

Drafting MAWSAC Report

Lanya Ross, Environmental Analyst, MCES Water Supply Planning
Emily Steinweg, Senior Engineer, MCES Water Supply Planning

MAWSAC meeting: November 16, 2021

2022 MAWSAC Report

Primary Audience: Metropolitan Council and Minnesota Legislature

Purpose:

To provide a set of recommendations and supporting information around high-priority water supply topics.

Policymakers and influencers will be better informed to develop and implement policies that achieve multiple benefits and reduce unintended impacts to water supplies.

Per Minnesota Statute 473.1565, the Council will consider Metropolitan Area Water Supply Advisory Committee's (MAWSAC) work and recommendations as it prepares its regional development framework.

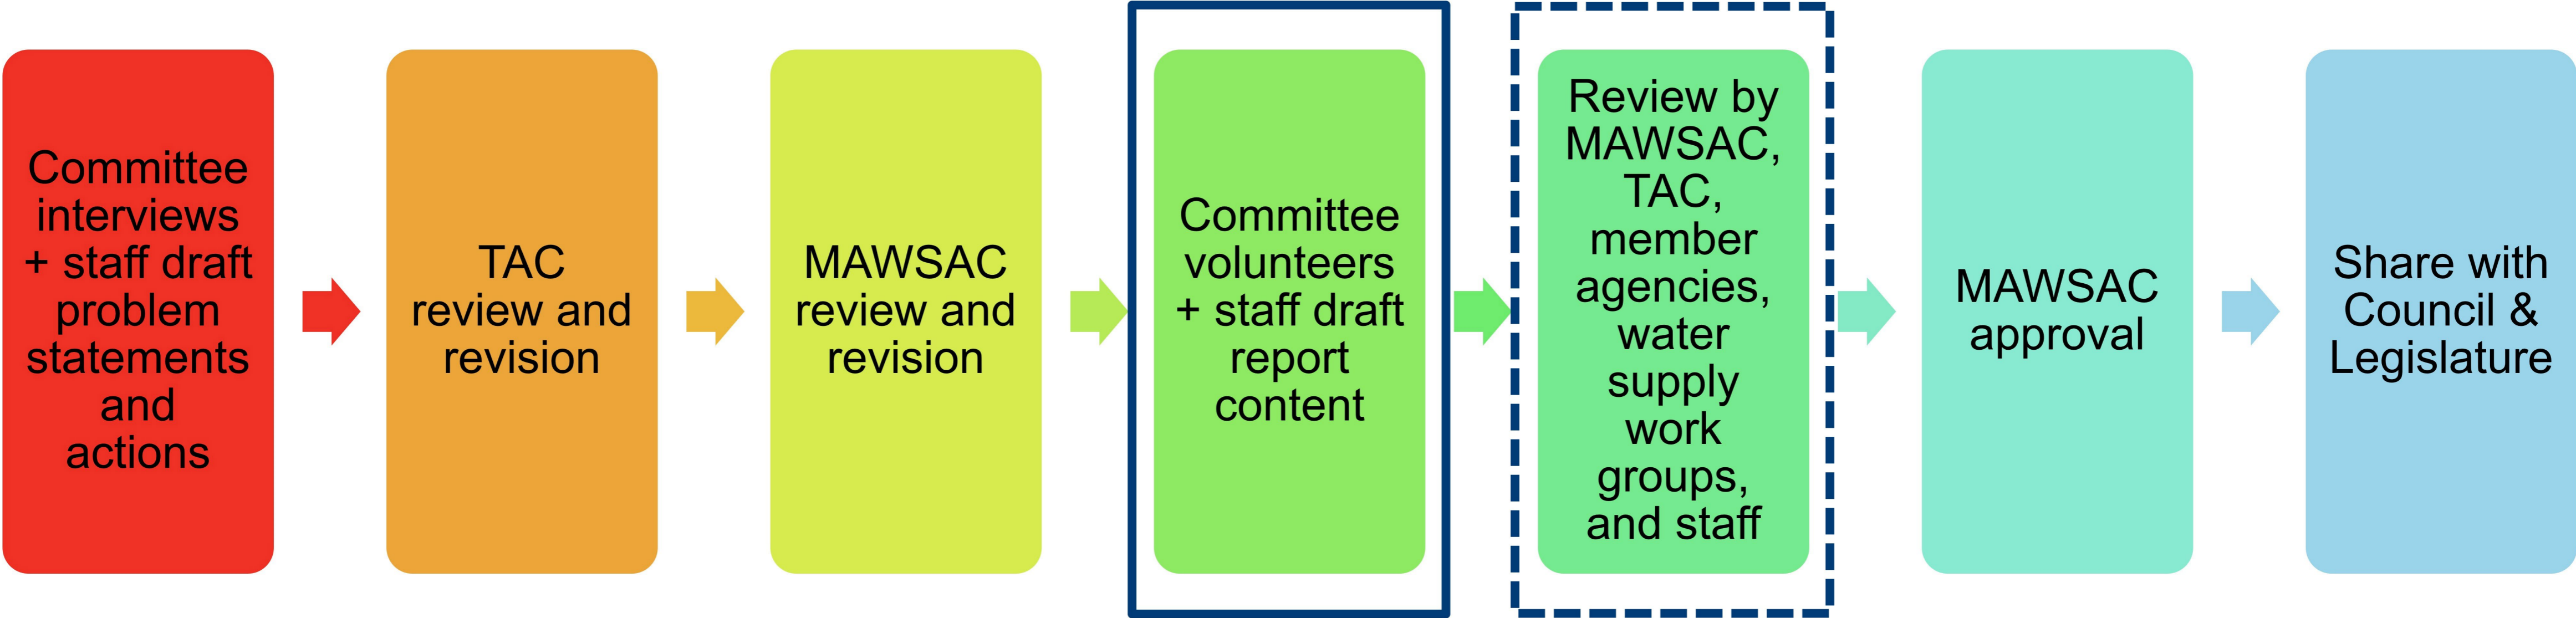

Proposed Milestones

(dates subject to change)

- Fall 2021:** MAWSAC & Technical Advisory Committee (TAC) provide input at meetings, and committee volunteers work with staff to write and solicit review of draft report
- Winter 2021:** Review comments incorporated into final report, guided by committee volunteers
- Jan. 18, 2022:** Approval by MAWSAC
- Jan. 25, 2022:** Present final report to Environment Committee
- Feb. 9, 2022:** Present final report to Council
- Feb. 15, 2022:** Submit final report to Legislature

Process to develop and revise language

Current Draft Content

- **Executive Summary**
- **Using this Report to Take Action**
- **Background**
- **Goals and Recommendations**
 - Regional challenges
 - Principles
 - Goals and recommendations
 - Water quality and contamination
 - Land use and water supply connections
 - Groundwater-surface water interaction
 - Infrastructure
- **Local Stories**
- **Supporting Information**

Input requested:

- Critical content (recommendation or information) for you or your organization
- Maps or graphs legislators, council members should consider
- Local stories to highlight challenges or recommended actions
- Other?
