruit talent and maintain training programs while following socially distancing guidelines.

The Finance department works with operating divisions to minimize property tax increases and maintain competitive user charges in Environmental Services and Transportation divisions. Finance and Budget operations strive to ensure the Met Council maintains its strong financial management, including adequate financial reserves and AAA bond rating, which enables capital financing at the lowest possible interest cost.

#### **OPERATIONS**

#### SOURCES OF FUNDS

The Met Council's operating divisions fund 99% of the Regional Administration budget by paying for the services they receive directly or benefit from. The divisions are billed each month and pay with the revenue sources of those divisions. The Met Council's general-purpose property tax levy, investment earnings, and other miscellaneous revenues fund the remainder of the Reginal Administration budget. (SEE CHART 15)

#### **USES OF FUNDS**

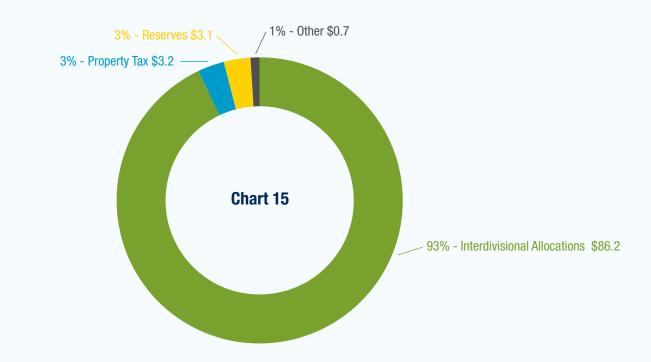

Approximately 89% of the Regional Administration budget is for salaries and benefits, and for consultant and contractual services.

Hardware and software maintenance and license fees budgeted in Information Services represent about 83% of contracted services and benefit the entire organization.

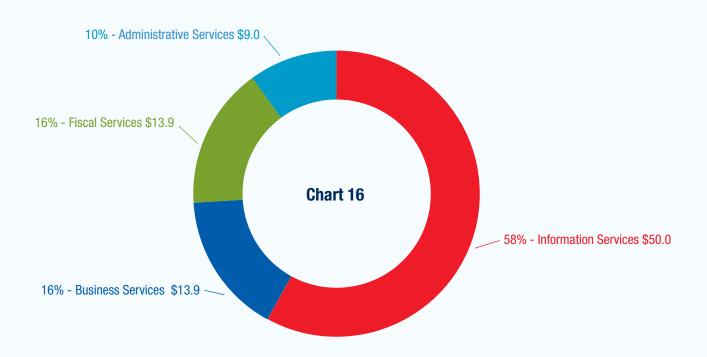

#### **STAFFING**

The 2022 budget for Regional Administration includes a total full-time equivalent of 369 Regional Administration staff to support the growing needs of the Met Council's divisions and meet the increasing compliance requirements and expanding transparency through technology.

2022 Regional Administration Division Operating Budget - Sources of Funds: \$93.2 Million

2022 Regional Administration Division Operating Budget - Uses by Category: \$86.8 Million

# **ENVIRONMENTAL SERVICES**

#### SERVICES

Environmental Services treats approximately 250 million gallons of wastewater daily at nine regional treatment plants.

In addition, it operates approximately 600 miles of regional sewers that collect flow from more than 5,000 miles of sewers owned by 111 communities. Environmental Services serves about 90% of the population in the seven-county metropolitan area.

Environmental Services continues near-perfect compliance with both federal and state clean water standards and data requirements, with six plants receiving the National Association of Clean Water Agencies (NACWA) Platinum Peak Performance award for eight years, including one for more than 30 years.

The division meets these standards while holding wastewater service rates about 40% below the national average for large utilities. The most recent financial survey by NACWA shows that the Twin Cities region has one of the lowest average retail sewer costs per household annually among reporting peer agencies (\$347 versus the peer average of \$555 for 2020).

In addition, Environmental Services:

- Works with more than 900 industrial clients to substantially reduce the amount of pollution entering our wastewater collection system.
- Partners with a variety of communities and organizations to monitor and analyze water resources in the region.
- Analyzes and partners with local municipalities to plan for water supply in the region.
- Ensures sufficient sewer capacity exists to serve planned future development.

#### **CHALLENGES AND OPPORTUNITIES**

The challenges facing the Environmental Services include:

- Meeting regulatory requirements that continue to get more stringent.
- Maintaining competitive wastewater rates and charges.
- Meeting customer expectations for high-quality wastewater services and engagement in division decisions.

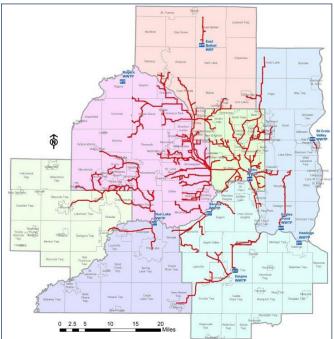

### **2022 Budget Highlights**

See Table B-1 for full breakdown of numbers on pages 53 and 54.

- Supporting proactive programs to prevent inflow and infiltration of clear water into the regional sewer system.
- Maintaining and rehabilitating aging wastewater facilities and equipment.
- Financing necessary capital projects while minimizing borrowing costs.
- Collaboratively researching and planning for regional water sustainability with our partners.
- Providing a productive and safe workplace for employees.
- Pursuing environmentally friendly and cost- effective energy solutions.

#### Wastewater System Operated and Maintained by Environmental Services

#### **OPERATIONS**

#### SOURCES OF FUNDS

The wastewater function of Environmental Services, which is run as a governmental enterprise, is entirely funded by user fees. The Met Council's rate-setting philosophy is that users should pay the regional cost of service.

Revenues include the metropolitan wastewater charge (MWC) allocated to customer municipalities based on flow volume, industry- specific retail charges based on service provided, sewer availability charges to municipalities (SAC) based on capacity demand, and miscellaneous revenues. (SEE CHART 17)

#### Metropolitan Wastewater Charge (MWC).

Communities pay Environmental Services for the flow entering the regional wastewater system from within their

own boundaries. Each community is allocated a portion of the total region-wide charge based on their portion of total regional wastewater flow.

Next year, 2022, will represent the fifth year of the division's promise to our customers to keep charge increases at or below 4%. Charges to individual communities will depend on community and regional flow. Total system flow and community flow vary from year to year, depending on inflow/infiltration (wet weather), water conservation, and growth in population and development.

**Industry-Specific Charges.** Industries pay Environmental Services directly for a variety of charges that are targeted to specific customer services. These include:

- Industrial-strength charges
- Liquid-waste hauler load charges
- Industrial-discharge permit fees
- Temporary-capacity charges

The industrial-strength charge provides roughly three-quarters of the Met Council's total industry-specific revenues from sewer service. It covers the higher treatment costs of industrial waste that has greater strength than domestic waste. Industry- specific charges are directly tied to the increase in municipal wastewater changes, so an increase in those charges will also mean an increase in industry-specific charges.

#### Metropolitan Sewer Availability Charges (SAC).

Communities pay the Met Council for additional capacity required by new development or increased industrial or commercial use.

Communities typically collect these upfront SAC fees from property owners at the time they issue a building permit. Generally, one SAC unit equals 274 gallons of potential daily wastewater flow capacity.

A freestanding single-family residence is charged one SAC unit. Each community pays the metropolitan rate for SAC, but communities can add local fees and thus charge higher rates to the end user. The metropolitan SAC rate will not increase for 2022 and remains at \$2,485 per residence or equivalent unit.

SAC revenue by law is used to finance the reserve capacity portion of capital project costs (or debt service) to build and maintain the wastewater system. Reserve capacity (the unused portion of the system built for future users) averages about 30% of total capacity over time.

**Other Revenue.** The remaining 2022 budgeted revenue includes:

• Interest earnings

- Revenue expected from state contracts for environmental monitoring
- State Clean Water Funds for water supply research and planning projects
- Miscellaneous revenues

#### **USES OF FUNDS**

Environmental Services expenses are categorized in one of four areas: labor expenses, non-labor expenses, debt service, and interdivisional charges. (SEE CHART 18)

**Labor.** Full-time-equivalent employees are budgeted at 678 for 2022, continuing the effort to manage labor costs while addressing the needs of the wastewater collection infrastructure and making significant process improvements. The expense is around a 6% increase from 2021, driven by increased salaries and medical benefits, new staffing in our workforce and equity initiative and to help with operations staff planning.

Labor expenses account for 24% of the total annual budget.

**Non-Labor expenses.** This category includes primarily operational expenses, such as contracted maintenance and other services, utilities, materials, chemicals, and capital outlays. In addition, this category includes "pay-as-you- go" capital project expenses, which are not financed through bonds or loans. In total, the 2022 budget for these expenses represents 21% of the total annual budget.

**Debt service**. Debt service includes the cost of paying principal and interest on Met Council wastewater bonds and Minnesota Public Facilities Authority loans. Funded entirely by wastewater revenues, debt service costs account for 49% of the annual budget.

**Interdivisional expenses.** Interdivisional charges are the cost of administrative and support services provided by Regional Administration to the Met Council's divisions. Examples of units making these charges include Human Resources, Information Services, Risk Management, and Procurement. These expenses represent 7% of the annual budget.

#### CAPITAL

#### SOURCES OF FUNDS

Capital improvements to the regional wastewater system are paid for with general obligation sewer bonds, Minnesota Public Facilities Authority loans, and directly from wastewater fees (pay-as-you-go). (SEE CHART 19)

#### **USES OF FUNDS**

Each year the Met Council adopts a capital improvement plan (CIP), a capital program (ACP – multi-year funding authorizations for projects), and a capital budget (annual funding appropriation for projects in aggregate). The three objectives of the capital improvement plan are (SEE CHART 20):

- Preserve infrastructure investment through rehabilitation and replacements. This represents 74% of the CIP and ACP.
- Expand the system's capacity through treatment plant and interceptor expansions and interceptor extensions. This represents 17% of the CIP and ACP.
- Improve the quality of service by responding to more stringent regulations (as currently known only), reusing wastewater, increasing system reliability, and conserving and generating energy. This represents 9% of the CIP and ACP.

The costs of the regional wastewater system capital program are paid using sewer fees directly or are financed by Metropolitan Council wastewater bonds and/or Minnesota Public Facilities Authority Ioans.

Water quality has improved substantially due to the reduced pollutant discharges from wastewater treatment plants. However, long-term water quality goals and standards established by the Minnesota Pollution Control Agency may require an additional, substantial reduction of pollution.

Federal law focuses compliance and enforcement authority on point sources of pollutant discharges; that is, wastewater treatment plants and urban storm water systems. As a result, the Minnesota Pollution Control Agency may impose more stringent discharge limits on the Met Council and its customer communities.

Achieving compliance with more stringent limits (not required now) could require significant increased operating and capital costs arising from increased chemical addition, pumping, filtration, and solids processing facilities. or other major capital improvements.

#### **SUSTAINABILITY**

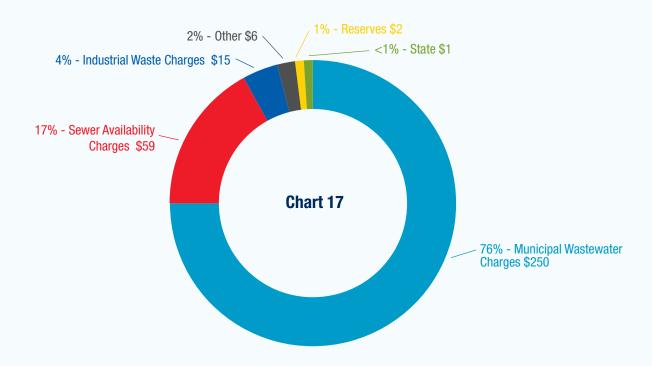

Sustainability efforts of Environmental Services include: (1) water sustainability; (2) energy conservation and generation, and (3) solid waste reuse and reduction and (4) COVID-19 testing.

Water. Two interrelated objectives are:

 (1) sustaining the region's water resources by providing wastewater treatment capacity and achieving performance that supports the region's growth and quality of life, and
 (2) investing the region's financial and technical resources to maximize benefits. Water supply, nonpoint-source pollution control, and wastewater treatment and reuse are considered parts of an integrated system that is optimized to meet these regional objectives.

Environmental Services is pursuing several projects to reuse wastewater at its plants in order to reduce water demand and aquifer use.

2022 Environmental Services Division Operating Budget - Sources of Funds: \$333 Million

2022 Environmental Services Division Operating Budget, - Uses by Category: \$333 Million

In addition, the Environmental Services inflow and infiltration (I/I) initiatives may be viewed as contributing to water sustainability by limiting the amount of clear water that enters the sanitary sewer (and then lost to the region) and minimizing the risks of water pollution from spills and outflow from cracks. Funding to prevent I/I into regional pipes is part of the rehabilitation work in the CIP.

Funding for I/I prevention in the local community sewer pipes is a municipal responsibility, although the division provides a grant program when funds are appropriated by the Legislature for that purpose. Property owners are responsible for preventing I/I originating from their property, although Environmental Services and cities have provided small grant programs.

**Energy and emissions.** Since 2006, Environmental Services reduced its purchase of energy by nearly 25%. To date, these energy savings result in avoided energy purchases of \$4 million per year. In addition, Environmental Services is furthering renewable energy in the region by participating in solar projects that provide the division with approximately 12 megawatts of energy.

Environmental Services continues to implement energy conservation by selecting the appropriate type of wastewater treatment and process, optimizing performance, installing higher- efficiency equipment (motors, pumps) and lighting, transitioning its fleet to electric vehicles, and reducing building-energy use. The division is also purchasing energy from solar-power generation facilities. Energy conservation and renewableenergy generation by Environmental Services contribute to reducing its purchased energy as well as lowering greenhouse and other air emissions. The Met Council has tracked and reported annual emissions using the Climate Registry protocols since 2007.

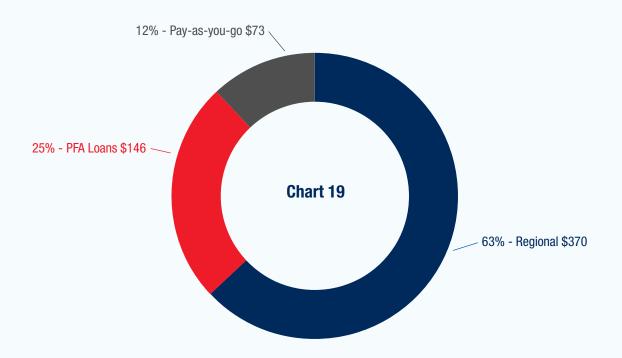

**Waste**. The wastewater system plan continues to support the use of wastewater treatment biosolids for energy generation for in-plant uses. The Metropolitan Plant uses thermal processing that reduces the biosolids to a small volume of inert ash, while recovering energy that is converted to electricity and steam for plant usage.

Moreover, the Met Council is studying the beneficial use of ash for its value as a phosphorus fertilizer. The Blue Lake and Empire plants use anaerobic digestion to reduce biosolids volume prior to its agricultural use and to produce biogas (methane) for in-plant uses.

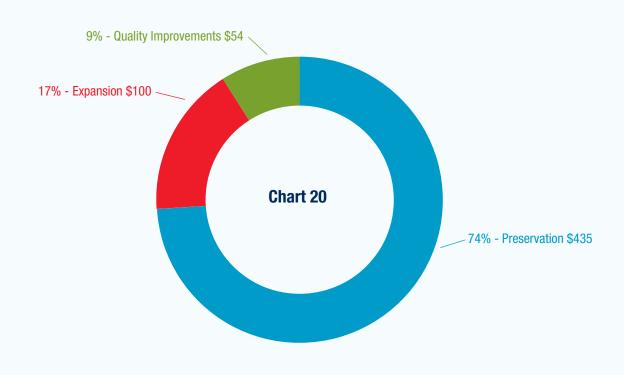

**COVID-19 testing.** Environmental Services has developed capabilities to monitor the level of SARS-CoV-2 viral RNA and variant prevalence in Metro Plant influent wastewater. The results closely track the clinical data for the Metro Plant service area. Environmental Services communicates its results to and coordinates details of its test methods with the Minnesota Department of Health. Wastewater data is another valuable indicator of the SARS-CoV-2 conditions within our region.

2022-2027 Environmental Services Division CIP - Sources of Funds: \$589 Million

# TRANSPORTATION

#### SERVICES

The Metropolitan Council's Transportation Division operates, administers, and coordinates public transit services in the Twin Cities metropolitan area. Two units of the Met Council's Transportation Division – Metro Transit and Metropolitan Transportation Services – carry out these transit programs.

The Met Council also serves as the federally designated Metropolitan Planning Organization and manages the allocation of federal transportation funds. In this role, the Transportation Division provides regional transportation planning for the aviation, highway, transit, and bike/ pedestrian systems.

Every five years, the Met Council develops and updates the 20-year regional Transportation Policy Plan and annually produces the federally required four-year Transportation Improvement Program (TIP) for the metropolitan area.

Metro Transit is the largest direct operator of regular-route transit service in the Twin Cities region, including regular-route bus, light rail, and commuter rail. It accounts for about 78% of the total operating expenses for the Met Council's Transportation Division. Metro Transit directly operates a network of regular routes served by a fleet of 885 buses. Metro Transit operates the METRO Blue Line, METRO Green Line, METRO Red Line and Northstar Commuter Rail. Metro Transit will operate the METRO Green Line Extension (Southwest Light Rail), METRO Blue Line Extension (Bottineau Boulevard) and METRO Orange Line BRT when those lines are completed.

Metropolitan Transportation Services is responsible for regional transportation planning, and it provides and coordinates transit services within the region through contracts with private providers.

Services managed by Metropolitan Transportation Services include the following:

- Metro Mobility provides on-demand transit service for certified riders whose disabilities prevent them from using the regular-route transit system. Metro Mobility provides service in the region to complement regular-route service, as required by the Americans with Disabilities Act.
- Contracted regular-route service provides service through contracts with private and governmental organizations.

See Table C-1 for full breakdown of numbers on pages 63 and 64.

- Transit Link provides dial-a-ride transit service through contracts with private and governmental agencies.
   These programs primarily serve transit customers in the region where regular-route service is not available.
- Metro Vanpool is a program that provides vanpools through contracts with a private company. Typically, these vanpools are formed either in areas without regular-route transit service or serve people who work shifts that are outside of normal commuting times.
- Suburban Transit Providers consist of 12 communities that have chosen to provide their own transit service as separate transit authorities. Suburban Transit Providers provide regular-route and dial-a-ride programs. Suburban Transit Providers receive funding from the state Motor Vehicle Sales Tax (MVST) and regionally allocated funding in accordance with the state transit funding allocation policy.

#### CHALLENGES AND OPPORTUNITIES

#### COVID-19

We are in unprecedented times and this budget carries the risk of these times. With the pandemic continuing, we face significant challenges and many unanswered questions about transit services in the near and long term.

We have faced the sudden loss of between 60% and 70% of our ridership while initiating an extensive maintenance cleaning program for all vehicles, customer facilities, and support facilities. Ridership on most of our services is forecast to remain lower due to the pandemic. Ridership on express and local bus, light rail, and dial-a-ride is projected at 55% of pre-pandemic levels. However, ridership is forecasted to return to pre-pandemic levels on Metro Mobility.

The Metropolitan Council continues to monitor and evaluate ridership impacts from the pandemic on a daily and weekly basis to evaluate service and need for service adjustments to support social distancing. The 2022 budget includes additional forecasted service hours to maintain social distancing on more heavily traveled routes.

Due to the pandemic, operations in 2020 and 2021 have included many significant operational changes. These changes continue and are reflected in the 2022 Operating Budget and include:

- Daily cleaning and disinfecting of buses and rail cars and facilities.
- Moving larger buses to our busiest routes and adding unscheduled trips to keep down the number of riders per vehicle.
- Requiring face coverings for riders.
- Installing barriers to separate riders and operators as we return to front-door boarding.

The 2022 budget is balanced through the availability of programmed federal relief funding and use of reserves. Absent federal relief funding, we would be telling a very different story.

However, federal relief funding – along with a large use of one-time transit reserves, and a reduction of bus services to 95% and administrative adjustments – allows us to present a balanced 2022 budget.

The forecasted MVST changes and volatility shine a light on why regional transportation requires reliable, dedicated funding to support current and future service-growth needs to meet future customer needs.

#### **OPPORTUNITIES**

Minnesota has received a Full Funding Grant Agreement for the METRO Green Line Extension that provides nearly \$1 billion in federal funds as a match to more than \$1 billion of local funding and clears the way for the completion of Minnesota's largest ever public works project.

In addition, the 2022 budget includes the addition of 50 community service officers as a new civilian presence that is welcoming and helpful to our transit customers while deterring crime and code-of-conduct violations. This program is based on much of what has been learned from similar programs at other large transit providers.

The 2021 omnibus transportation legislation provided forecasted funding for Metro Mobility as part of the state budget beginning in state fiscal year 2026.

The 8.5 mile METRO C Line bus rapid transit began service in June 2019 with the region's first electric buses, providing faster and more frequent service between Brooklyn Center and Minneapolis. The 17-mile METRO Orange Line bus rapid transit construction continues. When it opens in late 2021, the METRO Orange Line will provide frequent, all-day service between Minneapolis, Richfield, Bloomington, and Burnsville along I-35W in both directions.

#### **THRIVE MSP 2040**

Thrive MSP 2040 identifies five desired outcomes that define a 30-year vision for the region. The transit division work plays a part in advancing each of these five outcomes.

Accomplishing the division's responsibilities toward the five outcomes includes both challenges and opportunities:

#### STEWARDSHIP

• Focus on regional asset management.

#### PROSPERITY

- METRO Green Line expansion and arterial BRT line development focuses on future service growth needs and expansion to meet future customer needs.
- The Metro Transit Technician Training Program puts job seekers on a path to a good-paying job with a paid internship, job and skills training, and support for an educational degree.

#### EQUITY

- Providing transit contributes to regional equity, and the amount of service funded by the 2022 budget and how and where that service is configured are significant in understanding the equity implications of our budget.
- Continuing investment in the Better Bus Stops effort and transit assistance programs.
- Continuing travel behavior study analysis to better understand racial disparities in the metro area more fully.
- Continuing the partnership between the Metro Transit Police Homeless Action Team and Metropolitan Housing and Redevelopment Authority (Metro HRA). The two departments combine their expertise to meet the difficult challenge of connecting people experiencing homelessness who are sheltering on transit with housing and support services.
- Partnering with communities so decisions are made with people, not for people.
- Continuing use and growth of Disadvantaged Business Enterprises and Metropolitan Council Underutilized Businesses.
- Incorporating expectations for advancing equity in our everyday work.

#### LIVABILITY

- Providing the essential mobility service to people who rely on transit to get to work and to address their most basic needs.
- Keeping our riders and operators as safe as possible in a manner that adheres to public health guidelines through enhanced cleaning of our public spaces and changing service to achieving social distancing.
- When the Orange Line opens in late 2021, it will feature innovations such as a new bus-only access ramp into and out of downtown Minneapolis at 12th Street, a median station at Lake Street, and the Knox Avenue transitway under I-494 that will include a multi-use trail for bicyclists and pedestrians.

#### SUSTAINABILITY

- Plans to move to electric fleet with continued review and testing of our first eight electric buses.
- Construction of the new Minneapolis Bus Garage, which will incorporate many features with environmental benefits.

#### **OPERATIONS**

#### SOURCES OF FUNDS

The Transportation Division's 2022 operating budget is \$750 million. (SEE CHART 21)

The 2022 operating budget is built on bus service levels at 95% of pre-pandemic level, light rail and Metro Mobility at 100%, and Northstar at 55% (or four trips daily with no weekend service).

Funding for operations comes from the Motor Vehicle Sales Tax, state appropriations, federal and local funding, federal relief funds, investment earnings, passenger fares, and other revenues, including advertising. The counties provide operating funding for light rail and commuter rail. Sherburne County and the Minnesota Department of Transportation (MnDOT) also provide operating funds for commuter rail services.

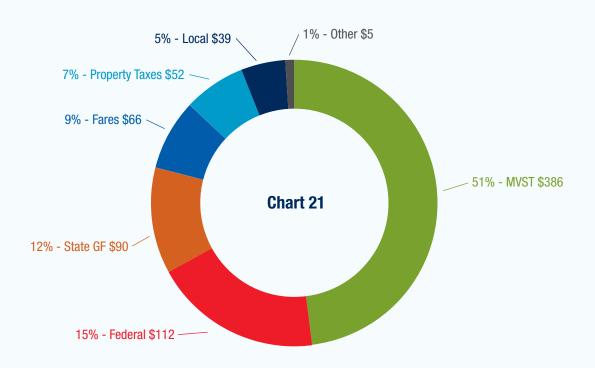

The Transportation Division operating budget is developed around key financial objectives:

- Support the Met Council's regional development plan, Thrive MSP 2040, and regional Transportation Policy Plan
- Grow transit ridership
- Construct a transit budget that balances revenues and expenses over four years
- Mitigate gaps in the transit financial structure over time
- Minimize impact on Met Council property tax levies
- Maintain reserves at policy levels

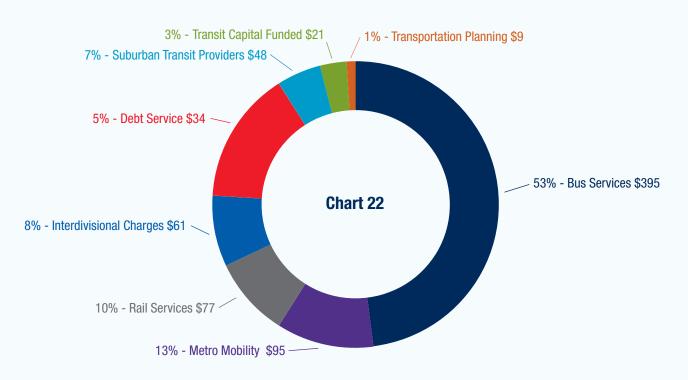

The Transportation Division operating budget for 2022 includes a planned use of reserves and includes several assumptions:

• Significant one-time use of reserves and federal relief funds. The Metropolitan Council received three federal relief funding plans for transportation in years 2020 and 2021, totaling \$725.8 million. These funds will be used to support transit operations and balance our budget. The federal funds are expected to be used, along with one-time use of operating reserves, to balance the budget of the Metropolitan Council transportation operations to about mid-year 2025.

#### 2022 Transportation Division Operating Budget - Uses by Category: \$740 Million

Use of reserves during this period brings transit operating reserves to minimum reserve levels.

- Average diesel fuel cost paid at \$1.73 per gallon
- Operating funding received from Hennepin County and Ramsey County for METRO Blue Line and METRO Green Line, Hennepin County and Dakota County for METRO Orange Line, and funding from Hennepin County, Anoka County, Sherburne County and MnDOT for Northstar.
- Full-year operations for METRO Orange Line which begin operations later in 2021.
- Continued review of the regional fare policy.

**Metro Transit Bus Service**. Metro Transit is the largest operator of regular-route bus service in the Twin Cities region and is a key part of the Met Council's commitment to operating high-quality transit service in an inclusive, customer-focused, and efficient manner. Metro Transit is one of the country's largest transit systems, providing over 90% of the regular-route public transportation rides in the Minneapolis-Saint Paul metro area.

Major sources of revenues include passenger fares, Motor Vehicle Sales Tax revenue, state general fund appropriations, and federal relief funds.

Major sources of expenses include salaries and benefits, fuel, allocations from Regional Administration, as well as materials, supplies, and additional expenses for continued COVID-related cleaning of vehicles, stations, and facilities.

**METRO Blue Line Light Rail.** The METRO Blue Line operates between downtown Minneapolis, Minneapolis-Saint Paul International Airport, and the Mall of America.

Major sources of revenue include passenger fares, the state general fund, federal relief funds, and a net subsidy contribution from Hennepin County.

Major sources of expenses include salaries and benefits; electricity expenses for light rail vehicle propulsion; allocations for shared Metro Transit administrative services, materials and supplies; allocations from Regional Administration; and additional expenses for COVID- related cleaning of vehicles, stations, and facilities.

**METRO Transit Northstar Commuter Rail**. Northstar Commuter Rail operates between Big Lake and Target Field in downtown Minneapolis, with six stations along the route. Weekday service in 2022 will consist of four weekday trains serving Minneapolis with no weekend service.

Major sources of revenue include passenger fares, state general fund appropriations, federal relief funds, and net subsidy contributions from Anoka County, Hennepin County, Sherburne County, and Greater Minnesota MnDOT. Major sources of expenses include salaries and benefits, diesel fuel, materials and supplies, and a professional services contract with Burlington Northern Santa Fe (BNSF) to operate the commuter rail, and additional expenses for COVID-related cleaning of vehicles, stations, and facilities. Operations of the commuter rail are performed under contract by BNSF with maintenance performed by Metro Transit.

**METRO Green Line Light Rail.** The METRO Green Line began operations in June 2014 with service between downtown Saint Paul and downtown Minneapolis via University Avenue and the University of Minnesota. The corridor also travels through the State Capital complex and Saint Paul's midway area.

Major revenue sources will include passenger fares, the state general fund, federal relief funds, and net subsidy contributions from Hennepin County and Ramsey County.

Major sources of operating expenses include salaries and benefits; electricity expenses for light rail vehicle propulsion; allocations for shared Metro Transit administrative services, materials and supplies; allocations from Regional Administration; and additional expenses for COVID-related cleaning of vehicles, stations, and facilities.

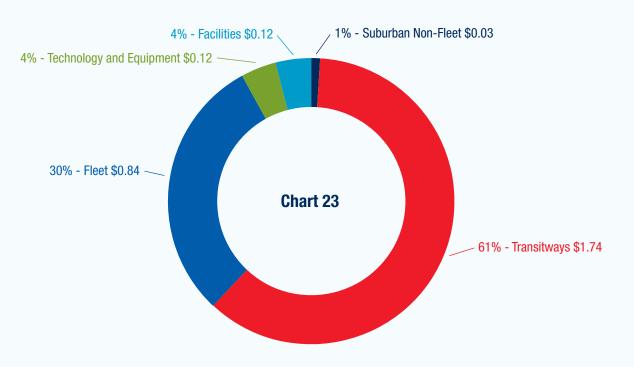

**METRO Orange Line BRT.** The 17-mile METRO Orange Line bus rapid transit is planned to begin revenue service in December 2021. The METRO Orange Line will provide frequent, all-day service between Minneapolis, Richfield, Bloomington, and Burnsville along I-35W in both directions. Major sources of revenue include passenger fares, the state general fund, federal relief funds, and a net subsidy contribution from Hennepin County and Dakota County. Major sources of expenses include salaries and benefits, fuel, allocations from Regional Administration, as well as materials, supplies, and additional expenses for continued COVID-related cleaning of vehicles, stations and facilities.

**Contracted Regular Routes.** Metropolitan Transportation Services provides regional transit service through its contracted regular-route program. Metropolitan Transportation Services contracts with private vendors and governmental organizations to operate regularly scheduled service throughout the metropolitan area.

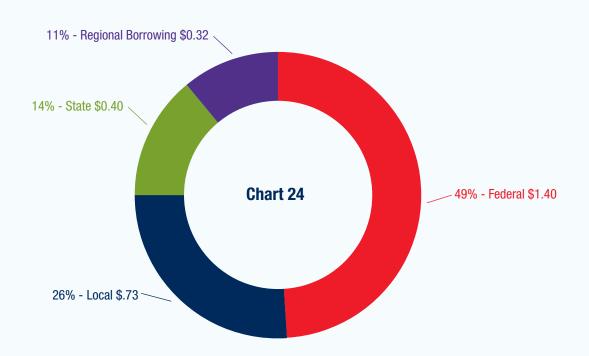

**Transit Link.** The Transit Link program provides demandresponsive transit service in portions of the metropolitan area. The Metropolitan Transportation Services division contracts with private vendors and governmental organizations to operate Transit Link service.

**Metro Mobility.** Metropolitan Transportation Services provides Metro Mobility transit service for certified riders who are unable to use regular fixed-route buses due to a disability or health condition. The service offers dial-a-ride service to people certified under the Americans with Disabilities Act. Service is provided by private vendors under contract.

2022-2027 Transportation Division CIP – Funds by Functions: \$2.85 Billion

#### CAPITAL

The Transportation Division capital budget reflects the primary priorities of (1) maintaining the current system by replacing vehicles according to fleet management plans and maintaining/repairing existing facilities, and (2) building transitways and expanding the bus system to meet future ridership and service demands.

The 2022 capital program reflects the following assumptions:

- Federal funding under the federal MAP-21 legislation will increase 2.2% per year.
- Regional transit capital expenditures will increase at 3.3% per year.
- Inflation affecting construction and bus operations will increase at 2.5% to 3.5% per year.
- Rail maintenance needs will continue with operations of the METRO Green Line, METRO Blue Line, Northstar Commuter Rail and METRO Orange Line.
- Bus purchases have been reviewed and adjusted for COVID-19 impacts on service. Expanding the bus fleet will require the completion of the Minneapolis Bus Garage for additional vehicle storage.
- Metro Transit developed a Transit Asset Management Plan as required by the Federal Transit Administration, with updates annually.
- New Starts federal funding will be available for the METRO Blue and Green Line Extensions.

The 2022 capital program will support:

- Construction of the METRO Green Line Extension and METRO Blue Line Extension
- Completion of a new Minneapolis Bus Garage.
- Bus replacement, facility energy enhancements, improvements to accessibility for people with disabilities, signage enhancements, and technology upgrades.
- Programs for overhauling light rail and commuter rail vehicles.
- Partial funding for additional bus rapid transit lines in Saint Paul and Minneapolis.
- The 2022-2027 Transportation Capital Improvement Program includes the Zero-Emission Fleet Plan. The Zero Emission Transportation System is an important strategy to make progress on mitigating climate changes. The 2022-2027 Transportation Capital Improvement Program begins a shift to zero emission buses in the Metro Transit fleet with 100 electric vehicles funded in the CIP. The Zero Emissions Fleet Plan will guide the investment plan and transition

timeframe while meeting reliability and range requirements.

- Customer experience equity priorities.
- Heywood Campus administration expansion.
- Planning for future bus rapid transit lines.

#### SOURCES OF FUNDS

Major sources of revenues in the 2022-2027 transportation capital improvement plan include federal funds, regional bonding, the state general fund, state general obligation bonds, the counties, and other local funding. (SEE CHART 24)

Within its statutory bonding authority, the Met Council issues long-term debt to finance transit projects.

Federal funding is the largest funding source and includes the following:

- MAP-21 legislation (5307 Formula Funds, 5337 Bus and Rail State of Good Repair, and 5339 Bus and Bus Facilities).
- Congestion Mitigation Air Quality (CMAQ) funds allocated competitively through the process overseen by the Met Council's Transportation Advisory Board.
- New Starts funding allocated at the discretion of Congress for the METRO Green Line and METRO Blue Line light rail extensions.

The remaining sources of capital funding include:

- The state general fund, state general obligation bonds, and state trunk highway funds. These funds have been approved and authorized for specific capital projects.
- Regional Transit Capital (RTC), which is used primarily for fleet and for matching of federal funds.

• Transitway funding from the counties and other local funds provided by counties and railroad authorities.

#### **USES OF FUNDS**

Major expenditures in the 2022-2027 Transportation Division capital improvement plan include the following:

Uses of funds by department consist of transitways, fleet, facilities, other providers (non-fleet) and technology and equipment. The transitways category is the predominant use due to the construction of the METRO Green Line and Blue Line extension projects and bus rapid transit. (SEE CHART 23)

The 2022-2027 Transportation Capital Improvement Program includes Appendix I which details important Transit Projects that are unfunded in the capital improvement plan but are identified if future funding becomes available.

#### **STAFFING**

Staffing for the Transportation Division includes bus operators, mechanics, police, and administrative staff. The 2022 division budget includes bus-operations service levels at 95%.

#### PERFORMANCE MEASURES

Key performance measures for the Transportation Division include measurements of operating and budget efficiencies by type of operation. Performance is measured by comparison with prior-year performance and with peer agencies. Key performance measures for the Transportation Division include:

- Ridership by type of transit service.
- Fleet size and peak bus level.
- Revenue miles and revenue hours operated.
- Cost per passenger trip.
- Operating expense per revenue mile.
- Operating expense per revenue hour.
- Operating expense per passenger mile.
- Fare box recovery ratio.
- Average revenue per passenger trip.
- Boardings per revenue hour.
- Subsidy per passenger trip.

In addition to these performance measures, comparisons of actual operating results versus budget are monitored during the year and are reported on a quarterly basis. This allows the Met Council and operations management to closely monitor operations performance and make adjustments, as necessary in a timely manner.

62

#### Table C - 1

	Metro Mobility	Transit Link	Fixed Route	Transportation Planning	Total Metropolitan Transportation Services	Bus

# COMMUNITY DEVELOPMENT

#### SERVICES

The Community Development Division:

- Provides rent payments to landlords that help very low-income residents pay their rent.
- Makes grants to communities for projects that use land efficiently, create affordable housing, and clean up polluted sites.
- Plans for the regional park system and provides funding for the purchase of land and improvements for those parks.
- Develops a 30-year plan that helps guide the future growth of the region (Thrive MSP 2040).
- Helps communities plan for their growth by supplying information, best practices, and analysis of regional issues.
- Reviews community plans for impacts on the region's transportation, sewer, and parks systems.

#### PRIORITIES, GOALS, AND OBJECTIVES

The 2022 priority goals and objectives of the Community Development Division include:

- Initiating planning and support efforts related to the 2050 Regional Development Guide.
- Advance a better Twin Cities region for all by delivering trusted and useful information. Data and analysis confront truths about systems of oppression and racism and their enduring effects.
- Working to leverage multiple policy tools across all Met Council systems and policy plans to address regional challenges and opportunities.
- Providing information, best practices, and investments to expand the use of regional parks by all residents across race, ethnicity, income, and ability.
- Operate a program in the Metro HRA to provide housing mobility and post-move counseling assistance to those who hold Housing Choice Voucher to ensure success in neighborhoods of choice.
- Distributing grants to communities to support equitable development.

### **2022 Budget Highlights**

See Table D-1 for full breakdown of numbers on pages 71 and 72.

 Collaborating with regional partners to develop tools and identify best practices to plan for climate impacts to regional systems and to assist local governments to plan for impacts to local infrastructure and their communities.

#### CHALLENGES AND OPPORTUNITIES

#### COVID-19

Federal COVID-19 relief has helped mitigate pandemic impacts on families and landlords through higher reimbursement and housing voucher payments. This funding has been critical as federal rules prohibit local fund investment to pay for housing vouchers. The Metropolitan Council's Housing and Redevelopment Authority also received an additional 218 emergency vouchers under the American Rescue Plan of 2021. The vouchers will help connect people experiencing homelessness to housing and housing stability. More vouchers will help expand partnerships with the Metro Transit Police Department's Homeless Action Team (HAT) and county continuums of care.

COVID-19 continues to impact operations, including home inspections and increasing administrative work related to income changes.

#### **Mobility Demonstration Program**

The U.S. Department of Housing and Urban Development (HUD) has awarded the Minneapolis Public Housing Authority (MPHA) and the Metropolitan Council's Housing and Redevelopment Authority (Metro HRA) \$5.2 million and 74 new vouchers to promote increased housing choices and opportunities among low-income families.

The two agencies partnered to apply for and participate in the federal Housing Choice Voucher Mobility Demonstration Program. Both agencies allocate housing choice vouchers, providing federal rent assistance to low-income families to help them find housing stability and all the benefits of having a safe home environment.

The Housing Choice Voucher Mobility Demonstration Program supports selected housing authorities, including MPHA and Metro HRA, to offer services that help families with children move to areas in the city and suburban areas that can provide more opportunities.

#### New Housing Partnership with City of Edina

The City of Edina and Met Council are collaborating to identify and purchase homes for the Met Council's Family Affordable Housing Program. Homes will be leased to eligible families with low incomes. The City of Edina has committed \$2 million for this initiative.

#### **THRIVE MSP 2040**

Thrive MSP 2040 identifies five desired outcomes that define a 30-year vision for the region. The work of the Community Development Division plays a part in advancing each of these five outcomes.

Accomplishing the division's responsibilities toward the five outcomes includes both challenges and opportunities:

#### STEWARDSHIP

- Funding the purchase of priority natural resources to include in the Regional Park System.
- Encouraging communities to locate and design development that preserves the natural environment, supports the transit system, provides a mix of housing costs, and uses land efficiently.
- Providing information and best practices to manage stormwater and protect natural resources.

#### PROSPERITY

- Helping communities protect land around airports, railroads, and industrial areas for compatible employment-supportive land uses.
- Encouraging communities to preserve farmland and reduce development pressures on this limited resource.
- Supporting communities in planning for water sustainability in their comprehensive plans.
- Providing information and assistance so all communities benefit from a regional strategy for economic competitiveness.

#### EQUITY

- Improving regional parks use by all residents of the region across race, ethnicity, income, and ability. The parks visitor study will provide information on demographics of visitors to the regional parks system. This will help identify if there are inequities in visitation across demographic groups and will help agencies better tailor plans and programming to meet the needs of diverse visitors.
- Using grants to help create mixed-income neighborhoods and affordable housing choices across the region.
- Developing information and services that help renters with vouchers to choose the community and neighborhood that best meets their needs.
- Partnering with communities so decisions are made with people, not for people.
- Incorporating expectations for advancing equity, inclusion, and diversity into job postings, hiring processes, on-boarding, and annual performance reviews.

#### LIVABILITY

- The parks visitor study will be finalized in 2022. The study will collect key data used in funding allocations for the regional park implementing agencies and provides an overall understanding of visitation to the regional parks system. This includes collecting data on demographics, travel patterns, activities pursued in the park, and other key data to inform planning.
- Increasing access to nature and outdoor recreation through regional parks and trails.
- Providing housing choices for everyone.
- Using resources to support walkable neighborhoods with access to transit service.
- Promoting healthy communities and active living through land use, planning, and investments.

#### SUSTAINABILITY

- Promoting and funding compact, well-connected, pedestrian-friendly development.
- Encouraging communities to protect farmland for local food production.
- Leading the development of the Met Council's Climate Action and Resilience Plan to limit the Met Council's contributions to climate change and to mitigate impacts to the Met Council's investments in regional infrastructure and assets.

#### **OPERATIONS**

#### SOURCES OF FUNDS

Funding from federal, state, and local property taxes make up the majority of the revenue for the Community Development Division. Planning work and administrative expenses are funded by local property taxes. The Metro HRA earns fees for program administration, paid by federal and state governments. The rent subsidy payments to landlords are passed through the Metro HRA from federal and state government. (SEE CHART 25)

#### **USES OF FUNDS**

The largest part of the Community Development Division budget consists of funds that pass through the Met Council to pay for rent payments to landlords, Livable Communities Act grants to communities, and grants to parks implementing agencies for park operations. (SEE CHART 26)

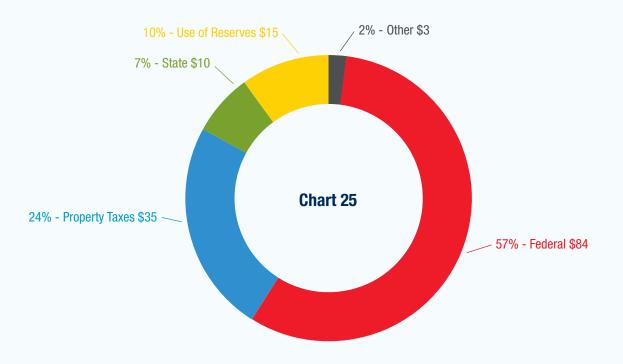

#### CAPITAL

#### SOURCES OF FUNDS

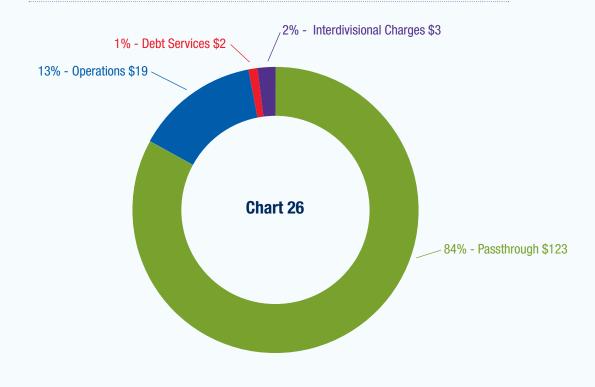

The capital program for the Community Development Division provides funding for regional parks and trails and Met Council-owned homes. The sources of funds include state appropriations, General Purpose Levy dollars, rental income, and regional bonds. The regional borrowing is used as a local match to the state appropriations, and to fund the Regional Parks System Equity Grant Program. (SEE CHART 27)

2022 Community Development Division Operating Budget - Sources of Funds: \$147 Million

2022 Community Development Division Operating Budget – Uses by Category: \$147 Million

#### **USES OF FUNDS**

The capital program provides grants to ten regional park implementing agencies. The regional park implementing agencies use the grants to purchase land, develop new park facilities, and rehabilitate existing ones. The capital program also supports home purchases and major asset preservation projects. (SEE CHART 28)

#### **STAFFING**

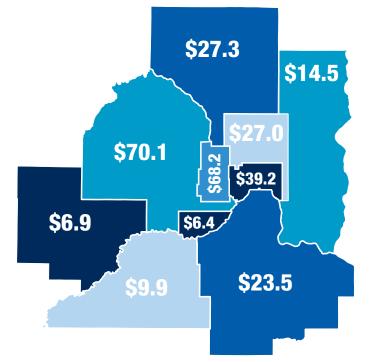

Staffing for the Community Development Division includes housing, planning, research, and administrative staff. The 2022 division budget includes 102 full-time equivalent employees.

#### PERFORMANCE MEASURES

Measurable outcomes of the Community Development Division services are:

- Number of annual visits to regional parks.
- Number of acres cleaned of pollution with assistance from Tax Base Revitalization grant funds.
- Increase in the net tax capacity of land cleaned of pollution with the assistance of Tax Base Revitalization grant funds.
- Number of jobs created or retained with the assistance of Livable Communities Act grant funds.
- Dollar amount of public and private funds leveraged with Livable Communities Act grant funds.
- Number of affordable housing units created or preserved with the assistance of Livable Communities Act funding.

#### OTHER POSTEMPLOYMENT BENEFITS

The Council's Other Postemployment Benefit Plan (OPEB) is a single-employer defined benefit health care plan for eligible retirees, their spouses, and dependents.

Benefit provisions are established through respective bargaining agreements with unions representing our employees. Only employees hired prior to benefit sunset dates, and meeting criteria for length of service and retirement age, are entitled to receive these employer paid benefits.

The Council has invested assets, with a fair market value of \$315,371,000 as of December 31, 2020, to pay OPEB obligations for retirees. The 2022 budget anticipates benefit payments of \$14,728,000 from the OPEB fund.

More information regarding the Council's OPEB obligations and assets can be found in the Council's Comprehensive Annual Financial Report.

# METROPOLITAN COUNCIL

#### SELF-INSURED BENEFIT PLANS

The Council self-insures its medical and dental plan benefits for employees and eligible retirees. Plan activity is recorded in an internal service fund. The internal service fund receives monthly premium revenues from operating division budgets and the OPEB fund and directly pays claims and administration costs of the plan.

Total premiums are intended to cover overall plan costs and maintain a sufficient reserve balance to minimize cash flow risk and protect the fund against unforeseen claims or plan expenses that may exceed annual premium revenues in a given year. This risk further limited by insuring the plan for 125% aggregate and \$500,000 individual stop loss coverage.

Plan reserves totaled \$48,231,395 on December 31, 2020.

## **Supplemental Information on Transit Capital Projects**

Minnesota Statutes 473.39 provides the Metropolitan Council with bonding authority for transit. Subdivision 4 of this section requires the Council to adopt a three-year transit capital improvement plan before the Council issues debt obligations authorized in Subdivision 1. Specifically, the statute states:

Subd. 4. **Transit capital improvement program.** The council may not issue obligations pursuant to this section until the council adopts a three-year transit capital improvement program. The program must include a capital investment component that sets forth a capital investment strategy and estimates the fiscal and other effects of the strategy. The component must specify, to the extent practicable, the capital improvements to be undertaken. For each improvement specified, the program must describe:

- (1) need, function, objective, and relative priority;
- (2) alternatives, including alternatives not involving capital expenditures;
- (3) ownership and operating entity;
- (4) location and schedule of development;
- (5) environmental, social, and economic effects;
- (6) cost;
- (7) manner of finance and revenue sources, including federal and state funds, private funds, taxes, and user charges; and
- (8) fiscal effects, including an estimate of annual operating costs and sources of revenue to pay the costs.

The Council adopts a six-year capital improvement plan (CIP). The current CIP covers the period from 2022 to 2027. Additional information is provided below for all projects in the CIP to provide supplemental information meeting the statutory requirement.

#### (1) Need, function, objective and relative priority

The capital improvement plan responds to the various needs of providing transit service in the Twin Cities. The CIP summarizes transit capital projects into six categories:

- <u>Fleet:</u> These projects purchase vehicles needed to provide transit service. This includes buses including Zero Emission Fleet, light rail vehicles, and equipment specifically for vehicles such as security cameras. It also includes mid-life overhauls used to extend the useful life of vehicles.
- <u>Support Facilities</u>: These projects are necessary to maintain and house the fleet and provide other ancillary facilities to support operations. This includes garages, office space, fueling stations, and other support facilities. These projects also include major maintenance and repairs to these facilities to extend their useful life.
- <u>Customer Facilities:</u> These projects encourage transit use by providing hubs for buses so riders can transfer from one route to another, providing parking spaces for transit users, sheltering riders from the elements, and providing other amenities to encourage and facilitate transit use.

- <u>Technology Improvements:</u> These projects include communication and computer equipment necessary to the operation of the transit system. It includes radios, dispatching systems, automatic vehicle locators, mobile data terminals, and other similar equipment.
- <u>Other Capital Equipment:</u> These projects include equipment and other items necessary for the operation of the transit system but do not fit in the first four categories. It can include such things as tow trucks, supervisor vehicles, police vehicles, bus lifts, bus washes, fareboxes and other equipment.
- <u>Transitways:</u> These projects include light rail, commuter rail and bus rapid transit projects making significant capital investment within specific transit corridors.

The Capital Program includes capital projects with secured funding and other capital projects with anticipated but not secured funding. Funded projects are broken into three tiers. The first tier is projects necessary to maintain the existing transit system. The second tier includes projects to expand the bus system and the third tier includes projects to expand the number of transitways in the region. Projects that maintain the existing transit system are of higher priority than expansion projects. Projects are not ranked further within the various tiers because the bus system is a network and projects are interconnected. The Capital Program also includes unfunded transit project priorities in Appendix I that would advance with additional funding.

### (2) Alternatives examined to include projects in the CIP

All alternatives are examined before a project is recommended for scarce transit resources. Alternatives examined include whether a project can be delayed or avoided, whether other funding sources would be more appropriate, whether other locations would better meet transit needs, and other considerations.

Major transitway projects seeking federal New Starts funding go through a formal alternatives analysis prescribed by the Federal Transit Administration.

### (3) Ownership and operating entity;

Transit equipment and facilities are owned and operated by numerous transit providers in the region. The largest transit provider is the Council's Metro Transit Division. Other transit providers include the opt out or replacement service providers and various cities, counties, and non-profit organizations. The Council operates under a regional fleet concept, with buses and other transit vehicles owned by the Council and operated by various providers. Information on ownership and operating entity for each transit asset included in the capital improvement plan is provided in the supplemental table.

#### (4) Location and schedule of development;

Information on the location and schedule of development is included in the supplemental table. In many instances, the specific location of capital asset cannot be determined. Fleet assets when acquired become part of the regional fleet and are assigned to particular providers or particular routes based on the overall transit service plan for the region.

Many capital assets are located in a specific location but benefit the entire transit system or sub areas within the region.

## (5) Environmental, social, and economic effects;

The Metropolitan Council Transit CIP is integral to the operation of the Twin Cities transit system. The environmental, social, and economic effects of the transit system supported by transit CIP are as follows.

- Takes people to and from work
  - 62% of bus riders, 48% of LRT riders, 80% of Northstar riders, and 45% of BRT riders are going to or from work
- Removes cars from the streets and highways during peak periods
  - Buses carry the equivalent of up to one and a half lanes of traffic at highly congested points in the highway system
  - Because transit removed cars from the roads, citizens avoided 10 million hours of being stuck in congestion
- Provides mobility options beyond driving
  - 65% of bus riders and 73% of rail riders chose to ride even though they had other transportation options
- Allows people to live without a car
  - 40% of bus riders do not have an automobile available for their use either by choice or because of economic reasons
- Provides mobility for low-income persons
  - 30% of bus riders and 33% of light rail riders earn less than \$25,000
- Provides access to areas with high concentrations of employment
  - 40% of downtown Minneapolis, 20% of downtown St Paul, and 20% of University of Minnesota employees get to work via transit during peak periods
- Provides mobility for persons whose physical abilities may be declining.
  - 14% of rail users are age 55 or older.

## (6) Cost;

Total project costs and projected costs in the 2022-2027 period are provided in the supplemental table.

#### (7) Manner of finance and revenue sources,

The Transit Capital Improvement Plan assumes funds from the following sources:

- Federal Grants
  - 5307 Formula Funds: Federal gas taxes allocated on a formula basis
  - 5337 State of Good Repair: Allocations on a formula basis
  - 5339 Bus and Bus Facilities: Allocations on a formula basis
  - TEA-21 Title I CMAQ/STP: Allocated competitively through the TAB Process
  - TEA 21 Title III 5309 New Starts: Allocated by Congress for transitways
- Regional Funds
  - Regional Transit Capital bonds: These revenues are from property-tax supported bonds sold by the Metropolitan Council requiring legislative approval and provide local match for federal grants.
- State Funds
  - State bonding bill: Can be either general cash revenues or general revenue bond funds.
  - Trunk highway bonds: Bonds sold and repaid with funds from the Trunk Highway Fund.
- Local Funds
  - Local funds from county regional rail authorities for transitways
  - Funds from the Local Counties for transitways

# (8) Fiscal effects, including an estimate of annual operating costs and sources of revenue to pay the costs.

#### **Annual Operating Costs**

**Tier One Preservation Projects** 

This includes projects necessary to maintain the existing transit system, including replacement of buses, capital facilities and equipment that have reached the end of their useful life. Because they are replacing existing vehicles or facilities, they do not result in new operating costs. As such, they are already funded through existing operating funds.

Tier Two Expansion Projects

These projects expand the transit system. As such, they may require additional operating and maintenance funds. Buses acquired to provide additional service incur the costs of

**APPENDIX J** 

additional drivers and mechanics to operate and maintain the vehicles. Transit facilities including support and customer facilities, technology and other capital equipment have additional maintenance costs and may have additional operating costs.

Operating costs associated with this expansion will include the salaries and benefits for operators of expansion vehicles; fuel, supplies and service for the vehicles; salaries and benefits for mechanics that maintain the vehicles, snowplowing and other maintenance of park and ride facilities, and other typical costs of operating a multi-modal transit system.

Tier Three Transitway Projects

These transitway projects expand the transit system and will have additional operating and maintenance costs.

Three large transitway projects are included in the capital improvement plan. These large transitway projects include the Southwest Light Rail Transit project (METRO Green Line Extension); the Bottineau Light Rail Transit Project (METRO Blue Line Extension) and the METRO Gold Line BRT Transit Project.

Operating costs associated with this expansion will include the salaries and benefits for operators of expansion vehicles; fuel, supplies and service for the vehicles; salaries and benefits for mechanics that maintain the vehicles, snowplowing and other maintenance of park and ride facilities, and other typical costs of operating a multi-modal transit system.

Other transitway projects in the capital improvement plan include the D Line, B Line and E Line BRT, Purple Rush Line BRT and other BRT projects with preliminary planning and design.

#### Sources of Revenues to Pay the Costs

The transit system relies on several funding sources to pay the operating and maintenance costs for capital equipment and facilities acquired through the capital improvement plan. Sources include:

Fare revenues, State general fund appropriations, Motor vehicle sales tax receipts distributed to the Metropolitan Transit Fund, Operating contributions from county regional rail authorities, Other revenues include advertising and investment income.

With passage of the constitutional amendment dedicating additional receipts from the motor vehicle sales tax to transit in the region, the Council has additional revenues to operate and maintain the existing system. The additional revenues from the motor vehicle sales tax were phased in starting in fiscal year 2008, with full implementation in fiscal year 2012.
