

## 2019-2022 STIP & 2023-2028 CHIP Overview

Figure 1. 3rd Avenue Bridge (MN 65)

### 2019-2022 State Transportation Improvement Program (STIP)

---

The new funding from the 2017 Minnesota Legislative session continues to impact the MnDOT Metro District program as projects are advanced and new projects are developed in the STIP years. A major river crossing, the 3<sup>rd</sup> Ave Bridge (MN 65), enters the STIP this year.

#### Changes from last year's STIP

##### *Projects moving and being added due to new funding*

- I-35 Pavement in Chisago County advanced from 2021 to 2019
- 3<sup>rd</sup> Ave Bridge (MN 65) in downtown Minneapolis, advanced from 2021 to 2020
- I-94 Pavement and auxiliary lanes in NW Hennepin County, advanced from 2026 to 2020
- Re-thinking I-94, additional investment beginning 2021
- Other infrastructure: \$10M in new funding in each year (2018-2021) is being used to upscope current projects and develop stand-alone roadside infrastructure projects.

##### *Main Streets and Interchange funding*

Some of the new funding has been set aside in 2020 and 2021 for two initiatives in Metro:

- The \$10M/yr Main Streets pool is intended to upscope projects on trunk highways that run through community main streets or are urban reconstruction projects. These funds will close funding gaps for additional needs that MnDOT and locals have identified as long term fixes that cannot be funded in another way.
- A pool for interchange/mobility projects has funding in 2020 (\$10M), 2021 (\$20M), and 2022 (\$25). Through 2021, these funds are intended primarily for MnDOT participation on projects that local agencies are leading on the state highway system.

Funds for both of these funding pools will start to be programmed in this upcoming year.

### Major projects (\$15M+)

In addition to multi-year construction projects, like the I-35W Downtown to Crosstown project, the following projects will begin in STIP years. The pavement projects listed are mainly concrete repair or reconstruction projects that will have major traffic impacts.

#### Major projects

- 2019
  - I-35W North MnPASS from Roseville to Lino Lakes. 3 year project. (Ramsey/Anoka)
  - I-494 from South St Paul to Inver Grove Heights, pavement and auxiliary lane (Dakota)
  - I-94/I-494/I-694 System Interchange in Woodbury (Washington)
  - I-35 from Harris to Chisago/Pine County line, pavement (Chisago)
- 2020
  - 3<sup>rd</sup> Ave Bridge (MN 65) over Mississippi in downtown Minneapolis. 2 to 3 year project. (Hennepin)
  - I-35W/42nd St - Stormwater cavern (Hennepin)
  - Hwy 5 at Minneapolis-St. Paul International Airport, pavement & bridges (Hennepin)
  - I-494 from South St Paul to Eagan, pavement (Dakota)
  - I-94 from Maple Grove to Rogers, pavement. 2 year project. (Hennepin)
- 2021
  - Rethinking I-94 projects – possible interchange rehabs, bridges, pavement, and MnPASS projects. Projects to be programmed in the upcoming year (Hennepin/Ramsey)
- 2022
  - Rethinking I-94 projects – possible interchange rehabs, bridges, pavement, and MnPASS projects. Projects to be programmed in the upcoming year. (Hennepin/Ramsey)
  - US 10/Rum River Bridge (Anoka)

### Corridors of Commerce\*

Two new major mobility projects have been announced for Metro District via the Corridors of Commerce program established via 2017 legislation:

Route	Description	Cost	Starting in FY
I-494	From France Avenue to Trunk Highway 77 eastbound and from Trunk Highway 77 to I-35W westbound, add MnPASS lanes in both directions.	\$134 million	2021
I-494/I-35W	Complete Phase 1 of the I-494/I-35W turbine interchange, northbound to westbound directional ramp.	\$70 million	2021

A third Metro District Corridors of Commerce project was funded via 2018 legislation:

Route	Description	Cost	Starting in FY
T.H. 252 / I-94	Convert to a freeway and add MnPASS lanes Dowling to TH 610.	\$163 million (\$31 in local funds)	---

\*Projects will be added to TIP/STIP after inclusion in regional Transportation Policy Plan

# 2023-2028 Capital Highway Investment Plan (CHIP)

---

## Changes from last year's CHIP

### *Mobility investments*

This past winter, MnDOT modified Minnesota State Highway Investment Plan (MnSHIP) direction and extended funding for Mobility investments past 2023, both for major investments and smaller spot mobility projects. Approximately \$50M/year was moved from pavement investments statewide for 2024, 2025, and 2026 plus some additional general fund revenues were added. MnDOT will work to plan the projects for these Mobility funds in the upcoming year. Post 2026, ongoing funding in the range of \$20-40M/year is anticipated.

### *Major projects (\$15M+)*

The following projects with pavement work are mainly concrete repair or reconstruction projects that will have major traffic impacts. In addition to the projects listed below, the Robert St. Bridge over the Mississippi River in downtown St. Paul may also enter the CHIP years if new funding can be secured.

#### 2023

- I-94 from Century Ave to St. Croix River – Phase 1 - Eastbound only, pavement (Washington)
- US 52 from CR 86 (north of Cannon Falls) to CSAH 42, pavement (Dakota)
- MN 610 from US 169 to Mississippi River – pavement and bridge (Hennepin)
- Rethinking I-94 projects – possible interchange rehabs, bridges, pavement, and MnPASS projects. Projects to be programmed in the upcoming year. (Hennepin/Ramsey)

#### 2024

- I-94 from Century Ave to St. Croix River – Phase 2 - Westbound only, pavement (Washington)
- US 12 from Wayzata to I-494, pavement (Hennepin)
- MN 65 from 153<sup>rd</sup> to 217<sup>th</sup> Av, pavement (Anoka)

#### 2025

- I-494 from 24<sup>th</sup> Av to France Av, pavement (Hennepin)
- MN 55 from Fernbrook to General Mills Blvd pavement (Hennepin)
- I-35E from the 35W/35E split to Lone Oak Rd, pavement (Dakota)
- I-35E from Lone Oak Rd to 10<sup>th</sup> St, pavement (Dakota and Ramsey)
- MN 100 from Cedar Lake Rd to I-694, pavement (Hennepin)

#### 2026

- I-394 Dunwoody Bridge in Mpls, redeck. Will be a 2 year project (Hennepin)
- US 212 from CSAH 4 to MN 62, pavement (Hennepin)
- MN 7 from Minnetrista to Christmas Lake Rd (Hennepin)
- I-35E from south junction I-35E/I-35W to Lone Oak Rd, pavement (Dakota)
- US 169 from CSAH 15 To Bloomington Ferry Br , pavement (Scott County)
- I-694 from Dupont to I-35W, pavement (Anoka/Ramsey)

2027

- I-94 from Nicollet Av to Western Ave, pavement (Hennepin and Ramsey). This is a good example of the frequency of M&O projects on bad pavement foundation. There is a 2020 M&O project on this same stretch
- I-394 from I-494 to MN 100, pavement (Hennepin)
- I-494 from France to US 12, pavement (Hennepin)
- US 52 from Clayton to I-494 and on MN 55 from CR 63 to US 52, pavement (Dakota)

2028

- MN 243 Osceola Bridge redeck/replacement (Chisago)
- I-35 from US 8 to MN 95, pavement (Chisago)
- MN 55 from Wright/Hennepin County line to Fernbrook Av, pavement (Hennepin)
- MN 77 from CSAH 23 to MN 13, pavement (Dakota)

## Transit Funding in the TIP

Both transit capital and operating projects are in the TIP and are funded almost exclusively by four federal sources:

- FTA formula funds: The largest source of funds allocated to the Council as the major transit operator in the region.
- Regional Solicitation funds: Projects funded with FHWA flexible funds – CMAQ or STP - that are allocated through the Regional Solicitation process. These funds are transferred from FHWA to FTA during the grant-making process.
- FTA and DOT discretionary award funds: Bus Livability Grants, Low No Emission and Transit Investments for Greenhouse Gas and Energy Reduction (TIGGER) are FTA discretionary award programs. Transportation Investment Generating Economic Recovery (TIGER) is a USDOT discretionary award. The Council has received all these types of discretionary awards in the past. New discretionary awards are amended into the TIP when the awards are announced by the federal agency.
- FTA New Starts/Small Starts funding: This is funding for major Capital Improvement Grants (CIG) and has funded Blue Line, Northstar, and the Green Line. Future programs funded with CIG funds include the Green Line Extension, the Blue Line Extension, and the Orange Line and Gold Line BRT transitways.

Regional Solicitation transit awards in the TIP include

- D-Line (Chicago/Emerson) rapid bus line technology, equipment and buses;
- City of St. Louis Park park & ride serving the Beltline Green Line Extension station;
- Lake Street/Hennepin Avenue rapid bus line technology, equipment and buses;
- SouthWest Transit creation of transit connector route including additional buses and operating funds;
- Construction of a Minneapolis Metro Transit bus garage;
- Metro Transit creation and expansion of St. Paul bus routes including additional buses and operating funds; and
- Travel Demand Management (TDM)/transportation management organization (TMO) projects

Projects that are not discretionary or CIG are selected from the Metropolitan Council Transit Capital Improvement Program (CIP) for inclusion in the TIP. The CIP is published for public comment before adoption by the Council. Federal formula funds are then used to fund these projects as follows:

- **Section 5307** - Funding for any improvement or rehabilitation of preservation projects, fleet vehicle procurement and new capital projects. This is the most flexible funding.
- **Section 5337 State of Good Repair** – Funding for preservation projects only. This funding has two parts:
  - High Intensity Fixed Guideway – Funding used for fixed guideway preservation including light rail and commuter rail, i.e., LRV overhaul/maintenance, rail maintenance, locomotive or other commuter rail preservation. Funding may also

be used for preservation of BRT on BRT-dedicated roadway (not shoulders or HOV lanes).

- High Intensity Bus – Funding used for bus and bus facilities preservation including bus replacement and maintenance, passenger facility rehabilitation, and park and ride maintenance and rehabilitation.
- **Section 5339 Bus and Bus Facility** – Funding used for replacement bus procurement, bus maintenance and other bus facilities improvements or rehabilitation.

The TIP only includes those transit projects that are federally funded. Therefore, looking only at the TIP does not provide a picture of all transit capital projects as some projects are funded with only local funds. These projects will not appear in the TIP.

APPENDIX C	Streamlined TIP Amendment Process
APPENDIX D	Potential Changes to the Draft TIP

The preparation of this document has been funded in part by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration. The contents of this document reflect the views of the MPO, which is responsible for the facts or accuracy of the data presented herein. The contents do not necessarily reflect the official views of the U.S. Department of Transportation. The report does not constitute a standard, specification or regulation.

## 2019 - 2022 TRANSPORTATION IMPROVEMENT PROGRAM

### SUMMARY

The Twin Cities, Minnesota Metropolitan Planning Organization's Transportation Improvement Program (TIP) for 2019 through 2022 responds to procedures required by the Fixing America's Surface Transportation Act (FAST Act). The legislation requires that all federally funded transportation projects within the metropolitan planning area (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties plus the contiguous urbanized areas<sup>1</sup> in parts of Sherburne and Wright Counties along with Houlton, Wisconsin) be included in the region's TIP. The TIP must be consistent with the projections of federal funds and local matching funds for this time period. All major transportation projects located in the federally defined carbon monoxide non-attainment area must be evaluated for their conformity with the Clean Air Act Amendments (CAAA) of 1990. The air quality conformity analysis must include all federally funded, as well as regionally significant, locally funded projects.

The 2019-2022 TIP for the Twin Cities Metropolitan Area includes projects valued at approximately \$4 billion for highway, freight transit, bicycle, and pedestrian projects. Of this total, approximately \$1.33 billion is supplied by federal highway funds, including Federal Highway Target funds and High Priority Project funds. The region has assumed it will receive approximately \$872 million in federal transit funds over the 2019-2022 period for transit projects.

The Transportation Advisory Board (TAB) to the Metropolitan Council hosts a public comment period on the TIP prior to adoption. Notice of the public comment period is printed in the newspaper and emailed to groups representing a diverse set of stakeholders. The notifications and process are carried out consistent with the Council's Public Participation Plan. The TAB will consider and respond to public comments received on the draft TIP prior to adopting the final TIP.

The 2019-2022 TIP implements, and is consistent with, the region's long-range transportation plan, the Transportation Policy Plan (TPP), adopted by the Metropolitan Council on January 14, 2015, with US DOT conformity determination established on March 13, 2015. The inclusion of a specific project in the TIP does not imply an endorsement of the specific design alternative or engineering details. Inclusion in the TIP is a funding commitment that assumes the project's development process has addressed all local, state, and federal requirements.

The 2019-2022 TIP will be fiscally constrained, will be consistent with the Transportation Policy Plan, will be in conformity with the CAAA of 1990, and its development process will provide acceptable opportunity for public involvement.

---

<sup>1</sup> For definitions, see [Highway Functional Classification Concepts, Criteria and Procedures, 2013 Edition](#), U.S. Department of Transportation Federal Highway Administration

## 1. INTRODUCTION

The 2019-2022 Transportation Improvement Program (TIP) for the Twin Cities Metropolitan Area (shown in Figure 1, including Houlton, Wisconsin, and parts of Wright and Sherburne Counties) is the multimodal program of highway, transit, bicycle, and pedestrian projects and programs proposed for federal funding throughout the metropolitan planning area over the four-year period. The TIP is prepared by the Metropolitan Council and its Transportation Advisory Board (TAB) in cooperation with the Minnesota and Wisconsin's Departments of Transportation (MnDOT and WisDOT). The projects listed in the TIP are consistent with and implement the region's transportation plan and priorities.

### *Federal Requirements and Regional Planning Process*

Federal regulations require that a Transportation Improvement Program:

- Be developed and updated at least every four years.
- Cover a period of at least four years.
- Be a product of a continuing, comprehensive, and cooperative (3C) planning process.
- Be consistent with regional land use and transportation plans and the State Implementation Plan (SIP) for air quality.
- Fulfill requirements of the March 14, 2012, final rule as required by the U.S. Environmental Protection Agency (EPA), Transportation Conformity Rule.
- Identify transportation improvements proposed in the region's long-range transportation plan, the Transportation Policy Plan, and recommended for federal funding during the program period.
- Contain projects that are from a conforming regional metropolitan transportation plan that is fiscally constrained and approved by the Federal Highway Administration.
- Be fiscally constrained, which means that total project costs and anticipated revenues balance.
- Be initiated by locally elected officials of general-purpose governments.
- Include both highway and transit projects.
- Allow opportunities for public participation.
- Reflect the priorities in the metropolitan planning area.
- Indicate the years in which initial contracts will be let.
- Identify the sources of federal funds.
- Include realistic estimates of total costs and revenues for the program period.
- Fulfill requirements of the Executive Order 12898 on Environmental Justice.

The 2019-2022 TIP for the Twin Cities Metropolitan Area will meet all of these requirements and will be submitted to the Minnesota and Wisconsin Departments of Transportation for inclusion in their respective State Transportation Improvement Programs (STIPs) approved by the Governor's designees, the Commissioner of Transportation (MN) and the Secretary of Transportation (WI).

The Twin Cities Metropolitan Area Metropolitan Planning Organization (MPO) certifies that it is in conformance with the provisions of 49 CFR Part 20 regarding lobbying restrictions on influencing certain Federal activities.

## MPO Area - 2015

**Figure 1: Twin Cities Metropolitan Area Political Boundaries – Also includes parts of Sherburne and Wright Counties (MN) and St. Croix County (WI)**

The following information is provided for each project receiving federal funds and listed in Appendix A:

- Program year
- Parent project (only in final TIP)
- Route
- Project number

- MnDOT program category
- Description of the project scope
- Estimated total funding in each year of the TIP along with the amount of federal funds proposed to be obligated
- Amount of advanced construction (AC) funds dedicated to the project in the program year
- Amount of federal, state, and other (usually local) funds dedicated to the project
- Name of the state, regional, or local agency receiving the federal funding and responsible for carrying out the project
- Air quality analysis category

The transportation planning process in the Twin Cities Metropolitan Area is based on Minnesota Statutes and requirements of federal rules and regulations on urban transportation planning that first became effective June 30, 1983, when they were published in the Federal Register. The Metropolitan Council is the designated MPO for the Twin Cities metropolitan area and is responsible for completing the continuing, comprehensive, and cooperative (3C) transportation planning process, as defined in [Title 23, Section 450.306 of the US Code of Federal Regulations](#) (CFR). Since transportation planning cannot be separated from land use and development planning, the transportation planning process is integrated with the total comprehensive planning program of the Metropolitan Council. With the advent of Intelligent Transportation Systems (ITS), the planning process has been expanded to include technology deployment. As of 2005, as defined in [23 CFR 450.306](#), the coordination of technology with the planning process is now required.

The Twin Cities regional transportation planning process is defined in the 2018 Memorandum of Understanding between MnDOT and the Metropolitan Council. Administered and coordinated by the Metropolitan Council, this process is a continuing, comprehensive, and cooperative effort, involving municipal and county governments, the Metropolitan Airports Commission (MAC), MnDOT, the Minnesota Pollution Control Agency (MPCA), transit operators, the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA). Local elected government officials participate in the process through the Transportation Advisory Board TAB. The TAB is a forum for the cooperative deliberation of state, regional, and local officials, intermodal interests, and private citizens. Metro Transit and suburban transit provider representatives are members of the TAB's Technical Advisory Committee (TAC). They participate in planning through the capital and service improvement planning processes coordinated by the Metropolitan Council.

In 2016, the Metropolitan Council adopted the [ITS Architecture](#), which was subsequently adopted by all MPOs in Minnesota. A Regional ITS Architecture provides a vision of how ITS and ITS projects can be deployed to satisfy the goals and objectives outlined in the TPP and serves as a visible demonstration of the institutional dependencies that exist in a region and how agencies can benefit from each other's activities. As needed, the Council coordinates with MnDOT and regional partners to ensure successful ITS integration. The Architecture relates to Title 23, Section 450.306 of the CFR, specifically the metropolitan transportation 3C planning process shall provide for consideration and implementation of projects, strategies, and services that will address a list of factors, including:

- Subsection (b)(6): Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight

- Subsection (d) (4) (vii): An MPO shall integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under 49 U.S.C. chapter 53 by providers of public transportation, required as part of a performance-based program including the congestion management process as defined in [23 CFR 450.322](#), if applicable.
- Subsection (g): The metropolitan transportation planning process shall (to the maximum extent practicable) be consistent with the development of applicable regional intelligent transportation systems (ITS) architectures, as defined in [23 CFR part 940](#).

Similarly, 23 CFR 450.208 calls for the coordination of data collection and analyses with MPOs and public transportation operators to support statewide transportation planning and programming priorities and decisions.

The [Minnesota Statewide Regional ITS Architecture](#):

- Provides MPOs with a useful planning tool for managing ITS funding decisions (Volume 9/ITS Initiatives and Project Concepts for Implementation).
- Improves continuity across the project life cycle, from planning through project development and operations.
- Meets the intent of 23 CFR 940.9.b (“Any region that is currently implementing ITS projects shall have a regional ITS architecture by April 8, 2005.”).
- Any region that is currently implementing ITS projects shall have a regional architecture.
- Formal adoption adds credibility to the Regional ITS Architecture and allows planners to use aspects of the regionally-agreed upon ITS architecture.
- By establishing the process, tools, and support for architecture use and maintenance in these plans, the MPO can ensure financial support for these critical activities.

*Public Participation Opportunities in Preparation of the Transportation Improvement Program*

A concerted effort is made to ensure all interested and concerned parties are offered opportunities to participate in the preparation of the TIP. TAB is accepting public comment on the draft TIP. The following is the schedule of public comment opportunities prior to adoption of the TIP.

- June 20, 2018 – A public meeting of the TAB where it adopted the draft TIP for the purpose of public comment.
- June 23 through August 7, 2018 – The TAB will accept public comments submitted by email, telephone, fax, and mail.
- August 15, 2018 – A public meeting of the TAB where public comments will be reviewed, recommended changes will be considered, and the TIP will be adopted by the TAB and forwarded to the Metropolitan Council for concurrence.

In preparation, the Metropolitan Council will publish a public notice in a newspaper of regional circulation and on [metro council.org](#). In addition, staff will notify groups representing a diverse set of stakeholders about the public comment period. You can sign up to see email alerts at [www.metro council.org](#).

For TIP Amendments (discussed on page 13) public input opportunities are offered at board and committee meetings, during which they are presented as business items. Amendments for

regionally-significant projects require a 21-calendar-day public comment period to begin after TAB releases the amendment for public comment. The comment period is only required for regionally-significant projects that are not currently in the TIP or are changing any project element that requires a new conformity determination.

Metro Transit is using the TIP's public involvement process to satisfy the public participation requirements of the FTA Section 5307 projects. The TIP serves as the FTA Section 5307 program of projects.

### *[Development and Content of the Transportation Improvement Program](#)*

The TIP is an integral part of the overall regional transportation planning and implementation process. TIP preparation is a cooperative effort among local units of government and metropolitan and state agencies. This cooperative process uses technical skills and resources of the various agencies and minimizes duplication by the participants.

The planning base from which projects are identified and developed for the TIP includes the following plans:

- [Thrive MSP 2040](#) establishes the regional outcomes and physical and development policy framework for seven counties within the Twin Cities metropolitan area (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties). Thrive MSP 2040, adopted in 2014, serves as the metropolitan development guide that provides the overarching vision for development of the region.
- The region's long-range transportation plan, the [2040 Transportation Policy Plan](#) (TPP), is one of the four system plans within Thrive MSP 2040. It sets the regional transportation policy for all of the metropolitan area – including urbanized portions of Sherburne and Wright Counties and Houlton, Wisconsin – and identifies the major, long-range transportation investments. The 2040 TPP was adopted in 2015 and addresses all applicable FAST Act requirements and considerations.
- The Council's [Public Participation Plan](#).
- The [Minnesota State Highway Investment Plan 2018-2037](#) (MnSHIP), developed by the Minnesota Department of Transportation and includes the district work plans, which set the investment priorities for the state highway system in the eight-county MnDOT Metro District (includes Chisago County).
- The [Highway Systems Operations Plan 2012-2015](#) (HSOP), developed by MnDOT, includes the operations and maintenance investment priorities for the state highway system.
- Local comprehensive plans and transportation programs, which include transportation plans that – within the seven-county region only – must be consistent with the regional transportation plan developed by the Metropolitan Council.

More information about these plans and planning processes is available in the [Transportation Planning and Programming Guide for the Twin Cities Metropolitan Area](#). Figure 2 summarizes the process used to develop the TIP for the region.

As illustrated in Figure 3, projects are selected for inclusion in the TIP in several ways: selection by Congress of federal High Priority Projects, the TAB Regional Solicitation, MnDOT Metro District selection, and the Council selection for regional transit providers, including projects in the federal New Starts program as selected by Congress. These selection processes are discussed in Chapter 3. While most projects are programmed by MnDOT, the TAB Regional Solicitation projects are programmed, roughly every-other year, by the Council.

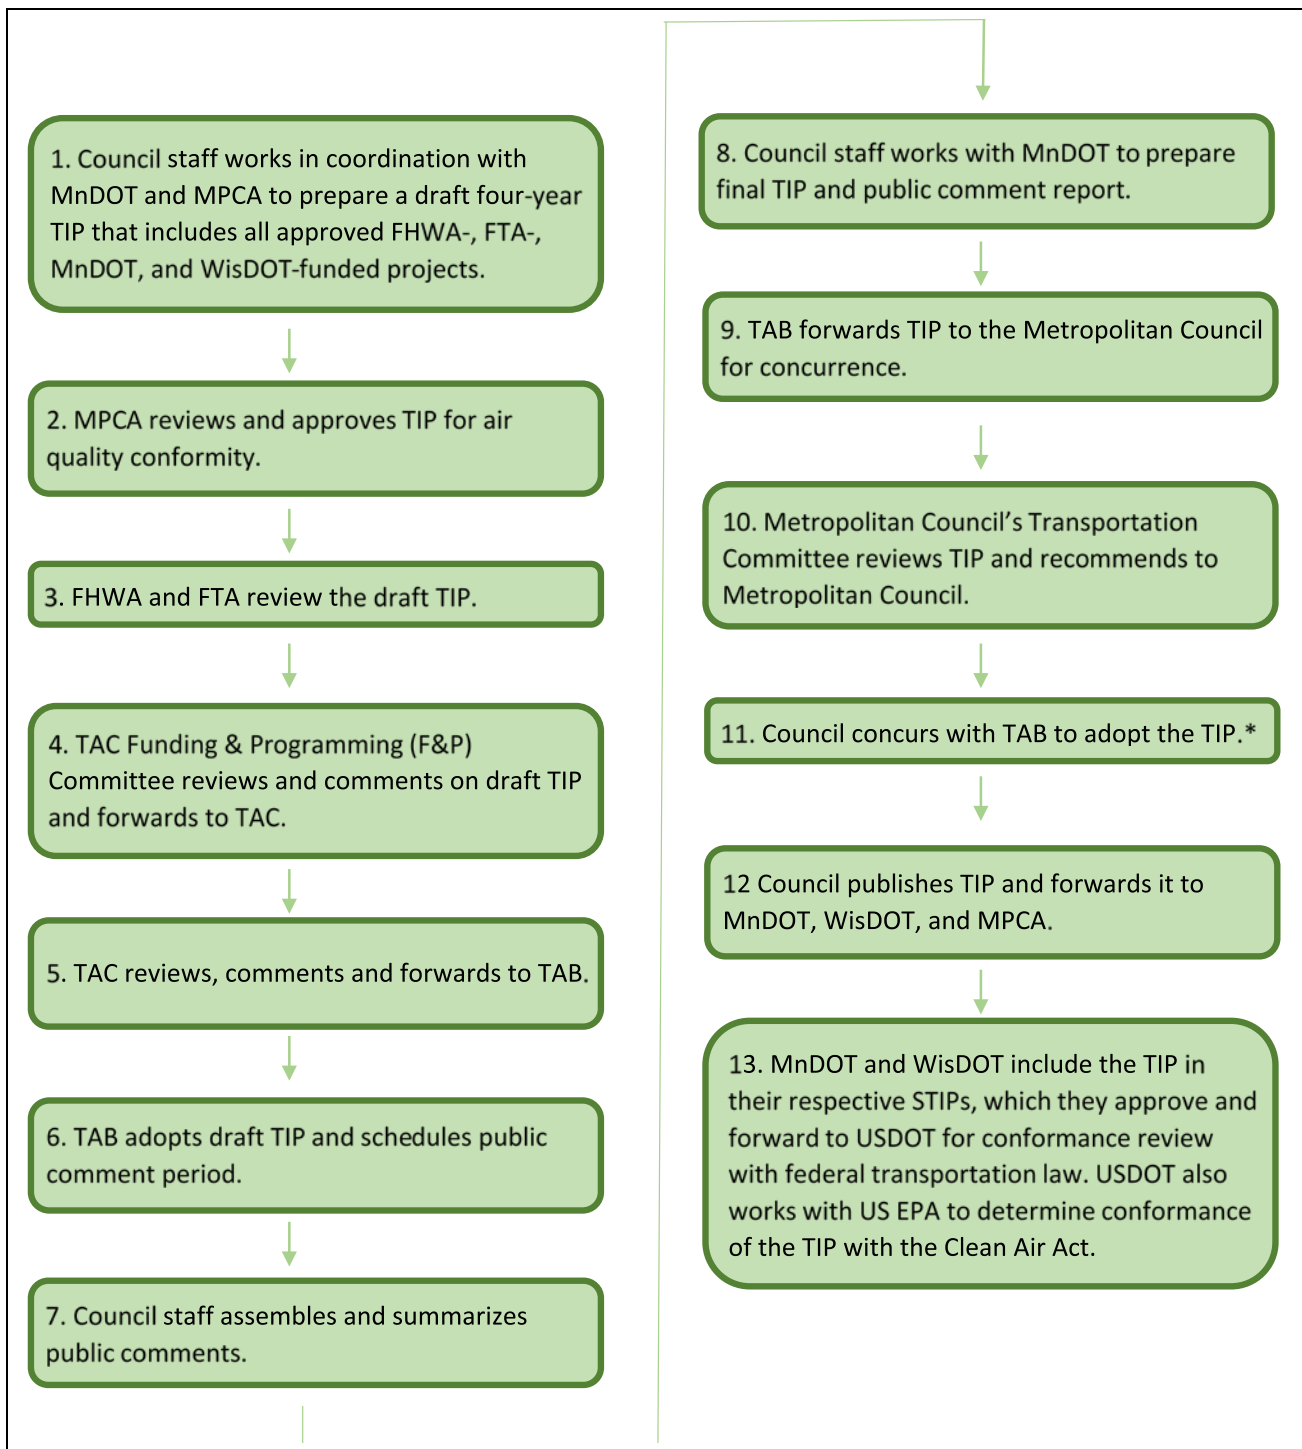

The funding percentages in Figure 3 represent the approximate share of total funds of all projects in the TIP (federal, state, and local), but it should be emphasized that the funding percentages in Figure 3 are not reflective of the total funding package for transportation. The TIP includes MnDOT's entire program, including projects that do not have any federal funding participation. The TIP does not include locally-funded transportation projects for the Metropolitan Council, Metro Transit, Metropolitan Transportation Services, suburban transit providers, counties, and cities. It also does not include the significant amounts of funding required for planning, design, engineering, and right-of-way acquisition that local governments typically pay for projects receiving federal construction funding.

The TPP and the Air Quality Control Plan provide a framework for the development of specific projects by MnDOT, the Metropolitan Council, and county and local governmental units and agencies that are responsible for planning, constructing and operating transportation facilities and services. All projects listed in this TIP must be consistent with the TPP and the transportation Air Quality Control Plan. Many of the highway construction projects included in this TIP are under MnDOT jurisdiction. They originate from ongoing MnDOT planning and programming activities and respond to the region's transportation plan. The projects that lead to the completion of the metropolitan highway system, along with the projects on other major arterials, are based on the region's TPP and on MnDOT's HSIP and programming process. The Metropolitan Council identifies transit service needs and objectives, planned transit service and capital improvements, and the costs and funding sources that help implement the TPP.

The TPP is further refined through more detailed studies, including corridor studies and alternatives studies. These studies, including the needed environmental reviews, lead to specific project recommendations that are included in implementation programs. Other projects, such as those concerned with resurfacing, bridge improvements and safety, arise from continual monitoring and evaluation of existing highway facilities through MnDOT's pavement and bridge management plans.

City and county federal aid projects are products of local comprehensive and transportation planning programs and reflect local and regional priorities. These projects are determined to be consistent with regional plans before being included in the TIP. Such plans must be also consistent with the TPP.

\* The TAB's action is returned for revision only if the Council finds the TIP inconsistent with Council policy.

**Figure 2: Transportation Improvement Program (TIP) Development and Approval Process**

Percentage of funding identified in the TIP by selection process for all projects (federal and state), 2019-2022. Top number represents share of total TIP; the bottom number represents share of federal funding included in the TIP.

\* This TIP includes all projects selected by MnDOT, including those without federal funding. Projects selected by the MnDOT Office of Transit are usually incorporated into the TIP by amendment during the year. Most projects are selected by Metro District, but Sherburne County and Wright County projects are selected by District 3.

\*\* Metro Transit numbers include projects funded with federal New Starts funding.

**Figure 3: Project Selection Processes for Inclusion in the Twin Cities Transportation Improvement Program**

### *Estimating Project Costs*

Projects beyond the first program year of the TIP will most likely be subject to inflation. Projects in the TIP are estimated in recognition of this reality in attempt to determine the cost in terms of year of expenditure. Each programming agency has its own approach to estimating inflated project costs. These approaches are:

- Metro Transit: Inflation is built into project amounts during the process of creating the six-year Capital Improvement Program for Transit divisions at the Council.
- MnDOT: Each year, a revised inflation adjustment table is used to update construction estimates and produce an inflated estimate for each project.
- Metropolitan Council-programmed Regional Solicitation Projects and MnDOT-programmed Highway Safety Improvement Program (HSIP) projects: Projects to be administered by FHWA awarded via the 2016 Regional Solicitation were adjusted at two percent per obligation year when added to the 2017-2020 TIP, with 2016 as the base, from their original cost estimate submitted in their funding application. The adjustments were entirely reflected in the local contribution, as the federal contribution is set at the time of award. The two percent per year adjustment derives from the Federal Reserve present target for inflation. Following this initial placement in the TIP, MnDOT monitors project costs and adjusts them as discussed in the above bullet. For FTA-administered projects, inflation is an assumption in the yearly [Metropolitan Council Transit CIP](#).

### *Amending or Modifying the TIP*

Over the course of the year it sometimes becomes necessary to amend the TIP. Reasons include the addition of a new project, a significant change of scope that alters a project's description, and significant cost changes.

A change to the TIP can go through one of four processes, depending on the nature of the project and the degree to which the project is proposed to change. These include:

- Administrative Modification. An administrative modification requires no board action and is reserved for minor changes, including change of program years, minor cost changes, funding source changes, technical corrections, and splitting a project into multiple projects.
- Formal TIP Amendment. A formal TIP amendment is a more substantive change such as the addition of a federally funded project, a change to the type of work on a project, a significant cost change, and a change in project termini. Formal TIP amendments must be approved by TAB and concurred with by the Metropolitan Council. Formal TIP amendments follow one of three processes:
  - Standard TIP Amendment. Standard TIP amendments are provided to the Funding & Programming Committee and TAC for a technical recommendation before going to TAB for approval. Once a TIP amendment is approved by TAB, the Transportation Committee provides a recommendation to the Metropolitan Council on whether to concur with the approval. The Council then determines whether or not to approve the amendment.
  - TIP Amendment to a Regionally Significant Project. A project is considered regionally significant if it adds one or more travel lanes for over one mile, involves the addition of an interchange, or involves the reconfiguration of an interchange for which a movement is added or eliminated. TIP amendments involving regionally significant projects follow the standard amendment process with the addition of a 21-day public comment period. TAB releases the amendment for

public comment. After the 21-day period is over, the amendment goes back to TAB for approval.

- Streamlined TIP Amendment. The streamlined amendment process was established in 2014 and enables more routine amendments. Streamlined amendments require approval from the TAC Executive Committee at which point they bypass the Funding & Programming Committee and TAC. In order to be eligible for the streamlined process, a proposed amendment must not potentially change the air quality impact of a regionally significant project, impact a project related to a scope change through TAB, or be related to solicitation scoring based on cost effectiveness.

The Metropolitan Council follows FHWA and FTA’s guidance in determining whether a proposed change requires a formal amendment to the State TIP (STIP). That guidance can be found on [MnDOT's website](#). Streamlined TIP amendment guidance can be found in Appendix C.

Cost change thresholds are shown in Table 1.

**Table 1: TIP Amendment and Modification Cost Change Thresholds\***

STIP Total Project Estimated Cost	Modification	Amendment
<\$1,000,000	No modification required**	
\$1,000,001 to \$3,000,000	20%	50%
\$3,000,001 to \$10,000,000	20%	35%
\$10,000,001 to \$50,000,000	10%	20%
\$50,000,001 to \$100,000,000	10%	15%
>\$100,000,000	***	10%

\*FHWA projects. FTA projects use a 20% threshold for an amendment. No threshold exists for a modification.

\*\*Required when total project cost estimate is less than \$1 million AND the proposed total estimate cost remains less than \$1 million.

\*\*\*Processing an Administrative modification for high profile projects (greater than \$100 million), when the change impacts financial constraint, requires prior collaborative discussion with FHWA.

### *Federal Legislation Changes*

The Fixing America’s Surface Transportation Act (FAST) Act was signed into law on December 4, 2016, as a five-year surface transportation authorization. Funding for specific programs is shown in Tables 8, 10, and 11.

In the spring of 2012, the U.S. Census Bureau released the updated 2010 urbanized area (UZA) boundaries for metropolitan areas across the country. This data included portions of Wright and Sherburne counties in Minnesota and Houlton in St. Croix County, Wisconsin in the Minneapolis-St. Paul urbanized area. As the metropolitan planning organization for the Twin Cities, the Metropolitan Council is required by federal law to become involved in the transportation planning efforts of those communities. Therefore, the TIP includes projects in Houlton, Wisconsin, along with the contiguous urbanized areas of Wright and Sherburne counties are now included in the TIP.

### *Federal Program Areas in the Transportation Improvement Program*

Highway and transit funding programs are described below. MAP-21 and FAST Act consolidated federal funding programs and changed eligible activities in some programs.

**Surface Transportation Block Grant (STBG) Program.** FAST Act consolidated the following two programs into the STBG Program, a block-grant type program that may be used for any roads (including NHS) that are not functionally classified as local or rural minor collectors, along with pedestrian projects, recreational trails, and Safe Routes to School projects. Bridge projects paid for with STBG Program funds may be on any public road. Transit capital projects are also eligible under this program. The 2019-2022 TIP still breaks these projects out into the former programs shown below:

- **Surface Transportation Program (STP).** This program was the most flexible program, as road, bicycle, pedestrian, and transit projects were all eligible to receive STP funding. Most STP-funded projects, however, were road projects.
- **Transportation Alternatives Program (TAP).** Under MAP-21, this program replaced the funding from programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and other discretionary programs.

**Congestion Mitigation and Air Quality Improvement Program (CMAQ).** CMAQ directs funds toward transportation projects in non-attainment and maintenance areas for ozone, carbon monoxide (CO), and particulate matter. These projects contribute to meeting or maintaining the attainment of national ambient air quality standards. Historically in the Twin Cities region, CMAQ funds have been used for transportation demand management, transit service expansion, or highway system management projects (such as traffic signal coordination).

**Highway Safety Improvement Program (HSIP).** This program is designed to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-state-owned public roads and roads on tribal lands. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. Railway-Highway Grade Crossing Safety funds are part of this program and focus on improving safety at these crossings.

**National Highway Performance Program (NHPP).** The National Highway System (NHS) consists of 161,000 miles of major roads in the United States. Included are all Interstate highways and a large percentage of urban and rural principal arterials, the defense strategic highway network, and strategic highway connectors. All NHS routes in the region are eligible to use NHPP funds. NHPP provides support for the condition and performance of the NHS, for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a state's asset management plan for the NHS.

**National Highway Freight Program (NHFP).** The FAST Act established the National Highway Freight Network. The NHFP funds projects that contribute to the efficient movement of freight on that designated network.

**Transit Section 5307 Urbanized Area Formula Grants.** This program provides assistance with transit capital and operating costs, including job access and reverse commute activities. This now includes job access and reverse commute activities formerly funded under Section 5316, which was rescinded in MAP-21.

**Transit Section 5309 Fixed Guideway Capital Investment Grants (“New Starts”).** This program funds major new and expanded rail and bus rapid transit system projects.

**Transit Section 5310 Mobility of Seniors and Individuals with Disabilities Program.** This program funds the purchase of lift-equipped vehicles by nonprofit organizations that provide transportation for seniors and individuals with disabilities.

**Transit Section 5311 Program.** This program is available for planning, operating, and capital assistance to areas with populations below 50,000 in rural areas.

**Transit Section 5337 State of Good Repair Program.** This program is designed to maintain public transportation systems in a state of good repair, focusing on fixed guideway and high-intensity bus systems.

**Transit Section 5339 Bus and Bus Facilities Program.** This program provides funds for capital projects to replace, rehabilitate, and purchase buses and bus-related equipment and construct bus-related facilities.

## 2. REGIONAL PLAN AND PRIORITIES

All projects in the TIP are reviewed for consistency with the Transportation Policy Plan (TPP) and the Air Quality Control Plan. The Metropolitan Council adopted the TPP on January 15, 2015, with FHWA/FTA conformity determination established on March 13, 2015. The Plan is in balance with anticipated revenues over the 20-year planning period. The Council carried out an extensive public participation process and held a public hearing on the TPP prior to adoption.

### *Conformity to the Clean Air Act Requirements*

The Clean Air Act Amendment requires a State Implementation Plan (SIP) for air quality for all areas that have not attained the National Ambient Air Quality Standards (NAAQS). The SIP is a planning document prepared by the MPCA and submitted to the U.S. Environmental Protection Agency (EPA) for approval. The SIP contains the programs and plans that will result in achievement of the NAAQS. The SIP serves as the state's legally binding commitment to actions that will reduce or eliminate air quality problems. At the time of passage of the CAA, the Twin Cities Area was designated as a nonattainment area for NAAQS CO standards. All federally approved or financially funded functions must conform to the SIP and be consistent with the TPP. MPOs can only legally approve projects, plans, or programs that conform to the SIP.

### *Conformity Determination Based on the U.S. Environmental Protection Agency Final Rule*

The Clean Air Act Amendments of 1990 require transportation conformity in nonattainment and maintenance areas. Conformity is the process that links transportation to the SIP to reduce emissions and keep the area in compliance with air quality standards. Conformity determinations are required on long-range transportation plans, TIPs, and federally funded or federally approved transportation projects. In Minnesota, the Twin Cities is a maintenance area for carbon monoxide (CO). The term "maintenance area" means EPA previously cited the area for not meeting CO standards but now legally recognizes the area as meeting (attaining) these standards. Maintenance areas must continue to demonstrate that they will meet the standards. EPA designated the Twin Cities to maintenance status on October 29, 1999. On November 8, 2010, in response to a MPCA request, the EPA approved a Limited Maintenance Plan<sup>2</sup> for the former non-attainment area. The conformity rules lay out technical and procedural requirements of conformity and require states to develop their own conformity procedures as part of their SIPs. The Twin Cities area is due to become an attainment area in the fall of 2019.

As described in the rule, the MPO must make a conformity determination on transportation plans and programs for maintenance areas, including federally funded or approved projects, as well as non-federal projects that are regionally significant. The MPO prepared the 2019-2022 TIP following the requirements of the conformity rule. A consultation process was followed, involving the MPCA, MnDOT, U.S. DOT, U.S. EPA and the Council, as described in the provision of the interagency consultation process and in Appendix B.

### *Projects Included in TIP Conformity Analysis*

The TIP conformity analysis involves review of all federally funded or approved highway and transit projects, all state trunk highway projects, and all projects that meet the definition of

---

<sup>2</sup> A limited maintenance plan enables a nonattainment area to be re-designated to attainment with a streamlined maintenance plan if they meet criteria. See more information on limited maintenance plans on [FHWA's Air Quality Transportation Conformity page](#).

regionally significant (see Appendix B) in the Twin Cities maintenance area. Certain project types will not have regional or local emissions impacts. The TIP project tables annotate these projects "exempt" from regional emission analysis with a code under the column "AQ," corresponding to the appropriate category listed in Appendix B. Certain types of exempt projects may require a hotspot analysis.<sup>3</sup> In addition, regionally significant projects programmed in the portion of Wright County within the maintenance area are also included as appropriate in the analysis as documented in Appendix B.

### ***Conformity of the TIP***

The Metropolitan Council and TAB have determined that the TIP conforms to the broad intentions of the Clean Air Act Amendments (CAAA) and to the specific requirements of the final transportation conformity rules (EPA's 40 CFR PARTS 51 and 93). The TIP emissions analysis, using the latest available planning assumptions and other supporting documentation, shows that the TIP will not result in violations of National Ambient Air Quality Standards for carbon monoxide. The TIP is fiscally constrained and comes from the conforming metropolitan transportation plan. Interagency consultation and public participation processes specified in the EPA rule and in the TPP were followed in the development of the TIP and the conformity analysis. A detailed description of the conformity analysis is found in Appendix B.

### ***Thrive MSP 2040***

The TIP is consistent with the 2040 TPP, which is a system plan under the umbrella of Thrive MSP 2040, adopted by the Metropolitan Council on May 28, 2014. Thrive MSP 2040 is the vision for the Twin Cities metropolitan area over the next 30 years. It reflects concerns and aspirations, anticipates future needs in the region, and addresses responsibility to future generations. The region's investments provide an important economic foundation, so all residents can prosper. Transportation, jobs, community development, and affordable housing are the bricks-and-mortar basics that make other things possible.

Thrive MSP 2040 works towards five outcomes: stewardship, prosperity, equity, livability, and sustainability. It is also guided by three principles for how the Council should implement its policies: integration, collaboration, and accountability.

---

<sup>3</sup> From CFR 93.101: A hot spot analysis is an estimation of likely future localized CO, PM<sub>10</sub>, and/or PM<sub>2.5</sub> pollutant concentrations and a comparison of those concentrations to the national ambient air quality standards. Hot-spot analysis assesses impacts on a scale smaller than the entire nonattainment or maintenance area, including, for example, congested roadway intersections and highways or transit terminals, and uses an air quality dispersion model to determine the effects of emissions on air quality.

### 3. FEDERAL PERFORMANCE MEASURES AND TARGETS

Pursuant to Title 23, Section 450.326(d) of the Code of Federal Regulations (CFR), the Metropolitan Council is required to incorporate a performance-based planning approach when developing the TIP. This includes an analysis of the anticipated effect the TIP may have towards achieving the performance targets adopted for the metropolitan area. Specifically, the regulation states: *The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.*

This approach was first established in 2012 with the federal Moving Ahead for Progress in the 21st Century Act (MAP-21), which established performance-based planning and identified the federal performance measures for highway safety, pavement, bridge, reliability, freight, CMAQ, and transit asset management and safety. The requirements continue through the federal Fixing America's Surface Transportation (FAST) Act, signed into law in 2015. The following are the three broad performance measure categories and the dates by which they must be included in the TIP:

- Highway Safety Performance Measure (PM1): May 27, 2018
- Pavement and Bridge Performance Measure (PM2): May 20, 2019
- System Performance Measures and CMAQ (PM3): May 20, 2019

Similarly, the Council must establish transit asset management (TAM) performance targets and incorporate an analysis of the anticipated effect of the TIP towards meeting those targets. The MPO Council has elected to use the targets established by the region's transit providers: Metro Transit; Minnesota Valley Transit Authority; SouthWest Transit; Maple Grove Transit; and Plymouth Transit.

#### *Highway Safety Performance Measure (PM1)*

##### **Council Activities and Progress**

The Transportation Policy Plan (TPP), which serves as the Metropolitan Transportation Plan (MTP) for the Council, includes an overarching goal related to highway safety—the Safety and Security Goal, as well as objectives and strategies (actions) the Council will employ to ensure that the desired safety outcomes are met. In addition, the five federally required safety performance measures and targets are included in the TPP appendices and the Performance Outcomes chapter reports on existing conditions and performance trends for all of the regional performance measures.

The region has implemented a number of proactive and reactive strategies to improve the safety for users of all modes within the metro area. These include a commitment to aggressively reduce the number of crashes involving fatalities and serious injuries annually, with the ultimate aspirational goal of achieving zero fatal and serious injury crashes. Pursuant to federal requirements, the Council must annually adopt highway safety performance targets that are reasonable and achievable. The Council thus adopted targets that reflect a 3% and 5% annual reduction from the base-year data for fatalities and serious injury crashes, respectively. The Council will continue to annually target a reduction in fatal and serious injury crashes and prioritize the safety of the travelling public over all other goals.

The Council officially adopted the regional Safety Performance measures on January 24<sup>th</sup>, 2018, and submitted them to MnDOT. Table 2 shows the existing conditions for the metro area and the adopted targets for 2018.

**Table 2: Existing Conditions and Adopted Highway Safety Targets for 2018**

<b>Measure</b>	<b>Existing Condition</b>	<b>2018 Target</b>
Total Traffic Fatalities	98 (2015)	89
Fatality Rate (per 100 million VMT)	0.35	0.31
Serious Injury Crashes	749 (2016)	642
Serious Injury Crash Rate (per 100 million VMT)	2.67	2.35
Non-motorized fatalities/serious injury crashes	131	112

The Council continues to work closely with MnDOT to develop state targets for the PM2, PM3, and CMAQ measures, and will submit the regional targets to MnDOT prior to the November 15<sup>th</sup>, 2018 deadline. In the future, TIPs will include adopted regional targets for all three of the performance measure categories.

In addition to the TPP, the Council and its regional partners have completed several studies that directly address safety issues and propose strategies to improve safety in the metro area. These studies and plans include the Minnesota Strategic Highway Safety Plan; the Congestion Management and Safety Plan IV; the Principal Arterial Intersection Conversion Study; and applicable modal and county-produced safety plans.

Efforts like [Towards Zero Deaths](#) and [Vision Zero](#) promote the long-term goal of eliminating fatalities and serious injuries on the transportation network. The Council supports these goals and will consistently work toward reducing fatalities and serious injuries toward that end. This long-term goal, however, will be achieved incrementally and these performance targets set an achievable increment in the near term.

***Anticipated Effect of the Safety Performance Measures***

Due to the fact that the metro area’s fatal and serious injury crash rates are significantly lower than those of the state as a whole, the Council developed and adopted 2018 targets specific to the metro area. These targets were developed using the same methodology that MnDOT employed to establish the statewide targets but adapted to account for safety performance in the metro area. While transportation safety figures are more positive in the metro area than in Greater Minnesota, the region is committed to further improving transportation safety. This is reflected in the importance of safety-related scoring criteria included in the Regional Solicitation and in MnDOT’s project selection, and in the projects that are ultimately programmed into the TIP.

The 2019-2022 TIP is anticipated to have a positive effect towards meeting the region’s established safety performance targets. The TIP reflects \$56 million in FHWA Highway Safety Improvement Program (HSIP) funds, in addition to local match funding (at least 10%). These projects address both existing high-incident locations (reactive projects) and the design of newer projects (proactive projects) that pre-emptively address safety in their design. Further, safety is a key scoring criterion for the roadway expansion, roadway reconstruction / modernization, roadway system management, multiuse trails and bicycle facilities, pedestrian facilities, and safe routes to school funding categories in the biennial Regional Solicitation. In addition to federal funding sources, the region has used a number of other revenue sources to improve transportation safety in the metro area. Examples include a number of county- and city-funded safety projects as well as MnDOT’s CMSP funding setaside each year.

While the 2018 safety targets reflect an improvement over historical performance, they should nonetheless be attainable. Some individual years might have a spike in fatal and serious injury crashes, but the overall long-term trend has been a significant decrease in serious-injury and fatal crashes. Serious-injury crash numbers are somewhat prone to human error, as the emergency vehicle operator has to manually enter information on the crash. This may potentially lead to unexpected results but is less likely to be a problem in the metro area than in rural areas of Minnesota.

### ***MPO Investment Priorities***

The Council has adopted a number of objectives and strategies intended to improve transportation safety and meet the 2018 safety targets. As outlined in the Transportation Policy Plan, these include the following objectives:

- Reduce fatal and serious injury crashes and improve safety and security for all modes of passenger travel and freight transport.
- Reduce the transportation system's vulnerability to natural and man-made incidents and threats.

Specific strategies the Council and its partners will use and implement to meet these objectives are as follows:

- Regional transportation partners will incorporate safety and security considerations for all modes and users throughout the processes of planning, funding, construction, and operation.
- Regional transportation partners should work with local, state, and federal public safety officials, including emergency responders, to protect and strengthen the role of the regional transportation system in providing security and effective emergency response to serious incidents and threats.
- Regional transportation partners should monitor and routinely analyze safety and security data by mode, severity, and location to identify priorities and progress.
- Regional transportation partners will support the state's vision of moving toward zero traffic fatalities and serious injuries, which includes supporting education and enforcement programs to increase awareness of regional safety issues, shared responsibility, and safe behavior.
- The Council and regional transit providers will provide transit police services and coordinate with public safety agencies to provide a collaborative approach to safety and security.
- Regional transportation partners will use best practices to provide and improve facilities for safe walking and bicycling, since pedestrians and bicyclists are the most vulnerable users of the transportation system.
- Airport sponsors and air service providers will provide facilities that are safe, secure and technologically current.

While it is too early to assess whether the strategies are having the intended effect, the Council and its partners will closely monitor safety performance and re-prioritize should it be necessary.

The Council supports the efforts to move towards a performance-based planning approach, and will continue to work closely with regional, state, and federal partners to proactively establish and monitor both the required federal and the regionally adopted performance measures over time. Moving forward, the Council will continue to devote substantial resources to this effort and

work closely with stakeholders to assess the federal targets and the regional performance measures and adjust to changes in the performance of the system by shifting regional investment priorities.

### *Transit Asset Management (TAM) Performance Targets*

Transit asset management (TAM), a best practice and a requirement under federal law, is a business model that prioritizes funding decisions based on the condition of transit assets. Transit providers are required to assess, track, and report on their assets to FTA, and develop annual targets for asset management to ensure a state of good repair. Transit providers also develop transit asset management plans that document the implementation actions for asset management within their transit systems. TAM must be coordinated with the Council, which is the region’s MPO. The four FTA-required performance measures for transit asset management are:

- Rolling stock (buses and train used for serving customers): The percentage of revenue vehicles (by type) that exceed the useful life benchmark.
- Equipment (vehicles used in a support role): The percentage of non-revenue service vehicles (by type) that exceed the useful life benchmark.
- Facilities: The percentage of facilities (by group) that are rated less than 3.0 on the [Transit Economic Requirements Model \(TERM\) Scale](#).
- Infrastructure: The percentage of rail track segments (by mode) that have performance restrictions. Track segments are measured to the nearest one-hundredth of a mile.

The region’s transit operators officially established 2018 performance targets on April 1 of 2018. Table 3 summarizes the 2018 targets, which will be adopted by the MPO prior to October 1, 2018.

**Table 3: Existing Conditions and Adopted Highway Safety Targets for 2018**

<b>Measure</b>	<b>2018 Target</b>
<b>Rolling Stock: % exceeding useful life</b>	
Articulated Bus	8%
Over-the-Road Bus	0%
Bus	2.4%
Cutaway	14%
Light Rail Vehicle	0%
Commuter Rail Locomotive	0%
Commuter Rail Passenger Coach	0%
<b>Equipment: % exceeding useful life</b>	
Automobiles	42%
Trucks/other Rubber Tire Vehicles	38%
<b>Facility: % rated below 3 on condition scale</b>	
Passenger/Parking Facilities	0%
Administrative/Maintenance Facilities	0%
<b>Infrastructure: % of track with performance restrictions</b>	
Light Rail	1%

### ***Transit Investment Priorities***

The Council's Transportation Policy Plan (TPP) outlines the goals, objectives, and strategies that are used to set transit investment priorities for the region. These factors, in turn, directly guide the investment plan and transit projects programmed within the TIP. The TPP guides transit investments through the following objectives and strategies:

- Efficiently preserve and maintain the regional transit system in a state of good repair;
- Manage the regional transit network and respond to demand as deemed appropriate based on the Transit Market Area;
- Provide transit police services and coordinate with other public safety agencies to ensure the safety and security of the transit system;
- Promote alternatives to single occupant vehicles and ensure transit services reach major job and commercial activity centers;
- Expand and modernize transit service, facilities, systems, and technology to meet demand, improve customer experience, and increase transit access to destinations.

The Council's [Fleet Management Procedures](#) provide guidance for minimum vehicle life and inform the TAM performance targets established by the region's transit providers. This document outlines the conditions used to determine if the replacement of assets is necessary or can be deferred, including the point at which fleet vehicles are eligible for mid-life rehab procedures. The Fleet Management Procedures also set the principles used for determining the end vehicle's useful life, a preventative maintenance schedule, and the process for the purchase of new vehicles.

The primary pool of funds used to replace aging assets is FTA Sections 5337 and 5339, which are prioritized via the Regional Transit Capital Improvement Program (CIP), developed by Metro Transit and the suburban transit providers.

#### **4. PROJECT SELECTION PROCESSES AND CONSISTENCY WITH FINANCIAL RESOURCES AND ADOPTED TRANSPORTATION PLAN**

This chapter discusses the sources (federal, state, regional, local) and amount of transportation funds available for projects and programs in the region; the processes used to select projects and programs for inclusion in the TIP; the balance between costs for selected projects and resources; and project consistency with the region's long-range transportation plan, the Transportation Policy Plan (TPP). A key element in the TIP fiscal constraint analysis is the balance between anticipated revenues and project costs.

##### *Processes to Allocate Federal and State Transportation Funds*

Several processes are used to allocate federal and state transportation funds to the Twin Cities Metropolitan Area. Projects have been selected for inclusion in the TIP by Congress (federal High Priority Projects and New Starts program), the TAB Regional Solicitation, MnDOT Metro District, and Council selection for regional transit providers.

Federal highway funding that goes to the TAB Regional Solicitation and to MnDOT Metro District is allocated by federal and state formulas. For federal and state highway funding, MnDOT uses a process to allocate the funds to the state's eight Area Transportation Partnership (ATP) regions, one of which covers the MnDOT Metro District. This process ensures the regional TIPs and the State Transportation Improvement Program (STIP) for highways meet the federal fiscal constraint requirement. The MnDOT fund allocation process has four steps:

1. The MnDOT Office of Transportation System Management (OTSM) identifies the amount of funds available to each ATP for the TIP period from the STBG Program, CMAQ, and HSIP programs. This funding amount is called the "funding target." The funding targets are sent to the ATPs for comment along with guidance for draft TIP preparation.
2. The ATPs, of which the MnDOT Metro District is one, develop their draft TIPs using its funding target.
3. OTSM reviews the draft TIPs, confirms the total highway funding amount programmed matches the total expected funding, and confirms fiscal constraint for the highway funding. All of the draft TIPs assembled together are called the draft State Transportation Improvement Program (STIP).
4. OTSM circulates the draft STIP to the ATPs. Each ATP may then modify and adopt their final TIP and submit it to MnDOT for inclusion into the final STIP.

Some transit funding is allocated by federal formula (Section 5307, Section 5310, Section 5311, Section 5337, and Section 5339), but funding for the federal New Starts program (Section 5309) is secured through national competition. Chapter 1 includes a list of each federal transit funding program and describes eligible projects. Section 5307, 5337, and 5339 funds are provided to the Council as the region's designated federal recipient and allocated among all regional providers. Section 5309 is discretionary New Starts and Small Starts funding appropriated by Congress to major transit capital projects. The New Starts funding is awarded to the Metropolitan Council after a major competitive process involving environmental review, preliminary engineering and design, and obtaining commitments of 50 percent of the total cost of the project by local cost-sharing partners. Section 5310 and Section 5311 funds are provided to the MnDOT Office of Transit as the State's designated agent.

**Resources Available 2019–2022**

All federally funded projects require a local match provided by the sponsoring agency. This local match can come from state trunk highway funds, state general funds, state bond funds, motor vehicle sales tax (MVST) funds, regional transit capital bond funds, city or county general funds, county transportation sales tax funds or from funding from other agencies. The local match funds add to the resources available to pay for the projects in the TIP.

Transportation resources available to the region for highway, transit, and non-motorized projects are approximately \$4 billion over the 2019 to 2022 period (See Tables 6, 7, and 8). These funds include capital investments for highway, transit, and non-motorized modes and some operating funds for the metropolitan transit systems. Highway programs such as the Surface Transportation Block Grant (STBG) Program also provide funding for non-motorized investments listed as Bike/Ped projects in Appendix A, as well as bicycle and pedestrian elements of roadway projects. The approximate amounts programmed by mode are listed in Table 4. These numbers are approximate because many projects, particularly roadway projects, include investments designed for more than one mode and are listed with the primary mode served.

**Table 4: Approximate Amount Programmed by Primary Mode Served\***

<b>Mode</b>	<b>Approximate Amount Programmed in 2019-2022</b>	<b>Share of total TIP</b>
<b>Highway/Roads</b>	\$2.02 billion	49.9%
<b>Bike/Ped Only</b>	\$98.2 million	2.4%
<b>Transit/TDM</b>	\$1.63 billion	40.2
<b>Other/Set-asides</b>	\$301.9 million	7.5%
<b>Total</b>	<b>\$4.05 billion</b>	<b>100%</b>

\*Many highway projects include significant bicycle and pedestrian elements such as trails, sidewalks, streetscape improvements and dedicated bike lanes and shoulders. The costs of these elements are not allocated to “Bike/Ped Only” in this table. Overall spending on bicycle and pedestrian infrastructure is higher than reflected in the “Bike/Ped Only” figure, which is the approximate sum of funds for projects dedicated solely for bicyclists and/or pedestrians. “Other/Set-asides” include all projects that do not directly serve a mode such as right-of-way purchase or environmental work.

**Highways and Roads**

The traditional highway funding sources available to the region are summarized in Table 7. The four-year total is approximately \$2.6 billion. The four-year total includes \$1.3 billion of Federal Formula funds and \$422 million of Minnesota state Trunk Highway funds for Minnesota and \$5 million for projects in Wisconsin.

MnDOT also uses the advanced construction (AC) process to extend its available resources. MnDOT constructs federal aid projects in advance of the apportionment of authorized federal aid funds. MnDOT has to meet a number of conditions to use the AC process. MnDOT can commit future federal funds to projects as long as they go through the normal FHWA approval and authorization process. The projects using AC must be fully encumbered in the state budget for both the amount of state funds and the federal AC amount. The state funds available at contract letting must equal 100% of the local match of federal funds. This is normally 10 or 20 percent of the project costs. The AC amounts must be shown in the TIP. (The detailed tables in Appendix A identify AC by project.) The AC must be shown in the year incurred and in each year the conversion takes place. Sufficient cash must exist to make project payments until AC is converted or the amount of work to be undertaken in a given construction season that does not exceed the actual federal funds available for that year. Within the TIP timeframe, \$162 million

will be used to advance construct projects in the region (Table 6). The AC funds that have been or will be used by the region by year are shown in Table 5.

**Table 5: Advanced Construction Funds (Millions)**

2022	UPDATED IN THE FINAL TIP	
Post-2022		
Total		

Local funds are necessary to match the federal transportation funds. The majority of the projects on the trunk highway system are matched with trunk highway funds included in the targets and not in the local match figure. In all other cases, the federal funds are matched by city or county funds, regional transit capital or operating funds, or funds from other agencies such as the Minnesota Department of Natural Resources. At a minimum, these funds represent 20 percent of the project cost (aside from HSIP, which requires a 10 percent match), although this can be significantly higher. Local funding represents \$425 million over four years.

***Transit***

Transit funds available to the region in 2019-2022 are summarized in Table 8. Included are federal transit funds and regional capital bonds used to match federal funds. This table does not show any highway funds allocated to transit. An estimated \$849.1 million in federal transit funds will be received by the region in the next four years. Note that Section 5309 funding, which constitutes roughly \$474.1 million of that amount, has been requested, but has not yet been authorized by FTA.

The region generates transit capital and operating funds from four principal sources: fares, the state motor vehicle sales tax for operations, regional property taxes dedicated to repay bonds that fund capital projects, and state general funds that are directed to the region’s ADA service, the regular transit service or to repay state bonds for transit projects. The suburban transit providers<sup>4</sup> may also use local general fund money to subsidize operating cost or to match federal funds. Regional Capital Bonds and other local funds of \$559 million will be used to match federal transit funds (including Section 5309) and to locally fund various transit capital investments.

---

<sup>4</sup>Twelve cities have elected to provide their own transit service. Today, through agreements and consolidations, the region includes four suburban transit providers (SW Transit, MVTA, Maple Grove and Plymouth ).

### *Project Selection Processes and Criteria*

The processes followed for selection of projects to use the resources described above vary depending on the type of funds. The sources of federal transportation funds that come to the region are summarized below, along with the processes followed for project selection and the agency that is responsible for each selection process. These processes are described on the following pages.

**Table 9: Summary of Federal Project Funding Categories and Selection Processes**

<b>Funding Category</b>	<b>Project Selection Process Followed</b>
Federal High Priority Projects	Selected and appropriated by Congress
Federal Highway Funding	-
National Highway Performance Program (NHPP)	MnDOT Metro District Process with guidance from Capital Improvement Committee (CIC)
National Highway Freight Program (NHFP)	MnDOT Central Office Process
Surface Transportation Program (STP), Transportation Alternatives Program (TAP), Congestion Mitigation and Air Quality Improvement (CMAQ) Program	Competitive Regional Solicitation Process conducted by the Transportation Advisory Board (TAB). NOTE: FAST Act created the Surface Transportation Block Grant (STBG) Program, which combines the former STP and TAP programs.
Highway Safety Improvement Program (HSIP)	Competitive regional solicitation process conducted by MnDOT and TAB
Federal Transit Funding	-
Section 5307	Regional Transit Capital Improvement Program (CIP) developed by Metropolitan Council with suburban transit provider assistance
Section 5309	Selected and appropriated by Congress
Section 5310	MnDOT Office of Transit/Statewide Competitive Process
Section 5311	MnDOT Office of Transit/Categorical Allocation
Section 5337 and 5339	Regional Transit Capital Improvement Program (CIP) developed by Metropolitan Council

***Project Selection Process for Additional Federal Highway Funds by MnDOT Metro District with Assistance from the Capital Improvement Committee***

MnDOT Metro District, with guidance from its partners through the Capital Improvement Committee (CIC), identifies and selects projects on the state trunk highway system to be funded using National Highway Performance Program (NHPP) funds and included in the TIP. The CIC's membership includes representation from MnDOT Metro District, the Transportation Advisory Board, the Metropolitan Council, and six representatives of the TAB's Technical Advisory Committee (TAC). The CIC provides guidance in developing investment strategies for MnDOT programs, prioritizing projects across program categories, and identifying major programming issues for consideration by MnDOT Metro District leadership (in the Metro District Program Committee) and the TAC Funding and Programming Committee. Investment decisions with statewide impacts may be elevated to the Transportation Program Investment Committee (TPIC) for consideration. TPIC membership includes the Metro District Engineer and other agency-wide leadership.

The Metropolitan Council and MnDOT have cooperatively identified priorities to be used in the selection of major projects to be included in the TIP. The priorities and projects are drawn from the TPP and the Minnesota State Highway Investment Plan (MnSHIP), 2018-2037. Investments and specific projects are identified consistent with priorities outlined in those plans, which over

the next 10 years balance preservation of existing infrastructure with investments in safety, new connections for multiple modes, and some projects that advance economic development and quality of life objectives.

### *Competitive Regional Project Selection Process*

The Metropolitan Council and its Transportation Advisory Board (TAB) conduct a competitive process for the selection of local projects for federal highway funding and inclusion in the TIP. The Regional Solicitation was designed by the region's partners to help the region implement its plans and high priority projects and programs. The TAB's Regional Solicitation allocates approximately 18 percent of the federal funds that are available to the region. The Regional Solicitation process directs federal funds to a variety of locally-initiated projects that address transportation problems and help implement regional transportation and development policies. These locally-initiated projects from cities and counties reflect local and regional priorities and are products of local comprehensive and transportation planning programs. These local projects must be consistent with the region's long-range TPP. Projects using STBG, CMAQ, and HSIP funds are selected through the Regional Solicitation process. The priorities for project selection are based on the goals and policies in Thrive MSP 2040 and Transportation Policy Plan.

The 2016 Regional Solicitation selected projects for federal highway funding in program years 2017-2021 (mostly 2020-2021) in the following categories:

- Roadways Including Multimodal Elements
- Roadway Expansion
- Roadway Reconstruction and Modernization
- Roadway System Management
- Bridges
- Bicycle and Pedestrian Facilities
- Multiuse Trails and Bicycle Facilities
- Pedestrian Facilities (Sidewalks, Streetscaping, and ADA)
- Safe Routes to School (Infrastructure Projects)
- Transit and Travel Demand Management
- Transit Expansion
- Transit System Modernization
- Travel Demand Management (TDM-projects selected for 2018-2019)
- Highway Safety Improvement Program

HSIP projects are evaluated and awarded funds through a process administered by MnDOT, due to the specialized technical nature of the projects. TAB reviews and approves the criteria MnDOT develops for HSIP project evaluation along with the prioritized list of projects for funding.

Scoring committees, comprised of local partners, state agency staff, and Metropolitan Council staff evaluate and rank all categories of projects for the Regional Solicitation. Recommended projects are reviewed and approved by the Funding and Programming Committee, which, using the scoring committee rankings, recommends funding allocation options to be considered by TAC and recommended to TAB. TAB approves a list of projects and funding allocation developed through the Regional Solicitation process.

Qualifying and prioritizing criteria, used to evaluate each project, vary by mode and category. The evaluations produce a score and category ranking for each project, based on the project's anticipated performance for each prioritizing criteria. The qualifying and prioritizing criteria were developed consistent with, and for the purposes of, implementing regional transportation priorities and plans. Examples of qualifying criteria and prioritizing criteria are listed below.

***Examples of Qualifying Criteria***

- The project must be consistent with the policies of Thrive MSP 2040 and the region's Transportation Policy Plan adopted by the Metropolitan Council.
- The project must implement a solution to a transportation problem discussed in a local or county comprehensive plan and/or in an approved Capital Improvement Program (CIP) of a local, regional, or state agency.
- The proposer must include with the project's application a letter from the agency with jurisdiction over the facility affected, indicating the agency is aware of and understands the project being submitted and that it commits to operate and maintain the facility for its design life.
- The proposer must show that the project has been coordinated with all affected communities, the appropriate transit operator, and other levels of government.

***Examples of Prioritizing Criteria***

- Role in the regional transportation system and economy
- Current or potential usage
- Demonstrated present and future need for facility
- Infrastructure age or condition
- Congestion reduction
- Integration of modes
- Collision reduction and safety
- Equity
- Likelihood of project coming to fruition (i.e., assessment of risk)
- Cost effectiveness
- Air quality

***Regional Solicitation Selected Projects***

A summary of the federal funding allocated by category through the Regional Solicitation process is shown in Table 10. This table reports only the federal funds allocated to the projects and does not include the local match.

**Table 10: Summary of Federal Funding Allocated through the TAB’S Regional Solicitation for Projects in State Fiscal Years 2018-2021 (Federal funds/in millions; Federal Amount only)**

<b>Program Category</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>	<b>Total</b>
Transportation Alternatives (TAP)	\$10.4	18.3	9.1	7.1	44.9
Congestion Mitigation Air Quality (CMAQ)	\$24.1	17.6	18.6	50.7	111.0
Surface Transportation Program (STP)	\$47.2	63.3	63.4	48.0	221.9
Highway Safety Improvement Program (HSIP)	\$8.9	7.8	8.6	10.4	35.7
<b>TOTALS</b>	<b>\$90.6</b>	<b>107.0</b>	<b>99.7</b>	<b>116.2</b>	<b>413.5</b>

*Transit Project Selection for Sections 5307, 5337, 5339, and 5309 New Starts/Major Capital Investment Funding*

Federal transit funds come to the Metropolitan Council as the designated federal recipient for the region. The Council uses the federal funds for bus, light rail vehicle, and locomotive purchases; bus and rail vehicle rebuilding; shelters; garages; guideway improvements such as shoulder bus lanes, light rail track and systems; and maintenance and operations. These projects are identified in The Council’s six-year Capital Improvement Program, which is a tool used to implement the regional transportation plan. The Council also submits projects for funding with federal transit funds and Regional Capital Bonds.

*Transit Project Selection for Sections 5310 and 5311 Funding*

Federal Transit Administration (FTA) Section 5310 and 5311 funds are allocated by MnDOT’s Office of Transit. Section 5310 funds are competitively allocated through a statewide process to non-profit agencies for vehicles. Projects are selected annually so each year the TIP is revised or amended and a new list of projects is included for the next fiscal year. Section 5311 allocates operating funds for small city transit service. There are three transit services in the region that receive funds.

*Balance of Selected Projects with Available Financial Resources*

The FAST Act requires that the region’s TIP must be consistent with funds reasonably expected to be available. This is called fiscal constraint and means the projects recorded in the TIP cannot significantly exceed expected revenues.

For federal and state highway funding, the state and region have agreed on a process that ensures a balance exists between federal highway funding resources and expenditures as discussed at the beginning of Chapter 3. The highway project program costs identified in Table 11 for 2019 to 2022 closely match the funds available as shown in Table 7, and the highway project program costs identified in Table 12 for State Fiscal Year 2019 closely match the funds available as shown Table 7. Anticipated highway revenues balance with expenditures and demonstrate fiscal constraint.

For federal, state, and regional transit funding, federal guidance requires transit funds match the approved project costs in the TIP. The projects funded with federal transit and local matching funds for 2019 have a total value of approximately \$120.3 million (Table 8).

**Table 11: Distribution of Federal Highway, State Trunk Highway and Matching Funds (in millions) 2019-2022**

\*\*Advanced construction is shown in Tables 11 and 12 but the AC amounts are not included in the totals.

### *State Highways and Local Transportation Operations and Maintenance*

MnDOT and metro area cities and counties are able to fund the maintenance and operations of the region's highway system over the course of the 2019-2022 TIP. The 2040 TPP forecasts \$2 billion in revenue for operating and maintaining state highway assets and \$17 billion for local roadways from 2015 to 2040. The TPP's increased revenue scenario shows an additional state highway need of \$1 billion for that time frame.

### *Consistency with the Regional Transportation Plan and Priorities*

All projects in the TIP must be consistent with the region's [2040 Transportation Policy Plan \(TPP\)](#). The region's transportation goals are:

- Transportation System Stewardship: Sustainable investments in the transportation system are protected by strategically preserving, maintaining, and operating system assets.

- **Safety and Security:** The regional transportation system is safe and secure for all users.
- **Access to Destinations:** People and businesses prosper by using a reliable, affordable, and efficient multimodal transportation system that connects them to destinations throughout the region and beyond.
- **Competitive Economy:** The regional transportation system supports the economic competitiveness, vitality, and prosperity of the region and state.
- **Healthy Environment:** The regional transportation system advances equity and contributes to communities' livability and sustainability while protecting the natural, cultural, and developed environments.
- **Leveraging Transportation Investments to Guide Land Use:** The region leverages transportation investments to guide land use and development patterns that advance the regional vision of stewardship, prosperity, livability, equity, and sustainability.

The TPP contains lists of short- and long- range transportation projects programmed from 2015 through 2024. The projects identified in this TIP are either programmatically or specifically identified in the TPP adopted by the Metropolitan Council on January 14, 2015, with FHWA/FTA conformity determination established on March 13, 2015. See the TPP on the [Metropolitan Council's website](#).

### *Plan Implementation Progress*

#### **Status of Major Projects**

Federal TIP guidance requires the progress made on implementing the region's transportation plan be reported annually. Tables 13 and 14 identify the major highway and transit projects in the 2019-2022 TIP, cost, and status of each. The discussion here summarizes the progress made on major projects and projects authorized in the previous fiscal year, 2018. During the past year, major projects completed included:

- I-694 in Shoreview and Arden Hills-Pavement reconstruction and the addition of a lane in each direction.
- US 169 over Nine Mile Creek in Edina, Minnetonka, and Hopkins-replacement of the bridge carrying US 169 over Nine Mile Creek with a causeway (i.e., a raised roadway over low or wet ground).
- I-94 between I-35E and Century Avenue in St. Paul, Maplewood, Oakdale, and Woodbury-pavement fix, noise wall work, bridge work, and a new auxiliary lane along eastbound I-94 from I-35E to Mounds Boulevard.
- I-94, Minneapolis to Brooklyn Center-Bituminous overlay, pavement rehabilitation, ADA ramps, sidewalks, curb & gutter, drainage, concrete barrier, guardrail, de-icing system, TMS, rehabilitation on 50 bridges and bridge railing, corridor lighting. Project due to be complete in August 2018.

All of the major projects are either specifically included in the region's Transportation Policy Plan or are consistent with the Plan's policies. The tables and maps in the Transportation Policy Plan also show major projects not yet programmed. In the coming years, these projects can be expected to move into the TIP as funds become available.

#### **Projects Authorized in Fiscal Year 2018**

Another measure of plan implementation is the projects and project values authorized in the previous fiscal year. These projects were in the 2018-2021 TIP. They have now been removed

as they have advanced to a point of authorization of funds. These project authorizations, in addition to the status of major projects (Tables 13 and 14), illustrate the progress made toward implementing the region's 2040 Transportation Policy Plan.

**Table 13: Status of Major Highway Projects**

<b>Project</b>	<b>Cost Estimates</b>	<b>Program Year-Last TIP</b>	<b>Assumed FY Traffic Open in All Lanes</b>	<b>Project Status/Comments</b>
TH 36, St. Croix Bridge	\$646,800,000	2014	Open to Auto Traffic; August 2, 2017	New 4-lane bridge and approaches, TH 95 interchange. Cost share with WI. New Bridge opened to auto traffic in August, 2017. The lift bridge will be converted to a bicycle/pedestrian facility and connections to both states' loop trails will be provided.  Construction Start: 2013 Construction Complete: 2019
I-35 W & Lake Street	\$239,000,000	2018	2021	From 43 <sup>rd</sup> St. to 11 <sup>th</sup> Ave., westbound I-94 from 1 <sup>st</sup> Ave. to Park Ave., and MN 65 from 24 <sup>th</sup> St. to 15 <sup>th</sup> St. in Minneapolis. MnPASS lane construction, pavement reconstruction, transit station, bridge, noise walls, retaining walls, and drainage.  Construction Start: August 2017 Tentative Construction Completion: Fall 2021
I-35W In Forest Lake	\$50,000,000	2018	2020	Concrete overlay, bridge replacement, and bridge rehabilitation.  Construction Start: July 2017 Tentative Construction Completion: 2019
I-35W North MnPASS	\$200,000,000	2019	2023	Construct MnPASS lanes and long-term pavement preservation from County Road C in Roseville to Lexington Ave. (CSAH 17) in Blaine. Pavement preservation will continue north of Lexington Ave. to Sunset Ave. (CR 53).  Construction Start: 2019 Construction Complete: 2023
I-35 W Bridge over the Minnesota River	\$130,000,000- \$150,000,000	2020	2022	Replacement of bridge and pavement and raising the road out of the floodplain between Cliff Road Interchange and 106 <sup>th</sup> St.  Construction Start: July 2018 Construction Complete: November 2021

<b>Project</b>	<b>Cost Estimates</b>	<b>Program Year-Last TIP</b>	<b>Assumed FY Traffic Open in All Lanes</b>	<b>Project Status/Comments</b>
MN 149 (St. Paul High Bridge) over Mississippi River	\$39,000,000	2018	2018	Resurface bridge and reconstruct bridge deck. Improve drainage and sidewalks. Replace signals. Construct additional turn lane from westbound I-494 to southbound Dodd Road. Construction Start: Fall 2017 Construction Complete: Fall 2018
US 169, MN 41, County 78 and County 14.	\$41,584,000	2018	2020	Interchange at US 169 MN 41/County Highway 78. Overpass over US 169 at County Highway 14. Frontage roads. Construction Start: Fall 2018 Construction Complete: 2020
Re-thinking Interstate 94	\$100,000,000	2021	2023	Development of project alternatives, evaluation of the corridor, development of short- and long-term recommendations.
I-94 from MN 101 to I-494	\$100,000,000	2020	2021	Concrete overlay, add eastbound and westbound lanes between MN 610 and MN 101, traffic management system, lighting

**Table 14: Status of Major Transit Capital Projects**

<b>Project Title</b>	<b>Cost Estimate</b>	<b>Federal Participation</b>	<b>Project Status</b>
Southwest Corridor Light Rail Transit (METRO Green Line Extension)	\$1,858,000,000	\$928,000,000	Engineering; Target Opening 2023
Bottineau Corridor Light Rail Transit (METRO Blue Line Extension)	\$1,536,000,000	\$752,700,000	Engineering; Target Opening TBD
METRO Orange Line Bus Rapid Transit	\$150,700,000	\$82,880,000	Design and Engineering; Target Opening in 2020/2021
C Line (Penn Avenue) Arterial BRT	\$35,000,000	\$28,000,000	Construction 2018; Target Opening 2019
D Line (Chicago-Fremont) Arterial BRT	\$75,000,000	TBD	Planning; Target Opening 2020/2021
METRO Gold Line BRT	\$420,000,000	\$189,000,000	Entered Project Development Jan 2018, Construction 2021-2024, Target Opening 2024

### Key to Tables

The tables are broken into the various "most likely" funding categories and are sorted by: Local/MnDOT, Agency, Trunk Highway, and State Project Number. The description of each column is shown below.

Year	The State Fiscal year the project is scheduled to be let.
PRT	The major project this project is a part of - see attached list.
Route	The highway the project is located on. A "999" means multiple routes or a location has yet to be determined.
Project Number	The MnDOT project number.
Description	The location and work to be accomplished by the project.
Agency	The agency with jurisdiction over the project.
Category	The project type: Preservation, Replacement, Management, Expansion, Transit, Trails or Other.

**PRG MnDOT Program categories**

AM: Municipal Agreement	B3: FTA Capital Program - Sec 5309
B9: FTA Urbanized Area Formula – Section 5307	BI: Bridge Improvement
BR: Bridge Improvement	BT: Bike Trail (not an Enhancement)
CA: Consultant Agreement	CF: Clean Fuels – Section 5308
DA: Detour Agreement	DR: Drainage
EN: Enhancement	FB: Ferry Boat Program
GR: State of Good Repair	IR: Indian Reservation Roads
MA: Miscellaneous Agreements	MC: Major Construction
NA: Not Applicable (Uncommitted)	
NB: FTA Elderly & Persons w/ Disabilities – Sec 5310	NO: Noise Walls
OB: FTA Non-urbanized Areas - Sec 5311 & 5311(f)	PL: Planning
PM: Preventive Maintenance	RB: Rest Area/Beautification
RC: Reconstruction	RD: Recondition
RS: Resurfacing	RT: Recreational Trail (DNR only)
RW: Right of Way Acquisition	
RX: Road Repair (Bridge-Road Construction (BARC))	SC: Safety Capacity

AQ TIP air quality category. See Appendix B for description of codes.

Total \$ Total estimated cost of project.

Fed \$ Federal funding for the project. In some instances, the federal funding is greater than the funding allocated by the STP selection process. This was necessary to completely fund some larger projects.

Draft

DEMO \$ Total federal demonstration funding for the project.  
State \$ MnDOT state funding for the project.  
Local \$ Total contribution from the local agency involved in the project.

Project Description Smart Codes (shown early in some project descriptions):

**AB**	Alternate Bid
**AC**	Advance Construction/AC Payback
**APP**	Additional Preservation Project
**CHAP 152**	Chapter 152 Bridge Bonds
**CMGC**	Construction Manager General Constructor Project
**COCII**	Corridors of Commerce
**DEB**	Delayed Budget Projects
**ELLA**	Early Let Late Award
**HB**	Historic Bridges
**IDIQ**	Indefinite Delivery Indefinite Quantity
**ITS**	Intelligent Transportation System Project
**MNXXX**	Demo
**PoDI**	Project of Division Interest
**SEC164**	MnDOT Section 164
**Sec164 DPS**	Department of Public Safety Section 164
**SPP**	Statewide Performance Program (bridge, mobility, and pavement)
**SRTS**	Safe Routes to School
**TED**	Trunk Highway Economic Development Account
**TRLF**	Transportation Revolving Loan Fund / TLRP Payback

Draft

*MnDOT Metro District Construction Projects*

*2019-2022 Parent Projects*

This table will be included in the Final TIP.

## Appendix B

### Conformity Documentation Of the 2019-2022 Transportation Improvement Program to the 1990 Clean Air Act Amendments May 3, 2018

## Air Quality Conformity

### Clean Air Act Conformity Determination

The Minneapolis-Saint Paul region is within an EPA-designated limited maintenance area for carbon monoxide. A map of this area, which for air quality conformity analysis purposes includes the seven-county Metropolitan Council jurisdiction plus Wright County and the City of New Prague, is shown below. The term "maintenance" reflects the fact that regional CO emissions were unacceptably high in the 1970s when the National Ambient Air Quality Standards (NAAQS) were introduced, but were subsequently brought under control. A second 10-year maintenance plan was approved by EPA on November 8, 2010, as a "limited maintenance plan." Every Transportation Policy Plan (TPP) or Transportation Improvement Program (TIP) approved by the Council must be analyzed using specific criteria and procedures defined in the Conformity Rule to verify that it does not result in emissions exceeding this current regional CO budget. A conforming TIP and TPP must be in place in order for any federally funded transportation program or project phase to receive FHWA or FTA approval.

The analysis described in the appendix has resulted in a Conformity Determination that the the 2019-2022 TIP meets all relevant regional emissions analysis and budget tests as described herein and conforms to the relevant sections of the Federal Conformity Rule and to the applicable sections of Minnesota State Implementation Plan for air quality.

### Public Involvement & Interagency Consultation Process

The Council remains committed to a proactive public involvement process used in the development and adoption of the TIP as required by the Council's [Transportation Public Participation Plan](#), adopted on July 26, 2017. An interagency consultation process was used to develop the TIP. Consultation continues throughout the public comment period to respond to comments and concerns raised by the public and agencies prior to final adoption by the Council. The Council, MPCA, and MnDOT confer on the application of the latest air quality emission models, the review and selection of projects exempted from a conformity air quality analysis, and regionally significant projects that must be included in the conformity analysis of the TIP. An interagency conformity work group provides a forum for interagency consultation on technical conformity issues, and has met in person and electronically over the course of the development of the TPP and TIP.

## Emissions Test

In 2010, the EPA approved a Limited Maintenance Plan for the maintenance area. A limited maintenance plan is available to former non-attainment areas which demonstrate that monitored concentrations of CO remain below 85% of the eight-hour NAAQS for eight consecutive quarters. MPCA CO monitoring data shows that eight-hour concentrations have been below 70% of the NAAQS since 1998 and below 30% of the NAAQS since 2004.

Under a limited maintenance plan, the EPA has determined that there is no requirement to project emissions over the maintenance period and that “an emissions budget may be treated as essentially not constraining for the length of the maintenance period because it is unreasonable to expect that such an area will experience so much growth in that period that a violation of the CO NAAQS would result.” No regional modeling analysis is required; however, federally funded projects are still subject to “hot spot” analysis requirements.

The limited maintenance plan adopted in 2010 determines that the level of CO emissions and resulting ambient concentrations continue to demonstrate attainment of the CO NAAQS. The following additional programs will also have a beneficial impact on CO emissions and ambient concentrations: ongoing implementation of an oxygenated gasoline program as reflected in the modeling assumptions used in the State Implementation Plan; a regional commitment to continue capital investments to maintain and improve the operational efficiencies of highway and transit systems; adoption of *Thrive MSP 2040*, which supports land use patterns that efficiently connect housing, jobs, retail centers, and transit-oriented development along transit corridors; and the continued involvement of local government units in the regional 3C transportation planning process, which allows the region to address local congestion, effectively manage available capacities in the transportation system, and promote transit supportive land uses as part of a coordinated regional growth management strategy. For all of these reasons, the Twin Cities CO maintenance areas will continue to attain the CO standard for the next 10 years.

## Transportation Control Measures

Pursuant to the Conformity Rule, the Council reviewed the 2019-2022 TIP and certifies that it conforms to the State Improvement Plan and does not conflict with its implementation. All transportation system management strategies which were the adopted transportation control measures for the region have been implemented or are ongoing and funded. There are no TSM projects remaining to be completed. There are no fully adopted regulatory new TCMs nor fully funded non-regulatory TCMs that will be implemented during the programming period of the TIP. There are no prior TCMs that were adopted since November 15, 1990, nor any prior TCMs that have been amended since that date. A list of officially adopted transportation control measures for the region may be found in the Nov. 27, 1979, Federal Register notice for EPA approval of the Minneapolis-St. Paul Carbon Monoxide Maintenance Plan. Details on the status

of adopted Transportation Control Measures can be found in the 2040 Transportation Policy Plan, in [Appendix E](#).

## Federal Requirements

The 2019-2022 TIP meets the following Conformity Rule requirements:

**Inter-agency consultation:** The Minnesota Pollution Control Agency (MPCA), Minnesota Department of Transportation (MnDOT), Environmental Protection Agency (EPA), and Federal Highway Administration (FHWA) were consulted during the preparation of the TIP and its conformity review and documentation. The "Transportation Conformity Procedures for Minnesota" handbook provides guidelines for agreed-upon roles and responsibilities and inter-agency consultation procedures in the conformity process.

**Regionally significant and exempt projects:** The analysis includes all known federal and nonfederal regionally significant projects. Exempt projects not included in the regional air quality analysis were identified by the inter-agency consultation group and classified.

**Donut areas:** No regionally significant projects are planned or programmed for the City of New Prague. Regionally significant projects were identified for Wright County to be built within the analyses period of the Plan and incorporated into the conformity analysis.

**Latest planning assumptions:** The published source of socioeconomic data for this region is *Thrive MSP 2040*. The latest update to these forecasts was published by the Metropolitan Council in April 2018.

**Public Participation:** The TIP was prepared in accordance with the Transportation Public Participation Plan, adopted by the Council on July 26, 2017. This process satisfies federal requirements for public involvement and public consultation.

**Fiscal Constraint:** The TIP addresses the fiscal constraint requirements of the Conformity Rule.

The Council certifies that the TIP does not conflict with the implementation of the State Implementation Plan, and conforms to the requirement to implement the Transportation System Management Strategies, which are the adopted Transportation Control Measures (TCMs) for the region. All of the adopted TCMs have been implemented.

Any TIP projects that are not specifically listed in the plan are consistent with the goals, objectives, and strategies of the plan and will not interfere with other projects specifically included in the plan.

There are no projects which have received NEPA approval and have not progressed within three years.

Although a small portion of the Twin Cities Metropolitan Area is a maintenance area for PM-10, the designation is due to non-transportation sources, and therefore is not analyzed herein.

## List of Regionally Significant Projects

Pursuant to the Conformity Rule, the projects listed in the TIP and Transportation Policy Plan (see Appendix C) were reviewed and categorized using the following determinations to identify projects that are exempt from a regional air quality analysis, as well as regionally significant projects to be included in the analysis. The classification process used to identify exempt and regionally significant projects was developed through an interagency consultation process involving the MPCA, EPA, FHWA, the Council and MnDOT. Regionally significant projects were selected according to the definition in Section 93.101 of the Conformity Rules:

"Regionally significant project means a transportation project (other than an exempt project) that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum all principal arterial highways and all fixed guideway transit facilities that offer an alternative to regional highway travel."

Junction improvements and upgraded segments less than one mile in length are not normally coded into the Regional Travel Demand Forecast Model, and therefore are not considered to be regionally significant, although they are otherwise not exempt. The exempt air quality classification codes used in the "AQ" column of project tables of the Transportation Improvement Program are listed at the end of this appendix. Projects which are classified as exempt must meet the following requirements:

- The project does not interfere with the implementation of transportation control measures.
- The project is exempt if it falls within one of the categories listed in Section 93.126 in the Conformity Rule. Projects identified as exempt by their nature do not affect the outcome of the regional emissions analyses and add no substance to the analyses. These projects are determined to be within the four major categories described in the conformity rule.

The inter-agency consultation group, including representatives from MnDOT, FHWA, MPCA, EPA, and the Council, reviewed list of projects to be completed by 2040 including the following:

- Existing regionally significant highway or transit facilities, services, and activities;
- Regionally significant projects (regardless of funding sources) which are currently:
  - under construction or undergoing right-of-way acquisition, or;
  - come from the first year of a previously conforming Transportation Improvement Program, or;

- have completed the NEPA process, or;
- listed in the 2019-2022 Transportation Improvement Program, or;
- listed in the Transportation Policy Plan (Appendix C), or;
- identified for Wright County.

Each project was assigned to a horizon year (open by January of 2020, 2030 or 2040) and categorized in terms of potential regional significance and air quality analysis exemption as per Sections 93.126 and 93.127 of the Conformity Rule, using the codes listed in this appendix. The resulting list of regionally significant projects is shown below.

## Horizon Year 2020

### *Rebuild and Replace Highway Assets*

- I-35W: from MN36/MN280 in Roseville to just N I694 in Arden Hills/new Brighton- Auxiliary lanes (6284-180AC1)
- I-35W MnPASS Southbound from downtown Minneapolis to 46th St.
- TH 100: from 36th St to Cedar Lake Rd in St. Louis Park - reconstruct interchanges including constructing auxiliary lanes
- TH 169: Bridge replacement over nine mile creek in Hopkins

### *Strategic Capacity Enhancements*

- I-94: EB from 7th St Exit to Mounds Blvd in St Paul- add auxiliary lane
- TH 55: from N Jct MN149 to S Jct MN149 in Eagan- widen from 4-lane to 6-lane
- I-494 SB from I-94/I-694 to Bass Lake Road: add auxiliary lane
- I-494 from CSAH 6 to I-94/I-694: Construct one additional lane in each direction
- I-494 from TH 55 to CSAH 6, construct one auxiliary lane
- I-494 NB from I-394 to Carlson Pkwy, construct auxiliary lane
- I-694 from Lexington Ave to east of Rice St: Construct one additional lane in each direction
- I-94 from TH 241 in St. Michael to TH 101 in Rogers: Extend westbound ramp, add westbound lane through TH 101 interchange, and add eastbound lane between the interchanges
- I-35E MnPASS Extension from Little Canada Road to County Road J
- TH 610 from I-94 to Hennepin County 81: Complete 4-lane freeway
- TH 5 from 94<sup>th</sup> St to Birch St in Waconia: Widen to 4-lanes
- TH 62 from France Ave to Xerxes: Construct EB auxiliary lane
- TH 55 from Plymouth Blvd to Vicksburg Ln in Plymouth, Construct WB auxiliary lane.
- I-94: SB I-694 to I-94 EB and I-694 NB to I-94 EB ramps: modify the CD road and convert to individual exists.
- US 169 at Scott County 3 in Belle Plaine, construct new overpass
- MN 41 between US 212 and CSAH 14: Reconstruction and expansion

- US 52 at CSAH 42 in Rosemount: Reconstruct to 4-lane divided, bridges and access ramps
- I-35W in Burnsville: Add Auxilliary lanes between Black Dog Rd and 106<sup>th</sup> Street
- I-494 in South St Paul and Inver Grove Heights: Add Auxillary lanes between Hardman Ave and Bovey Ave.
- I-35W from CR C in Roseville to Lexington Ave in Lino Lakes: Construct MNPASS LaneI-694 in Arden Hills: Construct 2 lane entrance ramp from US 10 to EB694
- US 10 from SB I-35W to CSAH 96 in Arden Hills: Construct two lane exit from I-35W, construct auxillary lane on US 10.
- US 169 from MN 41 to Scott County Road 69 in Jackson Twp: Construct Frontage road
- I-694 in Oakdale - auxiliary lane SB from 10th St to I-94
- MN 36, AT CSAH 35 (HADLEY AVE) IN OAKDALE

### ***Regional Highway Access | Horizon Year 2020***

- US 10 at Armstrong Blvd in Ramsey: New interchange and rail grade separation
- US 52 at Dakota CSAH 86 in Randolph Township – grade separated crossing
- I-94 at 5th/7th Street in Minneapolis- reconstruct interchange to close 5th street ramp and replace it with one at 7th street.
- I-494 at CSAH 28 in Bloomington: Construct ramp to WB I-494 including new bridge.
- US 169 at MN 41 in Jackson Twp: Construct interchange
- MN 36 at Hadley Ave in Oakdale: Construct interchange

### ***Transitway System***

- METRO Orange Line
- METRO Green Line extension
- Arterial BRT along Penn Ave in Brooklyn Center and Minneapolis

### ***Other Regionally Significant Transit Expansion***

- Stillwater Park and Ride at TH 36

### ***2011 Regional Solicitation Selected Projects***

- St. Paul East 7<sup>th</sup> Street: Limited stop transit service demonstration
- St. Paul Pierce Butler Rte: from Grotto St to Arundel St at Minnehaha Ave- extension on a new alignment as a 4-lane roadway
- 105th Ave: extension to 101st Ave W of I-94 in Maple Grove
- Lake Street and I-35W
- TH 149: from TH 55 to just N of I-494 in Eagan-reconstruct from 4-lane to 5-lane
- Anoka CSAH 11: from N of Egret Blvd to N of Northdale Blvd - reconstruction of CSAH 11 (Foley Blvd) as a 4-lane divided roadway

- Hennepin CSAH 34: from W 94th St to 8500 Block in Bloomington - reconstruction of CSAH 34 (Normandale Blvd) as a 4-lane divided roadway
- \*Hennepin CSAH 53: from just W of Washburn Ave to 16th Ave in Richfield-reconstruct to a 3-lane section center turn lane, raised concrete median, signal replacement, sidewalks, on-road bikeways
- Hennepin CSAH 81: from N of 63rd Ave N to N of CSAH 8 in Brooklyn Park - reconstruct to a multi-lane divided roadway
- Hennepin CSAH 35: from 67th St to 77th St in Richfield-reconstruct including transit, bicycle, and pedestrian facilities
- Scott CSAH 17: from S of CSAH 78 to N of CSAH 42 - reconstruct as a 4-lane divided roadway
- Anoka CSAH 116 from east of Crane St through Jefferson St – reconstruct to 4-lane divided roadway

#### ***2014 Regional Solicitation Selected Projects***

- Scott County: TH 169 and TH 41 interchange
- Eagan: Reconstruction of CSAH 31 from I-35E to Northwood/Central Parkway
- Washington County: TH 36/Hadley interchange
- Dakota County: CSAH 42/TH 52 interchange
- Washington County: CSAH 13 expansion
- Hennepin County: CSAH 81 expansion
- Bloomington: E Bush Lake Road I-494 WB entrance ramp
- Anoka County: CSAH 78 expansion from 139<sup>th</sup> Ln to CSAH 18
- Carver County: TH 41 expansion
- St. Louis Park: Beltline Park and Ride
- Metro Transit: Route 62 service expansion
- MVTA: 169 connector service
- Metro Transit: Route 2 service expansion
- Metro Transit: Emerson-Fremont Ave corridor bus and technology improvements
- Metro Transit: Chicago Ave corridor bus and technology Improvements

#### ***2016 Regional Solicitation Selected Projects***

- Brooklyn Center: US 252/66<sup>th</sup> Avenue Interchange
- Louisville Township: US 169 and CSAH 14 interchange
- Dayton: Brockton lane interchange
- Roseville: Snelling Avenue expansion
- Washington County: US 36 and Manning Avenue interchange
- Richfield: 77<sup>th</sup> Street underpass of CSAH 77
- Brooklyn Park: US 169 and 101<sup>st</sup> Avenue interchange

#### ***Projects Outside of Metropolitan Planning Area, Inside Maintenance Area***

- I-94: from MN 25 to CSAH 18 – reconstruction including addition of auxiliary lanes
- CSAH 19 in Alberville: Extend Multilane Roadway from Lamplight Dr to N of 70<sup>th</sup> St

## Horizon Year 2030

### *MnPASS Investments | Horizon Year 2030*

- I-35W from MN 36 to US 10 – construct MnPASS Lane
- I-94 from Cedar Avenue to Marion Street – construct MnPASS Lane

### *Transitway System | Horizon Year 2030*

- METRO Blue Line extension
- METRO Gold Line dedicated BRT
- Arterial BRT along Chicago Avenue and Emerson and Fremont avenues in Brooklyn Center, Minneapolis, Richfield, and Bloomington
- METRO Red Line Stage 2 improvements including extension of BRT service to 181st Street in Lakeville

### *Other Regionally Significant Transit Expansion*

- US 52, at MN 50 in hampton, in the NW quadrant- expand park and pool lot

### *Projects Outside of Metropolitan Planning Area, Inside Maintenance Area*

- Wright CSAH 19 from Lamplight Dr to N of 70th St in Albertville – extend multilane roadway
- Wright CSAH 19 from Chestnut Ave SE to Ash Ave NE in St. Michael – roadway expansion

### *Strategic Capacity Enhancements*

- I-94, from MN 101 in rogers to i-494 in Maple Grove: add EB and WB lanes between MN 610 and MN 101
- US 169 at 101st Ave in Brooklyn Park - construct interchange
- MN 41 from S of Minnesota River bridge to Walnut St in Chaska – improve intersection at CSAH 61
- MN 252, at 66th Ave N in Brooklyn Center-construct interchange, convert to freeway, close intersection at 70th Ave
- US 10/169 from Anoka/Ramsey city limits to Green Haven Rd/Main St interchange-reconstruct, grade separate intersections at Fair oak Ave and Thurston Ave, improve frontage and supporting road configurations to Main St and Thurston Ave
- CSAH 83 from US 169 north ramp to south of 4th Ave E in Shakopee-reconstruct to urban 4-lane divided roadway
- Reconstruct CSAH 21/TH 13 intersection in Prior Lake including on CSAH 21 from West Ave intersection to Franklin Trail E of MN 13 -reconstruct intersection with Main Ave to 3/4 intersection, roundabouts at TH 13 & Arcadia Ave intersection, ¾ intersection at TH 13 & Pleasant St
- MN 13 and Dakota Ave in Savage, from W of Dakota Ave to E of Yosemite- grade separated interchange at Dakota Ave, frontage roads and access ramps

- US 10, from W City of Anoka border to EB entrance ramp from W Main St. Includes new interchange with bridges at Thurston Ave, grade separation at Fairoak with bridge and supporting roadways on north and south side of US 10
- CSAH 70, from 0.36 mi E of I-35 to CSAH 23 in Lakeville- expand 2 to 4 lane
- US 212 from Carver (CSAH 11) to Cologne (CSAH 36)- expand 2 lane to 4 lane
- CSAH 14 from Lexington Ave NE (CSAH 17) to 0.23 mi E of Lever St in Blaine - reconstruct from 2 to 4 lane

## Horizon Year 2040

- No projects identified

Figure E-1: Carbon Monoxide Maintenance Area

May 31, 2018

Elaine Koutsoukos  
Transportation Advisory Board Coordinator Metropolitan Council  
390 Robert Street North  
St. Paul, MN 55101-1805

RE: Draft 2019-2022 Transportation Improvement Program

Dear Elaine Koutsoukos:

The Minnesota Pollution Control Agency (MPCA) staff has completed its formal review of the draft 2019-2022 Transportation Improvement Program (TIP). The MPCA staff has examined the draft TIP for conformance with a checklist of requirements from the joint Transportation Conformity Rule (Rule) of the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Transportation. The intent of the Rule is to ensure compliance with the Clean Air Act Amendments of 1990 and the new transportation reauthorization bill "Fixing America's Surface Transportation Act" (FAST Act) when a Metropolitan Planning Organization (MPO) or state department of transportation serves as a distribution agency for federal transportation funds.

The Rule requires that the MPO base their TIP and long-range comprehensive Transportation Plans (Plan) on the latest planning assumptions. As a result, the draft TIP's air quality conformity analysis is based on the most current Metropolitan Council (the Council) socioeconomic data used in Thrive MSP 2040, which was adopted by the Council on May 28, 2014. The latest update to these forecasts was published in June 2017. The planning document provides the Council with the socioeconomic data (planning assumptions) to develop long-range forecasts of regional highway and transit facility needs.

On November 8, 2010, the EPA approved a Limited Maintenance Plan request for the Twin Cities maintenance area. Under a limited maintenance plan, the EPA has determined that there is no requirement to project emissions over the maintenance period and that "an emission budget may be treated as essentially not constraining for the length of the maintenance period." The reason is that it is unreasonable to expect that the Twin Cities maintenance area will experience so much growth within this period that a violation of CO National Ambient Air Quality Standard (NAAQS) would result.

Therefore, no regional modeling analysis is required, however federally funded projects are still subject to "hot spot" analysis requirements. The limited maintenance plan adopted in 2010, determines that the level of CO emissions and resulting ambient concentrations will continue to demonstrate attainment of the CO NAAQS.

The current TIP was also prepared in accordance with the public participation plan for transportation planning adopted by the Council on July 26, 2017. This process satisfies FAST Act requirements for public participation involvement, as well as the public consultation procedures requirements of Conformity Rule. Based on this review, the analysis described in the conformity Appendix B and submitted by the Council, the MPCA concurs with the conformity determination that the projects included in the

Elaine Koutsoukos

Page 2

May 31, 2018

2019-2022 Draft TIP meet all relevant conformity emissions analysis and budget tests as described therein. The 2019-2022 TIP also conforms to the relevant sections of the Federal Conformity Rule and the applicable sections of the Minnesota State Implementation Plan for air quality.

The MPCA staff appreciates the opportunity given to review this document as part of the EPA Transportation Conformity Rule consultation process. The MPCA staff also appreciates the cooperation of the interagency consultation group that includes the Council, EPA, Minnesota Department of Transportation (MnDOT), and Federal Highway Administration (FHWA) for their immediate assistance in resolving all policy and technical analysis issues with respect to the projects' air quality classification and their willingness to accept the suggested course of action.

Please contact me if you have any questions at 651-757-2347 or [innocent.eyoh@state.mn.us](mailto:innocent.eyoh@state.mn.us).

Sincerely,

Innocent Eyoh

## Exempt Projects

Certain transportation projects eligible for funding under Title 23 U.S.C. have no impact on regional emissions. These are "exempt" projects that, because of their nature, will not affect the outcome of any regional emissions analyses and add no substance to those analyses. These projects (as listed in Section 93.126 of the Conformity Rules) are excluded from the regional emissions analyses required in order to determine conformity of the Transportation Policy Plan and the TIP.

The following is a list of "exempt" projects and their corresponding codes used in column "AQ" of the TIP. Except for projects given an "A" code, the categories listed under Air Quality should be viewed as advisory in nature, and relate to project specific requirements rather than to the air quality conformity requirements. Ultimate responsibility for determining the need for a hot-spot analysis for a project rests with the U.S. Department of Transportation. The Council has provided the categorization as a guide to possible conformity requirements.

## Projects that Do Not Impact Regional Emissions

### Safety

- S-1: Railroad/highway crossing
- S-2: Hazard elimination program
- S-3: Safer non-federal-aid system roads
- S-4: Shoulder improvements
- S-5: Increasing sight distance
- S-6: Safety improvement program
- S-7: Traffic control devices and operating assistance other than signalization projects
- S-8: Railroad/highway crossing warning devices
- S-9: Guardrails, median barriers, crash cushions
- S-10: Pavement resurfacing and/or rehabilitation
- S-11: Pavement marking demonstration
- S-12: Emergency relief (23 U.S.C. 125)
- S-13: Fencing
- S-14: Skid treatments
- S-15: Safety roadside rest areas
- S-16: Adding medians
- S-17: Truck climbing lanes outside the urbanized area
- S-18: Lighting improvements
- S-19: Widening narrow pavements or reconstructing bridges (no additional travel lanes)
- S-20: Emergency truck pullovers

## Transit

- T-1: Operating assistance to transit agencies
- T-2: Purchase of support vehicles
- T-3: Rehabilitation of transit vehicles
- T-4: Purchase of office, shop, and operating equipment for existing facilities
- T-5: Purchase of operating equipment for vehicles (e.g., radios, fareboxes, lifts, etc.)
- T-6: Construction or renovation of power, signal and communications systems
- T-7: Construction of small passenger shelters and information kiosks
- T-8: Reconstruction or renovation of transit buildings and structures (e.g., rail or bus buildings, storage and maintenance facilities, stations, terminals and ancillary structures)
- T-9: Rehabilitation or reconstruction of track structures, track and trackbed in existing rights-of-way
- T-10: Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet
- T-11: Construction of new bus or rail storage/maintenance facilities categorically excluded in 23 CFR 771

## Air Quality

- AQ-1: Continuation of ridesharing and vanpooling promotion activities at current levels
- AQ-2: Bicycle and pedestrian facilities

## Other

- O-1: Specific activities that do not involve or lead directly to construction, such as planning and technical studies, grants for training and research programs, planning activities conducted pursuant to titles 23 and 49 U.S.C., and Federal-aid systems revisions
- O-2: Engineering to assess social, economic and environmental effects of the proposed action or alternatives to that action
- O-3: Noise attenuation
- O-4: Advance land acquisitions (23 CFR 712 or 23 CRF 771)
- O-5: Acquisition of scenic easements
- O-6: Plantings, landscaping, etc.
- O-7: Sign removal
- O-8: Directional and informational signs
- O-9: Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures or facilities)
- O-10: Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity changes

## Projects Exempt from Regional Emissions Analyses that May Require Further Air Quality Analysis

The local effects of these projects with respect to carbon monoxide concentrations must be considered to determine if a "hot-spot" type of an analysis is required prior to making a project-level conformity determination. These projects may then proceed to the project development process even in the absence of a conforming transportation plan and Transportation Improvement Program. A particular action of the type listed below is not exempt from regional emissions analysis if the MPO in consultation with the MPCA, MnDOT, EPA, and FHWA (in the case of a highway project) or FTA (in the case of a transit project) concur that it has potential regional impacts for any reason.

Channelization projects include left and right turn lanes and continuous left turn lanes as well as those turn movements that are physically separated. Signalization projects include reconstruction of existing signals as well as installation of new signals. Signal preemption projects are exempt from hot-spot analysis. A final determination of the intersections that require an analysis by the project applicant rests with the U.S. DOT as part of its conformity determination for an individual project.

### Projects Exempt from Regional Emissions Analyses

- E-1: Intersection channelization projects
- E-2: Intersection signalization projects at individual intersections
- E-3: Interchange reconfiguration projects
- E-4: Changes in vertical and horizontal alignment
- E-5: Truck size and weight inspection stations
- E-6: Bus terminals and transfer points

### Non-Classifiable Projects

Certain unique projects cannot be classified, as denoted by "NC." These projects were evaluated through an interagency consultation process and determined not to fit into any exempt or intersection-level analysis category, but they are clearly not of a nature that would require inclusion in a regional air quality analysis.

### Traffic Signal Synchronization

Traffic signal synchronization projects (Sec. 83.128 of the Conformity Rules) may be approved, funded and implemented without satisfying the requirements of this subpart. However, all subsequent regional emissions analysis required by subparts 93.118 and 93.119 for transportation plans, Transportation Improvement Programs, or projects not from a conforming plan and Transportation Improvement Program, must include such regionally significant traffic signal synchronization projects.

## Regionally Significant Projects

The following codes identify the projects included in the "action" scenarios of the air quality analysis:

- A-20: Action Year 2020
- A-30: Action Year 2030
- A-40: Action Year 2040

## Appendix C

### Metropolitan Council Transportation Improvement Program (TIP) Amendments: Streamlined Process

## Conditions for Using a Streamlined Amendment Process

Any project that meets all of these criteria:

- 1) The federal funding for the project is from a program not administered by the Transportation Advisory Board and the Metropolitan Council.
- 2) The project is consistent with the adopted Transportation Policy Plan.
- 3) The project is not a regionally-significant project\* or is a regionally-significant project currently in the TIP but is not changing the scope or any other elements that would potentially change the air quality conformity determination.

OR

For projects funded through the Transportation Advisory Board and the Metropolitan Council, any project that meets these criteria as well as criteria 2 and 3 above:

- 4) The project does not relate to a scope change before the committee.
- 5) The project changes do not relate to solicitation scoring based on cost effectiveness.

## Process

The TIP amendment request is submitted as usual. Council staff will review each amendment request for these criteria. The Minnesota Interagency Air Quality and Transportation Planning Committee will, in its review of the project for air quality conformity determination, clarify if the project would be eligible for the streamlined process criterion for regional significance (#3). If the project meets the overall criteria, Met Council staff emails the request for streamlining to the TAC Executive Committee, which approves or denies the streamlined process by email. If approved, the amendment moves as an action directly to TAB. If denied, the amendment would move through the full five-committee Council process (TAC Funding & Programming Committee, TAC, TAB, Transportation Committee, and the Metropolitan Council). Information about streamlined amendments could be presented as information to the Funding and Programming Committee and TAC.

Example projects that could use this process:

- Congressional earmarks
- Projects funded through statewide programs, such as Section 5310 transit projects or Safe Routes to School (before 2017).
- Cost increases that do not affect the federal amount or project scope.

\*In this context, “regionally significant” refers to the air quality conformity definition, which is: *“Regionally significant project means a transportation project (other than an exempt project) that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals*

*themselves) and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum all principal arterial highways and all fixed guideway transit facilities that offer an alternatives to regional highway travel." [EPA Transportation Conformity Rules 93.101]*

*A project is generally considered regionally significant in the Twin Cities maintenance area if:*

- It adds one or more travel lanes for over one mile,*
- It involves the addition of an interchange, or*
- It involves the reconfiguration of an interchange such that a movement is added or eliminated."*
- [Transportation Conformity Procedures for Minnesota: A Handbook for Transportation and Air Quality Professionals, Minnesota Interagency Air Quality and Transportation Planning Committee]*

## Appendix D

### Potential Changes to the Draft TIP

The project tables shown in the Transportation Improvement Program (TIP) are the result of an extensive effort undertaken by the Minnesota Department of Transportation. The attached draft shows the status of projects as of mid-April. In the meantime, project sponsors continue to refine project scopes and cost-projections. Due to ongoing efforts some projects are expected to change.

- 141-030-042. A scope change request indicated an increased project total from \$2,017,440 to \$2,257,440, all local funding. This will be reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018.
- 082-596-005. A 2018-2021 TIP amendment is pending to change the total project cost from \$12,900,000 to \$13,650,000. All additional costs will be absorbed by the County. This will be reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018.
- 002-678-022. A TIP amendment is pending to reflect removal of language widening a bridge and decrease in total cost from \$12,532,320 to \$12,060,320 (some of that federal funding). This will not be complete in time to be reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018. Pending Council approval the TIP amendment will be finalized after federal approval of the 2019-2022 TIP.
- 164-591-002. A scope change reduced the project cost slightly. The project cost will be reduced to \$599,424 with a slight reduction to the federal cost. This will be reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018.
- 8825-658. A 2018-2021 TIP amendment added this project, which will be let before federal approval of the TIP. The federal funding amount increases from \$360,000 to \$1,160,000 while the state contribution decreases from \$1,090,000 to \$290,000. This will be reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018.
- 27-00324. A 2018-2021 TIP amendment added this project. The 2019-2022 TIP will move this project from Table A-16 (project obligated in Previous Fiscal Year) to fiscal year 2019. Federal cost will move from \$7,000 to \$18,000, other cost will move from \$228,191 to \$108,402, and state cost will move from \$0 to \$108,789. This will be reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018.
- Three MnDOT-sponsored mobility Management projects will be added and reflected in the final 2019-2022 TIP presented to TAB for approval on August 15, 2018.. See the below tables:

**Project 1**

SEQ #	State Fiscal Year	A T P	Dist	Route System	Project Number (S.P. #)	Agency	Description include location, description of all work, & city (if applicable)	
2077	2019	C	M	BB	TRF-9117-19	MnDOT	Section 5310; Dakota County; Mobility Management	
Prog	Type of Work			Funds	Total \$	FTA \$	TH \$	Other \$
NB	Operate Bus			FTA	300,000	240,000	-	60,000

**Project 2**

SEQ #	State Fiscal Year	A T P	Dist	Route System	Project Number (S.P. #)	Agency	Description include location, description of all work, & city (if applicable)	
2072	2019	C	M	BB	TRF-9056-19	MnDOT	Section 5310; Newtrax; Mobility Management	
Prog	Type of Work			Funds	Total \$	FTA \$	TH \$	Other \$
NB	Operate Bus			FTA	200,000	160,000	-	40,000

**Project 3**

SEQ #	State Fiscal Year	A T P	Dist	Route System	Project Number (S.P. #)	Agency	Description include location, description of all work, & city (if applicable)	
2071	2019	C	M	BB	TRF-0051-19	MnDOT	Section 5310; Scott County; Mobility Management	
Prog	Type of Work			Funds	Total \$	FTA \$	TH \$	Other \$
NB	Operate Bus			FTA	420,000	336,000	-	84,000
