Of the Metropolitan Council*

Notice of a Meeting of the
TECHNICAL ADVISORY COMMITTEE
Wednesday, November 4, 2015
Metropolitan Council
9:00 A.M.

AGENDA

1. **Call to Order**
2. **Approval of Agenda**
3. **Approval of October 7 2015, Minutes**
4. **TAB Report – Elaine Koutsoukos**
5. **Committee Reports**
 - **Executive Committee** (Steve Albrecht, Chair)
 - **Funding and Programming Committee** (Tim Mayasich, Chair)
 - a. **2015-44 Hennepin County Scope Change**
 - b. **2015-45 Hennepin County TIP Amendment**
 - **Planning Committee** (Lisa Freese, Chair)
6. **Special Agenda Items**
 - **2016 Regional Solicitation Update** (Steve Peterson, MTS)
7. **Agency Reports**
8. **Other Business**
9. **Adjournment**

Click here to print all agenda items at once.

Streamlined Amendments going to TAB in September. Contact Joe Barbeau with questions at 651-602-1705.

Three Rivers Park District TIP Amendment

*Transportation Advisory Board
Of the Metropolitan Council*

**Minutes of a Meeting of the
TECHNICAL ADVISORY COMMITTEE
Wednesday, October 7, 2015
9:00 A.M.**

Members Present: Doug Fischer, Lyndon Robjent, Carla Stueve, Brian Sorenson, Kevin Roggenbuck, Cory Slagle, Steve Bot, Elaine Koutsoukos, Mark Filipi, Michael Larson, Pat Bursaw, Innocent Eyoh, Bridget Rief, Danny McCullough, Jean Keely, Paul Oehme, Michael Thompson, Jim Kosluchar, Jenifer Hager, Paul Kurtz, Bill Dermody (Members Excused: Adam Harrington, Beverley Miller, Steve Albrecht, Bruce Loney, Jack Byers)

1. Call to Order

The meeting was called to order by Vice Chair Paul Oehme at 9:04 a.m.

2. Approval of Agenda

Mark Filipi moved and Pat Bursaw seconded. No discussion. Motion passed.

3. Approval of March Minutes

The September 2, 2015 meeting minutes were approved as written. Michael Thompson moved and Mark Filipi seconded. No discussion. Motion passed.

4. TAB Report

Elaine Koutsoukos reported on the September 19, 2015 TAB meeting.

Reports:

TAB Chair: James Hovland reported that the TAB Executive Committee meeting will move to a larger room in the lower level of the Metro Council building beginning in October and the Executive Committee agenda will be posted online to inform the public. TDM application deadline was last Friday, Sept. 11; 11 applications were received requesting \$2.4 M federal funding out of \$1.8 M available.

Agency Reports:

MPCA – Shannon Lotthammer, director, announced that EPA will be releasing new ozone standards on October 1. This may affect that attainment.

MAC – Carl Crimmins invited TAB to tour the MAC facilities or hold a meeting at the facility in the future. Carl will work with Elaine Koutsoukos and Jim Hovland in scheduling. The 2035 Long Range Plan is underway.

TAC Report: Steve Albrecht, TAC Chair, reported that there is ongoing discussion on de-federalization. A Scott County proposal is going through the process. The Scott County proposal and a draft policy will come to TAB at future meetings. The remaining items from TAC are on the TAB agenda.

TAB Bylaws: Proposed changes were approved, including adding the new TAB member added by the legislature representing the Suburban Transit Association and changes to quorum and voting.

Action Items:

1. 2015-37 Scope Change: CSAH 116, Anoka Co. - approved
2. 2015-39 2016-2019 TIP Amendment: CSAH 116, Anoka Co., release for public comment
3. 2015-36 2016 Unified Planning Work Program - approved

Information Items:

1. 2016 Regional Solicitation Sensitivity Analysis – Steve Peterson and Jessica Schoner presented the Sensitivity Analysis
2. Heidi Schallberg presented an update on the Equity Workshops. A consultant contract was signed with Center for Policy Planning and Performance. The planning committee to work with the consultant on developing the workshop structure has been schedule on Tuesday, September 22, from 2-4 pm, in LLA.

5. Committee Reports

A. Executive Committee (Paul Oehme, Vice Chair)

At this morning's TAC Executive meeting the regional solicitation timeline and next steps were discussed, as were some amendments going through the streamlined TIP amendment process.

B. Funding and Programming Committee (Joe Barbeau, MTS)

Joe Barbeau said that there were no action items out of Funding & Programming, but that a discussion item is later on today's agenda to continue the conversation from their latest meeting.

C. Planning Committee (Paul Oehme, Vice Chair)

Paul Oehme said that the Planning committee did not meet in September.

6. Special Agenda Items

EPA Ozone Requirements (Jonathan Ehrlich, MTS)

Jonathan Ehrlich said that the new EPA ozone requirements were released and the Twin Cities and State of Minnesota are in compliance. The standard moved from 75 parts per billion to 70 parts per billion. The Council will continue to work with MPCA to reduce emissions through policy and action. Innocent Eyoh added that MPCA staffer Amanda Smith is available for questions as well. No discussion.

Regional Solicitation (Joe Barbeau and Carl Ohrn, MTS)

Joe Barbeau said that survey responses are included in today's packet. There were four surveys: (1) TAB members, (2) TAC and Funding & Programming members, (3) solicitation applicants, and (4) members of the scoring teams. Scoring consistency was perhaps that greatest unifying theme throughout the responses.

Carl Ohrn presented a PowerPoint on some points that were brought to Funding & Programming, summarized the discussion, and looked for feedback from TAC for next steps.

Interchanges. Pat Bursaw expressed agreement with the steps proposed to move forward. Steve Bot asked if the interchange process applied to the parts of region 7W that are in the MPO area. Pat Bursaw said that is likely the case, but that conversation will continue offline. Michael Thompson asked how long the interchange process takes to get approved. Karen Scheffing from MnDOT Metro District

responded that it can take anywhere from two weeks to six months depending on the issues involved. Michael Thompson would like to see outreach to affected communities.

Equalize Roadway Classification. Doug Fischer stated that the comparisons are not equal and that one criteria will not meet this need. Lyndon Robjent added that there were three years of funding available this past round so more projects were funded, and it is unlikely that as many projects will be funded in the next round as a result of only have two years of funding available. All of System Management projects were funded, even low scoring ones, so we should consider funding that category less. Having TMOs receive money off the top should also be under consideration for review. Lyndon Robjent added that there are lots of lane miles not being funded based on the requests. Doug Fischer would like to see the expanders funded. Brian Sorenson said that local staff try to determine what kind of connector would be funded, and what characteristics a successful application would have, but do not think it is possible to have a successful connector project with the criteria. There is no incentive to even apply for funds.

Railroad Crossing Safety. Carl Ohrn said that there is too much competition for the limited amount of funds already, so therefore it should not be a priority to fund railroad projects. Doug Fischer disagreed, saying that it is easy to quantify the hours of delay lost due to railroad traffic and the projects would compete well. Lyndon Robjent added that flooding projects are a similar issue; there is a significant need, we just have to find a way to fund it.

Cost Effectiveness. Lyndon Robjent said that the air quality component is most challenging here. Innocent Eyoh agreed. Doug Fischer liked the way this has been reworked, but asked who checks the validity of the cost assumptions. Carl Ohrn responded that the new cost estimation worksheet has been very helpful at getting reasonable estimates out of applications. Doug Fischer said that noisewalls are the most challenging component of these projects, as they can add \$1-2M but it is unknown if noisewalls are needed until after the community vote is taken.

New Alignments. Carl Ohrn said that the condition of roads currently carrying these trips will be used. Doug Fischer asked how many applications there were; it was 4-6.

Bridge Eligibility. Carl Ohrn said that after the region lost \$11M in federal funding it was decided that B minor bridges would be ineligible for this funding. There were six applications for this category last round. No questions or discussion.

Bundling/Geographic Coverage. Carl Ohrn stated that a bundled package has never met qualification criteria. Pat Bursaw asked if it was possible to address this through the regular process, and to modify the solicitation to enable eligibility. Carl Ohrn responded that this solicitation is very geography-based (scoring on job centers, equity, etc), so it is too easy for region-wide projects to manipulate the scoring. Lyndon Robjent said that the geographic criteria (job centers, equity) were least likely to prove decisive in the scoring and ultimate funding, and therefore, they could be eliminated entirely. Carl Ohrn said that the staff team is coming up with recommendations on those ideas for review at an upcoming meeting.

Trail Usage. Carl Ohrn is recommending no change to the forecast methodology for trail usage. Lyndon Robjent said that the safety numbers look incorrect; Steve Peterson agreed. Jen Hager added that MnDOT is working on counting methodologies, so maybe in the 2018 solicitation we can incorporate that information. Craig Jenson added that new trails are experiencing similar issues as new roadways, so the same methodology can be used in 2018.

Existing vs. New Transit Riders. Carl Ohrn said that there is no consensus here and that the Transit team will discuss in more detail.

Pat Bursaw thanked Carl Ohrn, Steve Peterson, and Joe Barbeau for their work on this so far. This is a good approach to evaluate, summarize, and tweak the solicitation. Lyndon Robjent said that

some categories could be eliminated with no impact. Elaine Koutsoukos said that the goal is to have two solicitations with these criteria before making that decision.

7. Agency Reports

Pat Bursaw reported that eleven applications for TED funding were submitted in the Metro area for \$73M; \$15M is available. Half of the funds are designated for greater Minnesota.

Bridget Reif reported that MAC CEO Jeff Hamil is retiring in the spring. They expect at least six months to find a new CEO.

8. Other Business and Adjournment

There being no other business, the meeting adjourned at 10:27AM.

Prepared by:

Katie White

ACTION TRANSMITTAL No. 2015-44

DATE: October 16, 2015
TO: Technical Advisory Committee
FROM: TAC Funding and Programming Committee
PREPARED BY: Joe Barbeau, Senior Planner (651-602-1705)
SUBJECT: Scope Change Request for Hennepin County Cedar Lake LRT Regional Trail Crossings
REQUESTED ACTION: Hennepin County requests a scope change to its STP-funded trail crossing project (SP # 027-090-024) to incorporate the project into the base Southwest LRT project and add stairs at the crossings.
RECOMMENDED MOTION: TAC Funding & Programming Committee recommends approval of the scope change request.

BACKGROUND AND PURPOSE OF ACTION: Hennepin County was awarded \$5,830,000 (adjusted for inflation) in Surface Transportation Program (STP) funding from the 2014 Regional Solicitation for construction of three grade-separated road crossings along the Cedar Lake LRT Regional Trail. As originally approved, the project constructs three grade-separated crossings to create five miles of uninterrupted trail to be classified as a Regional Bicycle Trail Network (RBTN) Tier 1 trail. The three grade-separations include a tunnel beneath Blake Road (CSAH 20) in Hopkins, a tunnel beneath Wooddale Avenue in St. Louis Park, and extension of a bridge over Beltline Boulevard in St. Louis Park.

Hennepin County is requesting the following changes to the project:

- Incorporate the project into the base Southwest Light Rail Transit (SWLRT) project. This would allow the leveraging of other federal funds for the project. New Starts funds, if the application is approved would replace some of the STP funds awarded to the project. Other considerations are:
 - The STP funds would be able to contribute toward the New Starts funding of the SWLRT, up to a total federal funding amount of 80 percent.
 - This change has no impact on project design.
 - Leveraging New Starts funds will free up \$2.1 million in STP funds for FY 2018 (See below tables). The County requests that the funds not be re-obligated prior to the end of calendar year 2016 pending federal approval of the full funding grant agreement for New Starts funding.
- Change project sponsor from Hennepin County to Metro Transit.
- Addition of stairs to the crossings. Each of the three crossings will include a staircase to provide a connection between the trail and the SWLRT stations.
 - Beltline Station: stairs are proposed for the east and west sides of Beltline Boulevard.
 - Wooddale Station: Stairs are proposed on the east side of Wooddale Ave.
 - Blake Station: Stairs are proposed on the west side of Blake Road.

Original Cost Estimate

	Total Project Cost	Regional Solicitation	Local Match
Estimated construction cost	\$7,621,400	\$5,830,000	\$1,791,400
Percentage of total project cost		76.5%	23.5%

Updated Cost Estimate Adding Stairs and Adding Project to the SWLRT Base Project

	Total Cost	FTA New Start	STP	Local Match
Estimated construction cost	\$12,370,000	\$6,185,000	\$3,711,000	\$2,474,000
Percentage of total project cost		50.0%	30.0%	20.0%

However, FHWA does not allow STP to be used on ineligible costs such as professional services. Removing ineligible costs from the project budget, leaves the below:

Updated Cost Estimate Adding Stairs and Adding Project to the SWLRT Base Project (No professional services)

Eligible Costs	Total Cost	FTA New Starts	STP	Local Match
Estimated construction cost	\$9,523,000	\$3,907,400	\$3,711,000	\$1,904,600
Percentage of total project cost		41.0%	39.0%	20.0%

Ineligible Costs	Total Cost	FTA New Starts	STP	Local Match
Estimated costs	\$2,847,000	\$1,423,000	\$0	\$1,423,000
Percentage of total project cost		50.0%	0%	50.0%

Difference in Project Costs and STP Funds

	Total Project Cost	STP Funds
Estimated construction cost	+\$2,155,600	-\$2,119,000

RELATIONSHIP TO REGIONAL POLICY: Projects that receive funding through the regional solicitation process are subject to the regional scope change policy. The purpose of this policy is to ensure that the project is designed and constructed according to the plans and intent described in the original application. Additionally, federal rules require that any federally-funded project scope change must go through a formal review and TIP amendment process if the project description or total project cost changes substantially. The scope change policy and process allow project sponsors to make adjustments to their projects as needed while still providing substantially the same benefits described in their original project applications.

The County and Metro Transit are aware that FTA will be overseeing this project and that the funding is for FY 2018. FTA does not allow for “advance construction” in the TIP and it will be the sponsor’s role to receive authorization from FTA for expenditure of funds for early construction for reimbursement in 2018.

A TIP amendment request accompanies this request.

STAFF ANALYSIS: Staff reviewed the submitted scope change request and examined whether the updated project would have scored well enough to be funded. The project originally scored 899 points and was ranked first out of 31 projects that applied for the Multiuse Trails and Bicycle facilities category. Given the nature of the change, very few measures would be in position to see a score reduction. The cost increase leads to a reduced score in Cost Effectiveness of Usage. Other scores are unchanged. The adjusted score of 883 is 102 points above the lowest-scoring funded project in the category.

#	Category	Max	Orig	New	Notes
1	Location relative to RBTN	200	200	200	Not provided to scorer: Would not change
2	Cost Effectiveness of Usage	200	183	167	Scored by staff/scorer. Cost increase reduces score.
3A	Equity	50	18	18	Not provided to scorer: Would not change
3B	Housing	70	54	54	Not provided to scorer: Would not change
4A	Transportation Links	100	85	85	Not provided to scorer: Would not change
4B	Correction of Deficiencies	150	150	150	Not provided to scorer: Would not change
5A/B	Multimodal Connections	50	35	35	Not provided to scorer: Would not change
5C	Transit/Pedestrian Accommodations	50	50	50	Not provided to scorer: Would not change
6	Risk Assessment	130	124	124	Provided to scorer. Would not change
TOTAL		1000	899	883	

COMMITTEE COMMENTS AND ACTION: At its October 15, 2015, meeting, the TAC Funding and Programming Committee unanimously recommended approval of this scope change.

Elaine Koutsoukos
TAB Coordinator
Metropolitan Council
390 North Robert Street
St. Paul, MN 55101

Ms. Koutsoukos,

As expressed in our August 19, 2015 letter, Hennepin County is considering two potential modifications to the Southwest LRT Regional Trail Crossings project, for which the County was awarded federal transportation funds through the Metropolitan Council's 2015 Regional Solicitation. The funding is in the 2016-2019 STIP for the year 2018 with \$5,830,000 in federal funds for a project total of \$7,621,400.

The changes to the project include incorporation of the Trail Crossings into the Southwest Light Rail Transit (SWLRT) base project, and addition of stairs at each crossing. Inclusion of the trail crossings into the base SWLRT project will modify the funding package to leverage Federal Transit Administration New Starts dollars. In this scenario, the Regional Solicitation funds could decrease by an estimated \$2.1 million from the \$5.83 million originally estimated, freeing these funds to be used on other projects throughout the region. The addition of stairs was proposed by the cities during ongoing design discussions to improve safety, accessibility and functionality of the trails. Neither of these scope modifications will have an impact on project schedule.

The Southwest Project Office (SPO) has confirmed that other projects have used federal dollars as local match to federal New Starts dollars, specifically both CMAQ and STP funds. Per current New Starts reporting guidance, we have also revised costs to reflect that total federal funding for the project (New Starts plus other federal sources) cannot exceed 80 percent.

Hennepin County is seeking guidance from Metropolitan Council and Transportation Advisory Board (TAB) staff on whether the two requests described above are possible within the parameters of the Regional Solicitation program. We anticipate that incorporation into the base project will elicit more favorable bid prices from contractors, and the addition of stairs will enhance the safety and accessibility of the trail crossings.

Attached is additional information as requested. If you have any questions or need any additional information please contact me at 612-348-6370 or kimberly.zlimen@hennepin.us.

Sincerely,

A handwritten signature in black ink that reads "Kimberly Zlimen". The signature is written in a cursive, flowing style.

Scope Change Request

Southwest LRT Regional Trail Crossings

REVISED PROJECT DESCRIPTION

This project will grade-separate three Cedar Lake LRT Regional Trail road crossings to create five miles of uninterrupted RBTN Tier 1 trail with zero at-grade road crossings. The project includes tunnels beneath Blake Road (CSAH 20) in Hopkins and Wooddale Avenue in St. Louis Park, and a bridge over Beltline Boulevard in St. Louis Park.

The project will create an accessible and commuter corridor feeding into employment centers in downtown Minneapolis, the Lake Street corridor, St. Louis Park and Hopkins. Trail users will be able to ride five miles without having to stop at a road crossing, improving safety and transportation system efficiency. The project will reduce one-way trip delay by 4.5 minutes for trail users. Time savings for motorists at the trail crossings has not been calculated, but with 584,200 annual trail users crossing the roads, the time savings would be appreciable.

The crossings will avoid multiple-threat uncontrolled intersections along the regional trail carrying 584,200 people per year. Blake Road is a four-lane divided county highway carrying 11,800 ADT; Wooddale is a three-lane road carrying 10,500 ADT; and Beltline is a four-lane divided road carrying 14,100 ADT. The current uncontrolled at-grade crossing of Wooddale also is adjacent to an interchange with TH 7, resulting in a complicated traffic situation in which trail users are less visible, less safe and less comfortable.

The crossings also will benefit the METRO Green Line extension (Southwest LRT) as the crossings will connect existing and redeveloping transit-oriented neighborhoods to transit stations at Blake, Wooddale and Beltline. The METRO Green Line extension will run adjacent to the regional trail, further complicating the already difficult at-grade crossings. The project proposed in this application will eliminate those at-grade crossings and provide access to the LRT stations.

The tunnels at Blake and Wooddale will be concrete with a width of 14 feet and lengths of approximately 100 feet (Blake Road) and 90 feet (Wooddale Avenue). The Beltline bridge will be an extension of a bridge programmed as part of the METRO Green Line extension to span over Beltline Boulevard. The project will include necessary grading and trail replacement and connections. Connections will include access to adjacent METRO Green Line LRT stations at all three sites and will be coordinated with concurrent LRT construction.

Scope changes:

Incorporation into base SWLRT project

With the award of the Regional Solicitation grant, the idea to incorporate the trail projects into the SWLRT base project arose. There are a number of benefits to adding the Southwest LRT Regional Trail Crossings to the base SWLRT project. One benefit is that it allows the trail projects to be incorporated into the SWLRT plans, eliminating the need for separate design packages. It also removes the need to

carry bid alternates through the bidding and construction process, providing the County with some certainty that contingency and construction costs would not increase dramatically over those estimated.

Incorporating the trail projects into the SWLRT base project also provides an opportunity to leverage Federal Transit Administration (FTA) New Starts funds. Southwest Project Office staff have confirmed that the FTA would allow the use of Regional Solicitation funds as a portion of the local match for New Starts funds. Leveraging FTA New Starts funds could free up to \$2.1 million in Regional Solicitation funds previously dedicated to these projects which could then be used to fund other projects throughout the region.

This change has no impact on the design or project timeline, but could potentially have a positive impact on bids received with the removal of some price uncertainty inherent to bid alternates.

Addition of stairs

Another proposed scope modification includes the addition of stairs at all three crossings. At the time of the submission of the Regional Solicitation application, the trail crossing projects were at 30% design. As the design has progressed, further traffic and circulation analyses have identified the need for stairs to be added at each of the grade-separated trail crossings to increase the safety and functionality of the trail crossings for pedestrians and cyclists. The expected movements that are influencing the decision to add stairs are pedestrians and cyclists attempting to access the station by using the shortest route possible. Without stairs, the shortest possible route involves taking the ramps that go down or up to the grade-separated crossings and still crossing the roadway at-grade. This movement would negate the safety and circulation benefits of the grade-separated crossings.

With the addition of stairs that connect down to the underpasses at Blake Road and Wooddale Avenue and up to the bridge over Beltline Boulevard, pedestrians and cyclists would have a shorter, more direct route to the SWLRT stations while still utilizing the grade-separated crossing. This increases the safety and functionality of the crossings, and reduces the risk that a pedestrian or cyclist would attempt to cross the roadway at-grade.

This change has no impact on the design or project timeline. Cost estimates have been revised to include stairs. The cities of St. Louis Park and Hopkins will be funding the required 20% local share of these costs. Because the proposed funding package includes leveraging FTA New Starts funds, even with the additional cost of stairs, utilization of the Regional Solicitation funds could be decreased by up to \$2.1 million.

WORK TO BE COMPLETED

Complete 90% plans and specs.....	January 2016
Complete 100% plans and specs.....	March 2016
Advertise civil construction package.....	April 2016
Civil bids opened.....	June 2016
Construction complete.....	Mid-2019

PROJECT LOCATION MAP

A map showing the location of the project within the area and the region is attached.

REVISED LAYOUTS

Layouts showing project location and design features are attached.

REVISED PROJECT COST ESTIMATES AND FUNDING PACKAGE

See attached detailed cost estimates, revised to include cost of stairs at each location.

The [funding scenario as approved](#) in the Regional Solicitation application is as follows (with inflation adjustments to 2018\$):

	Total Project Cost	Regional Solicitation Grant	Local Match (Hennepin County and other local partners' funds)
Estimated construction costs	\$7,621,400	\$5,830,000	\$1,791,400
Percentage of total project cost	-	76.5%	23.5%

After adding the trail crossing projects to the SWLRT base project and adding stairs at each location, the funding scenario for the trail crossing projects changes to the following:

	Total Project Cost	FTA New Starts – Federal Amount	Regional Solicitation Grant	Local Match (Hennepin County and other local partners' funds)
Estimated construction costs	\$12,370,000	\$6,185,000	\$3,711,000	\$2,474,000
Percentage of total project cost	-	50%	30%	20%
Percentage of local match to FTA New Starts funds	-	-	60%	40%

The Southwest Project Office (SPO) has confirmed that Regional Solicitation and New Starts funds can be used to match each other. There are other projects that have used CMAQ and STP funds as local match to federal CIP (New Starts) dollars. See one example here:

http://www.fta.dot.gov/documents/TX_Ft_Worth_TEX_Rail_Profile-FINAL.pdf.

Per FTA's Final Interim Policy Guidance on the Capital Investment Grant Program (http://www.fta.dot.gov/documents/Final_CIG_interim_policy_guidance_August_2015.docx), FTA requires at least 50% of the non-Section 5309 (New Starts) capital funds are committed or budgeted. Hennepin County and project partners have committed 50% percent of the total project cost, including the costs anticipated to be reimbursed by the Regional Solicitation grant.

Per FTA's current New Starts reporting instructions, total federal funding for the project (New Starts plus other federal sources) may not exceed 80 percent (http://www.fta.dot.gov/documents/FY_17_NS_Reporting_Instructions_final_August_2015.doc). As such, the numbers in the table above have been revised to show a local match of at least 20% of the total project cost.

Proposed Budget**

Specific Bicycle and Pedestrian Elements

Cost Estimate		Funding Sources		
Construction project elements/cost estimates¹	Cost	FTA New Starts - Federal Funds	STP Grant - Federal Funds	Local match (Hennepin County and other local partners' funds)
Path/trail construction	\$5,840,000	\$2,687,700	\$2,217,000	\$935,700
Sidewalk construction		\$0	\$0	\$0
On-street bicycle facility construction		\$0	\$0	\$0
Right-of-way		\$0	\$0	\$0
Pedestrian curb ramps (ADA)		\$0	\$0	\$0
Crossing Aids (e.g., APS, HAWK)		\$0	\$0	\$0
Pedestrian-scale lighting	\$50,000	\$23,000	\$19,000	\$8,000
Streetscaping		\$0	\$0	\$0
Wayfinding	\$10,000	\$4,600	\$4,000	\$1,600
Bicycle and pedestrian contingencies (allocated and unallocated per FTA New Starts cost estimating protocol)	\$3,352,000	\$1,542,700	\$1,272,000	\$537,100
Other bicycle and pedestrian elements ²	\$525,000	\$241,600	\$199,000	\$84,100
<i>Professional services costs (design, construction administration, surveying, staking, etc.)</i>	\$2,593,000	\$1,685,500	-	\$907,600
Total	\$12,370,000	\$6,185,000	\$3,711,000	\$2,474,000
			\$12,370,000	

Notes:

1. All costs are in year of expenditure (YOE) dollars. FTA New Starts requires use of the Standard Cost Categories (SCC) workbook for cost estimates which prorates costs over the years during which construction is planned to occur.
2. YOE costs for stairs at each trail crossing location.

Proposed Budget - Eligible and Ineligible for STP Grant		
Eligible for STP (non-professional services)		\$6,425,000
Contingency (eligible for STP)	Allocated	\$2,248,000
	Unallocated	\$850,000
Ineligible for STP (professional services)		\$2,593,000
Contingency (ineligible for STP)	Unallocated	\$254,000
Total		\$12,370,000

THREE RIVERS PARK DISTRICT

RESOLUTION NO. 14-24

A RESOLUTION IN SUPPORT OF PARTIAL FUNDING OF THE DESIGN AND CONSTRUCTION OF GRADE-SEPARATED CROSSINGS OF THE CEDAR LAKE LRT REGIONAL TRAIL AT BELTLINE BOULEVARD, WOODDALE AVENUE AND BLAKE ROAD.

WHEREAS, Three Rivers Park District is a political subdivision of the State of Minnesota and authorized by statute to acquire, establish, operate, and maintain regional trail systems, and

WHEREAS, Three Rivers Park District constructed and operates the Cedar Lake LRT Regional Trail within the Cities of Hopkins and St. Louis Park; and

WHEREAS, The Cedar Lake LRT Regional Trail is wholly within a transportation corridor owned by Hennepin County's Regional Railroad Authority; and

WHEREAS, The Southwest Light Rail Transit (SWLRT) project will be located in the existing regional trail corridor, resulting in removal and reinstallation of the regional trail within the Cities of Hopkins and St. Louis Park; and

WHEREAS, The SWLRT will create significant trail crossing safety issues of the existing at-grade trail crossings of Blake Road, Wooddale Avenue and Beltline Boulevard; and

WHEREAS, The SWLRT Project Office (SPO) recognized the safety concerns and identified alternative grade-separated trail crossing safety solutions for each road crossing; and

WHEREAS, The SPO and Metropolitan Council classify the grade-separated trail crossings as a "Locally Requested Capital Improvement" project (LRCI) that requires funding from outside the base budget of the SWLRT project; and

WHEREAS, Hennepin County formally submitted the three grade-separated trail crossings to the SPO as a Trail Crossing LRCI package in order for the associated design and construction to occur as part of the SWLRT project; and

WHEREAS, The SPO has estimated final design costs for the Trail Crossings LRCI to be no greater than \$648,000 and construction costs to be no greater than \$7,187,057; and

WHEREAS, A funding commitment for the design of the Trail Crossing LRCI is required from Hennepin County by the end of December 2014 for the trail crossings LRCI to proceed in conjunction with the SWLRT project; and

WHEREAS, Hennepin County has applied for a federal transportation grant to cover eighty percent, up to \$5,500,000, of the Trail Crossings LRCI construction costs requiring a local twenty percent match up to \$1,687,057; and

WHEREAS, Three Rivers and Hennepin County have discussed the idea that each agency would share equally the funding responsibilities for design and for construction of the three trail crossings; and

WHEREAS, Hennepin County and Three Rivers recognize that additional local match funding sources for construction may help reduce each agencies' share of funding in equal amounts; and

NOW, THEREFORE, BE IT RESOLVED, that Three Rivers Park District shall provide funding of up to one-half of the total design costs for the grade-separated trail connections at Blake, Wooddale and Beltline, not to exceed \$324,000, to be reimbursed to Hennepin County as costs are incurred; and

FURTHER BE IT RESOLVED, that Three Rivers Park District shall provide funding of up to one-half of the local match for construction of the grade-separated crossings at Blake, Wooddale and Beltline, not to exceed \$843,529, to be reimbursed to Hennepin County as costs are incurred.

The Park District Board of Commissioners adopted this resolution on the 18th day of December, 2014, by a vote of 6 Ayes and 1 Nays.

THREE RIVERS PARK DISTRICT,

By: *John Gunyou*

**CITY OF HOPKINS
HENNEPIN COUNTY, MINNESOTA**

RESOLUTION 2015-057

**RESOLUTION COMMITTING FUNDING SUPPORT FOR A STAIRWAY
PORTION OF THE BLAKE ROAD REGIONAL TRAIL UNDERPASS – A SWLRT
PROJECT LOCALLY REQUESTED CAPITAL INVESTMENT**

WHEREAS, Hennepin County has applied for and received a federal STP grant for the construction of grade-separated regional trail crossings as locally requested capital investments within the SWLRT project (the “Project”); and

WHEREAS, the County is relying on the Park District and Cities to meet the local match requirements of the STP grant; and

WHEREAS, final decisions regarding the Project scope will not be made until environmental processes are completed.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF HOPKINS, MINNESOTA AS FOLLOWS:

1. The City of Hopkins (the “City”) commits to funding a portion of the cost to construct a stairway on the west side of the Blake Road trail underpass, as part of the Project, at an amount not to exceed \$30,000; and
2. The City’s commitment of funds is subject to each of the following conditions:
 - a) Each of the governmental entities providing matching funds for the Project, including the City, has approved the then-applicable physical design components of the latest preliminary design plans for its jurisdiction, to the extent required by Minnesota Statutes section 473.3994;
 - b) The ongoing environmental review proceeds without concluding, until completion of that review, that any specific scope elements will be included in the Project;
 - c) The completion of any necessary state and federal environmental review and findings and publication of the Record of Decision in the Federal Register;
 - d) The Blake Road Regional Trail Underpass is identified, following completion of environmental review, as part of the Project;
 - e) The Metropolitan Council demonstrates commitments, subject to the review and approval of the City, for the capital costs of the Project of at least \$165 million, cumulatively, from the State of Minnesota and/or the Metropolitan Council;
 - f) The Metropolitan Council demonstrates commitment, subject to the review and approval of the City, of federal funds recognizing the value to the Project of the

local funding by the County and any other local entities participating in cost-sharing for the Blake Road Regional Trail Underpass;

- g) The Federal Transit Administration has approved and executed a full funding grant agreement for not less than 50 percent of the capital costs of the Project;
- h) The funds may be used only for federally-eligible, New Starts activities;
- i) The final terms and conditions of the county funding for the Blake Road Regional Trail Underpass will be addressed in subsequent Council resolutions and in one or more cooperative funding agreements or similar agreements, which terms are subject to the review and approval of the City.

Adopted by the City Council of the City of Hopkins, Minnesota, this 18th day of August, 2015.

St. Paul, MN 55101

Dear Mr. Hovland,

As indicated in your July 22, 2015 grant award letter, Hennepin County was awarded 2018 Surface Transportation Program (STP) funding for the Cedar Lake LRT Regional Trail Crossings project (Project # 027-090-024). The project includes extension of a Cedar Lake LRT Regional trail bridge over Beltline Boulevard, and tunnels for the trail beneath Wooddale Avenue and Blake Road adjacent to the Southwest light rail transit (Southwest LRT) project.

The County, along with project partners Three Rivers Park District and the cities of St. Louis Park and Hopkins, have coordinated with Metropolitan Council's Southwest Project Office to incorporate the trail crossings into the base Southwest LRT project. Advantages of combining with the larger project include leveraging Federal Transit Administration New Starts funds, and eliminating the need to carry forward separate designs as bid alternates.

As Metropolitan Council is the project sponsor for the Southwest LRT project, Metropolitan Council will serve as sponsor for the trail crossings as well once incorporated base LRT project. Hennepin County requests to transfer the FHWA STP funds from the regional solicitation grant from the County to the Metropolitan Council as the agency that will ultimately administer the funds. The County has been working with TAB staff to facilitate the scope change to the grant and TIP amendment processes.

If you have any questions regarding the trail crossings project or the current request, you may contact me at john.doan@hennepin.us or 612-543-1468.

Sincerely,

A handwritten signature in black ink, appearing to read 'John Doan'.

ACTION TRANSMITTAL No. 2015-45

DATE: October 16, 2015
TO: Technical Advisory Committee
FROM: TAC Funding and Programming Committee
PREPARED BY: Joe Barbeau, Senior Planner (651-602-1705)
SUBJECT: 2016-2019 TIP Amendment: Hennepin County Cedar Lake LRT Regional Trail Crossings
REQUESTED ACTION: Hennepin County requests an amendment to adjust the cost, change the sponsor, and add stairways to the scope of its Cedar Lake LRT Regional Trail Crossings project (SP # 027-090-024).
RECOMMENDED MOTION: Recommend that the Transportation Advisory Board adopt the amendment into the 2016-2019 TIP adjust the cost, change the sponsor, and add stairways to the scope Hennepin County's Cedar Lake LRT Regional Trail Crossings project (SP # 027-090-024).

BACKGROUND AND PURPOSE OF ACTION: This TIP amendment is required due to a change in project cost, sponsor, and project description. This project will be administered by the Southwest LRT project but will remain its own stand-alone line in the TIP. The amendment will allow the addition of stairways at each crossing: east and west sides of Beltline Boulevard; east side of Wooddale Avenue; and west side of Blake Road. The 2016-2019 TIP was approved by the Metropolitan Council on September 23, after which time it was provided to MnDOT and is now in federal review. Should this amendment be accepted by the Metropolitan Council prior to federal approval of the 2016-2019 TIP, it will not be official until after that approval is granted. Hennepin County will turn \$2,119,000 of its Solicitation award back to the region.

RELATIONSHIP TO REGIONAL POLICY: Federal law requires that all transportation projects that will be funded with federal funds must be in an approved TIP and meet the following four tests: fiscal constraint; consistency with the adopted regional transportation plan; air quality conformity; and opportunity for public input. It is the TAB's responsibility to adopt and amend the TIP according to these four requirements.

STAFF ANALYSIS: The TIP amendment meets fiscal constraint because the federal and local funds are sufficient to fully fund the project. This amendment is consistent with the Metropolitan Council Transportation Policy Plan, adopted by the Metropolitan Council on January 14, 2015, with FHWA/FTA conformity determination established on March 13, 2015. Approval of this TIP amendment must be contingent on the approval of the accompanying scope change and approval of the 2016-19 TIP by FHWA during the fall of 2015. The Minnesota Interagency Air Quality and Transportation Planning Committee determined that the project is exempt from air quality conformity analysis. Public input opportunity for this amendment is provided through the TAB's and Council's regular meetings.

COMMITTEE COMMENTS AND ACTION: At its October 15, 2015, meeting, the TAC Funding and Programming Committee unanimously recommended approval of this TIP amendment.

ROUTING

TO	ACTION REQUESTED	DATE COMPLETED
TAC Funding & Programming Committee	Review & Recommend	10/15/2015
Technical Advisory Committee	Review & Recommend	
Transportation Advisory Board	Review & Adopt	
Metropolitan Council Transportation Committee	Review & Recommend	
Metropolitan Council	Review & Concurrence	

Please amend the 2016-2019 Transportation Improvement Program (TIP) to modify this project in program year 2018. This project is being submitted with the following information:

PROJECT IDENTIFICATION:

SEQ #	STATE FISCAL YEAR	A T P	D I S T	ROUTE SYSTEM	PROJECT NUMBER (S.P. #) (Fed # if available)	AGENCY	DESCRIPTION include location, description of all work, & city (if applicable)	M I L L E S
	2018	M	M	PED/BIKE	027-090-024 To be assigned	Hennepin County Metro Transit	Three grade-separated road crossings along Cedar Lake LRT Regional Trail: Tunnels beneath CSAH 20 in Hopkins and Wooddale Ave in St Louis Park and a bridge over Beltline Blvd in St Louis Park Three grade-separated road crossings, with stairways connected to the roadway at each, along Cedar Lake LRT Regional Trail: Tunnels beneath CSAH 20 in Hopkins and Wooddale Ave in St Louis Park and a bridge over Beltline Blvd in St Louis Park.	

PROG	TYPE OF WORK	PROP FUNDS	TOTAL \$	FHWA \$	AC \$	FTA \$	TH \$	OTHER \$
	Ped/Bike	STP	7,621,400	5,830,000		0		1,791,400
		FTA New Starts	9,523,000	3,711,000		3,907,400		1,904,600

PROJECT BACKGROUND:

1. Briefly describe why amendment is needed (e.g., project in previous STIP but not completed; illustrative project and funds now available; discretionary funds received; inadvertently not included in TIP).

This TIP amendment is required due to a change in project cost, sponsor, and project description. This project will be administered by the Southwest LRT project (TRF-TCMT-17Y) but will remain its own stand-alone line in the TIP. The project will add inclusion of stairways at each crossing: east and west sides of Beltline Boulevard; east side of Wooddale Avenue; and west side of Blake Road. The 2016-2019 TIP was approved by the Metropolitan Council on September 23, after which time it was provided to MnDOT and is now in federal review. Should this amendment be accepted by the Metropolitan Council prior to federal approval of the 2016-2019 TIP, it will not be official until after that approval is granted. Hennepin County will turn \$2,119,000 of its Solicitation award back to the region.

2. How is Fiscal Constraint Maintained as required by 23 CFR 450.216 (check all that apply)?

- New Money
- Anticipated Advance Construction
- ATP or MPO or MnDOT Adjustment by deferral of other projects
- Earmark or HPP not affecting fiscal constraint
- Other X

STP funding is guaranteed by the federal sources. Hennepin County, Three Rivers Park District, the City of Hopkins and the City of St. Louis Park will provide the local match.

CONSISTENCY WITH MPO LONG RANGE PLAN:

This amendment is consistent with the Metropolitan Council Transportation Policy Plan, adopted by the Metropolitan Council on January 14, 2015, with FHWA/FTA conformity determination established on March 13, 2015.

AIR QUALITY CONFORMITY:

- Subject to conformity determination
- Exempt from regional level analysis X*
- N/A (not in a nonattainment or maintenance area)

*Exempt from regional level analysis: AQ-2 (bicycle and pedestrian facilities)

Information Item

DATE: October 27, 2015
TO: Technical Advisory Committee
PREPARED BY: Steve Peterson, Planning Analyst (651-602-1819)
SUBJECT: 2016 Regional Solicitation Update

Today's regional solicitation discussion will include:

- 1) A review of potential changes to be made to the Forms and Qualifying Criteria

- 2) A review of potential changes to be made to the Roadways applications

Regional Solicitation for Transportation Projects Application

October 16, 2015

Complete and submit the following online application **by 4:00 PM on July 15, 2016.**

IV. REQUIRED ATTACHMENTS

19. MAPS:

- A map or concept drawing of the proposed improvements that clearly labels the [beginning and end of the project, all roadways in the project area](#), roadway geometry, and any bicycle, pedestrian, and transit components upon completion of the project.
- **For Roadway Expansion, Roadway Reconstruction/Modernization, and Roadway System Management projects only:** The Synchro/Highway Capacity Manual emission reduction reports [including the Timing Page Report that displays input and output information](#). *This report must be attached within the web-based application form for Measure 5A (Congestion Reduction/Air Quality).*
- **For Safe Routes to School Projects only:** The completed travel tally and parent survey results from the SRTS planning process. The travel tally form can be found on the Minnesota Department of Transportation (MnDOT) SRTS website: http://www.saferoutesinfo.org/sites/default/files/resources/SRTS_Two_Day_Tally.pdf. *The travel tally and parent survey results must be attached within the web-based application form for Measure 2A (Usage).*
- ~~For Multiuse Trails and Bicycle Facilities, Pedestrian Facilities, and Safe Routes to School Projects only: The documentation of any labor hours (soft match) used to meet the 20 percent local match requirement.~~
- All project information maps generated through the Metropolitan Council Make-A-Map web-based application completed at the beginning of the application process. Attachment/upload locations are placed throughout all appropriate web-based application forms.

20. COORDINATION

- The applicant must include a letter from the agency with jurisdiction over the facility (if different than the applicant) indicating that it is aware of and understands the project being submitted, and that it commits to operate and maintain the facility for its design life.
- If the applicant expects any other agency to provide part of the local match, the applicant must include a letter or resolution from the other agency agreeing to financially participate.
- **For Transit Expansion projects that include service expansion only:** Applicants must provide a letter of support for the project from the transit provider that will commit to providing the service or manage the contract for the service provider.

21. OTHER

- **For Transit and TDM Projects that include public/private joint-use parking facilities only:** The applicant must upload a plan for and make a commitment to the long-term management and enforcement of ensuring exclusive availability of parking to public transit users during commuting times. Federal rules require that parking spaces funded be available exclusively to transit users during the hours of transit service. In the plan, the applicant must indicate how commuter and transit parking will coexist with parking needs for joint use tenants. The entity charged with ensuring exclusive parking for transit commuters after the facility opens must be designated in the plan.
- **TDM Projects only:** [Upload Project Budget \(budget should include applicable costs, such as, salary, fringe benefits, overhead expenses, marketing, materials, etc.\). If using a sub-vendor as part of the project, proper procurement procedures must be used after the project is awarded to select the vendor.](#)

Estimate of TAB-Eligible Project Costs

Fill out the scoping sheet below and provide the estimate of TAB- eligible costs for the project. Applicants are not required to fill out each row of the cost estimate. The list of project elements is meant to provide a framework to think about the types of costs that may be incurred from the project. The total cost should match the total cost reported for the project on the first page of this application. Costs for specific elements are solely used to help applicants come up with a more accurate total cost; adjustments to these specific costs are expected as the project is more fully developed. Per TAB direction, the project must exclude costs for studies, preliminary engineering, design, or construction engineering. Right-of-way costs are only eligible as part of bicycle/pedestrian projects, transit stations/stops, transit terminals, park-and-ride facilities, or pool-and-ride lots. Noise barriers, drainage projects, fences, landscaping, etc., are not eligible for funding as a standalone project, but can be included as part of the larger submitted project, which is otherwise eligible.

Please use 2016 cost estimates for all project elements including transit vehicle and operating costs. The TAB may apply an inflation factor to awarded projects. If TAB includes an inflation factor, then all project elements will be inflated, unlike past years, when only certain project elements were inflated.

It is important that applicants accurately break out costs for the project’s various multimodal elements. These costs will be used, in part, to help determine the score for the Multimodal Facilities scoring criterion. If no dollar amount is placed in the cost estimate form below, than it will be assumed that no multimodal elements are included with the project.

40% Historic/archeological review under way; determination of "adverse effect" anticipated
0% Unsure if there are any historic/archaeological resources in the project area.

Anticipated date or date of completion of historic/archeological review: _____

Project is located on an identified historic bridge:

5) Review of Section 4f/6f Resources (150 Percent of Points)

4(f) – Does the project impacts any public parks, public wildlife refuges, public golf courses, wild & scenic rivers or public private historic properties?

6(f) – Does the project impact any public parks, public wildlife refuges, public golf courses, wild & scenic rivers or historic property that was purchased or improved with federal funds?

- 100% No Section 4f/6f resources located in or adjacent to the project
- 100% Impact to 4(f) property. The project is an Independent Bikeway/Walkway project covered by the bikeway/walkway Negative Declaration statement. Letter of support received (potential option for bicycle and pedestrian facility applications only)
- 80% Section 4f resources present within the project area, but no adverse effects
- 50% Project impacts to Section 4f/6f resources likely – coordination/documentation has begun
- 30% Project impacts to Section 4f/6f resources likely – coordination/documentation has not begun
- 0% Unsure if there are any impacts to Section 4f/6f resources in the project area

6) Right-of-Way (15 Percent of Points)

- 100% Right-of-way, permanent or temporary easements not required
- 100% Right-of-way, permanent or temporary easements has/have been acquired
- 75% Right-of-way, permanent or temporary easements required, offers made
- 50% Right-of-way, permanent or temporary easements required, appraisals made
- 25% Right-of-way, permanent or temporary easements required, parcels identified
- 0% Right-of-way, permanent or temporary easements required, parcels not identified
- 0% Right-of-way, permanent or temporary easements identification has not been completed

Anticipated date or date of acquisition _____

7) Railroad Involvement (25 Percent of Points)

- 100% No railroad involvement on project
- 100% Railroad Right-of-Way Agreement is executed (include signature page)
- 60% Railroad Right-of-Way Agreement required; Agreement has been initiated
- 40% Railroad Right-of-Way Agreement required; negotiations have begun
- 0% Railroad Right-of-Way Agreement required; negotiations not begun

Anticipated date or date of executed Agreement _____

8) Interchange Approval (15 Percent of Points)*

- 100% Project does not involve construction of a new/expanded interchange or new interchange ramps
- 100% Interchange project has been approved by the Metropolitan Council/MnDOT Highway Interchange Request Committee
- 0% Interchange project has not been approved by the Metropolitan Council/MnDOT Highway Interchange Request Committee

*Please contact Karen Scheffing at MnDOT (Karen.Scheffing@state.mn.us or 651-234-7784) to determine if your project needs to go through the Metropolitan Council/MnDOT Highway Interchange Request Committee.

9) Construction Documents/Plan (10 Percent of Points)

- 100% Construction plans completed/approved (include signed title sheet)
- 75% Construction plans submitted to State Aid for review

- 50% Construction plans in progress; at least 30% completion
0% Construction plans have not been started

Anticipated date or date of completion: _____

10) Letting

Anticipated Letting Date: _____

Qualifying Requirements (Draft)

October 8, 2015

The applicant must show that the project meets all of the qualifying requirements to be eligible to be scored and ranked against other projects. All qualifying requirements must be met before completing an application. Applicants whose projects are disqualified may appeal and participate in the review and determination of eligibility at the Technical Advisory Committee (TAC) Funding & Programming Committee meeting.

By selecting each checkbox, the applicant confirms compliance with the following project requirements:

All Projects

1. The project must be consistent with the goals and policies in these adopted regional plans: Thrive MSP 2040 (2014), the 2040 Transportation Policy Plan, the 2040 Regional Parks Policy Plan (2015), and the 2040 Water Resources Policy Plan (2015).

Check the box to indicate that the project meets this requirement.

2. The project must be consistent with the 2040 Transportation Policy Plan. Reference the 2040 Transportation Plan objectives and strategies that relate to the project. List the goals, objectives, strategies, and associated pages):

3. The project or the transportation problem/need that the project addresses must be in a local planning or programming document. Reference the name of the appropriate comprehensive plan, regional/statewide plan, capital improvement program, corridor study document [studies on trunk highway must be approved by the Minnesota Department of Transportation and the Metropolitan Council], or other official plan or program of the applicant agency [includes Safe Routes to School Plans] that the project is included in and/or a transportation problem/need that the project addresses. List the applicable documents and pages):

4. The project must exclude costs for studies, preliminary engineering, design, or construction engineering. Right-of-way costs are only eligible as part of bicycle/pedestrian projects, transit stations/stops, transit terminals, park-and-ride facilities, or pool-and-ride lots. Noise barriers, drainage projects, fences, landscaping, etc., are not eligible for funding as a standalone project, but can be included as part of the larger submitted project, which is otherwise eligible.

Check the box to indicate that the project meets this requirement.

5. Applicants that are not cities or counties in the seven-county metro area with populations over 5,000 must contact the MnDOT Metro State Aid Office prior to submitting their application to determine if a public agency sponsor is required.

Check the box to indicate that the project meets this requirement.

6. Applicants must not submit an application for the same project elements in more than one funding sub-category.

Check the box to indicate that the project meets this requirement.

5. The requested funding amount must be more than or equal to the minimum award and less than or equal to the maximum award. The cost of preparing a project for funding authorization can be substantial. For that reason, minimum federal amounts apply. Other federal funds may be combined with the requested funds for projects exceeding the maximum award, but the source(s) must be identified in the application. Funding amounts by application category are listed below in Table 1.

Table 1: 2016 Regional Solicitation Funding Award Minimums and Maximums

Modal Categories	2016 Regional Solicitation		
	Sub-Categories	Minimum <u>Federal</u> Award	Maximum <u>Federal</u> Award
Roadways Including Multimodal Elements	Roadway Expansion	\$1,000,000	\$7,000,000
	Roadway Reconstruction/ Modernization	\$1,000,000	\$7,000,000
	Roadway System Management	\$250,000	\$7,000,000
	Bridges Rehabilitation/ Replacement	\$1,000,000	\$7,000,000
Bicycle and Pedestrian Facilities	Multiuse Trails and Bicycle Facilities	\$125 <u>250</u> ,000	\$53 <u>3</u> ,500,000
	Pedestrian Facilities (Sidewalks, Streetscaping, and ADA)	\$125 <u>250</u> ,000	\$1,000,000
	Safe Routes to School	\$125 <u>150</u> ,000	\$1,000,000
Transit and TDM Projects	Transit Expansion	\$500,000	\$7,000,000
	Travel Demand Management (TDM)	\$75,000	\$300,000
	Transit System Modernization	\$100,000	\$7,000,000

Check the box to indicate that the project meets this requirement

6. The project must comply with the Americans with Disabilities Act.
 Check the box to indicate that the project meets this requirement.
7. The project must be accessible and open to the general public.
 Check the box to indicate that the project meets this requirement.
8. The owner/operator of the facility must operate and maintain the project for the useful life of the improvement.
 Check the box to indicate that the project meets this requirement.
9. The project must represent a permanent improvement with independent utility. The term “independent utility” means the project provides benefits described in the application by itself and does not depend on any construction elements of the project being funded from other sources outside the regional solicitation, excluding the required non-federal match. Projects that include traffic management or transit operating funds as part of a construction project are exempt from this policy.
 Check the box to indicate that the project meets this requirement.
10. The project must not be a temporary construction project. A temporary construction project is defined as work that must be replaced within five years and is ineligible for funding. The project must also not be staged construction where the project will be replaced as part of future stages. Staged construction is eligible for funding as long as future stages build on, rather than replace, previous work.
 Check the box to indicate that the project meets this requirement.
11. The project applicant must send written notification regarding the proposed project to all affected state and local units of government prior to submitting the application.
 Check the box to indicate that the project meets this requirement.

Roadways Including Multimodal Elements

1. All roadway and bridge projects must be identified as a Principal Arterial (Non-Freeway facilities only) or A-Minor Arterial as shown on the latest TAB approved roadway functional classification map.
 Check the box to indicate that the project meets this requirement.

2. **Roadway Expansion and Reconstruction/Modernization projects only:** The project must be designed to meet 10-ton load limit standards.
 Check the box to indicate that the project meets this requirement.

4. **Bridge Rehabilitation/Replacement projects only:** Projects requiring a grade-separated crossing of a Principal Arterial freeway must be limited to the federal share of those project costs identified as local (non-MnDOT) cost responsibility using MnDOT’s “Cost Participation for Cooperative Construction Projects and Maintenance Responsibilities” manual. In the case of a federally funded trunk highway project, the policy guidelines should be read as if the funded trunk highway route is under local jurisdiction.
 Check the box to indicate that the project meets this requirement.

5. **Bridge Rehabilitation/Replacement projects only:** The bridge must carry vehicular traffic. Bridges can carry traffic from multiple modes. However, bridges that are exclusively for bicycle or pedestrian traffic must apply under one of the Bicycle and Pedestrian Facilities sub-categories. Rail-only bridges are ineligible for funding.
 Check the box to indicate that the project meets this requirement.

6. **Bridge Rehabilitation/Replacement projects only:** The length of the bridge must equal or exceed 20 feet.
 Check the box to indicate that the project meets this requirement.

7. **Bridge Rehabilitation/Replacement projects only:** The bridge must have a sufficiency rating less than 80 for rehabilitation projects and less than 50 for replacement projects. Additionally, the bridge must also be classified as structurally deficient or functionally obsolete.
 Check the box to indicate that the project meets this requirement.

[Please note: In this 2016 solicitation, points will be awarded as part of the Risk Assessment for applicable projects that have completed this interchange approval process. In the next Regional Solicitation, applicable interchange projects will need to go through the approval prior to submitting an application \(i.e., it will become a qualifying requirement\). Please contact Karen Scheffing at MnDOT \(Karen.Scheffing@state.mn.us or 651-234-7784\) to determine if your project needs to go through the Metropolitan Council/MnDOT Highway Interchange Request Committee.](#)

Bicycle and Pedestrian Facilities Projects Only

1. All projects must relate to surface transportation. As an example, for multiuse trail and bicycle facilities, surface transportation is defined as primarily serving a commuting purpose and/or that connect two destination points. A facility may serve both a transportation purpose and a recreational purpose; a facility that connects people to recreational destinations may be considered to have a transportation purpose.

Check the box to indicate that the project meets this requirement.

- ~~2. Seventy percent of the project cost must fall under one or a combination of the following eligible activities:~~

- ~~• Construction of on road and off road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.).~~
- ~~• Construction of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities, to access daily needs.~~
- ~~• Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized transportation users.~~
- ~~• Safe Routes to School Infrastructure-related projects.~~

~~Check the box to indicate that the project meets this requirement.~~

2. Multiuse Trails on Active Railroad Right-of-Way: All multiuse trail projects that are located within right-of-way occupied by an active railroad must attach an agreement with the railroad that this right-of-way will be used for trail purposes.

Check the box to indicate that the project meets this requirement.

3. **Safe Routes to School projects only:** All projects must be located within a two-mile radius of the associated primary, middle, or high school site.

Check the box to indicate that the project meets this requirement.

4. **Safe Routes to School projects only:** All schools benefitting from the SRTS program must conduct after-implementation surveys. These include the [student travel tally form](#) and the [parent survey](#) available on the National Center for SRTS website. The school(s) must submit the after-evaluation data to the National Center for SRTS within a year of the project completion date. Additional guidance regarding evaluation can be found at the [MnDOT SRTS website](#).

Check the box to indicate that the applicant understands this requirement and will submit data to the National Center for SRTS within one year of project completion.

5. **Safe Routes to School projects only:** The applicant must have a Safe Routes to School plan established to be eligible for funding. MnDOT staff will notify Metropolitan Council staff of all agencies eligible for funding. If an applicant has a new Safe Routes to School plan and has not previously notified MnDOT Safe Routes to School staff of the plan, the applicant should contact Mao Yang (Mao.Yang@state.mn.us; 651-366-3827) prior to beginning an application to discuss the plan and confirm eligibility. MnDOT staff will send updated applicant eligibility information to Metropolitan Council staff, if necessary.

Check the box to indicate that the applicant understands this requirement and will contact MnDOT Safe Routes to School staff, if necessary, to confirm funding eligibility.

Transit and Travel Demand Management (TDM) Projects Only

1. **Transit Expansion projects only:** The project must provide a new or expanded transit facility or service (includes peak, off-peak, express, limited stop service, or dial-a-ride).

Check the box to indicate that the project meets this requirement.

2. **Transit Expansion projects only:** The applicant must have the capital and operating funds necessary to implement the entire project and commit to continuing the service or facility project beyond the initial three-year funding period for transit operating funds.

Check the box to indicate that the project meets this requirement.

3. **Transit Expansion projects only:** The project is not eligible for either capital or operating funds if the corresponding capital or operating costs have been funded in a previous solicitation. However, Transit Modernization projects are eligible to apply in multiple solicitations if new project elements are being added with each application.

Check the box to indicate that the project meets this requirement.

Roadway Expansion – Prioritizing Criteria and Measures

October 26, 2015

Specific instructions for how to respond to measures for a proposed new roadway alignment are given as part of each measure, if applicable.

Please answer the following questions:

1. Role in the Regional Transportation System and Economy (175 Points) – Tying regional policy (Thrive MSP2040) to the Regional Solicitation, this criterion measures the project’s ability to serve a transportation purpose within the regional transportation system and economy based on how well it fulfills its functional classification role, serves heavy commercial traffic, and connects to employment and manufacturing/distribution-related employment, ~~as well as existing local activity centers.~~

- A. **MEASURE:** Address how the project route fulfills its role in the regional transportation system as identified by its current functional classification. Respond as appropriate to one type of functional classification. (90 Points)

Expander/Augmentor/Non-Freeway Principal Arterial:

- ~~Reference Use~~ the “Roadway Area Definition” map generated at the beginning of the application process. ~~Report the total area and project length, as depicted on the “Roadway Area Definition Project Summary” map, to~~ To ensure consistency of methodology between applicants, Metropolitan Council staff will calculate the average distance between the project and the closest parallel A-Minor Arterials or Principal Arterials on both sides of the project given the project description included by the applicant.

RESPONSE (Calculation):

- Metropolitan Council staff will calculate the response

Reliever: For A-Minor Arterial Relievers, the measure will analyze the level of congestion on the parallel Principal Arterial to determine the importance of the Reliever. Identify the hours per day the current volume exceeds the design capacity on the Principal Arterial being relieved by the Reliever.

- If the Reliever is relieving a Principal Arterial that is a freeway facility, the applicant should obtain data from the current [MnDOT Metro Freeway Congestion Report](#).
- If the Reliever is relieving a Principal Arterial that is a non-freeway facility, the applicant should obtain intersection turning movement or hourly volume data (within the last three years) directly from the [MnDOT Metro Intersection Warrant Information website](#). If data is unavailable on the website, the applicant should collect or use their own intersection turning movement or hourly volume data (within the

last three years) for the non-freeway facility. The volume used for the Principal Arterial being relieved should be located within the parallel length of the project. To calculate existing conditions, the applicant must obtain the hourly directional traffic volumes on a weekday, and the current lane configurations.

For the design capacity calculations, the applicant must use Metropolitan Council definition below:

Design Capacity

The assumed maximum number of vehicles per lane which pass any given point in an hour on an average day during normal operating conditions. For the purposes of responding to criteria in this solicitation packet, the following capacities shall be used:

- Expressway through lane - 800 vehicles per hour;
- Arterial through lane - 600 vehicles per hour;
- Left-turn lane - 300 vehicles per hour;
- Right-turn lane - 200 vehicles per hour;
- Dedicated bike lane or multi use trail - 60 vehicles per hour.

RESPONSE (Calculation):

SCORING GUIDANCE (90 Points)

Expanders, Augmentors, and Non-Freeway Principal Arterials: The applicant with the furthest average distance from the closest parallel A-Minor Arterials or Principal Arterials on both sides will receive the full points. The furthest average distance will be considered separately for Expanders, Augmentors, and Non-Freeway Principal Arterials. Four projects (one each for Augmentor, Expander, Reliever, and Non-Freeway Principal Arterial) may receive the full points. Remaining projects will receive a proportional share of the full points (awarded to the top score in its functional classification) equal to the average distance of the project being scored divided by average distance of the greatest distance project multiplied by the maximum points available for the measure (90). For example, if the Expander being scored had a distance of 8 miles and the top Expander project was had an average distance of 10 miles, this applicant would receive $(8/10)*90$ points or 72 points. Metropolitan Council staff will provide average distance data for all Augmentor, Expander, and Non-Freeway Principal Arterial projects to ensure consistency of methodology between applications.

Relievers: The applicant with the highest number of hours per day in which current capacity exceeds the design capacity on the Principal Arterial will receive the full points. Remaining Reliever projects will receive a proportional share of the full points, calculated as described above.

- B. MEASURE: Provide the current daily heavy commercial traffic at one location along the A-Minor Arterial or Non-Freeway Principal Arterial's project length. It is required that an actual daily count is collected or available data from within the last three years is used (from the city, county or MnDOT). Heavy commercial traffic is defined as all trucks with at least two axles and six tires. (65 Points)

- For new roadways, identify the current daily heavy commercial traffic volume that will be relocated from any parallel roadway(s) to the new roadway. For instance, if it

is expected that 20% of the 5,000 vehicles on an existing parallel roadway will divert to the new roadway, then it can be assumed that the amount of heavy commercial vehicles that will divert to the new roadway will also be 20% of the total heavy commercial volume on the existing road.

RESPONSE:

- Location or location(s) if a new roadway: _____
- Current daily heavy commercial traffic volume: _____

SCORING GUIDANCE (65 Points)

The applicant with the highest daily heavy commercial traffic at a location along the project length will receive the full points. The highest daily heavy commercial traffic will be considered separately for Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials.

As a result, four projects (Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials) may receive the full points. Remaining projects in each of the four categories will receive a proportional share of the full points equal to the daily heavy commercial traffic of the project being scored divided by the highest daily heavy commercial traffic project (in the same functional classification) multiplied by the maximum points available for the measure (65). For example, if the application being scored had a heavy commercial volume of 750 vehicles and the top project had a heavy commercial volume of 1,000 vehicles, this applicant would receive $(750/1,000) * 65$ points, or 48 points.

- C. **MEASURE:** Reference the “Regional Economy” map generated at the beginning of the application process. Report the existing total employment and manufacturing/distribution-related employment within one mile, as depicted on the “Regional Economy” map. Reference the “Regional Economy” map generated at the beginning of the application process. Identify the project’s connections to the Job Concentrations, Manufacturing/ Distribution Locations, and Educational Institutions as defined in ThriveMSP 2040, and depicted in the “Regional Economy” map. If the project does not provide a connection to a Job Concentration, Manufacturing/Distribution Location, or Educational Institution, but provides a connection to a local activity center, reference the adopted county or city plan identifying this area. (20 Points)

Upload the “Regional Economy” map used for this measure.

RESPONSE (Select all that apply, based on the “Regional Economy” map):

- ~~Direct connection to or within a mile of a Job Concentration: (20 Points)~~
- ~~Direct connection to or within a mile of a Manufacturing/Distribution Location: (20 Points)~~
- ~~Direct connection to or within a mile of an Educational Institution: (12 Points)~~
- ~~Project provides a direct connection to or within a mile of an existing local activity center identified in an adopted county or city plan: (12.8 Points)~~

RESPONSE (Data from the “Regional Population” map):

- Existing Total Employment within 1 Mile: _____

- Existing Manufacturing/Distribution-Related Employment within 1 Mile:

SCORING GUIDANCE (20 Points)

Using the Metropolitan Council model, all traffic analysis zone that are included within or intersect the buffer area around the project.

The applicant with the highest existing total employment will receive the full points. Remaining projects will receive a proportionate share of the full points equal to the existing employment within one mile of the project being scored divided by the project with the highest employment within one mile multiplied by the maximum points available for the measure (20). For example, if the application being scored had 1,000 workers within one mile and the top project had 1,500 workers, this applicant would receive $(1,000/1,500)*20$ points or 13 points.

The applicant with the highest existing manufacturing/distribution-related employment will receive the full points. Remaining projects will receive a proportionate share of the full points equal to the existing manufacturing/distribution-related employment within one mile of the project being scored divided by the project with the highest manufacturing/distribution-related employment within one mile multiplied by the maximum points available for the measure (20). For example, if the application being scored had 1,000 manufacturing/distribution-related workers within one mile and the top project had 1,500 manufacturing/distribution-related workers, this applicant would receive $(1,000/1,500)*20$ points or 13 points.

The scorer will assess if the applicant would score higher with the total employment part of the measure or the manufacturing/distribution employment part of the measure, and give the applicant the higher of the two scores out of a maximum of 20 points.

2. Usage (175 Points) – This criterion quantifies the project’s potential mobility impact by measuring the current daily person throughput and future vehicular traffic that will be served by the project. These roadway users directly benefit from the project improvements on the A-Minor Arterial or Non-Freeway Principal Arterial.

A. **MEASURE:** Metropolitan Council staff will calculate the current daily person throughput at one location along the A-Minor Arterial or Non-Freeway Principal Arterial project length using the current average annual daily traffic (AADT) volume and average annual ridership. The applicant must identify the location along the project length and provide the current AADT volume from the last published MnDOT 50-series maps and existing transit routes. Ridership data will be provided by the Metropolitan Council staff, if public transit is currently provided on the project length. (110 Points)

- Current Daily Person Throughput = (current average annual daily traffic volume x 1.30 vehicle occupancy) + average annual daily transit ridership (2015)
- For new roadways, identify the current daily traffic volume and existing transit routes that will be relocated from any parallel roadway(s) to the new roadway.

RESPONSE:

- Location or location(s) if a new roadway: _____
- Current AADT volume: _____
- Existing Transit Routes on the Project: _____

SCORING GUIDANCE (110 Points)

The applicant with highest current daily person throughput will receive the full points for the measure. This measure will be considered separately for Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials.

As a result, four projects (Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials) may receive the full points. Remaining projects will receive a proportional share of the full points equal to the daily person throughput of the project being scored divided by the project with the highest daily person throughput (in the same functional classification) multiplied by the maximum points available for the measure (110). For example, if the application being scored had a daily person throughput of 1,000 vehicles and the top project had a daily person throughput of 1,500 vehicles, this applicant would receive $(1,000/1,500)*110$ points or 73 points.

B. **MEASURE:** Provide the forecast (~~2030~~2040) average daily traffic volume at the same location along the A-Minor Arterial or Non-Freeway Principal Arterial project length, as identified in the previous measure. The applicant may choose to use a county or city travel demand model based on the Metropolitan Council model to identify the forecast (~~2030~~2040) average daily traffic volume or have Metropolitan Council staff determine the forecast volume using the Metropolitan Council model and project location. Respond as appropriate to the use of one type of forecast model. (65 Points)

- [For new roadways, identify the forecast daily traffic volume if this information is available. If not available, then identify the forecast volumes that will be relocated from any parallel roadway\(s\) to the new roadway.](#)

RESPONSE:

- Use Metropolitan Council model to determine forecast (~~2030~~2040) ADT volume

OR

RESPONSE:

- Approved county or city travel demand model to determine forecast (~~2030~~2040) ADT volume
- Forecast (~~2030~~2040) ADT volume : _____

SCORING GUIDANCE (65 Points)

The applicant with the highest forecast (2040) ADT volume will receive the full points for the measure. This measure will be considered separately for Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials.

As a result, four projects (Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials) may receive the full points. Remaining projects will receive a proportional share of the full points equal to the daily forecast of the project being scored divided by the project with the highest daily forecast multiplied by the maximum points available for the measure (65). For example, if the application being scored had a daily forecast of 28,000 vehicles and the top project had a daily forecast of 32,000 vehicles, this applicant would receive $(28,000/32,000) * 65$ points or 57 points.

3. Equity and Housing Performance (100 Points) – The language for this criterion has not yet been updated. This criterion addresses the project’s positive and negative impacts to low-income populations, people of color, children, people with disabilities, and the elderly. The criterion also evaluates a community’s efforts to promote affordable housing.

- A. **MEASURE:** Reference the “Socio-Econ” map generated at the beginning of the application process. Identify the project’s location from the list below, as depicted on the map. Describe the project’s positive benefits, and negative impacts, and mitigation for low-income populations; people of color; children, people with disabilities, and the elderly. Geographic proximity alone is not sufficient to receive the full points listed below. In order to receive the maximum points, the response should address the benefits, impacts, and mitigation for the populations listed above. (30 Points)

Upload the “Socio-Econ” map used for this measure.

RESPONSE (Select one, based on the “Socio-Econ” map):

- Project located in Racially Concentrated Area of Poverty: (0 to 30 Points)
- Project located in Concentrated Area of Poverty: (0 to 24 Points)
- Project’s census tracts are above the regional average for population in poverty or population of color: (0 to 18 Points)
- Project located in a census tract that is below the regional average for population in poverty or populations of color, or includes children, people with disabilities, or the elderly: (0 to 12 Points)

RESPONSE (Limit 2,800 characters; approximately 400 words):

SCORING GUIDANCE (30 Points)

Based on the “Socio-Econ” map’s output, the applicant will select the appropriate option from the above bullets. However, geographic proximity alone is not sufficient to receive full points. The applicant must fully describe the positive benefits and negative impacts (with mitigation to address the issue) for those identified groups. Each project will first be graded on a 10-point scale, not accounting for geography. Each score from the 10-point scale will then be adjusted to the appropriate geography. The project with the most positive benefits and appropriate mitigation for negative impacts will receive the full points relative to its maximum geographic sub-area defined above. Remaining projects will receive a share of the full points at the scorer’s discretion. This response is intended to be qualitative. Metropolitan Council staff will score this measure.

Note: Due to the geographic adjustment to scores, it is possible that no project will receive the maximum allotment of 30 points.

- B. **MEASURE:** Metropolitan Council staff will award points to the project based on the 2015 Housing Performance Score [\(add hyperlink\)](#) for the city or township in which the project is located. The score includes consideration of affordability and diversification, local initiatives to facilitate affordable workforce housing development or preservation, and density of residential development. If the project is in more than one jurisdiction, the points will be awarded based on a weighted average using the length of the project in each jurisdiction. If a

project is located in a city or township with no allocation of affordable housing need (either there is no forecasted household growth or the area does not have land to support sewer development), then the project will not be disadvantaged by this measure and the project's total score will be adjusted as a result. (70 Points)

RESPONSE (Affordable Housing Score completed by Metropolitan Council staff):

- City/Township: _____
- Length of Segment within City/Township: _____

SCORING GUIDANCE (70 Points)

The applicant with the highest 2015 Housing Performance Score will receive the full points. Remaining projects will receive a proportional share of the full points equal to the Housing Performance Score of the project being scored divided by the project with the highest Housing Performance Score multiplied by the maximum points available for the measure (70). For example, if the application being scored had a Housing Performance Score of 55 and the top project had a Housing Performance Score of 90, this applicant would receive $(55/90)*70$ points or 43 points.

Note: Metropolitan Council staff will score this measure.

Projects will use the city Housing Performance Score based on the project location. If a project is located in more than one jurisdiction, the points will be awarded based on a weighted average of the city or township scores for the project location based on the length of the project in each jurisdiction. If a project is located in a city or township with no allocation of affordable housing need (either there is no forecasted household growth or the area does not have land to support sewer development), then the project will not be disadvantaged by this measure and the project's total score will be adjusted as a result.

If this is the case, then the total points possible in the application will be 930 instead of 1,000. The total points awarded through the rest of the application (900 as a hypothetical example) will be divided by 930, then multiplied by 1,000. Therefore, a project scoring 900 out of 930, will equate to 968 points on a 1,000-point scale.

If a portion of the project is located in a city with an affordable housing allocation and the other portion is located in a township with no affordable housing allocation, then a combination of the weighted average and no affordable housing methodologies should be used. This will result in a total score that will be somewhere between 930 and 1,000; then the score will need to be adjusted to fit a 1,000-point scale.

4. Infrastructure Age (75 Points) – This criterion will assess the age of the roadway facility being improved. Roadway improvement investments should focus on the higher needs of an aging facility, whereas, improvements to a recently reconstructed roadway does not display as efficient use of funds.

A. **MEASURE:** Identify the year of the roadway’s original construction or most recent reconstruction. If the reconstruction date is used for the roadway, a full reconstruction must have been completed during the indicated year. Routine maintenance, such as an overlay or a sealcoating project does not constitute a reconstruction and should not be used to determine the infrastructure age.

- [For new roadways, identify the average age of the parallel roadways from which traffic will be diverted to the new roadway.](#)

RESPONSE:

- Year of original roadway construction or most recent full reconstruction: _____
- [Explanation \(if needed\):](#) _____

SCORING GUIDANCE (75 Points)

The applicant with the oldest roadway will receive full points. Remaining projects will receive a proportional share of the full points equal to the age of the project being scored divided by age of the oldest project multiplied by the maximum points available for the measure (75). For example, if the application being scored was constructed 41 years ago and the oldest project was constructed 48 years ago, this applicant would receive $(41/48)*75$ points or 64 points.

5. Congestion Reduction/Air Quality (150 Points) – This criterion measures the project’s ability to reduce intersection delay and emissions during peak hour conditions.

A. MEASURE: Conduct a capacity analysis at one or more of the intersections being improved by the roadway project using existing turning movement counts (collected within the last three years) in the a.m. or p.m. peak hour and Synchro or HCM software. The analysis must include build and no build conditions (with and without the project improvements). The applicant must show the current total peak hour delay at one or more intersections and the reduction in total peak hour intersection delay at these intersections in seconds due to the project. If more than one intersection is examined, then the delay reduced by each intersection can be added together to determine the total delay reduced by the project (100 Points)

- For new roadways, identify the key intersection(s) on any parallel roadway(s) that will experience reduced delay as a result of traffic diverting to the new roadway. If more than one intersection is examined, then the delay reduced by each intersection can be added together.
- For roadway projects that include a railroad crossing, the Synchro analysis should be adapted to account for the delay caused by the railroad tracks being blocked.

The applicant should include the appropriate Synchro or HCM full reports (including the Timing Page Report) that support the improvement in total peak hour delay and should conduct the analysis using the following:

- Under the network settings, all defaults should be used for lanes, volumes, phases and simulation
- Use Synchro’s automatic optimization to determine cycle, offset and splits (for traffic signals)
- Project improvements assumed in the build condition should be reflected in the total project cost, such as additional through or turn lanes and protective left-turn phasing

- Total Peak Hour Delay Reduced (Seconds) = Total Peak Hour Delay/Vehicle x Vehicles Per Hour

RESPONSE (Calculation):

- Total Peak Hour Delay/Vehicle Reduced by the Project (Seconds/Vehicle): _____
- Volume (Vehicles Per Hour): _____
- Total Peak Hour Delay Reduced by the Project (Seconds): _____
- Cost Effectiveness: _____

SCORING GUIDANCE (100 Points)

The applicant with the most peak hour vehicle delay reduced by the project improvement will receive the full points for the measure. Remaining projects will receive a proportional share of the points equal to the delay reduced by the project being scored divided by the project with the highest reduction in delay multiplied by the maximum points available for the measure (10). For example, if the application being scored reduced delay by 5,000 seconds and the top project reduced delay by 25,000 seconds, this applicant would receive $(5,000/25,000)*100$ points, or 20 points.

A.B.MEASURE: Using the Synchro or HCM analysis completed in the previous measure, identify the total peak hour emissions reduction in kilograms (CO, NO_x, VOC) due to the project. The applicant should include the appropriate Synchro or full HCM reports (including the Timing Page Report) that support the improvement in total peak hour emissions. If more than one intersection is examined, then the emissions reduced by each intersection can be can added together to determine the total emissions reduced by the project (50 Points)

- For new roadways, identify the key intersection(s) on any parallel roadway(s) that will experience reduced emissions as a result of traffic diverting to the new roadway. If more than one intersection is examined, then the emissions reduced by each intersection can be can added together.
- Total Peak Hour Emissions Reduced (Kilograms)= Total Peak Hour Emissions Reduced/Vehicle x Vehicles Per Hour

RESPONSE (Calculation):

- Peak Hour CO Emissions Reduced/Vehicle by the Project (Kilograms): _____
- Peak Hour NO_x Emissions Reduced/Vehicle by the Project (Kilograms): _____
- Peak Hour VOC Emissions Reduced/Vehicle by the Project (Kilograms): _____
- Total Peak Hour Emissions Reduced/Vehicle by the Project (Kilograms): _____
- Volume (Vehicles Per Hour): _____
- Total Peak Hour Emissions Reduced by the Project (Kilograms): _____

SCORING GUIDANCE (50 Points)

The applicant with the most kilograms reduced by the project improvement will receive the full points for the measure. Remaining projects will receive a proportional share of the full points equal to the emissions reduced by the project being scored divided by the project with the highest reduction in emissions multiplied by the maximum points available for the measure (10). For example, if the application being scored reduced emissions by 3 kilograms and the top project reduced emissions by 5 kilograms, this applicant would receive (3/5)*50 points or 30 points.

6. Safety (150 Points) – This criterion addresses the project’s ability to correct deficiencies and improve the overall safety of an existing or future roadway facility. It will assess the project’s [Benefit/Cost ratio monetized safety benefits](#).

A. **MEASURE**: Respond as appropriate to one of the two project types below. (150 Points)

Roadway projects that do not include railroad grade-separation elements:

Calculate the reduction in the total number of crashes due to improvements on the A-Minor Arterial or Non-Freeway Principal Arterial made by the project. The applicant must base the estimate of crash reduction on the methodology consistent with the [Highway Safety Improvement Program \(HSIP\)](#). Applicants should focus on the crash analysis for reactive projects starting on page 7 through page 11, in addition to Appendix A, E, and F.

Crash data must be obtained for the project length using the MnDOT TIS system average for calendar years 2013 through 2015. Crash data should include all crash types and severity, including pedestrian and bicycle crashes.

Applicants should request crash data from MnDOT as early as possible. The applicant must then [attach a listing of the crashes reduced and](#) the HSIP Benefit/Cost (B/C) worksheet that identifies the resulting benefit associated with the project. [As part of the response, please detail the crash modification factor\(s\) used from FHWA’s Crash Modification Factors Clearinghouse: <http://www.cmfclearinghouse.org/>](#)

- [1. For new roadways, identify the parallel roadway\(s\) from which traffic will be diverted to the new roadway.](#)
- [2. Using the crash data for 2013-2015, calculate the existing crash rate for the parallel roadway\(s\) identified in Step 1.](#)
- [3. Identify the daily traffic volume that will be relocated from the parallel roadway\(s\) to the new roadway.](#)
- [4. Calculate the number of crashes on the parallel roadway\(s\) using the existing crash rate from Step 2 and the relocated traffic volume to determine the change in number of crashes due to the relocated traffic volume. For instance, if 5,000 vehicles are expected to relocate from the existing parallel roadway to the new roadway, calculate the number of crashes related to the 5,000 vehicles.](#)
- [5. Identify the average crash rate for the new roadway using MnDOT’s average crash rates by roadway type. Using the average crash rate for the new roadway, calculate the number of crashes related to the relocated traffic \(i.e., the 5,000 vehicles\).](#)
- [6. Calculate the crash reduction factor using the existing number of crashes on the existing parallel roadway \(Step 4\) compared to the estimated crashes calculated for the new roadway \(Step 5\), due to the relocated traffic volume \(i.e., the 5,000 vehicles\).](#)
- [7. The calculated crash reduction factor should be used in the HSIP B/C worksheet.](#)
- [8. Upload additional documentation materials into the “Other Attachments” Form in the online application.](#)

RESPONSE (Calculation):

- Crash Modification Factors Used: _____
- Rationale for Crash Modifications Selected (Limit 1,400 characters; approximately 200 words): _____
- Project Benefit (\$) from B/C ratio / Cost ratio: _____

Roadway projects that include railroad grade-separation elements:

Since the number of observed crashes at an existing at-grade railroad crossing is small compared to an intersection, this measure will assess crash risk exposure that exists in order to compare projects. As a proactive safety measure, railroad grade-separation projects eliminate the crash risk exposure.

- Crash Risk Exposure Eliminated = current average annual daily traffic volume x average number of daily trains at the at-grade crossing

RESPONSE (Calculation):

- Current AADT volume: _____
- Average daily trains: _____
- Crash Risk Exposure eliminated: _____

SCORING GUIDANCE (150 Points)

This measure will be considered separately for projects that do and do not include a railroad grade-separation project. As a result, two projects (one project without a railroad grade-separation project and one with a railroad grade-separation project) may receive the full points.

For projects that do not include a grade-separation project, the applicant with the highest dollar value of benefits will receive the full points for the measure. Remaining projects will receive a proportional share of the full points equal to the dollar value of safety benefits for the project being scored divided by the project with the highest dollar value of safety benefits multiplied by the maximum points available for the measure (150). For example, if the application being scored had safety benefits of \$11,000,000 and the top project had safety benefits of \$16,000,000, this applicant would receive $(11,000,000/16,000,000)*150$ points or 103 points.

For railroad grade-separation projects, the applicant with the highest dollar value of benefits will receive the full points for the measure. Remaining projects will receive a proportional share of the full points equal to the dollar value of safety benefits for the project being scored divided by the project with the highest dollar value of safety benefits multiplied by the maximum points available for the measure (150). For example, if the application being scored had safety benefits of \$11,000,000 and the top project had safety benefits of \$16,000,000, this applicant would receive $(11,000,000/16,000,000)*150$ points or 103 points.

7. Multimodal Facilities (100 Points) – This criterion measures how the project improves the travel experience, safety, and security for other modes of transportation and addresses the safe integration of these modes. The *Transportation Policy Plan* requires that explicit consideration of all users of the transportation system be considered in the planning and scoping phase of roadway projects.

Multimodal Connections (50 Points)

Transit Connections

A. ~~MEASURE: Reference the “Transit Connectivity” map generated at the beginning of the application process. List the transit routes directly connected to the project to help determine the annual transit ridership of these connecting routes, as depicted on the “Transit Connectivity” map. Potential connections include transitway stations (existing transitways or planned transitways with a mode and alignment determined in the 2030 TPP), high-frequency express and local stations/stops, and other non-high-frequency fixed-route stations/stops. Metropolitan Council staff will provide annual ridership for each connecting route.~~

Upload the “Transit Connectivity” map used for this measure.

Note: Transitways offer travel time advantages for transit vehicles, improve transit service reliability, and increase the convenience and attractiveness of transit service. Transitways are defined in the Transportation Policy Plan to include commuter rail, light rail, highway and arterial bus rapid transit, and express bus with transit advantages. Eligible transitway projects are those that have a mode and alignment identified in the Transportation Policy Plan.

RESPONSE (Data from the “Transit Connectivity” map):

- Existing routes directly connected to the project: _____
- Planned transitways directly connected to the project (alignment and mode determined and identified in the 2030 TPP): _____

SCORING GUIDANCE

NOTE: 7A IS SCORED BELOW, ALONG WITH 7B.

Bicycle and Pedestrian Connections

B. ~~MEASURE: Identify the pedestrian and bikeway connections to the project and describe these existing facilities. As part of the required response, discuss how the project provides a direct connection to an existing high pedestrian traffic area (e.g., commercial, mixed use, or entertainment nodes/districts; town or village centers) identified in an adopted county or city plan or study. Applicants should also discuss any bicycle or pedestrian connections that will be constructed before the completion of the proposed project, or planned future connections. If the pedestrian or bicycle connection is planned, also describe the timing of the project and the adopted county or city plan or study that identifies this facility.~~

RESPONSE (Limit 1,400 characters; approximately 200 words): _____

SCORING GUIDANCE (50 Points)

NOTE: THIS SCORING SECTION IS FOR 7A and 7B, COMBINED

The applicant should provide a response to measures A and B. The project with the most extensive connections to other modes will receive the full points. Remaining projects will receive a share of the full points at the scorer's discretion.

The scorer will weigh the project's connections to transit (as measured through annual transit ridership), bikeways, high traffic pedestrian areas (e.g., commercial, mixed use, or entertainment nodes/districts; town or village centers), and other pedestrian facilities, as detailed in the required response (200 words or less). A higher value will be placed on existing transit ridership and infrastructure connections present at the time of project construction over future transit ridership and planned infrastructure connections.

Multimodal Facilities (50 Points)

C.A. MEASURE: Discuss any bicycle, pedestrian, transit, or freight elements that are included as part of the project and how they improve the travel experience, safety, and security for users of these modes. Applicants should make sure that new multimodal elements described in the response are accounted for as part of the cost estimate form earlier in the application. Also, describe the existing bicycle, pedestrian, transit, or freight accommodations. Furthermore, address how the proposed project safely integrates all modes of transportation (i.e., vehicles, trucks, bicyclists, transit, and pedestrians) and, if applicable, supports planned transitway stations. Applicants should note if there is no transit service in the project area and identify supporting studies or plans that address why a mode may not be incorporated in the project (e.g., a bicycle system plan that locates bikeway facilities on a lower-volume parallel route).

RESPONSE (Limit 12, 4800 characters; approximately 200-400 words):

SCORING GUIDANCE (100 Points)

The project with the most comprehensive multimodal elements included as part of the project will receive the full points. This measure will be considered separately for Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials. As a result, four projects (Augmentors, Expanders, Relievers, and Non-Freeway Principal Arterials) may receive the full points. Remaining projects will receive a share of the full points at the scorer's discretion. The project score will be based on the quality of the improvements, as opposed to being based solely on the number of modes addressed.

Scorers should make sure that new multimodal elements described in the response are accounted for on the cost estimate form earlier in the application.

8. Risk Assessment (75 Points) – This criterion measures the number of risks associated with the project and the steps already completed in the project development process. These steps are outlined in the checklist in the required Risk Assessment.

- A. *MEASURE*: Applications involving construction must complete the Risk Assessment. This checklist includes activities completed to-date, as well as an assessment of risks (e.g., right-of-way acquisition, proximity to historic properties, etc.).

RESPONSE (Complete Risk Assessment):

SCORING GUIDANCE (75 Points)

The applicant with the most points on the Risk Assessment (more points equate to less project risk) will receive the full points for the measure. Remaining projects will receive a proportional share of the full points equal to the Risk Assessment points for the project being scored divided by the project with the highest Risk Assessment points multiplied by the maximum points available for the measure (75). For example, if the application being scored had 40 points and the top project had 70 points, this applicant would receive $(40/70) * 75$ points or 43 points.

9. –Cost-Benefit Ratio (100 Points) – This criterion will assess the project’s cost-benefit based on the total TAB-eligible project cost and total points awarded in the previous 8 criteria. Calculations must be based on the total project cost of TAB-eligible expenses. Any eligible dollars allocated to noise walls should be excluded from this measure because of the uncertainty of needing them at this stage of the project development cycle.

A. *MEASURE: Calculate the cost-benefit ratio of the project.* The Scoring Committee will divide the total project cost by the total number of points awarded in the previous criteria (1-8).

- Cost-Benefit Ratio= total TAB-eligible project cost/total number of points awarded in previous criteria (1-8)

RESPONSE (This measure will be calculated after the scores for the other measures are tabulated by the Scoring Committee):

- Total Project Cost (entered in Project Cost Form): _____

SCORING GUIDANCE (100 Points)

The applicant with the lowest dollar value needed to achieve the points earned in the application (i.e., the benefits) will receive the full points for the measure. Remaining projects will receive a proportional share of the full points equal to the project with the lowest cost benefit divided by the project being scored multiplied by the maximum points available for the measure (100). For example, if the top project had 35,000 and the application being scored had 70,000, this applicant would receive $(35,000/70,000)*100$ points or 50 points.

TOTAL: 1,000-1,100 POINTS

Roadway Reconstruction/Modernization – Prioritizing Criteria and Measures

October 28, 2015

4. Infrastructure Age/Condition

- B. **MEASURE:** Select the geometric, structural, or infrastructure deficiencies listed below that will be improved as part of this project, as reflected in the project cost estimate. (100 Points)

RESPONSE (Select all that apply):

- [Improving a non-10-ton roadway to a 10-ton roadway: 0-15 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Improved clear zones or sight lines: 0-10 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Improved lanes widths, shoulders widths, and/or materials: 0-15 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Access management enhancements: 15-20 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Vertical/horizontal alignments improvements: 0-10 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Stormwater mitigation enhancements: 5-10 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Stormwater/sanitary sewer/others related improvements: 5-10 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)
- [Signals/lighting upgrades: 0-10 pts](#)
 - [RESPONSE \(Limit 700 characters; approximately 100 words\)](#)

SCORING GUIDANCE (100 Points)

Within each above improvement sub-measure, the best-response will receive full (e.g., the top project that improves clear zones or sight lines will receive 10 points), with each remaining project receiving a share of the full points at the scorer's discretion. It is possible for more than one project to receive maximum points for a sub-measure. The project scoring the highest number of points will be adjusted to the full 100 points, with remaining projects adjusted proportionately.

Bridges – Prioritizing Criteria and Measures

October 8, 2015

4. Infrastructure Condition (400 Points) – This criterion will assess condition of the bridge facility being improved. Bridge improvement investments should focus on the higher needs of unsafe facilities. If there are two separate spans, then the applicant should take the average bridge sufficiency rating of the two spans.

A. **MEASURE:** Identify the bridge sufficiency rating. (300 Points)

RESPONSE:

- Bridge Sufficiency Rating: ____ (Ratings are from 0 to 100)

SCORING GUIDANCE (300 Points)

The applicant with the lowest bridge sufficiency rating will receive the full points for the measure. Remaining projects will receive a proportional share of the full points equal to the rating for the project with the lowest bridge sufficiency rating divided by the project being scored multiplied by the maximum points available for the measure (300). For example, if the top project had a bridge sufficiency rating of 35 and the application being scored had a score of 55, this applicant would receive $(35/55) * 300$ points or 191 points.

B. **MEASURE:** Select if the bridge is posted for load restrictions~~Describe the design and safety deficiencies improved by the proposed project.~~ (100 Points)

RESPONSE (Select if the bridge is load-posted):

- Load-Posted: (100 points)

SCORING GUIDANCE (100 Points)

Applicants will receive the points shown depending on if the bridge is load-posted. The applicant can only score 0 or 100 points for this measure.

Note: Due to tiered scoring, it is possible that no project will receive the maximum allotment of 100 points.

**2014 REGIONAL SOLICITATION FUNDING RESULTS
ROADWAY RECONSTRUCTION/MODERNIZATION PROJECTS BY FUNCTIONAL CLASS**

Roadway Reconstruction/Modernization: Non-Freeway Principal Arterials

Rank	ID	Applicant	Project Name	Funct Class	Year	Fed. Request	Total Scores
