

# Information Item

Transportation Advisory Board

Meeting Date: January 18, 2023

## Topic

2050 Regional Development Guide Values, Vision, and Goals

**Policy/Legal Reference:** Minn. Stat. § 473.145

**Staff Prepared/Presented:** Michael Larson, Planning Analyst, 651-602-1407

**Division/Department:** LisaBeth Barajas, Community Development  
Charles Carlson, Metropolitan Transportation Services

## Background

Staff have conducted numerous engagement activities with the Metropolitan Council and various advisory groups to identify shared regional values, components of a regional vision, and potential goals for the 2050 Regional Development Guide. On several occasions, this has included structured engagement with the Transportation Policy Plan (TPP) Technical Working Group and TPP Advisory Work Group.

Based on input to date, staff are developing a working document of regional values and vision statements for Council review, discussion, and use for further engagement. A working draft for discussion was presented to the Council at their January 11th meeting. The development of more specific shared regional goals based on the regional vision will commence this year and be informed by future stakeholder engagement.

## Regional Values

Values are core beliefs or principles that guide our work. The challenge in identifying shared values is that different people value or emphasize different things. However, the following themes have emerged as core sets of shared values that emphasize the need for effectively working together.

- Equity, justice, cultural competence, respect, and compassion
- Leadership, collaboration, entrepreneurship, and innovation
- Accountability, transparency, and effectiveness
- Stewardship, sustainability, and resilience

## Significant Cross-Cutting Regional Issues

In consultation with the Council's policy and technical leads, and in reviewing what we have heard through this first phase of engagement and in other planning work, we have identified four cross cutting issues of regional significance. They are significant policy and programmatic areas that are not the sole responsibility of any one division or agency/organization. They represent potential areas of policy collaboration and identification of shared regional goals. Consequently, they will be reflected throughout the regional vision and our policy plans.

- Equity
- Climate
- Natural Systems
- Public Health, Safety, and Wellbeing

## Regional Vision

Vision is what we want to achieve for the region. State statute empowers the Metropolitan Council to develop a comprehensive development guide prescribing the orderly and economical development of the metropolitan area. The following have been and will be considered as we articulate a regional vision. One area of recent emphasis is the importance of “anchoring” the vision with references to the people, communities, and places that we serve.

### *Regional Development Issues*

- Growth management
- Housing needs
- Commerce & industry
- Parks and open space
- Water resources
- Other natural resources

### *Regional System Considerations*

- Transportation
- Wastewater
- Regional Parks

### *Contextual Issues*

- Accessibility and affordability
- Shared economic prosperity
- Welcoming and inclusive

### *Anchoring Principles*

- People
- Communities
- Places

## TPP Advisory Work Group Feedback

On December 16, we updated the TPP Advisory Work Group and asked for feedback and reflection on a compilation of input that we summarized (attached) based on previous engagement with them on June 29 and August 26. We organized their previous input into the framework we are now using.

The input from the TPP Advisory Work Group is like the input we receive from other advisory groups we have (e.g., Land Use Advisory Committee, Metropolitan Water Supply Advisory Committee, Regional Planning Advisory Group). It is often very detailed with policy area insights and inspiring ideas. In many cases, the input may function better as goals, policies, or implementation strategies that will be articulated later. In other cases, we have examples of success stories or specific problems that highlight our challenges. All of this input is valuable.

At the February 1 Metropolitan Council meeting, we will share a report that documents the engagement to date, and how it will serve us going forward. Consistent with our proposed regional core value of accountability, we will document how this input can and should inform future work.

# Value Areas

## Equity, justice, cultural competence, respect, and compassion

*These are related ideas that we heard from the TPP Advisory Work Group:*

- The regional transportation planning process should include leadership roles for BIPOC communities, tribal nations, communities with disabilities, seniors, and those with economic disadvantages.
- Planning for the transportation system should prioritize the removal of barriers to accessibility.
- Transportation programming should prioritize the repair of past harms.
- Transportation planning should mitigate risks of displacement due to market forces.

## Leadership, collaboration, entrepreneurship, and innovation

*These are related ideas that we heard from the TPP Advisory Work Group:*

- Transportation planning and design should foster a sense of ownership, stewardship, and community.
- The transportation planning process should reflect the needs of different types of users including those involved in economic supply chains.
- Research and technology should drive innovations in ways that reduce GHG, enhance the efficiency of systems, and increase both accessibility and reliability.
- The transportation planning process should be informed by ongoing community engagement, relationship building, and shared decision making.
- The transportation planning process should be informed by ongoing research into evolving travel behavior and needs.

## Transparency, effectiveness, and accountability

*This area was a focus of discussion at the December 16<sup>th</sup> TPP AWG meeting:*

- Planning should develop effective metrics to measure our success and identify potential unintended consequences.
- Planning should focus on people-centered needs, engaging communities that we serve.
- Projects should address critical regional issues in a direct manner (e.g., equity or climate).
- Transportation and project planning should include adequate risk management.
- Planning should continue to develop anti-displacement practices.

## Stewardship, sustainably, and resilience

*These are related ideas that we heard from the TPP Advisory Work Group:*

- The transportation system should be high quality, low-maintenance (alternatively, “well maintained”), and consider future needs related to our region’s communities and economy.
- Transportation planning should be integrated with natural resource planning.

# Cross-Cutting Issues

## Equity

*These are related ideas that we heard from the TPP Advisory Work Group:*

- The transportation system will provide affordable, reliable, and convenient access to destinations throughout the region for those who rely on transit, paratransit, walking, and rolling.
- The regional transportation planning process will include leadership roles for BIPOC communities, tribal nations, communities with disabilities, seniors, and those with economic disadvantages.

## Climate

*These are related ideas that we heard from the TPP Advisory Work Group:*

- High quality transit and non-motorized investments will support shifts from SOV travel.
- The region will invest in technologies and services that reduce GHG and VMT.

## Natural Systems

*These are related ideas that we heard from the TPP Advisory Work Group:*

- Transportation planning and implementation will protect, enhance, and restore natural systems impacted by rights-of-way.
- Winter maintenance of transportation surfaces will minimize the use of salts or other practices that impair water quality.

## Public Health, Safety, and Wellbeing

*These are related ideas that we heard from the TPP Advisory Work Group:*

- The transportation system will support the orderly and economical development of the region, including the needs of freight and industry.
- The transportation system will support access to housing, services, recreation, and other community needs throughout the region.
- Transportation rights-of-way and investments will create opportunities to support multiple modes, increase accessibility, and improve “last mile” connections for communities.
- The transportation system will be safe for its users and patrons.
