### Proposed Action

To comply with the Legislature's directives in the Transit Rider Investment Program (TRIP), that the Metropolitan Council:

- 1) Adopt Resolution 2023-19; and
- 2) Adopt the Transit Rider Investment Program Policy

### Background

TRIP is a new program within Metro Transit established by the Legislature under Minnesota Statutes Section 473.4075, which calls for the establishment of non-sworn uniformed personnel who are responsible for a variety of duties that support better rider experience, including enforcing fare compliance and providing support to customers. The statute also requires the creation of an administrative citation program that decriminalizes fare evasion, reduces the penalties and provides for alternative citation resolutions.

TRIP personnel are required to assist and connect passengers to appropriate social services; provide navigation assistance; accompany to passengers who have a disability, are elderly, or request assistance; and advise customers regarding Metro Transit's code of conduct.

### Rationale

State law requires Metropolitan Council to adopt a resolution that establishes the TRIP program and establishes fine amounts. It also requires that the Metropolitan Council establish policies and procedures that govern the TRIP program, including authorizing and training personnel, establishing uniforms, issuing administrative citations, and contesting an administrative citation.

### Thrive Lens Analysis

This action supports the following Thrive Outcomes:

- 1) **Providing for economic vitality** by creating a safer transit system that connects residents and visitors to their employment, schools, medical and social services, special events in the downtown cores and other activities.
- 2) **Creating equity** by decriminalizing fare evasion which therefore keeps people out of the criminal justice system.

### **Funding**

Funding is provided by Metro Transit's existing budget.

### **Small Business Inclusion**

There are no direct impacts to small businesses with this action.
