Initial Results from the 2020 Census

Published August 2021

In this worksheet, 2010 population and household counts reflect *boundaries that existed in 2010* (nominal geographies).

The 2010-2020 change in this sheet therefore reflects real population change *and boundary changes* since 2010.

For example, the City of Stillwater's population count increased by 1,167 from 2010 to 2020 using nominal geographies.

Some of those people existed in 2010; they were simply transferred from Stillwater Township to Stillwater via annexation.

Nominal geographies are useful for examining change in "official" counts and how that may impact finances.

To look instead at change within *boundaries as they existed in 2020*, see the "2020 Census (standardized geog)" sheet.

Some of the Census Bureau's city/township boundaries used in the 2020 Census appear to be erroneous.

Metropolitan Council staff adjusted some of the numbers above to correct these apparent errors.

See the following link for details:

<https://metrocouncil.org/Data-and-Maps/Research-and-Data/Census-Data/How-we-edited-initial-2020-Census-Data.aspx>

* Boundaries changed after 2010; 2010-2020 differences reflect those transfers in addition to actual change.

** Statistics for Rogers include Hassan township (fully annexed in 2012).

*** Shorewood annexed part of Chanhassen in 2018 and now has a portion in Carver County.

+ Following the 2020 Census, Credit River township (Scott County) incorporated and is now Credit River city.

Initial Results from the 2020 Census

In this worksheet, 2010 population and household counts reflect *boundaries that existed in 2020* (standardized geographies). The 2010-2020 change in this sheet therefore reflects real population change since 2010, *not* changes in city/township borders. For example, the City of Stillwater's population count increased by 759 from 2010 to 2020 using standardized geographies. That change occurred within Stillwater's 2010 boundaries as well as the annexed portion of Stillwater Township. Standardized geographies are useful for examining demographic trends within a certain area. To look instead at change between "official" 2010 and 2020 numbers, see the "2020 Census (nominal geog)" sheet.

Initial Results from the 2020 Census

Published August 2021

In this worksheet, 2010 population and household counts reflect *boundaries that existed in 2020* (standardized geographies). The 2010-2020 change in this sheet therefore reflects real population change since 2010, *not* changes in city/township borders. For example, the City of Stillwater's population count increased by 759 from 2010 to 2020 using standardized geographies. That change occurred within Stillwater's 2010 boundaries as well as the annexed portion of Stillwater Township. Standardized geographies are useful for examining demographic trends within a certain area. To look instead at change between "official" 2010 and 2020 numbers, see the "2020 Census (nominal geog)" sheet.

A small number of the Census Bureau's city/township boundaries used in the 2020 Census appear to be erroneous.

Metropolitan Council staff adjusted some of the numbers above to correct these apparent errors.

* Boundaries changed after 2010; 2010-2020 differences reflect those transfers in addition to actual change.

** Statistics for Rogers include Hassan township (fully annexed in 2012).

*** Shorewood annexed part of Chanhassen in 2018 and now has a portion in Carver County.

+ Following the 2020 Census, Credit River township (Scott County) incorporated and is now Credit River city.
