Action Item: 2024 Regional Solicitation

TAB

July 17, 2024
2024 Regional Solicitation Schedule

Action Item Schedule:

• 7/17 TAB will consider the technical feedback, move a recommendation, consider amendments and adopt a funding option
  • The action item also includes 17 Active Transportation regional sales tax projects. These projects are above and beyond the federal funding.
  • The item will then move to the Transportation Committee (8/12) and Met Council (8/28) for concurrence.
June 12 TAB

- General sentiment among TAB members that they want to build consensus and come together on one of the three options or a combination of the best parts of each option.
- Examine adding in more of overprogramming with a focus on bike/ped projects. Currently the options 1, 2, and 3 show $25M of overprogramming or 10%. Recent funding cycles have overprogrammed by 8% to 12% (approximately $20M-$30M given current funding levels).
- Add in the two remaining Safe Routes to School projects to the funding options.
- No clear direction on funding the remaining transit modernization project.
Recommended an additional funding option (hybrid option) that accounts for general TAB direction on building consensus from the June TAB meeting and includes:

- All projects from Safety scenario
- All projects from Bike/Ped scenario
- 1 additional transit modernization project
- 2 additional Safe Routes to School projects

Funding from all sources: $282M (includes $18.7M for Active Transportation)

Overprogramming increased based on general TAB direction and now totals 14%, compared to 10% in previous iterations of the funding options. Amount seemed reasonable to F&P and TAC and allows for the best parts of the three scenarios to be funded.
TAC Feedback and Recommended Motion

That the TAB approve:

- Funding the projects in the attached Option 4: Hybrid Option (funds all projects in the Bike/Pedestrian and Safety options, plus the final Transit Modernization project and final two Safe Routes to School projects);
- Funding the 17 Active Transportation projects shown as part of each of the attached funding options.

</table>
1. There is more of funding in the transit modal area than transit project requests. The Option 1 closest to midpoint option funds all transit and TDM projects then allocates the remaining $7.7M to other modes. The other two options forgo funding the lowest scoring transit projects and then allocate $12.7 to other modes.

2. Options 1, 2, and 3 show 10% overprogramming or $25M. Option 4 shows 14% overprogramming or $35M. Recent cycles have overprogrammed by 8% to 12% (approximately $20M-$30M). Base-level funding ($200M), plus overprogramming ($25M) is shown in yellow. Potential additional overprogramming is shown in blue.

3. $15M of Carbon Reduction (green) is allocated to eligible projects in all three modes.

4. $7.3M of PROTECT (orange) is allocated to the project with the highest number of eligible elements within a larger project.

5. $18.7M of Active Transportation funding (purple) is included in the scenarios for projects requesting $2M or less, meet all of the legislative requirements, and can have a construction contract signed by the end of calendar year 2026. Preference is given for higher ranking projects. AT funding is not included in the modal funding ranges as it is extra funding. This funding is shown going to 17 projects, representing a wide geographic spread of community types (projects within 6 of the 7 counties).
