Engineering & Facilities

AIMRail SCADA (AIM)

- AIMRail is the monitoring and control platform Metro Transit uses to run their LRT system from the Rail Control Center (RCC) at the Franklin OMF
- AIMRail is a proprietary system provided by Wabtec
- SCADA – Supervisory Control and Data Acquisition
- Updates are needed to maintain functionality of the system with upcoming capital projects

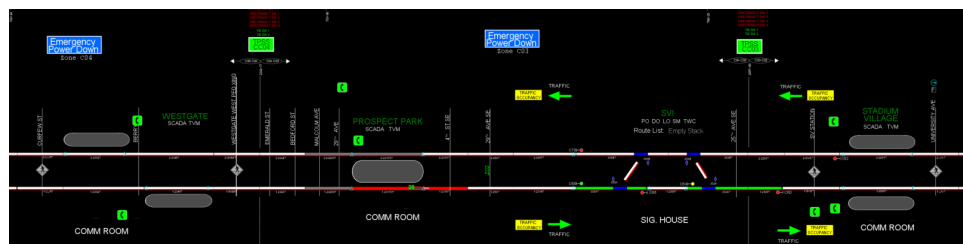

Metro Transit Infrastructure Improvement Projects

Blue Line State of Good Repair Phase 3

UMT and MNT Traffic Interface Improvements

Bid Pack 2 – Switch Heater Upgrades

St. Paul OMF Power Switch Conversion

Requested Action – Business Item 2025-186

The proposed action is that the Council authorize the Regional Administrator to execute a sole source contract with Wabtec Transportation Systems, LLC to provide software upgrades in an amount not to exceed \$2,366,265.
