- Transportation Finance
- Evaluation and Performance
- Work Program
- Congestion Management Process

Regional Vision/Goals Chapters

A new link between policy and planning

- Lay out the importance of the issue and the links to transportation, including data and trends
- Identify key objectives for transportation investments and plans
- Provide contextual relationships to the investment chapters, for example:
 - Health and Safety chapter will reference the elements of safety that are important in the modal investment chapters
 - Climate Change chapter will lay out the strategic approach to climate change in transportation, including any investments that are not modal specific

Thank you

Cole Hiniker

Senior Manager, Multimodal Transportation Planning
