

Rosedale Transit Center Renovation

Alicia Vap | June 1, 2022

metrotransit.org

Rosedale Transit Center Renovation—Existing Conditions

- Transit Center has an indoor passenger waiting area and small bus operator break room
- Transit Center exterior includes three bus gates that serve eight bus routes, bus lanes, sidewalks, fare collections equipment, and real time signs

Rosedale Transit Center Renovation—Bus Routes by Gate

- Three bus gates serve several routes, including:
 - Gate A: Routes A Line and 65
 - Gate B: Routes 87, 225, and 227
 - Gate C: Routes 32, 264, and 801

Rosedale Transit Center Renovation—Scope of Work

- New layout to better serve transit that will include additional medians and will tie into the Rosedale Mall's perimeter road realignment that is currently underway
- Replacement of bus lane pavement, replace all sidewalks and pedestrian ramps, replace signage, replace all lighting, likely add more bus gates
- Either replace or by adjusting the sidewalk grading, eliminate the need for the existing ramp into the indoor waiting area
- Evaluating options to refresh indoor waiting and bus operator break room areas

Rosedale Transit Center Renovation — Accessibility

- Addressing items identified in the 2019 ADA Self-Evaluation report
- Replace all sidewalks and trip hazards
- Replace pedestrian ramps
- Consider incorporating different texture on one edge of crosswalks for low or no vision transit riders if pedestrian ramp doesn't directly align with crosswalk

Rosedale Transit Center Renovation—Schedule

- 60% plans anticipated mid summer
- 100% plans anticipated in late summer
- Construction proposed in spring 2023

Thank You!
