

# Light Rail Wayfinding Improvements for Riders who are Blind or have Low Vision

Transportation Accessibility Advisory Committee  
April 6, 2016

Kim Zlimen  
Metro Transit, Engineering and Facilities

# Today's Topics

- Project overview
- Customer feedback
- Project scope and deliverables
- Opportunities to offer input

# Project Overview

# Customer Feedback

- Door indicators for safer boarding
- Safe location to wait for trains or vehicles to pass
- Delineation between platform landing and street
- Cues for crossing streets or tracks, moving from station landing to platform, purchasing tickets, and boarding/exiting trains
- Consistency in platform layout

## Project Scope and Deliverables

- Best practices study
- Site evaluations
- Outreach
  - TAAC
  - Focus group
- Recommendations memo
- Standards template for light rail platforms
  - Identification of a pilot project station

## Opportunities for TAAC Input

- Methodology and site inventory
- Focus group
- Individual meetings
- Report back in fall/winter 2016
