#### Call to Order

A quorum being present, Committee Chair Solberg called the regular meeting of the TAB Technical Advisory Committee to order at 9:03 a.m.

# **Approval of Agenda**

The committee approved the agenda with no changes. Therefore, no vote was needed.

#### **Approval of Minutes**

It was moved by Isaacson and seconded by Eyoh to approve the minutes of the September 7, 2022, regular meeting of the TAB Technical Advisory Committee. **Motion carried**.

# **Public Comment on Committee Business**

None.

## **TAB Report**

Koutsoukos reported on the September 21, 2022, Transportation Advisory Board meeting.

# **Business – Committee Reports**

# Executive Committee (Jon Solberg, Chair)

Chair Solberg reported that the TAC Executive Committee met prior to the TAC meeting and discussed the agenda items.

# **Action Transmittal**

Meeting Date: November 2, 2022 Date: October 21, 2022

#### Action Transmittal: 2022-44

Program Year Extension Request: Maple Grove Rush Creek Boulevard/I-94/TH 610 Interchange

**To:** Technical Advisory Committee

From: TAC Funding & Programming Committee

Prepared By: Joe Barbeau, Senior Planner (651-602-1705)

# **Requested Action**

Maple Grove requests a program year extension for its Rush Creek Boulevard/I-94/TH 610 Interchange Construction and MN 610 Extension (SP# 189-143-001) from fiscal year 2023 to fiscal year 2024.

#### **Recommended Motion**

That the Techncial Advisory Committee recommend that TAB approve Maple Grove's Rush Creek Boulevard/I-94/TH 610 Interchange Construction and MN 610 Extension (SP# 189-143-001) be extended from fiscal year 2023 to fiscal year 2024.

#### Summary

Maple Grove was awarded \$7M in the 2018 Regional Solicitation to construct a four-lane divided A-minor arterial expander between CSAH 30 and the I-94 and MN 610 interchange. Maple Grove requests that the project be extended from 2023 to 2024 after federal authorization has been delayed.

# **Background and Purpose**

In the 2018 Regional Solicitation, the City of Maple Grove was awarded \$7M to construct a four-lane divided highway (an extension of MN 610) and expand the MN 610 interchange at I-94. The project was, and remains, programmed for fiscal year 2023. Maple Grove is requesting that the project be extended to fiscal year 2024 due to federal authorization taking longer than expected. This is due primarily to the project's inclusion of partial interchange construction.

#### **Relationship to Regional Policy**

The Transportation Advisory Board (TAB) adopted the Program Year Policy in April 2013 (updated in August 2014) to assist with management and timely delivery of transportation projects awarded federal funding through the TAB's Regional Solicitation. The policy includes a procedure to request a one-year extension based on extenuating circumstances within certain guidelines.

#### Staff Analysis

Per the Program Year Policy's progress assessment (attached) a minimum score of 7 is needed to be eligible for an extension. This process helps assess whether the project is in position to be able

to be obligated with the one-year extension. The request obtained a score of 8. Therefore, staff recommends approval of the request.

An extension of the program year does not guarantee federal funding will be available in that year. The project sponsor is responsible for completing the project in the new program year and covering the federal share of the project until federal funding becomes available. While funding reimbursement is not guaranteed for 2024, the project will receive reimbursement at the earliest time available.

# **Committee Comments and Action**

At its October 20, 2022, meeting, the TAC Funding & Programming Committee unanimously recommended approval of Maple Grove's Rush Creek Boulevard/I-94/TH 610 Interchange Construction and MN 610 Extension be extended from fiscal year 2023 to fiscal year 2024.

October 6, 2022

Mr. Michael Thompson Chair, TAC Funding and Programming Committee Metropolitan Council 390 Robert Street North St. Paul, MN 55101

Subject: Program Year Extension Request for SP 189-143-001

Rush Creek Boulevard (MSAS 143)/I-94/TH 610 Interchange

Dear Mr. Thompson:

In 2019, the City of Maple Grove was awarded federal funding as part of the Metropolitan Council Regional Solicitation to construct a new four-lane divided A-Minor Arterial Expander roadway (Rush Creek Boulevard – MSAS 143) between Hennepin County CSAH 30 and the I-94/TH 610 interchange. As proposed, the project will also a new bridge over I-94 and add missing roadway movements to the I-94/TH 610 interchange, including a westbound I-94 loop off-ramp to westbound MSAS 143 and a westbound I-94 on-ramp from westbound TH 610 and eastbound MSAS 143. The current program year is 2023.

Over the past few years, city staff has worked with their agency partners at MnDOT and Hennepin County to advance the project with the intent of obtaining federal authorization by the required deadline. However, since the project involves a partial interchange with I-94, federal review of the Interstate Access Modification Report (IAMR) and the environmental document has taken longer than expected.

We therefore, kindly request the TAC Funding and Programming Committee consider a program year extension to 2024, which will account for any additional delays in the project that may delay federal authorization to 2024.

Sincerely,

John Hagen, P.E., PTOE

**Transportation Operations Engineer**

# **REQUEST FOR PROGRAM YEAR EXTENSION**

SP 189-143-001

Rush Creek Boulevard (MSAS 143)/I-94/TH 610 Interchange

# 1. Project Progress

# a) Progress Schedule

See Attachment 1

# b) Right of Way

All the necessary permanent roadway right of way needed for the project elements located to the east of I-94 have already been acquired as part of the most recent TH 610 project that was completed in 2017. Additional permanent roadway right of way, permanent easements, and temporary construction easements are necessary for this project on the west side of I-94.

Please see Attachment 2 for the locations and the types of easements being acquired. Acquisitions will be complete by April 1, 2023.

# c) Plans

- Layout Approved <a href="https://www.610extensionproject.com/wp-content/uploads/2022/07/220418">https://www.610extensionproject.com/wp-content/uploads/2022/07/220418</a> 12510 loa1 SIGNED.pdf
- 60% Plans have been submitted and plan comments received.
- 90% Plans Scheduled for submittal Nov 30, 2022
- 95% Final Road and Bridge Plans for approval Feb 28 March 30, 2023

# d) Permits

#### **PERMITS AND APPROVALS**

Permit of Approval	Agency	Action Required (Status)					
Federal							
Categorical Exclusion Determination	FHWA	Approval (pending)					
Interstate Access Request (IAR)	FHWA	Approval (pending)					
Section 106 (Historic / Archaeological)	MnDOT CRU (on behalf of FHWA)	Determination of Effect (Complete)					
Section 4(f)	MnDOT/FHWA	Section 4(f) De Minimis review and concurrence (Complete)					

Permit of Approval	Agency	Action Required (Status)				
Section 404 Permit, Clean Water Act	USACE	Submitted, Public Notice Published, Pending Approval				
Federal Threatened and Endangered Species Review	MnDOT OES and USFWS	Determination of Effect (Complete)				
State						
Categorical Exclusion Determination	MnDOT	Approval (pending)				
Wetland Conservation Act (WCA)	MnDOT	Submitted, pending approval				
Public Water Work Permit	DNR	To Be Acquired				
State Endangered Species Review	DNR	Review (Complete)				
NPDES / SDS Construction Site Permit (Phase II)	MPCA	To Be Acquired				
Section 401 Water Quality Certification	MPCA	Submitted, pending approval.				
Local						
Controlled Access Approval	Metropolitan Council	To Be Acquired				
WCA (for work outside of MnDOT right of way)	City of Maple Grove	To Be Acquired				
Stormwater Management Permit	Elm Creek Watershed Management Commission	To Be Acquired				
Erosion and Sediment Control Permit	Elm Creek Watershed Management Commission	To Be Acquired				

# e) Approvals

- Environmental Doc (CAT EX) Required Approvals/ Status Full approval needed prior to IAMR approval.
  - o MnDOT Needed at Completion of Document
  - o FHWA Needed after MnDOT Approval

- Construction Plans Required Approvals / Status (All agencies have seen 60% submittals)
  - City of Maple Grove Needed at Final Plan Submittal
  - Hennepin County Needed at Final Plan Submittal
  - MnDOT State Aid Needed at Final Plan Submittal
  - MnDOT Office of Land Management Needed at Final Plan Submittal
  - MnDOT Needed at Final Plan Submittal

# f) Funding / Expenditures to Date

The City of Maple Grove has expended staff time in planning, scoping, project development, preliminary environmental review, and project management. We have also engaged consultant services and have spent approximately \$2,250,000 to date on preliminary engineering, environmental documentation, traffic forecasting/modeling, and final design for this project. Remaining final design and project procurement, to be completed by the consultant, are anticipated to cost an additional \$930,000.

# 2. Justification for Extension Request

# a) What is unique about this project that requires an extension of the program year?

Major elements of the project development (right-of-way acquisition, plans, permits, and funding) are on schedule to obtain approvals in advance of the necessary deadlines for program year 2023. However, since the project involves a partial interchange at I-94/TH 610, the higher level of analysis and scrutiny as part of the federal review is resulting in delays in the approvals of the IAMR and environment document.

A program year extension of one year is being requested to account for any additional potential delays in the federal approvals that may delay federal authorizations to 2024.

# b) What are the financial impacts if this project does not meet its current program year?

If additional delays in the federal review results in the project not being able to obtain federal authorization by the necessary deadline for program year 2023, \$7,000,000 in federal funds would be forfeited. As a result, additional local funds would be required within the City of Maple Grove's five-year Capital Improvement Program (CIP) contingent on City Council approval.

# c) What are the implications if the project does not obtain the requested extension?

The target date for letting of this project is in 2023. However, if the letting date is delayed due to federal review, the letting date may shift to early 2024. Without the requested, a project delay would result in the loss of federal funding and the aforementioned City CIP impacts.

# d) What actions will the agency take to resolve the problems facing the project in the next three to six months?

The City of Maple Grove will continue to aggressively pursue the completion of this project by the Spring of 2023. We have monthly Project Management Team meetings with our agency partners (FHWA, MnDOT, and Hennepin County) to stay on schedule and deliver the project, preferably in 2023 or, if needed, 2024.

## **Action Transmittal: 2022-45**

2022 Regional Solicitation Funding Options

To: Technical Advisory Committee

From: TAC Funding & Programming Committee

Prepared By: Steve Peterson, Mgr. of Highway Planning and TAB/TAC Process (651-602-1819)

# **Requested Action**

TAB requests that the technical committees forward a listing of key differences and technical feedback on the three Regional Solicitation funding options for TAB's consideration in its selection of the final Regional Solicitation program of projects.

#### **Recommended Motion**

That TAC forward three funding options to TAB along with a list of key differences and other technical feedback.

# **Summary**

Three Regional Solicitation funding options, the "Midpoint" option and two "Bike/Pedestrian-Heavy" options were created for TAB's consideration, based upon policy direction provided by TAB. Technical committees are asked to produce a list of key differences and other technical feedback for TAB's consideration about each option.

#### **Background and Purpose**

TAB provided direction that the following funding options should be created for consideration as follows:

- A. Midpoint + Extra to Bike/Ped (Blue): This option is similar to TAB's past selection history of Solicitation funding across the modal categories dating back to 2014. The option focuses on the midpoints of the TAB-approved funding ranges (55.5% for Roadways, 30% for Transit/TDM, and 14.5% for Bicycle/Pedestrian). Funding within modal categories is allocated based upon the number of applications submitted within each application category. Unprogrammed dollars from the transit category (\$4M) would be applied to projects in Bike/Ped categories and this slightly shifts the modal allocation percentages.
- B1. Bicycle/Pedestrian-Heavy Option+ Extra to Roadway (Pink): This option goes to the top of the Bicycle/Pedestrian modal funding range (20%). This option was created at TAB's request. Unprogrammed dollars from the transit category (\$3M) would be applied to projects in Roadway categories with roadways only losing \$8M relative to the Midpoint option (instead of losing \$11M in Option B2).
- B2. Bicycle/Pedestrian-Heavy + Extra to Bike/Ped (Orange): This option slightly exceeds the modal range for bike/ped (9% to 20%) by putting 21% of the total funding to the

Bike/Ped categories and reducing total roadway funds by \$11M relative to the Midpoint option. Unprogrammed dollars from the transit category would be applied to projects in Bike/Ped categories.

Two new funding sources established by the Infrastructure Investment and Jobs Act (IIJA) are included in the 2022 Solicitation. The first is the On-System Bridge Program. All options show funding of all five applications in the Bridge category to accommodate this new funding source. This program will provide \$4M to \$5M per year from 2023 to 2027. The Bridge funding, therefore, is larger than it would have been without this new source. The new Bridge funding is not included in the calculation of the share of funding allocated to the Roadways modal category, except for the fifth bridge project, which was added late in the process.

**Table 1: Key Differences Between Funding Options** 

	A. Midpoint	B1. Bike/Ped	B2. Bike/Ped
	+ Extra to	Heavy + Extra	Heavy + Extra
Variables	Bike/Ped	to Roadway	to Bike/Ped
Projects <sup>1</sup>	84	86	85

Counties with Investment (Project Location)	7	7	7
Cities/Townships with Investment (Project Location)	53	54	54
Different Applicants Funded	31	30	30

The other new funding source available to the region through IIJA is the Carbon Reduction Program. This new federal program is aimed at funding projects that reduce greenhouse gas emissions, defined as carbon dioxide (CO2), from on-road highway sources. The allocation of this funding is to be addressed in Action Transmittal 2022-46. This new federal source is not

2

<sup>&</sup>lt;sup>1</sup> Includes Carbon Reduction Program projects shown in green in the table of options. Does not include unique projects or TMO set-aside.

included in the calculation of the modal categories funding shares for the base Solicitation funding options.

A list of key differences (see Table 1) and other technical feedback provided by the technical committees will be forwarded to TAB to help in their decision-making and selection of a final Solicitation program of projects in November.

# **Relationship to Regional Policy**

The Regional Solicitation is a key responsibility of the TAB. Through this process, federal funds can be directed to a variety of locally initiated projects that help implement regional transportation and development policies. The Regional Solicitation is part of the Metropolitan Council's federally required continuing, comprehensive, and cooperative transportation planning process for the Twin Cities Metropolitan Area.

#### **Committee Comments and Action**

At its October 20, 2022, meeting, the TAC Funding & Programming Committee voted to forward the three funding options to TAC along with a list of key differences and other technical feedback.

Discussion topics and key technical feedback included:

- The 5<sup>th</sup> ranked bridge (\$5.5M) comes out of the roadways modal split, instead of the On-System Bridge funding. This fifth project was added late in this process due to guidance changes on how to approach the new program. Discussion ensued on adding \$5.5M of roadway projects back to the options, likely by increasing using some unspent funds and/or further overprogramming. No conclusion was reached.
- Option B2 only funds one of two projects with the same total score. This is not a violation of any rule, though it is counter to past practice. That said, the sponsor of the potential unfunded tied project has expressed comfort with only funding one of the two projects, as it has three other projects funded in the same application category.
- Option B2 funds a Scott County project not funded in the other options, which is a move towards regional balance, as defined as dollars vs. population by county.
- Option B2 underfunds roadways the most vs. the other options.
- Concern was expressed that prior to inclusion of the Carbon Reduction Program, Option B2 funds over the modal maximum for bicycle/pedestrian (21%; maximum is 20%)
- All Regional Solicitation projects are required to be ADA compliant, and this is one small way to help bring transportation infrastructure into compliance. There may be certain application categories that help with ADA more than others based on their location and type (the differences between the funding options are noted in the Intersections Impacted row in Table 1).
- Overall, the three funding options remaining are largely the same with minimal differences that can be seen on the table of key differences.

## Routing

#### Reference notes for scenario tables

Below is an explanation on how to understand the funding options developed, including what the color shading implies throughout the tables.

# Color Shading:

- Blue: Midpoint + Extra to Bike/Ped scenario (Scenario A)
- Pink: Bicycle/Pedestrian-Heavy Option+ Extra to Roadway scenario (Scenario B1)
- Orange: Bicycle/Pedestrian-Heavy + Extra to Bike/Ped scenario (Scenario B2)
- Purple (Bridges, page 6): Bridge category (all Bridge projects funded in each scenario)
- Gray (Travel Demand Management, page 7): TDM projects funded to the standard amount
- Green (Carbon Reduction in the bike/ped categories, pages 8 and 9): 2023-2024 Carbon Reduction Funding spending on top of the scenarios.

Bold black underlines on tables indicate the likely approximate scenario outcome prior to receipt of additional IIJA funds (i.e., funded projects below the bold lines are beyond what would have been funded prior to the increase). It is also assumed that no projects will have their request partially funded. This is subject to change pending TAB final direction.

The right column on each of the tables shows the percentage of points applications received relative to the top scoring project in that category.

Tables on pages 11 and 13 show funding distribution by county for the various scenarios.

<sup>\*</sup>Excludes Unique Projects. Shows more than the number of applications submitted because some projects span more than one county.

# 2022 Unique Projects Scoring – Committee Memo to TAB 10/12/2022

The Unique Projects Scoring Committee met on October 10 to discuss funding of the project applications. Below is a summary of the scores arrived at by the committee, federal funding requests, the committee's recommendation to TAB, and future considerations.

# **Scoring Summary**

A summary of the average scores across all scorers is provided in Table 1. The following point scale was used to evaluate projects: Excellent (5 pts), Very Good (4 pts), Good (3 pts), Fair (2 pts), Poor (1 pt).

The following three projects were scored:

- EV Spot Network Strategic Expansion submitted by City of Saint Paul
- 'True Impacts of Transportation' Public Education Campaign submitted by Move Minnesota
- Mobility Hubs submitted by Metro Transit

Table 1 – Summary of the Average Unique Projects Scores by Project and Criteria

			17635	17547	17596
Crite	eria	Weight	<b>EV Spot Network</b>	Education	<b>Mobility Hubs</b>
1.	Innovation	28%	2.6	1.6	3.0
2.	Environmental Impacts	21%	3.5	1.7	2.9
3.	Racial Equity	18%	3.1	1.8	2.7
4.	Multimodal Communities	13%	3.0	1.3	3.6
5.	Regional Impact/Scalability	11%	3.5	1.9	3.4
6.	Partnerships	9%	2.8	1.7	3.0
TOT	AL	100%	3.0 (Good)	2.1 (Fair)	3.1 (Good)

#### Scoring Notes:

- Nine scorers reviewed the projects.
- One scorer ranked projects in order of their preference and scores of 3.8, 2.2, and 3.0 were
  interpreted from this ranking.<sup>1</sup> Two other scorers provided overall scores without distinguishing
  scores of the individual measures. Those scores are not factored into the individual criteria
  scores, meaning only six scorers contributed to those.

### **Federal Funding Requests**

The Unique Projects funding availability was established during the 2020 Regional Solicitation.

	Federal
TOTAL AVALABLE	\$4,500,000
17635—EV Spot Network	\$1,440,000
17547—Education	\$768,100
17596—Mobility Hubs	\$1,600,000
Travel Behavior Inventory	\$733,000
TOTAL Federal Requested	\$4,541,100

<sup>&</sup>lt;sup>1</sup> It was assumed that the second ranked project would receive a score of 3.0. Standard deviations from the other scorers were used to determine the scoring margins for the other scores.

#### Funding Notes:

- The Travel Behavior Inventory (TBI) was agreed upon for inclusion as a multi-phase project during previous Regional Solicitation approvals.
- The \$41,100 above the available funds is not an obstacle to funding all these projects. Other Solicitation funding is available to cover this difference.
- If TAB decides not to fund all the applications, unused funds can be used on applications applied for in the other Regional Solicitation funding categories or to increase total Unique Projects funding availability for the 2024 Unique Projects category.

#### **Committee Recommendation to TAB**

All present committee members discussed their scores during the scoring meeting and no changes were made. Some members supported funding multiple projects and others only wanted to fund the Travel Behavior Inventory (TBI) commitment that TAB previously made. Chair Hovland polled the group on the numbers of projects that they wanted to fund beyond the TBI, using the ranked list of projects based on scores. About half the participants indicated support for the TBI and two projects and the other half indicated support for the TBI and no additional Unique Projects. The group discussed a compromise to recommend funding one project, Mobility Hubs, but did acknowledge that the EV Spot Network project was only 0.1 points lower in its score.

The committee also discussed two options for any unallocated Unique Project funds: rolling the funds forward to the 2024 Regional Solicitation Unique Projects category or increasing the amount available in this Solicitation. If funds are moved to other modal categories in this Solicitation, there are two options of either moving the funds to the Bicycle and Pedestrian modal category only (suggested by the scoring committee) or proportionately distributing the funds amongst all the modal categories.

As a result of the committee's discussion, the following questions are recommended to be brought forward to TAB in October.

- 1. What Unique Projects should be funded?
  - Option 1A Fund the TBI and the Mobility Hubs project at \$2,333,000, leaving \$2,167,000 remaining.
  - Option 1B Fund the TBI, Mobility Hubs and EV Spot Network projects at \$3,773,000, leaving \$727,000 remaining.
  - o Options 1C Fund only the TBI at \$733,000, leaving \$3,767,000 remaining.
- 2. How should any remaining funds be allocated??
  - Option 2A Increase the set aside for the 2024 Unique Projects funding allocation by the amount of remaining funds (given the reality that this was the first time soliciting under this new category and there was limited time to develop project ideas).
  - Option 2B Keep the funding in the 2022 Regional Solicitation and reallocate it among other modal categories.
- 3. If it is recommended to use the remaining funds in 2022, how should the funds be reallocated? (only if Option 2B is selected)
  - Option 3A Move any remaining funds to the Bicycle and Pedestrian modal category given the high demand and closer tie to Unique Project goals.
  - Option 3B Move any remaining funds to Roadway, Transit, and Bicycle and Pedestrian proportional to their midpoint given this is how the funds were originally sourced.

Committee members **favored Option 1A** be brought to TAB as a recommendation, with the understanding that the other options discussed by the committee would be presented for

discussion. Committee members acknowledged that the scoring gap between the Mobility Hubs project and the EV Network project is small but decided that the projects could be split because the former is closer to a pilot project while the latter is an extension of a project that was funded in the previous Regional Solicitation. The committee members discussed options 2A and 2B as well as option 3A, but there was no consensus on making a recommendation to TAB. The committee ultimately felt it was TAB's role to decide what to do with any remaining funds from the Unique Projects category.

#### **Future Considerations**

Members would like future Regional Solicitations to better indicate the desire for innovation to be at the forefront of the category, even suggesting that the category name be changed to "Unique and Innovative Projects." There was an acknowledgement that the TAB needs to do a better job defining innovation or promoting the idea to get better project applications.

#### Action Transmittal: 2022-46

2022 Carbon Reduction Program Funding Distribution

To: Technical Advisory Committee

From: TAC Funding & Programming Committee

Prepared By: Steve Peterson, Manager of Highway Planning and TAB/TAC Process

# **Requested Action**

TAB requests that the technical committees forward technical feedback on the Carbon Reduction Program funding options for TAB's consideration in its selection of a final Carbon Reduction program of projects.

#### **Recommended Motion**

That TAC forward to TAB technical feedback on the Carbon Reduction Program funding options.

#### Summary

Carbon Reduction Program options (shown in green on the attached tables) were created for TAB's consideration for each of the three funding scenario options:

- A. Midpoint + Extra to Bike/Ped;
- B1. Bicycle/Pedestrian-Heavy Option+ Extra to Roadway; and
- B2. Bicycle/Pedestrian-Heavy + Extra to Bike/Ped.

Technical committees are asked to provide technical feedback for TAB's consideration about each Carbon Reduction funding option.

#### **Background and Purpose**

The new federal Carbon Reduction Program is designed to fund projects that reduce transportation emissions, defined as carbon dioxide, from on-road highway sources. There is a wide array of federally eligible project types including most transit, bike, pedestrian, carpooling, congestion pricing projects, vehicles/modes that lower emissions (EVs), and approaches that lower construction emissions.

TAB requested, and the Council Transportation Committee recommended allocating the 2023 and 2024 Carbon Reduction funds (\$16M total) as part of the 2022 Regional Solicitation cycle. The direction received from the Council's Transportation Committee and TAB was to put this funding towards the Bicycle and Pedestrian Facilities modal category given that these projects are eligible for the funding and also the high number of applications submitted. The Transit modal category projects are also eligible, however, almost all submitted transit applications are already funded through the base Regional Solicitation funding options. Roadway modal

category projects are largely ineligible for the Carbon Reduction funding, except for Traffic Management Technologies.

Allocation of Carbon Reduction funds for 2025 and beyond will be discussed in 2023 pending completion of MnDOT's required Carbon Reduction Strategy and input from Council climate related planning studies. This planning work will help determine the best use of these new federal funds. In action item 2022-45, three options for spending STP, CMAQ, and On-System Bridge funding are shown, inclusive of potential Carbon Reduction Program distribution.

# **Relationship to Regional Policy**

The Infrastructure Investment and Jobs Action (IIJA) created the Carbon Reduction Program, which is meant to fund projects that help reduce carbon output. That has provided the Council with \$8M per year for fiscal years 2023-2027. Given the limited time to develop a new allocation process focused on carbon reduction and the need to spend 2023 and 2024 funds, the Council and TAB advised that the funds be awarded to bicycle and pedestrian projects submitted to the Regional Solicitation. How to distribute 2025-2027 funds will be discussed and addressed in 2023 by the TAB and Council, pending completion of MnDOT's required Carbon Reduction Strategy and climate related planning studies.

#### **Committee Comments and Action**

At its October 19, 2022, meeting, the TAB indicated a general preference for using the Carbon Reduction funds on smaller projects (i.e., Pedestrian Facilities and Safe Routes to School) to spread the funding around to different applicants and to recognize the pedestrian safety issues in the region. Staff narrowed down the options for Carbon Reduction based on this feedback.

At its October 20, 2022, meeting, the TAC Funding & Programming Committee voted unanimously to forward technical feedback on the Carbon Reduction Program funding options.

Discussion included that along with bike and pedestrian projects, Carbon Reduction Program funding can be used on transit and roadway (mostly traffic management technologies) projects. Because the Carbon Reduction Program funds are for fiscal years 2023 and 2024, the projects able to receive the funding are limited. Some members expressed a desire to use some of the funding on larger projects in multiuse trails, especially if it could aid in geographic balance.

## **Action Transmittal: 2022-47**

2022 Highway Safety Improvement Program Project Selection

**To:** TAC Funding & Programming Committee

Prepared By: Joe Barbeau, Senior Planner, phone 651-602-1705

Steve Peterson, Manager. of Highway Planning and TAB/TAC Process

# **Requested Action**

MnDOT requests approval of the attached 38 projects for funding through the Highway Safety Improvement Program (HSIP) solicitation.

#### **Recommended Motion**

That the Technical Advisory Committee recommend to TAB approval of the attached 38 projects for funding through the Highway Safety Improvement Program (HSIP) solicitation and inclusion of all Urbanized Area projects in the draft 2024-2027 TIP.

#### Summary

MnDOT conducts a semi-annual Highway Safety Improvement Program (HSIP) solicitation that coincides with the Council's Regional Solicitation.

## **Background and Purpose**

The Highway Safety Improvement Program (HSIP) is a core federal funding program designed to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-state-owned public roads and roads on tribal lands. HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. To obligate HSIP funds, the state must develop, implement, and update a Strategic Highway Safety Plan and produce a program of projects.

MnDOT shares these federal funds with local governments to improve and protect the transportation system beyond the state's trunk highway system. MnDOT conducts the solicitation, and the proposed projects are evaluated by a team of transportation professionals.

With guidance and recommendation from its technical committees, the TAB's role is to approve the solicitation criteria and select projects to be awarded HSIP funds. MnDOT conducted a solicitation for both "proactive" and "reactive" projects to be funded primarily in 2026 and 2027, though the recent influx of funding from the Infrastructure Investment and Jobs Act (IIJA) helps increases the overall available funding, including roughly \$17.4M in 2024 and 2025. The overall funding available is about \$62.8M, roughly double that of the 2020 HSIP solicitation. The attached projects (not including two projects located in Chisago County), if approved, will be included in the 2024-2027 TIP to be released for public comment in May 2023.

Scores and rankings are shown in the attachment. On each of the two lists of funded projects (Proactive and Reactive) is a dark line indicating the likely funding line had the pre-IIJA funding amount been available. This indicates that 19 projects (11 proactive and eight reactive) would have been funded with previously assumed funding availability.

# Relationship to Regional Policy

Federal law requires that all transportation projects that will be funded with federal funds must be in an approved TIP and meet the following tests: fiscal constraint; consistency with the adopted regional transportation plan; and opportunity for public input. Each project is consistent with the Transportation Policy Plan. Public input opportunity will occur when the TIP is out for public review. The region's Transportation Policy Plan includes transportation safety policies and strategies. The projects selected through the HSIP solicitation are consistent with that plan.

# **Staff Analysis**

Staff recommends approval of the attached 38 projects for funding through the HSIP solicitation and inclusion of all Urbanized Area projects in the draft 2024-2027 TIP. HSIP funds are awarded by MnDOT district. MnDOT's Metro District includes Chisago County, along with the seven-county metro area. Two projects selected through this process, P11 and P12, are located in Chisago County, bringing the total HSIP projects awarded funding to 40. Due to the location of these projects, they do not need MPO approval as part of this action item and will not be included in region's TIP.

#### **Committee Comments and Action**

At its October 20, 2022, meeting, the TAC Funding & Programming Committee unanimously recommend to TAB approval of 38 projects for funding through the Highway Safety Improvement Program (HSIP) solicitation and inclusion of all Urbanized Area projects in the draft 2024-2027 TIP.

Concern was expressed that nine MnDOT-sponsored projects are selected for funding while some local projects are not funded, while MnDOT has its own HSIP allotment. It was pointed out that most states do not give any of the HSIP solicitation funding to local agencies. One member also asked that more guidance be provided in the application as to how the funding will be split between reactive and proactive application categories.

\$46,262,069

Note: Thick black underlines in each list indicate approximate funding lines before IIJA increases.

Solberg suggested that Barbeau present all three TIP amendments and that a motion be made to recommend approval of all three.

 2022-40: Streamlined 2023-2026 TIP Amendment: Minnesota River Greenway (Joe Barbeau, MTS)

Barbeau said that this request is to add local work to the Regional Solicitation project. The added work is a bridge a third- to half-mile away from the project and is being added to be a part of the same contract. All funding for the additional scope is local.

2. 2022-41: Streamlined 2023-2026 TIP Amendment: SouthWest Transit Electric Buses and Charging Station (Joe Barbeau, MTS)

Barbeau said that the requested action involves adding a federally awarded project to purchase two electric buses and a charging station for SouthWest Transit. The project was originally programmed in the 2022-2025 TIP but needs to be moved forward. The delay is because the project is part of a new program and it took longer than expected to determine eligible costs and that Metro Transit will administer the funds.

Solberg asked Fyten to provide an explanation for what caused the delay. Fyten replied that it was determined to have the funds flow through Metropolitan Council rather than MnDOT and that, along with discussion of eligible costs and re-scoping of the grant, caused the delay.

3. 2022-36: Streamlined 2023-2026 TIP Amendment: Electric Bus Purchase (Joe Barbeau, MTS)

Barbeau said that this request involves the purchase of eight electric buses awarded the Federal Transit Administration's Low- or No-Emissions Vehicle Program. This project was added to the 2022-2025 TIP but FTA informed the sponsor that it would be unable to award funding prior to approval of the 2023-2026 TIP and it therefore needs to be added to that TIP.

It was moved by Keel and seconded by Isaacson recommend adoption of the TIP amendment requests in action transmittals 2022-40, 2022-41, and 2022-42. **Motion carried** unanimously.

#### Planning Committee/TPP Technical Working Group (Scott Mareck, Chair)

Mareck reported that the TAC Planning meeting was cancelled in September and will also be cancelled in October. He provided an update on the TPP Technical Working Group meeting that occurred in September. He and vice chair Angie Stenson discussed A-minor arterial performance measure data for 2023 with staff. Robjent suggested that a project be included in the UPWP if there is funding available. Peterson said that the project would need to be scoped.

#### Funding & Programming (Paul Oehme, Vice Chair)

Oehme chaired the September Funding & Programming Committee meeting. He reported that an additional Regional Solicitation scoring challenge was brought to the committee, which declined to make a scoring change.

# Information

1. Highway Safety Improvement Program (Kaare Festvog, MnDOT)

Festvog summarized the currently ranked Highway Safety Improvement Program (HSIP) applications. the draft includes some changes from when it was presented to the Funding & Programming Committee. Three projects were not scored on time and at least one is likely to be funded. Additional IIJA funding has led to significantly more projects being funded than in previous years. The list will hopefully the list will be finalized prior to the next meeting.

2. Regional Solicitation Funding Scenarios (Steve Peterson, Met Council)

Peterson summarized the two proposed Regional Solicitation funding scenarios, each of which is paired with two potential scenarios for how to spend the Carbon Reduction Program funds. He

said that individual projects will not be funded by both HSIP and Solicitation funds; that with the new On-System Bridge program, all bridge applications are shown as funded; and that staff is seeking clarity on whether to waive the rule only allowing \$32M on BRT projects. Carbon Reduction funds are included for 2023 and 2024 because of how immediate those funds are. How to distribute 2025 to 2027 funds can be discussed later. He also discussed the possibility that some Unique Projects money could be used to fund capital projects. He added that TAB is interested in receiving a list of pros and cons about each scenario from the technical committees.

Isaacson asked whether staff will make a Unique Projects recommendation. Peterson replied that it will not; though it provided technical comments to the scoring group. Koutsoukos added that that group meets soon.

Leitner provided suggestions for clarifying the colors used in the table. She asked whether the question of removing the bus rapid transit (BRT) maximum is because of the additional funds, to which Peterson replied in the affirmative. Leitner asked why the scenarios show funding all travel demand management (TDM) projects. Peterson replied that the first five projects are within the standard TDM award amount and the other two would be funded from the extra transit money.

McCullough stated that some projects shown as funded have significantly lower scores than projects in other categories shown as funded. He asked why an additional Roadway Reconstruction/Modernization project is shown in the Bicycle/Pedestrian-Heavy Scenario versus the Midpoint Scenario. Peterson said that the latter has two fewer Strategic Capacity projects, and the intent was to show a different tact within roadways in the two scenarios.

Koutsoukos summarized comments provided by TAB. TAB provided no recommendation on distribution within modes. TAB recommended that there not be a separate solicitation for the Carbon Reduction program. Members suggested that materials indicate any projects that are slated to received federal earmarks, expressed concern with funding lower-rated projects, expressed the preference to no spend money on partially funded projects from the last Regional Solicitation, and preferred not to fund any projects with funds from both HSIP and the Regional Solicitation. A workshop summarizing the scoring process is scheduled at the request of a member. Solberg added that TAB had a lot of comments but provided no direction.

McCullough asked whether the committee should narrow options down for TAB. Solberg said that TAB wants a list of pros and cons for each option.

Robjent stated that midpoints were shifted towards transit in the lasty cycle and given the amount of money available for transit, perhaps the midpoints could be shifted back. He said that there is no roadway-heavy scenario, reminding members that roadway projects include bicycle and pedestrian elements. He added that the Midpoint Scenario with Carbon Reduction Option 2 funds the Midpoint and the Bicycle/Pedestrian-heavy scenarios and that urban trails are scoring significantly better than non-urban trails.

Leitner said that the two lowest-ranked Transit Modernization projects are in the same city so it may be worth discussing with people from that area whether they are favorable to the proposed scenario that does not break the BRT maximum funding rule. She then asked how "carbon reduction" is defined, to which Peterson replied that the definition s federal and eligibility is similar to CMAQ eligibility, minus roadway projects like traffic management technologies. Finally, Leitner said that just because a project is ranked at the bottom of the scoring category does not mean it is a bad project, as evidenced by a lower-ranked project in Safe Routes to School that scored 63% of the top-ranked project, as opposed to a lot lower of a proportion in other categories.

Fyten asked how lifting the BRT rule would impact the transit categories. Peterson replied that in the Midpoint Scenario the Apple Valley BRT project would have likely been funded at the expense of the Southwest Transit project while in the Bicycle/Pedestrian-Heavy Scenario the MVTA project likely would not have been funded. Fyten said that care should be taken in comparing scores from category-to-category because there are several variables between categories. Koutsoukos said that TAB members expressed concern with lifting the BRT rule because one applicant said it chose not to apply in a transit category because of the rule.

Eyoh asked for clarification on whether the first two years of the Carbon Reduction program is included, while the subsequent three years will be decided later. Peterson replied that this is the case, and the first two years are included due to time constraints. Eyoh said he can provide a list of eligible projects.

Several members suggested retaining the BRT rule; Solberg suggested that the rule could be amended to accommodate scenarios with more funding. Solberg asked what will become of the funding if this decision results in \$2M to \$3M left over. Leitner suggested that it could break the tie shown in the Multiuse Trails and Bicycle Facilities category. Peterson said that the project could be funded by piecing together transit money and extra Unique Projects money.

Isaacson asked how much overprogramming is shown. Peterson replied that it is just under 11% and that MnDOT is not likely to support a lot more. Isaacson said that more projects may drop than expected, as delivering projects is becoming more difficult. Solberg added that the workforce is not stable in the transportation industry.

Robjent suggested that federal funding exchanges should be discussed again.

Several members suggested a preference for moving any non-BRT money to bicycle and pedestrian projects for climate reasons. Robjent added traffic management technologies fits with that objective.

Peterson asked for pros and cons of the scenarios to provide to TAB. Robjent said that a pro for the Midpoint Scenario with Carbon Reduction option #2 is that it funds the full original Bicycle/Pedestrian-Heavy and Midpoint scenarios. Solberg said that the Bicycle/Pedestrian-Heavy Scenario is good for safety because it serves the most vulnerable users. Ellos expressed agreement and added that that in the Multiuse Trails category, some of the projects just below the funding line are resubmittals or equity bonus projects.

McCullough said it makes sense to fund the Scott County bicycle project, which is tied with a Three Rivers Park District project because the former is a resubmittal and Scott County does not have any other projects funded, while Three Rivers Park District has three projects shown as funded.

Hager said expressed support for the Bicycle/Pedestrian-Heavy Scenario and added that Safe Routes to School projects are low-cost and high benefit. Isaacson expressed agreement.

Solberg said that the Bicycle/Pedestrian-Heavy Scenario provision of an extra roadway reconstruction/modernization project is a pro.

Solberg asked that applicants provide pros and cons to Council staff within a week.

#### Other Business

Eyoh said the MPCA launched the Minnesota Action Framework on September 16. The framework has goals to reduce greenhouse gas emissions by 50% by 2030 and achieve net-zero emissions by 2050. He said that a grant opportunity for small communities to improve stormwater resilience and reduce flood risk is available. He said that MPCA has a job open for a climate and energy coordinator in its climate unit.

## **Adjournment**

The meeting adjourned.
