## Organization Information

Name: ST PAUL, CITY OF

**Jurisdictional Agency (if different):**

**Organization Type:** City

**Organization Website:**

**Address:** DEPT OF PUBLIC WORKS-CITY HALL ANNEX  
25 W 4TH ST #1500

\* ST PAUL Minnesota 55101  
City State/Province Postal Code/Zip

**County:** Ramsey

**Phone:**\* 651-266-9700 Ext.

**Fax:**

**PeopleSoft Vendor Number** 0000003222A22

---

## Project Information

**Project Name** Arterial Corridor Management (Snelling and Lexington)

**Primary County where the Project is Located** Ramsey

**Jurisdictional Agency (If Different than the Applicant):**

This project aims to relieve congestion and improve traffic signal operations, incident, emergency and event management along two key arterials in the City of Saint Paul through the installation of new signal controllers, robust detection, interconnect, changeable message signs (CMS), implementation of adaptive traffic signal control, travel time monitoring, and signal timing optimization. Snelling Avenue (TH 51) and Lexington Parkway (CR 51) each carry upwards of 30,000 vehicles per day with an average signal spacing of one quarter mile. These conditions place an emphasis on the need for effective traffic signal coordination and optimization on these corridors.

**Brief Project Description (Limit 2,800 characters; approximately 400 words)**

- The implementation of adaptive traffic signal control at multiple signals along Snelling and Lexington will maximize the capacity of the intersection by optimizing splits in real time based on the powerful data collection capabilities of modern controllers, robust vehicle detection, and the City's advanced traffic management system (ATMS). Adaptive control will also increase the ability of the City to manage event traffic for the proposed soccer stadium on Snelling Avenue, as well as reducing delay during times of unpredictable traffic demands.
- Many traffic signal controllers along Lexington Parkway in Saint Paul are legacy 170 controllers, which have limited functionality and reliability. Additionally, most are not a part of the City's fiber optic network. Through this project, modern controllers would be installed and connected to the City's existing fiber optic backbone, allowing for holistic management and operation of the roadway.
- The ability to provide real-time information to commuters, visitors, and residents is a key component of any emergency or incident management plan. This project proposes to place CMS at key locations along Snelling and Lexington

to provide information about emergencies, road closures, snow emergencies, and events. The signs would be placed at strategic locations to manage vehicle routing and maximize the dissemination of important alerts when issues arise.

- The installation of cameras and travel time monitoring equipment will allow the City to observe the conditions at congested intersections from the traffic management center, make signal timing modifications in real time, observe the impacts of those changes without making site visits, and quantify the benefits of the system with detailed reports on performance.

- On average, signal timing optimization of coordinated signal systems result in a 13.8% reduction in delay (ITS Benefits: The Case of Traffic Signal Control Systems, Skabardonis, Alexander). As this reduction is based on static time of day plans, the delay reduction could be much greater when adaptive traffic signal control is implemented.

*Include location, road name/functional class, type of improvement, etc.*

**TIP Description Guidance** (will be used in TIP if the project is selected for funding)

TH 51, FROM MSAS 168 TO HEWITT AVE & CR 51 FROM CR 38 TO MSAS 142 IN ST. PAUL, INTERCONNECT, SIGNAL UPGRADES, ADAPTIVE SIGNAL TIMING, DYNAMIC MESSAGE SIGNS, AND DEPLOYMENT OF CCTV CAMERAS

**Project Length (Miles)**

8.2

---

## Project Funding

**Are you applying for funds from another source(s) to implement this project?**

No

**If yes, please identify the source(s)**

**Federal Amount**

\$2,001,320.00

**Match Amount**

\$500,330.00

*Minimum of 20% of project total*

**Project Total**

\$2,501,650.00

<b>Match Percentage</b>	20.0%
<i>Minimum of 20% Compute the match percentage by dividing the match amount by the project total</i>	
<b>Source of Match Funds</b>	Local
<i>A minimum of 20% of the total project cost must come from non-federal sources; additional match funds over the 20% minimum can come from other federal sources</i>	
<b>Preferred Program Year</b>	
<b>Select one:</b>	2021
<i>For TDM projects, select 2018 or 2019. For Roadway, Transit, or Trail/Pedestrian projects, select 2020 or 2021.</i>	
<b>Additional Program Years:</b>	
<i>Select all years that are feasible if funding in an earlier year becomes available.</i>	

## Project Information: Roadway Projects

<b>County, City, or Lead Agency</b>	City of Saint Paul Department of Public Works
<b>Functional Class of Road</b>	A Minor Arterial, B Minor Arterial
<b>Road System</b>	TH, CSAH
<i>TH, CSAH, MSAS, CO. RD., TWP. RD., CITY STREET</i>	
<b>Road/Route No.</b>	51
<i>i.e., 53 for CSAH 53</i>	
<b>Name of Road</b>	Snelling Avenue, Lexington Parkway
<i>Example; 1st ST., MAIN AVE</i>	
<b>Zip Code where Majority of Work is Being Performed</b>	55104
<b>(Approximate) Begin Construction Date</b>	03/01/2021
<b>(Approximate) End Construction Date</b>	11/19/2021

### TERMINI:(Termini listed must be within 0.3 miles of any work)

<b>From:</b> <b>(Intersection or Address)</b>	Snelling & Montreal/Lexington & Randolph
<b>To:</b> <b>(Intersection or Address)</b>	Snelling & Hewitt/Lexington & Hoyt

*DO NOT INCLUDE LEGAL DESCRIPTION*

### Or At

<b>Primary Types of Work</b>	Installation of interconnect, vehicle detection, CMS, CCTV cameras, etc.

## Requirements - All Projects

### All Projects

1. *The project must be consistent with the goals and policies in these adopted regional plans: Thrive MSP 2040 (2014), the 2040 Transportation Policy Plan, the 2040 Regional Parks Policy Plan (2015), and the 2040 Water Resources Policy Plan (2015).*

**Check the box to indicate that the project meets this requirement.** Yes

2. *The project must be consistent with the 2040 Transportation Policy Plan. Reference the 2040 Transportation Plan objectives and strategies that relate to the project.*

- A. Operate the regional transportation system to efficiently and cost-effectively connect people and freight to destinations. Pg. 2.6
- B. Reduce the transportation system's vulnerability to natural and manmade incidents and threats. Pg. 2.7
  - B2. Regional transportation partners should work with local, state, and federal public safety officials, including emergency responders, to protect and strengthen the role of the regional transportation system in providing security and effective emergency response to serious incidents and threats. Pg. 2.7
  - B3. Regional transportation partners should monitor and routinely analyze safety and security data by mode and severity to identify priorities and progress. Pg. 2.7

**List the goals, objectives, strategies, and associated pages:**

- C. Increase travel time reliability and predictability for travel on highway and transit systems. Pg. 2.8
- C2. Local units of government should provide a system of interconnected arterial roads, streets, bicycle facilities, and pedestrian facilities to meet local travel needs using Complete Streets principles. Pg. 2.8
- C7. Regional transportation partners will manage and optimize the performance of the principal arterial system as measured by person throughput. Pg. 2.9
- C9. The Council will support investments in A-minor arterials that build, manage, or improve the system's ability to supplement the capacity of the principal arterial system and support access to the region's job, activity, and industrial and manufacturing concentrations. Pg. 2.9

- D. Improve multimodal access to regional job concentrations identified in Thrive MSP 2040. Pg. 2.11
- D4. The Council, MnDOT, and local governments will invest in a transportation system that provides travel conditions that compete well with peer metropolitan areas. Pg. 2.11
- E. Reduce transportation related air emissions. Pg. 2.12
- E. Reduce impacts of transportation construction, operations, and use on the natural, cultural, and developed environments. Pg 2.12
- E. Increase the availability and attractiveness of transit, bicycling, and walking to encourage healthy communities and active car-free lifestyles. Pg 2.12
- F2. Local governments should plan for increased density and a diversification of uses in job concentrations, nodes along corridors, and local centers to maximize the effectiveness of the transportation system. Pg. 2.14

*3. The project or the transportation problem/need that the project addresses must be in a local planning or programming document. Reference the name of the appropriate comprehensive plan, regional/statewide plan, capital improvement program, corridor study document [studies on trunk highway must be approved by the Minnesota Department of Transportation and the Metropolitan Council], or other official plan or program of the applicant agency [includes Safe Routes to School Plans] that the project is included in and/or a transportation problem/need that the project addresses.*

- Page T5 of the City's Comprehensive Plan expresses a need to '[e]xamine alternatives to enhance safety through right-of-way design, including narrowing or removing lanes on roads.'
  - Page T13 of the City's Comprehensive Plan declares that the City's parking management toolbox must be expanded.
- List the applicable documents and pages:**
- Page T23 of the City's Comprehensive Plan discusses the importance and potential of the City's fiber optic cable system.
  - Page T27 of the City's Comprehensive Plan directs the City to improve access to information about construction, detours, and events.

*4. The project must exclude costs for studies, preliminary engineering, design, or construction engineering. Right-of-way costs are only eligible as part of bicycle/pedestrian projects, transit stations/stops, transit terminals, park-and-ride facilities, or pool-and-ride lots. Noise barriers, drainage projects, fences, landscaping, etc., are not eligible for funding as a standalone project, but can be included as part of the larger submitted project, which is otherwise eligible.*

**Check the box to indicate that the project meets this requirement.** Yes

*5. Applicants that are not cities or counties in the seven-county metro area with populations over 5,000 must contact the MnDOT Metro State Aid Office prior to submitting their application to determine if a public agency sponsor is required.*

**Check the box to indicate that the project meets this requirement.** Yes

*6. Applicants must not submit an application for the same project elements in more than one funding application category.*

**Check the box to indicate that the project meets this requirement.** Yes

*7. The requested funding amount must be more than or equal to the minimum award and less than or equal to the maximum award. The cost of preparing a project for funding authorization can be substantial. For that reason, minimum federal amounts apply. Other federal funds may be combined with the requested funds for projects exceeding the maximum award, but the source(s) must be identified in the application. Funding amounts by application category are listed below.*

**Roadway Expansion:** \$1,000,000 to \$7,000,000

**Roadway Reconstruction/ Modernization:** \$1,000,000 to \$7,000,000

**Roadway System Management** \$250,000 to \$7,000,000

**Bridges Rehabilitation/ Replacement:** \$1,000,000 to \$7,000,000

**Check the box to indicate that the project meets this requirement.** Yes

*8. The project must comply with the Americans with Disabilities Act.*

**Check the box to indicate that the project meets this requirement.** Yes

*9. The project must be accessible and open to the general public.*

**Check the box to indicate that the project meets this requirement.** Yes

*10. The owner/operator of the facility must operate and maintain the project for the useful life of the improvement.*

**Check the box to indicate that the project meets this requirement.** Yes

*11. The project must represent a permanent improvement with independent utility. The term independent utility means the project provides benefits described in the application by itself and does not depend on any construction elements of the project being funded from other sources outside the regional solicitation, excluding the required non-federal match. Projects that include traffic management or transit operating funds as part of a construction project are exempt from this policy.*

**Check the box to indicate that the project meets this requirement.** Yes

*12. The project must not be a temporary construction project. A temporary construction project is defined as work that must be replaced within five years and is ineligible for funding. The project must also not be staged construction where the project will be replaced as part of future stages. Staged construction is eligible for funding as long as future stages build on, rather than replace, previous work.*

**Check the box to indicate that the project meets this requirement.** Yes

*13. The project applicant must send written notification regarding the proposed project to all affected state and local units of government prior to submitting the application.*

**Check the box to indicate that the project meets this requirement.** Yes

---

## Roadways Including Multimodal Elements

*1. All roadway and bridge projects must be identified as a Principal Arterial (Non-Freeway facilities only) or A-Minor Arterial as shown on the latest TAB approved roadway functional classification map.*

**Check the box to indicate that the project meets this requirement.** Yes

### Roadway Expansion and Reconstruction/Modernization projects only:

*2. The project must be designed to meet 10-ton load limit standards.*

**Check the box to indicate that the project meets this requirement.**

### Bridge Rehabilitation/Replacement projects only:

*3. Projects requiring a grade-separated crossing of a Principal Arterial freeway must be limited to the federal share of those project costs identified as local (non-MnDOT) cost responsibility using MnDOT's Cost Participation for Cooperative Construction Projects and Maintenance Responsibilities manual. In the case of a federally funded trunk highway project, the policy guidelines should be read as if the funded trunk highway route is under local jurisdiction.*

**Check the box to indicate that the project meets this requirement.**

*4. The bridge must carry vehicular traffic. Bridges can carry traffic from multiple modes. However, bridges that are exclusively for bicycle or pedestrian traffic must apply under one of the Bicycle and Pedestrian Facilities application categories. Rail-only bridges are ineligible for funding.*

**Check the box to indicate that the project meets this requirement.**

*5. The length of the bridge must equal or exceed 20 feet.*

**Check the box to indicate that the project meets this requirement.**

*6. The bridge must have a sufficiency rating less than 80 for rehabilitation projects and less than 50 for replacement projects. Additionally, the bridge must also be classified as structurally deficient or functionally obsolete.*

**Check the box to indicate that the project meets this requirement.**

---

## Requirements - Roadways Including Multimodal Elements

### Measure A: Functional Classification

<b>Area</b>	13.919
<b>Project Length</b>	11.409
<b>Average Distance</b>	1.22

<b>Upload Map</b>	1467397516091_20160701-Regional Economy.pdf

---

## Measure C: Current Heavy Commercial Traffic

<b>Location:</b>	Snelling Avenue (TH 51) between Summit Avenue and Selby Avenue
<b>Current daily heavy commercial traffic volume:</b>	1050
<b>Date heavy commercial count taken:</b>	2012

---

## Measure D: Freight Elements

**Response (Limit 1,400 characters; approximately 200 words)**

TH 51 has an HCAADT of 1050 and connects TH 94 with rail lines to the north. Increasing efficiency and travel time reliability on TH 51 will allow for increased efficiency.

## Measure A: Current Daily Person Throughput

<b>Location</b>	Snelling Avenue (TH 51), Snelling to Concordia
<b>Current AADT Volume</b>	42500.0
<b>Existing Transit Routes on the Project</b>	3, 16, 21, 53, 63, 67, 70, 74, 83, 84, 94, 353, 355, 365, 375, 452, 480, 484, 489, 902-METRO Green Line
<b>Upload Transit Map</b>	1467398403546_20160701-Transit Connections.pdf

---

## Response - Daily Person Throughput

<b>Average Annual Daily Transit Ridership</b>	0
<b>Current Daily Person Throughput</b>	55250.0

---

## **Measure B: 2040 Forecast ADT**

Use Metropolitan Council model to determine forecast (2040) ADT volume      Yes

If checked, METC Staff will provide Forecast (2040) ADT volume

OR

Identify the approved county or city travel demand model to determine forecast (2040) ADT volume

Forecast (2040) ADT volume

---

## **Measure A: Project Location and Impact to Disadvantaged Populations**

Select one:

Project located in Area of Concentrated Poverty with 50% or more of residents are people of color (ACP50):      Yes

Project located in Area of Concentrated Poverty:

Projects census tracts are above the regional average for population in poverty or population of color:

Project located in a census tract that is below the regional average for population in poverty or populations of color or includes children, people with disabilities, or the elderly:

**Response (Limit 2,800 characters; approximately 400 words)**

This project will benefit the noted populations in several ways, some of which are noted below:

- Current technologies have provided new avenues of connecting with the public, but often times information posted to websites, sent via text message, or released via social media do not reach impoverished or elderly populations as effectively. The installation of changeable message signs in will allow for the distribution of information regarding emergencies, incidents, or events to those who don't have unfettered access to modern technology.
- Upgrading existing traffic signal controllers will allow for easier accommodation of future BRT routes and bicycle facilities. Transit is an essential public service for households without automobiles.
- The installation of APS pedestrian push buttons will aid those with hearing or visual impairments safely traverse intersections.

*The response should address the benefits, impacts, and mitigation for the populations affected by the project.*

---

### **Measure A: Roadway Projects that do not Include Railroad Grade-Separation Elements**

Crash Modification Factor Used:	0
---------------------------------	---

**Rationale for Crash Modification Selected:**

The installation of APS push buttons is expected to increase safety for pedestrians where installed, but no existing CMFs are available for that improvement.

(Limit 1400 Characters; approximately 200 words)

**Project Benefit (\$)** from B/C Ratio      \$0.00

**Worksheet Attachment**

---

**Roadway projects that include railroad grade-separation elements:**

<b>Current AADT volume:</b>	0
<b>Average daily trains:</b>	0
<b>Crash Risk Exposure eliminated:</b>	0

---

**Measure A: Multimodal Elements and Existing Connections**

As part of this project, APS push buttons will be installed at intersections where they are not in place. APS push buttons have been found to have many benefits to pedestrians, particularly those with visual impairments. Additionally, the installation of changeable message signs will provide information to pedestrians, bicyclists, and transit operators and riders of events, construction, and incidents.

**Response (Limit 2,800 characters; approximately 400 words)**

The intersections along Snelling and Lexington included in the project serve a high volume of pedestrians, bicycles, and transit users. Users of existing bike lanes, paths, or bike boulevards on Minnehaha Avenue, Marshall Avenue, Summit Avenue, Ford Parkway, Jefferson Avenue, and Lexington Parkway would see the benefits of the increased efficiency, decreased delay, and improved air quality provided by the project, as would A Line BRT riders, Green Line riders, and those on one of the many local bus routes traveling along or across these two corridors.

---

## Transit Projects Not Requiring Construction

If the applicant is completing a transit or TDM application that is operations only, check the box and do not complete the remainder of the form. These projects will receive full points for the Risk Assessment. Park-and-Ride and other transit construction projects require completion of the Risk Assessment below.

**Check Here if Your Transit Project Does Not Require Construction**

---

## Measure A: Risk Assessment

### 1) Project Scope (5 Percent of Points)

Meetings or contacts with stakeholders have occurred Yes

100%

Stakeholders have been identified

40%

Stakeholders have not been identified or contacted

0%

### 2) Layout or Preliminary Plan (5 Percent of Points)

Layout or Preliminary Plan completed

100%

Layout or Preliminary Plan started Yes

50%

Layout or Preliminary Plan has not been started

0%

Anticipated date or date of completion

### 3) Environmental Documentation (5 Percent of Points)

EIS

EA

PM

**Document Status:**

Document approved (include copy of signed cover sheet) 100%

Document submitted to State Aid for review 75% date submitted

Document in progress; environmental impacts identified; review request letters sent

50%

Document not started

0%

**Anticipated date or date of completion/approval** 07/31/2020

#### **4)Review of Section 106 Historic Resources (10 Percent of Points)**

No known historic properties eligible for or listed in the National Register of Historic Places are located in the project area, and project is not located on an identified historic bridge

100%

Historic/archeological review under way; determination of no historic properties affected or no adverse effect anticipated

80%

Historic/archaeological review under way; determination of adverse effect anticipated

40%

Unsure if there are any historic/archaeological resources in the project area Yes

0%

**Anticipated date or date of completion of historic/archeological review:** 07/31/2020

Project is located on an identified historic bridge

#### **5)Review of Section 4f/6f Resources (10 Percent of Points)**

4(f) Does the project impacts any public parks, public wildlife refuges, public golf courses, wild & scenic rivers or public private historic properties?

6(f) Does the project impact any public parks, public wildlife refuges, public golf courses, wild & scenic rivers or historic property that was purchased or improved with federal funds?

No Section 4f/6f resources located in the project area

100%

No impact to 4f property. The project is an independent bikeway/walkway project covered by the bikeway/walkway Negative Declaration statement; letter of support received

100%

Section 4f resources present within the project area, but no known adverse effects

80%

Project impacts to Section 4f/6f resources likely coordination/documentation has begun

50%

Project impacts to Section 4f/6f resources likely coordination/documentation has not begun

30%

Unsure if there are any impacts to Section 4f/6f resources in the project area Yes

0%

#### **6)Right-of-Way (15 Percent of Points)**

**Right-of-way, permanent or temporary easements not required** Yes

100%

**Right-of-way, permanent or temporary easements has/have been acquired**

100%

**Right-of-way, permanent or temporary easements required, offers made**

75%

**Right-of-way, permanent or temporary easements required, appraisals made**

50%

**Right-of-way, permanent or temporary easements required, parcels identified**

25%

**Right-of-way, permanent or temporary easements required, parcels not identified**

0%

**Right-of-way, permanent or temporary easements identification has not been completed**

0%

**Anticipated date or date of acquisition**

## **7) Railroad Involvement (25 Percent of Points)**

**No railroad involvement on project** Yes

100%

**Railroad Right-of-Way Agreement is executed (include signature page)**

100%

**Railroad Right-of-Way Agreement required; Agreement has been initiated**

60%

**Railroad Right-of-Way Agreement required; negotiations have begun**

40%

**Railroad Right-of-Way Agreement required; negotiations not begun**

0%

**Anticipated date or date of executed Agreement**

## **8) Interchange Approval (15 Percent of Points)\***

*\*Please contact Karen Scheffing at MnDOT (Karen.Scheffing@state.mn.us or 651-234-7784) to determine if your project needs to go through the Metropolitan Council/MnDOT Highway Interchange Request Committee.*

**Project does not involve construction of a new/expanded interchange or new interchange ramps** Yes

100%

**Interchange project has been approved by the Metropolitan Council/MnDOT Highway Interchange Request Committee**

100%

**Interchange project has not been approved by the Metropolitan Council/MnDOT Highway Interchange Request Committee**

0%

## **9)Construction Documents/Plan (10 Percent of Points)**

**Construction plans completed/approved (include signed title sheet)**

100%

**Construction plans submitted to State Aid for review**

75%

**Construction plans in progress; at least 30% completion**

50%

**Construction plans have not been started** Yes

0%

**Anticipated date or date of completion** 03/31/2021

## **10)Letting**

**Anticipated Letting Date** 05/01/2021

---

## **Measure A: Cost Effectiveness**

**Total Project Cost (entered in Project Cost Form):** \$2,501,650.00

**Enter Amount of the Noise Walls:** \$0.00

**Total Project Cost subtract the amount of the noise walls:** \$2,501,650.00

**Points Awarded in Previous Criteria**

**Cost Effectiveness** \$0.00

# SYNCHRO REPORTS

## ARTERIAL CORRIDOR MANAGEMENT (SNELLING & LEXINGTON)

### SYNCHRO METHODOLOGY

In order to simulate the benefits to delay and reduction of emissions anticipated with the implementation of adaptive signal timing and optimization, the Synchro analysis performed for this application attempted to imitate the behavior of an adaptive system using the following methodology:

- Turning movement counts at fifteen minute intervals in the PM peak hour were obtained for nine traffic signals where adaptive control is expected to be implemented, on TH 51 (Snelling Avenue between University Avenue and Selby Avenue), and CR 51 (Lexington Parkway between University Avenue and Concordia Avenue).
- Each fifteen minute interval was modeled separately, and the fifteen minute volumes were extrapolated to hourly rates. A PHF of 1 was used for each interval. The intervals were evaluated for two scenarios:
  - **Existing** – Models for each of the four fifteen minute intervals were analyzed individually using the existing signal timing plan for the PM peak hour.
  - **Adaptive** – Each of the four fifteen minute intervals were analyzed individually using optimized timings for their individual volumes, in order to imitate the adaptive system.
- The results were formulated by adjusting the results from the Synchro models to levels appropriate for the aggregate hourly volumes.
  - The delay per vehicle for each interval was multiplied by the actual fifteen minute counts for that interval, and then divided by the actual hourly volume to derive the average delay per vehicle per hour.
  - One quarter of the hourly emissions outputs for each interval were summed to derive the emissions totals for the peak hour.

The City of Saint Paul believes that this modeling depicts a reasonable approximation of the benefits likely to be achieved by the implementation of adaptive signal timing along this corridor.

Please contact Mike Klobucar at 651.266.6208 or [mike.klobucar@ci.stpaul.mn.us](mailto:mike.klobucar@ci.stpaul.mn.us) if you have any questions.

Intersection Summary

Area Type: Other

Cycle Length: 130

Actuated Cycle Length: 130

Offset: 10 (8%), Referenced to phase 2:SBTL and 6:NBT, Start of FDW or yellow

Natural Cycle: 75

Control Type: Actuated-Coordinated

Maximum v/c Ratio: 0.66

Intersection Signal Delay: 9.5

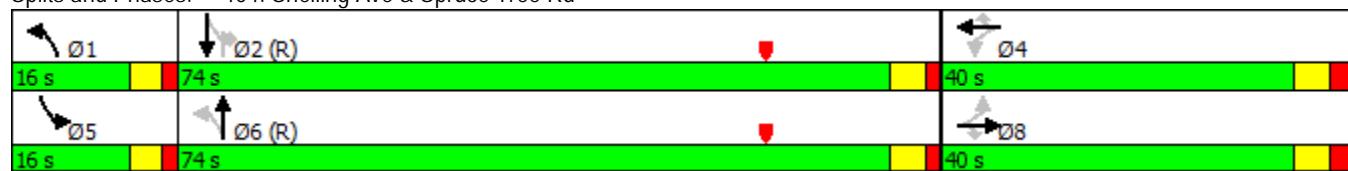

Intersection LOS: A

Intersection Capacity Utilization 69.8%

ICU Level of Service C

Analysis Period (min) 15

# SYNCHRO REPORTS

## ARTERIAL CORRIDOR MANAGEMENT (SNELLING & LEXINGTON)

### SYNCHRO METHODOLOGY

In order to simulate the benefits to delay and reduction of emissions anticipated with the implementation of adaptive signal timing and optimization, the Synchro analysis performed for this application attempted to imitate the behavior of an adaptive system using the following methodology:

- Turning movement counts at fifteen minute intervals in the PM peak hour were obtained for nine traffic signals where adaptive control is expected to be implemented, on TH 51 (Snelling Avenue between University Avenue and Selby Avenue), and CR 51 (Lexington Parkway between University Avenue and Concordia Avenue).
- Each fifteen minute interval was modeled separately, and the fifteen minute volumes were extrapolated to hourly rates. A PHF of 1 was used for each interval. The intervals were evaluated for two scenarios:
  - **Existing** – Models for each of the four fifteen minute intervals were analyzed individually using the existing signal timing plan for the PM peak hour.
  - **Adaptive** – Each of the four fifteen minute intervals were analyzed individually using optimized timings for their individual volumes, in order to imitate the adaptive system.
- The results were formulated by adjusting the results from the Synchro models to levels appropriate for the aggregate hourly volumes.
  - The delay per vehicle for each interval was multiplied by the actual fifteen minute counts for that interval, and then divided by the actual hourly volume to derive the average delay per vehicle per hour.
  - One quarter of the hourly emissions outputs for each interval were summed to derive the emissions totals for the peak hour.

The City of Saint Paul believes that this modeling depicts a reasonable approximation of the benefits likely to be achieved by the implementation of adaptive signal timing along this corridor.

Intersection Summary

Area Type: Other

Cycle Length: 130

Actuated Cycle Length: 130

Offset: 103 (79%), Referenced to phase 2:NBTL and 6:SBTL, Start of 1st Green

Natural Cycle: 95

Control Type: Actuated-Coordinated

Maximum v/c Ratio: 0.85

Intersection Signal Delay: 40.2

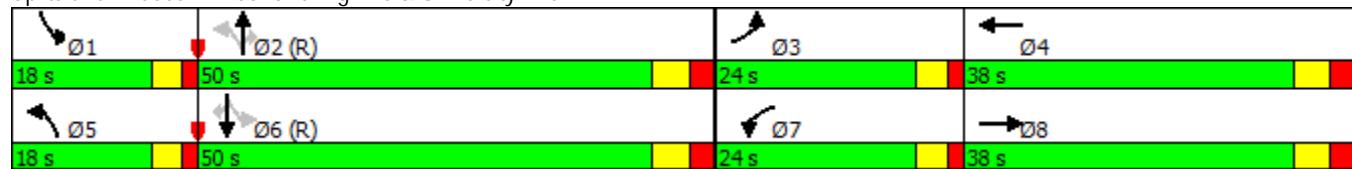

Intersection LOS: D

Intersection Capacity Utilization 87.3%

ICU Level of Service E

Analysis Period (min) 15

Splits and Phases: 166: Snelling Ave & University Ave

Lanes, Volumes, Timings  
260: Snelling Ave & Concordia Ave

Intersection Summary

Area Type: Other

Cycle Length: 100

Actuated Cycle Length: 100

Offset: 4 (4%), Referenced to phase 2:NBTL and 6:SBT, Start of FDW or yellow

Natural Cycle: 65

Control Type: Actuated-Coordinated

Maximum v/c Ratio: 0.60

Intersection Signal Delay: 18.5

Intersection LOS: B

Intersection Capacity Utilization 55.1%

ICU Level of Service B

Analysis Period (min) 15

Splits and Phases: 162: Snelling Ave & St Anthony Ave

Lanes, Volumes, Timings  
166: Snelling Ave & University Ave

1700-1715

Intersection Summary

Area Type: Other

Cycle Length: 110

Actuated Cycle Length: 110

Offset: 62 (56%), Referenced to phase 2:NBTL and 6:SBTL, Start of 1st Green

Natural Cycle: 95

Control Type: Actuated-Coordinated

Maximum v/c Ratio: 0.70

Intersection Signal Delay: 28.5

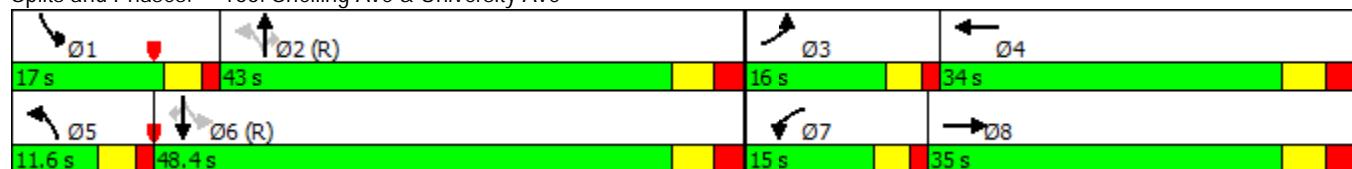

Intersection LOS: C

Intersection Capacity Utilization 82.5%

ICU Level of Service E

Analysis Period (min) 15

Splits and Phases: 166: Snelling Ave & University Ave

Lanes, Volumes, Timings  
260: Snelling Ave & Concordia Ave

## Intersection Summary

Area Type: Other

Cycle Length: 110

Actuated Cycle Length: 110

Offset: 8 (7%), Referenced to phase 2:NBT and 6:SBTL, Start of 1st Green

Natural Cycle: 75

Control Type: Actuated-Coordinated

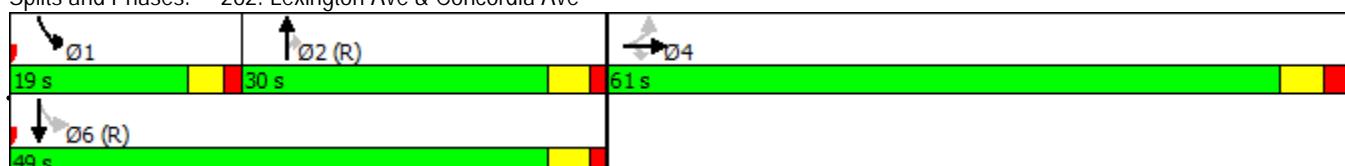

Maximum v/c Ratio: 1.26

Intersection Signal Delay: 41.5 Intersection LOS: D

Intersection Capacity Utilization 74.2% ICU Level of Service D

Analysis Period (min) 15

Splits and Phases: 262: Lexington Ave &amp; Concordia Ave

Lanes, Volumes, Timings  
404: Snelling Ave & Spruce Tree Rd

Saint Paul, MN 55102

RE: Regional Solicitation Application for Arterial Corridor Management (TH51/Snelling and Lexington Aves.)

Dear Mr. Klobucar:

Thank you for requesting a letter of support from MnDOT for the Metropolitan Council/Transportation Advisory Board (TAB) 2016 Regional Solicitation. Your application for the Arterial Corridor Management (TH51/Snelling and Lexington) project impacts MnDOT right of way on TH 51/Snelling Ave.

MnDOT, as the agency with jurisdiction over TH 51, would allow the signal operation improvements included in the application for the Arterial Corridor Management (TH51/Snelling and Lexington) project. Details of any future maintenance agreement with the City would be determined during project development to define how the improvements will be maintained for the project's useful life.

This project currently has no funding from MnDOT. In addition, the Metro District currently has no discretionary funding in year 2020 of the State Transportation Improvement Program (STIP) or year 2021 of the Capital Highway Investment Plan (CHIP) to assist with construction or assist with MnDOT services such as the design or construction engineering of the project. Please continue to work with MnDOT Area staff to assist in identifying additional project funding.

Sincerely,

A handwritten signature in blue ink that reads "Scott McBride".

Scott McBride, P.E.  
Metro District Engineer

**FEDERAL SURFACE TRANSPORTATION PROGRAM ARTERIAL CORRIDOR MANAGEMENT  
FUNDING APPLICATION FOR SNELLING AVENUE (TH 51) AND LEXINGTON PARKWAY  
(RAMSEY COUNTY STATE AID HIGHWAY 51)**

Dear Mr. Klobucar:

Ramsey County supports the City of Saint Paul's efforts to obtain funding for purchase and implementation of the Centrac Adaptive traffic control system and associated traffic signal improvements on Lexington Parkway. The proposed upgrades will greatly increase efficiency of the signal operations and greater safety for pedestrians.

We appreciate and support the City's efforts to improve the operations on these key arterials where we have City/County and City/State partnerships and look forward to working with you as the project moves forward.

Sincerely,

James E. Tolaas, P.E.  
Director of Public Works/County Engineer

File Number: RES 16-1053

Authorizing the Departments of Public Works and Parks and Recreation to submit 14 project applications for federal funding into the 2016 Metropolitan Council Regional Solicitation Program and to authorize the commitment of a 20% local funding match for any project(s) that get awarded federal funding.

WHEREAS, The Departments of Public Works and Parks and Recreation are proposing to submit 14 project applications for possible federal transportation funding in years 2020 and 2021 under the Metropolitan Council Regional Solicitation Process, and

WHEREAS, there is a required twenty percent local funding match to any project(s) awarded to an agency under the Regional Solicitation Program, and

WHEREAS, the projects to be submitted by the City under the Metropolitan Council Regional Solicitation are:

- Freight Connection from Pierce Butler to I-94 via Transfer, Ellis and Vandalia
- University Avenue Reconstruction - I35E to Lafayette Road
- Sidewalk Infill, Replacement and ADA Compliance - Area Bounded by Maryland-Case-Forest-Duluth
- Tedesco Street Reconstruction - University Avenue to Payne Avenue
- Como Avenue Trail Construction - Raymond Avenue to Hamline Avenue
- Troutbrook Road Connection - Kittson Street to Lafayette/University
- Eastbound Kellogg Boulevard Bridge near the RiverCentre Ramp
- Johnson Parkway Trail (Grand Round) - Burns Avenue to Phalen Boulevard
- Bruce Vento Bicycle and Pedestrian Bridge - connects Sam Morgan Trail with Bruce Vento Trail
- Pierce Butler East Extension - Grotto to Arundel
- Battle Creek to Sam Morgan Regional Trail Rehabilitation
- Arterial Corridor Management (Snelling and Lexington) - Implement Technology to Improve Traffic Flow & Safety (Fiber Optics, Detection, ADA Upgrades)
- Safe Routes to School (SRTS) - Washington Magnet School Area and Ran-Ham Schools (Cretin, Holy Spirit Elementary and Expo Elementary)
- Lafayette Bridge reconstruction from University to Otsego

WHEREAS, these projects all fall within appropriate funding categories and all meet the conditions and requirements specified for eligibility of federal funding, and so

THEREFORE BE IT RESOLVED, by the Council of the City of Saint Paul to authorize submission of the thirteen project applications for possible award of federal transportation funds through the Metropolitan Council Regional Solicitation Program, and

BE IT FURTHER RESOLVED, by the Council of the City of Saint Paul to authorize the commitment of local funds on a twenty percent match basis for any project(s) awarded federal funding under

the Regional Solicitation Program.

At a meeting of the City Council on 7/6/2016, this Resolution was Passed.
