

2020 Regional Solicitation Assessment: Surveys and Sensitivity Analysis

TAB: March 17, 2021

Participant Surveys

- Surveys provided to applicants, scorers, TAB members, and F&P/TAC members.
- Responses:
 - Applicants: 9 (18 Responses in 2018)
 - Scorers: 28 (21)
 - F&P/TAC members: 14 (21)
 - TAB Members: 2 (12)

Survey Themes

- Bike/pedestrian bridges.
- Scoring methodology; prescribe more?
- Need to examine the new measures, particularly pedestrian safety and housing connectivity.
- Codify when and how to use outliers.
- Simplification of scoring measures.

Scoring Measure Sensitivity Analysis

- Few counterintuitive results: more valuable measures tend to have larger impacts. Few measures are greatly impactful on their own.

Major Issues Heading Toward 2022

Major Issues:

- Unique projects.
- Geographic balance
- Bicycle/pedestrian bridges
- Measure evaluation (particularly affordable housing access and pedestrian safety, both new measures)
- Simplify scoring measures
- Others?

What's Next

- April/May: Before and After Study report.
- April-June: Discuss/develop changes to applications.
- July-August: Introduce changes to technical committees.
- September-October: Public comment period.
- November: TAB Approval of the Regional Solicitation.
