

# REGIONAL DEVELOPMENT GUIDE FEEDBACK

## VALUES

## GOALS

Equity

We value the people and communities of our region. Our region is economically and culturally vibrant. We also recognize, however, the harm and disparities that injustices, including racism, have created.

Our Region is Equitable and Inclusive

Racial inequities and injustices experienced by historically marginalized communities have been eliminated; and all residents and newcomers feel welcome, included, and empowered.

As goals need to be measurable, how will this one be measured? It seems perhaps a bit to vague?

Leadership

We value those in our region who inspire and motivate others for positive change. Our region is known for its civic engagement. We need broad and inclusive leadership to help confront the significant challenges we face around equity, climate change, safety, and other pressing issues. To maximize the potential of our region and its communities, we turn to leadership that is diverse, collaborative, culturally competent, and innovative. We encourage this kind of leadership across all sectors including business, government, non-profit, and education.

Our Communities are Healthy and Safe

All our region's residents live healthy, productive, and rewarding lives with a sense of security, dignity, and wellbeing.

may run into direct conflict between individual choice vs public access?

Accountability

We value being effective in our work and achieving measurable outcomes. Our region is known for its research, initiatives, and collaborations. We must be open to criticism and clearly understand when we are not achieving results or have harmed communities. We recognize that we can maximize our effectiveness by being in partnership with others. We will also be transparent and flexible so that we can change course when needed.

Our Economy is Dynamic and Resilient

Our region meets the opportunities and challenges faced by our communities and economy including issues of choice, access, and affordability.

Stewardship

We value our region's resources. Our resources include our natural, economic, and financial resources as well as our infrastructure. We recognize that these resources may be vulnerable over time to changing conditions, including from climate change. We must design our systems and allocate our resources in ways that can be sustained over time and support the needs of future generations.

We Lead on Addressing Climate Change

We have mitigated greenhouse gas emissions and have adapted to ensure that our communities and systems are resilient to climate impacts.

Integrate into what?

We Protect and Restore Natural Systems

We protect, integrate, and restore natural systems to protect habitat and ensure a high quality of life for the people of our region.

## EQUITY FRAMEWORK

This is an important piece. It'll be interesting how this is accomplished. Seems like one of the largest challenges in the Plan. Co-creating instead of developing solution for them
