Typical construction activities

- Platform construction
- Vertical amenities installation
- Pedestrian ramp reconstruction
- Roadway pavement replacement & rehabilitation
- Pavement markings
- Traffic signal modifications
- Fiber optic communications installation
Construction outreach activities

- Pre-construction postcard
- Weekly E Line newsletter e-mails and website updates
- E Line construction hotline
- Station neighbor door knocking and flyering
- Coordination of communications with partner agency-led projects

What to expect from METRO E Line construction

- Work in the corridor includes station construction, utility work, pavement and intersection improvements, and traffic signal changes. Expect temporary lane restrictions and intersection closures.
- Sidewalks will remain open on at least one side of the road and pedestrian access will be maintained to homes and businesses.
