# Equity Evaluation of Regional Transportation Investment Processes Pilot Study

September 2024 [metro council.org](https://metro council.org)

# Agenda

Metropolitan Council Commitment to Racial Equity and Purpose of this Work

---

The Equity Policy Group

---

The Draft Equity Framework & Tool

---

Capacity Building Pilot Training Program

---

Needs for an Equitable Investment Process

---

Future Work Planned

---

# Core Values

**Equity:** Addressing disparities and fostering an equitable future.

We value the people and communities of our region, which is economically and culturally vibrant. We also recognize, however, the harm and disparities that injustices, including racism, have created.

**We are dedicated to creating systems, policies, and programs that repair and heal past harm, foster an equitable future, and eliminate disparities. Communities that have been marginalized in the past will be at the center of this work in leadership roles.**

**Accountability:** Measuring impact and being open to change.

**Leadership:** Inspiring positive change across sectors.

**Stewardship:** Sustaining resources for future generations.

# Council's Racial Equity Framework

## **Contextualized**

Ensure solutions address systemic inequity.

## **Community Centered**

Work with impacted people and populations to co-create solutions.

## **Reparative**

Seek restorative remedies commensurate with the level of negative impact.

# Transportation Planning's Work Response

- Prioritize work and actions that address “actualizing” Equity and go beyond focusing on equitable engagement
- Address systemic inequities that exist in our planning, programming and project development processes
- \$3 million in competitive local funding made available to Council business units to pilot new Equity related activities
  - This project received \$400,000, 18-month timeline
  - Project grew to \$720,000, 2.5 years
- Original Proposal: *Conduct an evaluation of regional transportation investment and decision-making processes and develop prioritized strategies and actions to reduce transportation-related inequities*
- Proposal included working with and paying an advisory body of community members to:
  - Identify inequities in our processes
  - Identify and prioritize actions to make the processes more equitable

## Why?

This pilot study seeks to overcome and reconcile the historic and ongoing racism systematically embedded in **transportation decision-making processes**.

## Who?

The pilot study was guided by an Equity Policy Group (EPG) of community members.

## What?

A Transportation Equity Framework & Process Evaluation Tool provides thought provoking questions and recommendations to reduce inequities in transportation decision-making.

# The Equity Policy Group (EPG)

## The EPG's Guiding Values

Transparency

Equitable  
Burdens and  
Benefits

Shared  
Accountability

Genuine  
Inclusion

Shared  
Decision  
Making

Resources

# The EPG's Transportation Equity Definition

*“Transportation equity means benefits and burdens of transportation systems, services, and spending are fair and just, which historically has not been the case.*

*Transportation equity requires acknowledging, addressing and repairing past harms, particularly impacting underserved Black, African, Latine, Asian, and Indigenous people, including Tribal Nations. It also calls for active intentional inclusion of underserved communities in shaping transportation decisions.”*

# The Work Model

# The Draft Equity Framework & Tool

# Early Realizations

There is no one process for a project from identification through implementation

Often project teams don't even know who the decision-makers are

You cannot effectively use the framework and tool without a detailed mapping of your process and community assets

# The Draft Equity Framework & Tool

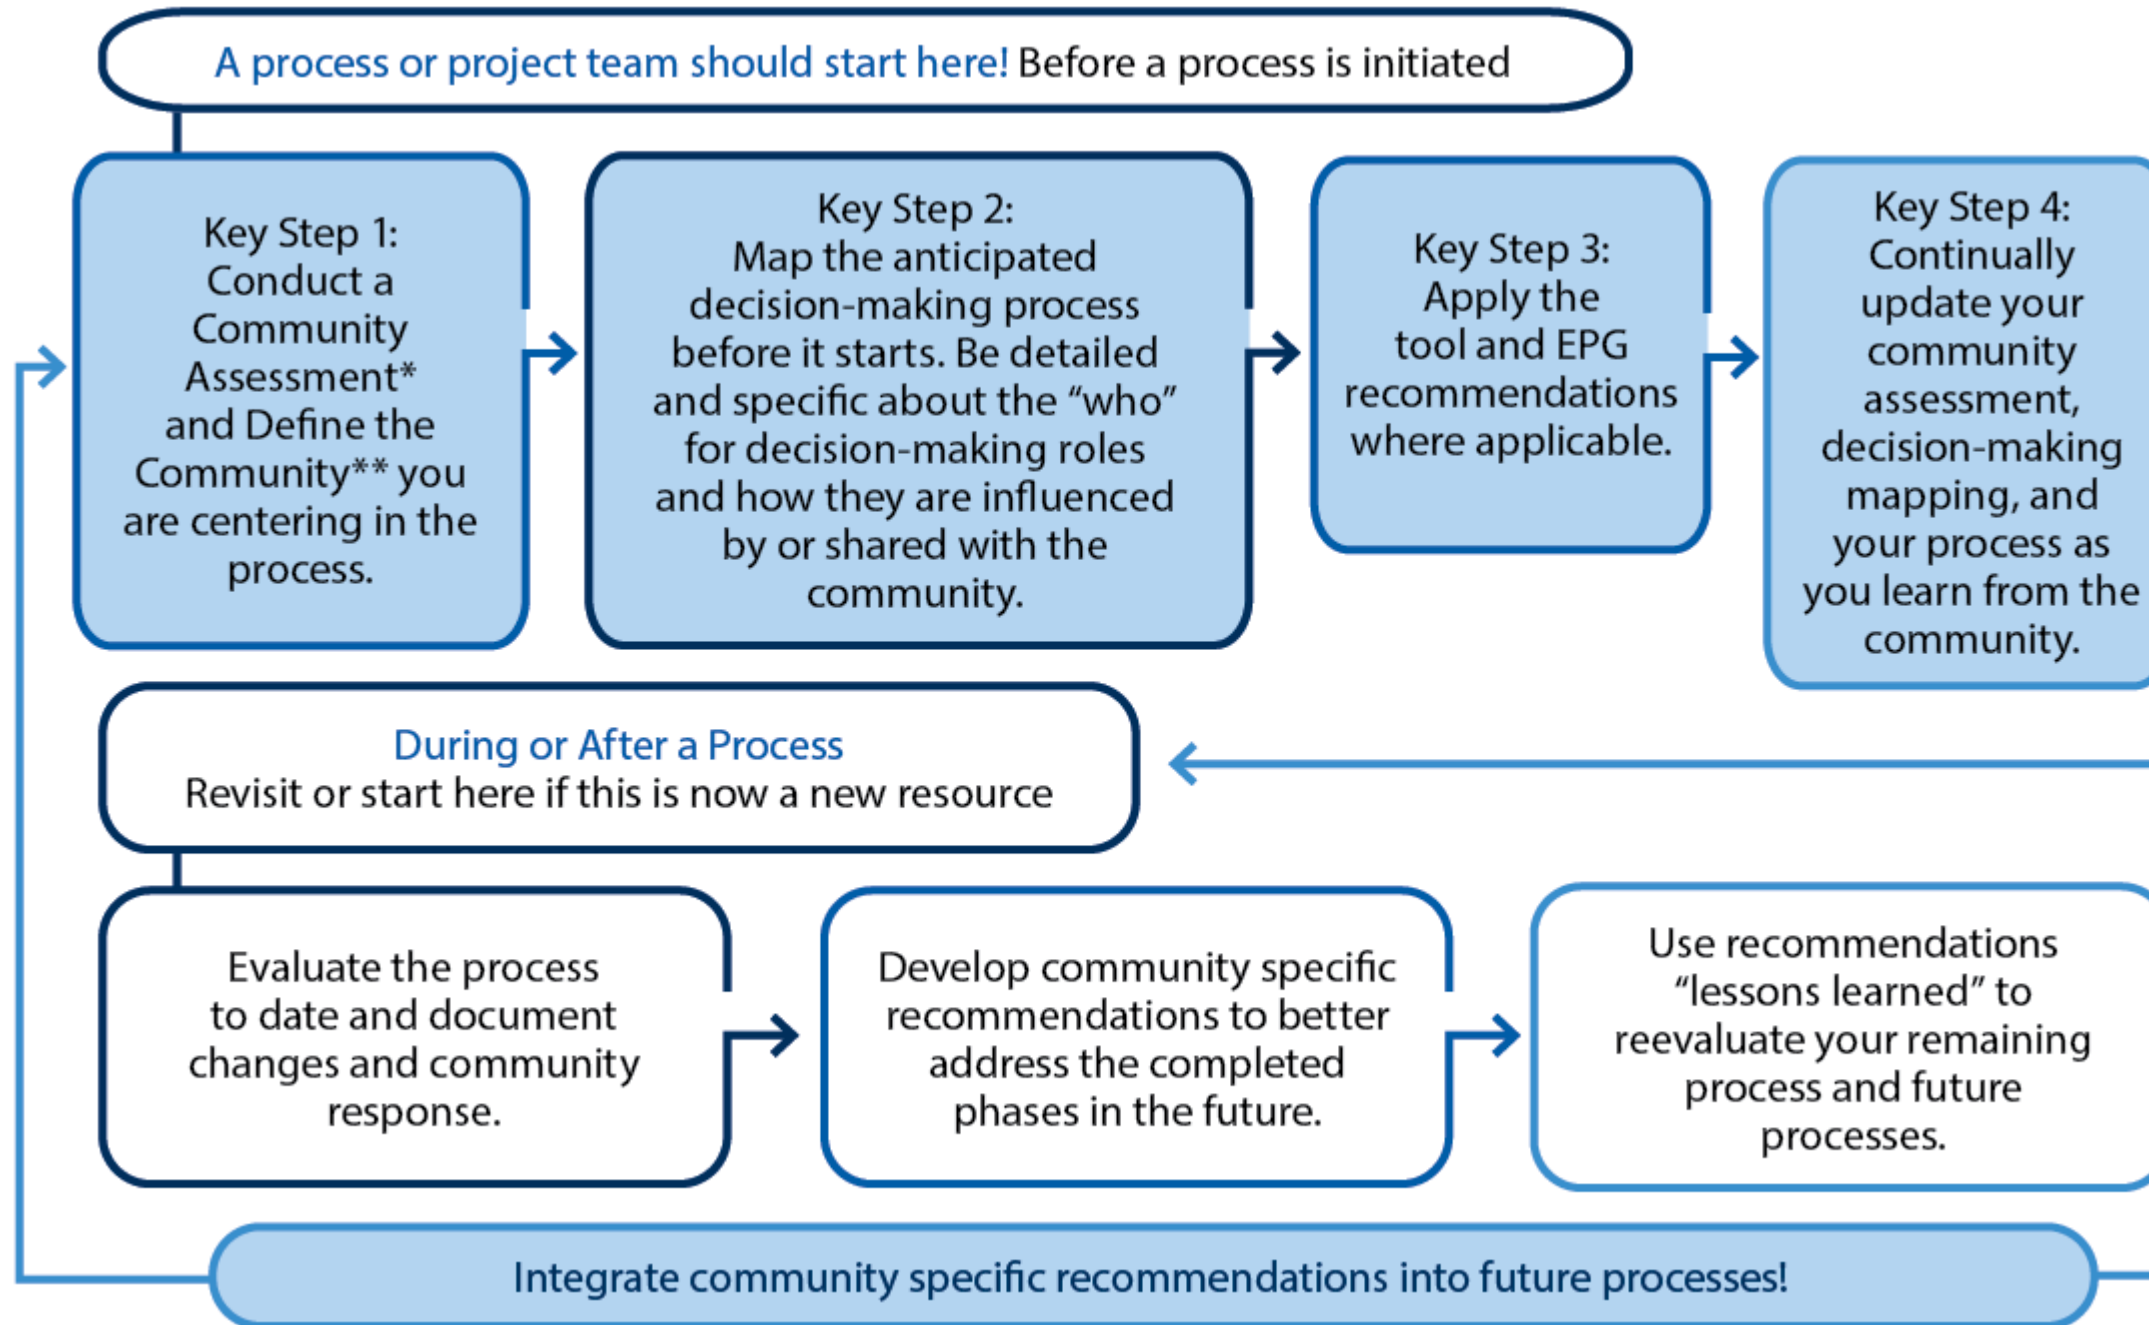

## TRANSPORTATION EQUITY FRAMEWORK & PROCESS EVALUATION TOOL

```
graph TD; Title[TRANSPORTATION EQUITY FRAMEWORK & PROCESS EVALUATION TOOL] --- Box1[The Framework is the "how to guide" for use of the Process Evaluation Tool.]; Title --- Box2[The Tool is a set of questions and recommendations to guide and evaluate processes for racial equity.];
```

The *Framework* is the “how to guide” for use of the Process Evaluation Tool.

The *Tool* is a set of questions and recommendations to guide and evaluate processes for racial equity.

# The Draft Equity Framework & Tool

# The Draft Equity Framework & Tool

# The Draft Equity Framework & Tool

## Other Example Questions

### Problem & Opportunity Identification

- What is the problem or opportunity to be addressed? How does it relate to the community?
- **Who named the problem or opportunity?** Is there community agreement that this problem or opportunity needs to be addressed?
- Are the intended users and beneficiaries the community members? If not, how will the process be changed to include benefit to the community?
- Who will be burdened by the potential investment? **How and when will anti-displacement be considered?**
- After completing the questions for this phase, **did you learn anything new that should result in updates to your community assessment and/or decision-making mapping?**

# On Going Work: Capacity Building & Pilot Training

# On Going Work: Capacity Building & Pilot Training

## Training Purpose

Develop and test a training about how to apply the EPG Framework & Tool to a transportation project they are working on.

## Training Audience

- (Current phase) – Teams of City, County, MnDOT, and Met Council staff who have a role in a transportation project at every phase.
- (Future phase) – Agency staff teams + Community members and community-based organizations in the project area

## Role of EPG in Training – *In development*

May include:

- Facilitation and asking the tool questions
- Evaluation of the training
- Connecting with other community partners in future

# On Going Work: Capacity Building & Pilot Training

## Participants of the training will:

1. Expand knowledge of what is an equitable transportation process and why it is important, centering this conversation on what we heard from the EPG
2. Know how to apply the EPG's equity recommendations and tools to their transportation planning, decision-making, and investment processes
3. Build an action plan to implement changes to your transportation planning, decision-making, or investment processes to make it more equitable

# Training Tensions

What are the roles of project staff, the EPG, and community-based organizations?

How to create a constructive space that doesn't trigger participants?

How to rise about the noise, competing priorities, and finite staff capacity?

With the tool still evolving, when and how to include the community in testing the tool?

# Summary of Lessons Learned

# Needs for an Equitable Investment Process

**An equitable process is necessary for an equitable outcome.**

1. A successful process takes co-creation.
2. Empowering community members throughout your process is the game-changer, even though it adds challenges.
3. Plan for adequate time and budget.
4. Have community members as boots on the ground for the process and project delivery.
5. Detailed mapping/homework on the community is very important.
6. Mapping your decision-making process for transparency is very important.

Questions?

# Future Follow Up Work Planned

- ❑ Create processes and guidelines and implement training for a community assessment process.
- ❑ Develop a guide for engaging with communities about transportation needs and integrating findings into a project's purpose and need, planning, development, and decision-making.
- ❑ Develop an analysis methodology and environmental justice framework to evaluate how projects benefit and harm different communities and demographics.

Thank you.
