Patrick Haney, Intern (651-602-1580)

SUBJECT: Update to Geographic Balance in the Regional Solicitation and

Employment Flows

BACKGROUND: At the June 20, 2018, TAB meeting, Council staff presented a series of maps and tables on the topic of geographic balance. TAB members requested that the data tables be split to show trends before and after the major program evaluation (prior to the 2014 funding cycle). Figures 1-3 now shows a table that splits the 2003-2013 funding cycles and the 2014-2016 funding cycles. Due to the small sample size of using just two funding cycles (2014 and 2016), it may be difficult to draw meaningful conclusions from the data. Council staff will add 2018 projects once TAB approves a list of projects in January.

TAB also requested that funding be shown relative to vehicle miles travelled (VMT). This change is shown on Figure 1 (VMT data is only available at the county level, so it cannot be added to the other maps). Figure 1 includes funding for all three modes; staff then compared the relationship between each county's VMT to just the roadway funding application categories. There was a stronger correlation between VMT and roadway funding distribution than to funding for all three modes combined.

Lastly, TAB requested additional information on where people are traveling to work, including one specific question on the number of workers from St. Croix County, Wisconsin traveling through Washington County to employment sites in Ramsey and Hennepin Counties. The broader topic of where people live, work, and travel has been of interest to TAB for over 20 years. In fact, in 1996, the State Legislature directed the Council to analyze the impact on the regional highway system of commuters and the results were included in the 2001 Transportation Policy Plan.

To provide some context on the work trip, the 2010 MSP Region Travel Behavior Inventory (TBI) Report reported that work commutes account for approximately 17% of all trips, and an even higher percentage during the peak periods when roads are the most congested (approximately 33% of trips during the morning commute and 22% during the evening commute). The work trip only accounts for 6% of the total travel during the middle of the day.

Figures 4-22 and Tables 1-3 display 2015 Longitudinal Employer-Household Dynamics (LEHD) data from the U.S. Census Bureau. Some of the key highlights from the data include the following:

- 1. People are traveling throughout the metro area for work. This suggests that investments made on key regional facilities will benefit people beyond those people living in the immediate area.
 - 16% of workers in the 7-county metro area stay their home city for work, while the remaining 84% travel to another city.
 - 51% workers in the 7-county metro stay in their home county for work, while
 the remaining 49% travel to another county. For most counties, less than
 one-third of the workers living in a county stay within their home county for
 work. The most notable exception is Hennepin County where 74% of
 workers stay within Hennepin County.

Live and Work in Same County				
Hennepin	424,000	74%		
Ramsey	102,000	43%		
Dakota	75,000	36%		
Anoka	51,000	29%		
Carver	13,000	28%		
Washington	28,000	23%		
Scott	16,000	23%		
Total	710,000	51%		

- 2. There are a large number of workers who live outside the 7-county metro who are traveling to the region for work.
 - Approximately 14%, or 221,000 out of the 1,575,000 people who work in the 7-county metro live outside of it.
 - Approximately 86,000 people who live in the 7-county metro work outside of the metro area.
 - o In 2015, 33,000 more people worked in the 7-county metro and lived outside of the region than in 2002.
 - Wright, Sherburne, Isanti, and St. Croix Counties all have over 40% of their workers coming to the 7-county metro area for employment.
 - O As an example, 5,000 St. Croix County residents are traveling to Washington County for work, 5,000 St. Croix County residents to Hennepin County, and 6,000 St. Croix County residents to Ramsey County. It can be assumed that the vast majority of those 16,000 workers (32,000 daily trips) are using Highway 36 or I-94 as these are the only two St. Croix River crossings from St. Croix County to the metro area. These increased traffic volumes result in additional impact to pavement quality, congestion, and safety.

Council staff developed an online tool to be shared with the TAB where users can select a particular city or county and the tool will output employment flows.

Figure 1: Location of Awarded 2003 - 2016 Regional Solicitation Funded Projects by County

County	2003-2016 Federal Dollars %	Population %	Jobs %	Vehicle Miles Travelled %
Anoka	#4 (10%)	#4 (11%)	#4 (7%)	#4 (13%)
Carver	#7 (5%)	#7 (3%)	#7 (2%)	#7 (5%)
Dakota	#3 (12%)	#3 (14%)	#3 (11%)	#2 (17%)
Hennepin	#1 (43%)	#1 (41%)	#1 (53%)	#1 (34%)

Scott	#6 (7%)	#6 (5%)	#6 (3%)	#6 (8%)
Washington	#5 (7%)	#5 (8%)	#5 (5%)	#5 (10)%
Total	100%	100%	100%	100%

Notes: # = Rank

Notes: Years used in the table (2003-2016) indicate the year of the project selection.

Funds from 2003-2016 will be expended in approximately 2007-2021.

Federal Funding refers to Regional Solicitation funds only and includes funds

for all three modal categories (Roadways, Transit/Travel Demand Management, and Bicycle/Pedestrian).

Data for population and employment based on Metropolitan Council 2016 estimates.

Approximately \$200 million of Regional Solicitation funds are awarded every two years

by the Transportation Advisory Board (TAB).

VMT more closely corresponds with roadway projects.

County	2003-2013 Federal Funding %	2014-2016 Federal Funding %
Anoka	#4 (11%)	#5 (6%)
Carver	#7 (6%)	#7 (3%)
Dakota	#3 (13%)	#3 (9%)
Hennepin	#1 (38%)	#1 (53%)
Ramsey	#2 (18%)	#2 (16%)
Scott	#6 (7%)	#4 (8%)
Washington	#5 (8%)	#6 (5%)
Total	100%	100%

Note: A major restructuring of the Regional Solicitation took place prior to the 2014 funding cycle.
