

# Group exercise questions (1/2)

1. Do you have any additional thoughts or comments for the groundwater modeling analysis that were not discussed today?
2. The estimated costs and potential utility rates for the surface water supply option will be evaluated in the next two phases of the project. Aside from the potential costs and utility rates, do you feel that this option could align with the objectives of the work group's problem statement? If not, please explain.

*Ensure equitable access to sufficient, safe, and affordable water for communities in the North and East Metro areas to meet current and future needs while safeguarding the sustainability of surface water and groundwater resources.*

# Group exercise questions (2/2)

3. As we proceed to further evaluate this option, is there anything else you would like to ask or recommend to the work group, Met Council, the DNR, or others?
