Land identified as cemeteries by The Lawrence Group and by communities as part of the planned land use inventory
- Existing and Funded Regional and State Trails**
Source: The Lawrence Group, 2000; trails not shown within park boundaries
- All Categories Above of less than 40 Contiguous Acres**
Sources: Metropolitan Council 2000 land use and planned land use inventories

Aquatic Resources

Data source: Metropolitan Council

Surface Water Features Showing Maximum Rank for Recreation and Supply Uses

- Outstanding
- High
- Moderate
- Limited

Recreational use capacity is determined by public accessibility to the shoreline and water surface and basic physical characteristics and aesthetics which support direct or indirect recreational uses. Water supply use is based upon frequency of use as a source of public drinking water.

- Steep Slopes (18% or greater)

Additional Natural Resources

Boundary source: MnDNR; only areas of 40 or more contiguous acres are shown

- Wildlife Management Areas
- Minnesota Valley National Wildlife Refuge
- Scientific Natural Areas
- Land in RIM
