We've tried elevator speeches...

How MnDOT Selects Projects in Less Than 100 words

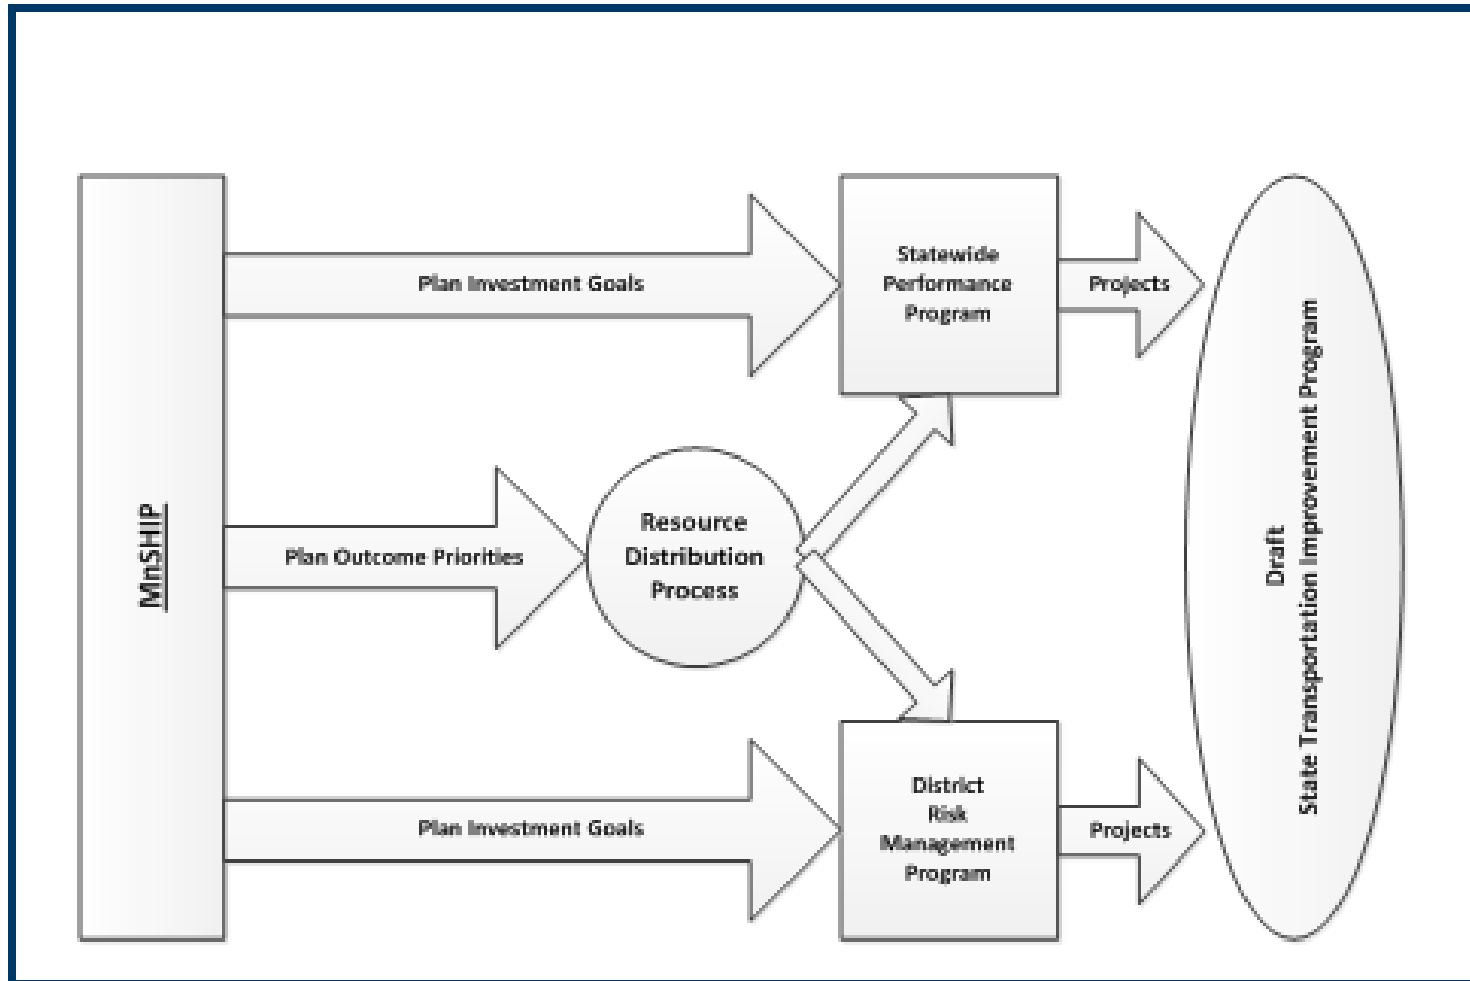

Transportation investments should improve the quality of life and support economic development.

To meet Minnesota's goals, MnDOT evaluates physical factors like smoothness for pavement or state-of-good-repair for bridges combined with qualitative factors like Minnesota's quality of life or economic development potential.

There are never enough resources to meet every worthy goal completely. So with the aid of citizen and transportation partner input, MnDOT chooses a mix of projects that represent the best compromise of asset preservation, system expansion, enhancements, local needs, legal obligations, and public opinion.

Your questions, answered!

How are construction projects selected?

Mark Nelson, Program Manager for Statewide Planning and Transportation Data Analysis

[Learn more about how projects are selected](#)

We've tried presentations...

The image shows a presentation slide for MnDOT. At the top, there is a blue header with a circular logo containing the number '4' and a star, with the text '40th Anniversary' and '1975-2015' around it. The main title 'MnDOT Overview' is centered in a large, dark blue font. Below the title, the text 'House Transportation Committee' and 'March 4, 2015' is centered in a smaller, dark blue font. At the bottom, there is a dark blue footer with the slogan 'We all have a stake in A to B' in white text. Below the slogan is a row of eight circular icons representing different modes of transportation: a train, a ship, a person walking, an airplane, a car, a bicycle, a bus, and a person pushing a stroller.

MnDOT Overview

House Transportation Committee
March 4, 2015

We all have a stake in **A to B**

We welcomed an audit...

- How does MnDOT select projects?
- How transparent is MnDOT's process?
- Who makes decisions?
- What criteria are used?
- How do special programs compare to the standard project selection process?

OLA Audit Findings

“In our interviews with MnDOT staff, it was clear that standard programming decisions were carefully thought out and took into consideration a wide variety of important factors.”

OLA Audit Findings

*“Further, we found that when we asked specific questions, MnDOT staff could generally provide cogent explanations for the reasons behind specific programming decisions. **We do not have significant concerns about the decisions themselves.**”*

OLA Audit Findings

“MnDOT does not provide sufficient information about its project-selection decisions to the public or interested stakeholders.”

OLA Audit Findings

*“MnDOT publishes lists of the projects it plans to construct, **but it does not publish information about how these decisions were reached or what alternatives were considered.** Without that basis for comparison, it is difficult for those outside of MnDOT to understand or assess its decisions.”*

OLA Recommendation #1

The Minnesota Department of Transportation should take steps to improve the transparency of its standard project selection process.

MN Laws 2017, Chapter 3, Sec. 124

The commissioner of transportation must develop, adopt, and implement a policy for project evaluation and selection by November 2018

<https://www.revisor.mn.gov/laws/?year=2017&type=1&doctype=Chapter&id=3>

... after consultation with the Federal Highway Administration, metropolitan planning organizations, regional development commissions, area transportation partnerships, local governments, the Metropolitan Council, and transportation stakeholders, ...

<https://www.revisor.mn.gov/laws/?year=2017&type=1&doctype=Chapter&id=3>

For Each Selection Process

- Identify criteria, the weight of each criterion, and a process to score each project based on the weighted criteria
- Identify both projects selected and not selected
- Publicize scores and reasons projects were not selected
- Involve ATPs and other local authorities, as appropriate, in scoring/ranking projects

Projects in the State
Transportation
Improvement Program
include scores assigned
under the new policy

Legislative Report

The commissioner must submit a report to the legislature describing how the policy is anticipated to improve the **consistency, objectivity, and transparency** of the selection process.

Due February 2019

The 2020-2023 STIP will be the first governed by the new policy

We Need Your Input...

Discussion Areas

- Project Selection Information
- Transparency
- Involvement of local authorities in the Selection Process

Area #1: Project Selection Information

Discussion Questions:

- Do you know how project selection decisions are made at MnDOT and who makes them?
- Is the information provided by MnDOT for project selection understandable and helpful to you and/or your constituents? Is it adequate for your needs?
- If you could have more information on project selection, what would you want?

Area #2: Transparency

Scoring Based Project Selections

Chapter 3, Section 124 requires the use of scores in project selection.

- What do you like or not like about using numeric scores to select projects?

Area #3: Involvement in Project Selection

Chapter 3 Law

“For each selection process, the policy adopted under this section must:

... involve area transportation partnerships and other local authorities, as appropriate, in the process.”

Involvement of ATPs and Other Local Agencies in the Project Selection

What type of involvement do you feel the Met Council / TAB and other local agencies should have in the selection of MnDOT state highway construction projects?

What other advice do you have for how MnDOT can “improve the consistency, objectivity, and transparency of the selection process?”

- Develop outline for policy
- Develop initial scoring process for each program
- Additional stakeholder feedback

Thank you!

Philip Schaffner

Project Selection Process Manager
