- Expert Articles
- Conference
- Examples/Other resources

Met Council framework for plan expectations and guidance, based on regional policies and the Metro Area Water Supply Plan and developed in collaboration with DNR and MDH

System Statement	Minimum requirements	Get more...	Helpful resources	Review by affected jurisdictions
A succinct statement of what content should be included in local plan updates	<p>A checklist of specific elements for each system statement topic, that MC will use to evaluate local plan updates</p> <p>These are required by statute or regional policy, or are needed to evaluate elements that are required by statute or policy</p>	<p>A list of options that communities can incorporate to go beyond the minimum plan requirements</p> <p>These are not required by statute or policy, but they are good practices that have demonstrated benefits</p>	<p>Resources that can be used to develop content for minimum requirements and “get more” recommendations</p> <p>Each resource should include guidance on how to use it</p>	The entities who should be given the opportunity to review and comment on parts of an updated local plan that impact them

DISCUSSION: Input to help design outreach plan

If you were given the checklist of water supply minimum requirements, what questions would you have and what resources would you need to complete it?

What do people <u>need</u> to know?	What do people most <u>want</u> to know?	What are people most likely to get wrong or not understand?

Meeting requirements and getting more out of your plan

Areas for input

- How can we help communities plan for their private wells?
- Which consultant groups should we invite to training events?
- Are there security concerns for service area maps?
- New tools/resources?
- Examples to highlight?
- Anything else?
