

Summary of water supply issues discussed in MAWSAC meeting 5/22/13

- MC role should be as active participant as facilitator, advisor, collaborator creating partnerships - not as active manager and regulator
- Optimized water supply management system
 - Cost of alternative water supplies: Surface water, Stormwater, Wastewater
 - Equity: State financial role
- Water is factor, but not determining factor in terms of development.
- Comprehensive long-term look at water supply planning
- Collaborations and partnerships
- Do not need single direction for the region. Do not need top-down regional regulations
- Protecting recharge areas
 - How to develop differently
 - How to compensate communities for sacrifices made in passing development opportunities
- Incorporation of Groundwater management area concept in planning
