Organization Information

Name: BROOKLYN PARK, CITY OF
Jurisdictional Agency (if different): City
Organization Type:
Organization Website: 5200 85TH AVE N
Address:

County: Hennepin
Phone:* 763-493-8185
Fax:
PeopleSoft Vendor Number 0000020926A1

Project Information

Project Name: Brooklyn Park - Rush Creek Regional Trail Grade Separation at CSAH 103/Winnetka Ave N
Primary County where the Project is Located: Hennepin
Cities or Townships where the Project is Located: Brooklyn Park
Jurisdictional Agency (If Different than the Applicant): Three Rivers Park District
This non-motorized, multimodal trail project includes construction of a grade-separated underpass along Three Rivers Park District’s Rush Creek Regional Trail at Hennepin County’s CSAH 103/Winnetka Ave N (urban minor arterial) in Brooklyn Park.

Currently, this at-grade trail crossing intersects CSAH 103/Winnetka Ave N (50 MPH, 7,000 AADT) and experiences a large volume of vehicles traveling at a high rate of speed - encountering pedestrians and bicycles bisecting at an unexpected mid-block crossing, resulting in a hazardous situation for both. This roadway serves as an alternative vehicular route to TH 169 which is undergoing rapid growth due to development in the immediate area (NorthPark Industrial Park, future METRO Transit’s Blue Line LRT Extension: Oak Grove Parkway station, and Target Northern Campus) and along the greater TH 169 corridor. This CSAH 103/Winnetka Ave N crossing will experience continued and exacerbated safety concerns until it is grade-separated.

Project elements include:

- Installing a 10’ high x 14’ wide box culvert with lights at CSAH 103/Winnetka Ave N and reconstruct existing regional trail (10’ wide, off road/protected, multiuse bituminous trail) approaches.

- Expanding the width of CSAH 103/Winnetka Ave N to a 52’ roadway in anticipation of future three or four lanes, including local trail connections north/south.

Project benefits include:

- Providing a safe, active transportation grade-separated crossing of CSAH 103/Winnetka Ave N for people of all ages, abilities, and active transportation modes and for those without access to a vehicle or whom choose to commute.

- Eliminating conflicts between people walking, biking, and rolling (existing 281,000 annual trips on the regional trail) with people driving vehicles (7,000 AADT) resulting in a 3.7 miles corridor completely separated from vehicular traffic.

- Improving conditions for community members with limited mobility, impaired vision, and other disabilities, families with strollers, and less experienced cyclists.

- Supporting recent and anticipated investment within and adjacent to the project corridor including a vital “last mile” multi-modal link to METRO Transit’s Blue Line Extension: Oak Grove Parkway LRT end of the line station and park-and-ride facility, Target Northern Campus expansion, NorthPark Business Park, residential housing, places of worship, regional parks and recreation and planned Signature Event Area. Further pedestrian and bicycle trail connections to/from this project area will be created to Gateway Business Park, Champlin Park High School, Jackson Middle School and Champlin Brooklyn Park Academy for Math and Environmental Sciences.
TRANSPORTATION IMPROVEMENT PROGRAM (TIP) DESCRIPTION - will be used in TIP if the project is selected for funding. See MnDOT’s TIP description guidance. Rush Creek Regional Trail grade separation at CSAH 103/Winnetka Ave N

Include both the CSAH/MSAS/TH references and their corresponding street names in the TIP Description (see Resources link on Regional Solicitation webpage for examples).

Project Length (Miles)
0.1

to the nearest one-tenth of a mile

---

**Project Funding**

Are you applying for competitive funds from another source(s) to implement this project? No

If yes, please identify the source(s)

Federal Amount $1,136,080.00

Match Amount $284,020.00

Minimum of 20% of project total

Project Total $1,420,100.00

For transit projects, the total cost for the application is total cost minus fare revenues.

Match Percentage 20.0%

Minimum of 20%

Compute the match percentage by dividing the match amount by the project total

Source of Match Funds City of Brooklyn Park

A minimum of 20% of the total project cost must come from non-federal sources; additional match funds over the 20% minimum can come from other federal sources

Preferred Program Year

Select one:

2028

Select 2026 or 2027 for TDM and Unique projects only. For all other applications, select 2028 or 2029.

Additional Program Years: 2025, 2026, 2027

Select all years that are feasible if funding in an earlier year becomes available.

---

**Project Information**

If your project has already been assigned a State Aid Project # (SAP or SP)

Please indicate here SAP/SP#.

Requirements - All Projects  
All Projects  
1. The project must be consistent with the goals and policies in these adopted regional plans: Thrive MSP 2040 (2014), the 2040 Transportation Policy Plan (2018), the 2040 Regional Parks Policy Plan (2018), and the 2040 Water Resources Policy Plan (2015).  
Check the box to indicate that the project meets this requirement.  
Yes  
2. The project must be consistent with the 2040 Transportation Policy Plan. Reference the 2040 Transportation Plan goals, objectives, and strategies that relate to the project.  
Briefly list the goals, objectives, strategies, and associated pages:  
-Goal B: Strategy B6; 2.7  
-Goal C: Strategies C1, C2, C15, C16 and C17; p2. 10-2. 12, 2.22-2.24  
-Goal D: Objectives A and B; p2. 26; Strategy D3: p2.27  
-Goal E: Objectives C and D; p2.30; Strategy E3 and E6; p2.31-2.32, 2.34  
-Goal F: Objective C; p2.35  
3. The project or the transportation problem/need that the project addresses must be in a local planning or programming document. Reference the name of the appropriate comprehensive plan, regional/statewide plan, capital improvement program, corridor study document [studies on trunk highway must be approved by the Minnesota Department of Transportation and the Metropolitan Council], or other official plan or program of the applicant agency [includes Safe Routes to School Plans] that the project is included in and/or a transportation problem/need that the project addresses.  
List the applicable documents and pages: Unique projects are exempt from this qualifying requirement because of their innovative nature.  
-Brooklyn Park Ten-Year Parks and Recreation System Plan (pages XV and 50)  
-Brooklyn Park 2040 Comprehensive Plan (7-16)  
-Three Rivers Park District 2040 System Plan p. 17  
-Rush Creek Regional Trail Master Plan (entire document)  
-Hennepin County 2040 Bicycle Transportation Plan p. 37  
-THRIVE MSP 2040 Regional Parks Policy Plan p. 14, 15, and 108  
4. The project must exclude costs for studies, preliminary engineering, design, or construction engineering. Right-of-way costs are only eligible as part of transit stations/stops, transit terminals, park-and-ride facilities, or pool-and-ride lots. Noise barriers, drainage projects, fences, landscaping, etc., are not eligible for funding as a standalone project, but can be included as part of the larger submitted project, which is otherwise eligible. Unique project costs are limited to those that are federally eligible.
Check the box to indicate that the project meets this requirement. Yes

5. Applicant is a public agency (e.g., county, city, tribal government, transit provider, etc.) or non-profit organization (TDM and Unique Projects applicants only). Applicants that are not State Aid cities or counties in the seven-county metro area with populations over 5,000 must contact the MnDOT Metro State Aid Office prior to submitting their application to determine if a public agency sponsor is required.

Check the box to indicate that the project meets this requirement. Yes

6. Applicants must not submit an application for the same project in more than one funding sub-category.

Check the box to indicate that the project meets this requirement. Yes

7. The requested funding amount must be more than or equal to the minimum award and less than or equal to the maximum award. The cost of preparing a project for funding authorization can be substantial. For that reason, minimum federal amounts apply. Other federal funds may be combined with the requested funds for projects exceeding the maximum award, but the source(s) must be identified in the application. Funding amounts by application category are listed below in Table 1. For unique projects, the minimum award is $500,000 and the maximum award is the total amount available each funding cycle (approximately $6,000,000 for the 2024 funding cycle).

Multiuse Trails and Bicycle Facilities: $250,000 to $5,500,000
Pedestrian Facilities (Sidewalks, Streetscaping, and ADA): $250,000 to $2,000,000
Safe Routes to School: $250,000 to $1,000,000

Check the box to indicate that the project meets this requirement. Yes

8. The project must comply with the Americans with Disabilities Act (ADA).

Check the box to indicate that the project meets this requirement. Yes

9. In order for a selected project to be included in the Transportation Improvement Program (TIP) and approved by USDOT, the public agency sponsor must either have a current Americans with Disabilities Act (ADA) self-evaluation or transition plan that covers the public right of way/transportation, as required under Title II of the ADA. The plan must be completed by the local agency before the Regional Solicitation application deadline. For future Regional Solicitation funding cycles, this requirement may include that the plan has undergone a recent update, e.g., within five years prior to application.

The applicant is a public agency that employs 50 or more people and has a completed ADA Transition Plan that covers the public right of way/transportation.

Date plan completed: 11/27/2018

The applicant is a public agency that employs fewer than 50 people and has a completed ADA self-evaluation that covers the public right of way/transportation.

Date self-evaluation completed: 11/27/2018
Link to plan: ADA-Transition-Plan.pdf

10. The project must be accessible and open to the general public.

Check the box to indicate that the project meets this requirement. Yes

11. The owner/operator of the facility must operate and maintain the project year-round for the useful life of the improvement. This includes assurance of year-round use of bicycle, pedestrian, and transit facilities. per FHWA direction established 8/27/2008 and updated 4/15/2019. Unique projects are exempt from this qualifying requirement.

Check the box to indicate that the project meets this requirement. Yes

12. The project must represent a permanent improvement with independent utility. The term ?independent utility? means the project provides benefits described in the application by itself and does not depend on any construction elements of the project being funded from other sources outside the regional solicitation, excluding the required non-federal match.

Projects that include traffic management or transit operating funds as part of a construction project are exempt from this policy.

Check the box to indicate that the project meets this requirement. Yes

13. The project must not be a temporary construction project. A temporary construction project is defined as work that must be replaced within five years and is ineligible for funding. The project must also not be staged construction where the project will be replaced as part of future stages. Staged construction is eligible for funding as long as future stages build on, rather than replace, previous work.

Check the box to indicate that the project meets this requirement. Yes

14. The project applicant must send written notification regarding the proposed project to all affected state and local units of government prior to submitting the application.

Check the box to indicate that the project meets this requirement. Yes

Requirements - Bicycle and Pedestrian Facilities Projects

1. All projects must relate to surface transportation. As an example, for multiuse trail and bicycle facilities, surface transportation is defined as primarily serving a commuting purpose and/or that connect two destination points. A facility may serve both a transportation purpose and a recreational purpose; a facility that connects people to recreational destinations may be considered to have a transportation purpose.

Check the box to indicate that the project meets this requirement. Yes

Multiuse Trails on Active Railroad Right-of-Way:

2. All multiuse trail projects that are located within right-of-way occupied by an active railroad must attach an agreement with the railroad that this right-of-way will be used for trail purposes.

Check the box to indicate that the project meets this requirement. Yes

Multiuse Trails and Bicycle Facilities projects only:
3. All applications must include a letter from the operator of the facility confirming that they will remove snow and ice for year-round bicycle and pedestrian use. The Minnesota Pollution Control Agency has a resource for best practices when using salt. Upload PDF of Agreement in Other Attachments.

Check the box to indicate that the project meets this requirement. Yes

Upload PDF of Agreement in Other Attachments.

Safe Routes to School projects only:

4. All projects must be located within a two-mile radius of the associated primary, middle, or high school site.

Check the box to indicate that the project meets this requirement.

5. All schools benefitting from the SRTS program must conduct after-implementation surveys. These include the student travel tally form and the parent survey available on the National Center for SRTS website. The school(s) must submit the after-evaluation data to the National Center for SRTS within a year of the project completion date. Additional guidance regarding evaluation can be found at the MnDOT SRTS website.

Check the box to indicate that the applicant understands this requirement and will submit data to the National Center for SRTS within one year of project completion.

Requirements - Bicycle and Pedestrian Facilities Projects

### Specific Roadway Elements

PROTECT Funds Eligibility

One of the new federal funding sources is Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT). Please describe which specific elements of your project and associated costs out of the Total TAB-Eligible Costs are eligible to receive PROTECT funds. Examples of potential eligible items may include: storm sewer, ponding, erosion control/landscaping, retaining walls, new bridges over floodplains, and road realignments out of floodplains.

Response: Does not appear to be applicable to this project.

Please upload attachment in PDF form

Measure A: Engagement
i. Describe any Black, Indigenous, and People of Color populations, low-income populations, disabled populations, youth, or older adults within a ½ mile of the proposed project. Describe how these populations relate to regional context. Location of affordable housing will be addressed in Measure C.

ii. Describe how Black, Indigenous, and People of Color populations, low-income populations, persons with disabilities, youth, older adults, and residents in affordable housing were engaged, whether through community planning efforts, project needs identification, or during the project development process.

iii. Describe the progression of engagement activities in this project. A full response should answer these questions:

1. What engagement methods and tools were used?
2. How did you engage specific communities and populations likely to be directly impacted by the project?
3. What techniques did you use to reach populations traditionally not involved in community engagement related to transportation projects?
4. How were the project’s purpose and need identified?
5. How was the community engaged as the project was developed and designed?
6. How did you provide multiple opportunities for of Black, Indigenous, and People of Color populations, low-income populations, persons with disabilities, youth, older adults, and residents in affordable housing to engage at different points of project development?
7. How did engagement influence the project plans or recommendations? How did you share back findings with community and re-engage to assess responsiveness of these changes?
8. If applicable, how will NEPA or Title VI regulations guide engagement activities?

Response:
The proposed project is located in a census tract where 48.5 percent of the population identifies as BIPOC. The median Brooklyn Park household income is $73,207, with 9.2 percent under the poverty line, 10.8 percent age 65+, and 6.1 percent persons with a disability under age 65 (2016-2020).

Extensive community engagement efforts for this grade-separated crossing have been conducted as part of multiple planning processes by the City of Brooklyn Park, Hennepin County and Three Rivers, specifically seeking targeted feedback from disadvantaged community members.

The Brooklyn Park Pedestrian & Bicycle Plan (2015) included 5 pop-up events, community workshops, an online survey taken by 142 users and a mapping application that generated 175 comments. Designed to engage vulnerable populations, the feedback resulted in identification of a bicycle/pedestrian barrier on the Rush Creek Regional Trail at CSAH 103/Winnetka Ave N, as well as significant interest in improving bicycle/pedestrian connections to METRO Transit Blue Line LRT stations.

As part of the City’s 2040 Comprehensive Plan, public engagement included a 26-member Community Advisory Team, a 40-member Community Outreach Team and Youth Facilitators. These groups helped facilitate meetings, solicit input and ensure feedback was respective of the broader community - especially BIPOC community members, low-income residents, seniors, and youth. The community engagement process generated a total of 3,701 survey responses, of which 43 percent were completed by people of color. The Plan proactively engaged the community at public events and gatherings, enabling a broader cross-section of the residents and more representative sampling. Community engagement events included over 20 pop-up meetings, as well as meetings with the African Career, Education and Resources, Inc, Rec on the Go events and community at-large meetings. Engagement identified a grade-separated crossing for the Rush Creek Regional Trail at CSAH 103/Winnetka Ave N as a priority for completion within the next 10 years.

Additionally, Three Rivers was a partner in the 2040 Hennepin County Bicycle Transportation Plan. Engagement activities included 10 community listening sessions, 3 community events, small group discussions (160 engaged people) and an online survey (1,944 survey responses). Engagement was heavily focused on receiving feedback from disadvantaged community groups including those with health disparities. Themes drawn from these engagement efforts include:

- Preference for separation between motor-vehicle traffic and bicycle traffic;
- Desire for connections between neighborhoods, regional trails and local destinations;
- Trail crossing safety concerns; and
- Desire for improved coordination between jurisdictions

Measure B: Disadvantaged Communities Benefits and Impacts
Describe the project’s benefits to Black, Indigenous, and People of Color populations, low-income populations, children, people with disabilities, youth, and older adults. Benefits could relate to:

- pedestrian and bicycle safety improvements;
- public health benefits;
- direct access improvements for residents or improved access to destinations such as jobs, school, health care, or other;
- travel time improvements;
- gap closures;
- new transportation services or modal options;
- leveraging of other beneficial projects and investments;
- and/or community connection and cohesion improvements.

This is not an exhaustive list. A full response will support the benefits claimed, identify benefits specific to Disadvantaged communities residing or engaged in activities near the project area, identify benefits addressing a transportation issue affecting Disadvantaged communities specifically identified through engagement, and substantiate benefits with data.

Acknowledge and describe any negative project impacts to Black, Indigenous, and People of Color populations, low-income populations, children, people with disabilities, youth, and older adults. Describe measures to mitigate these impacts. Unidentified or unmitigated negative impacts may result in a reduction in points.

Below is a list of potential negative impacts. This is not an exhaustive list.

- Decreased pedestrian access through sidewalk removal / narrowing, placement of barriers along the walking path, increase in auto-oriented curb cuts, etc.
- Increased speed and/or cut-through traffic.
- Removed or diminished safe bicycle access.
- Inclusion of some other barrier to access to jobs and other destinations.

Response:
The proposed grade-separated crossing provides benefits to the City's most vulnerable and disenfranchised residents that may not own a vehicle and rely on transit including bicycling and walking as their primary mode of transportation.

Safety: Currently, this at-grade trail crossing intersects a two lane, undivided roadway (50 MPH, 7,000 AADT). The nearest controlled intersection is 0.8 miles to the north, forcing trail users - especially children, elderly and disabled - to make the difficult decision to determine if a large enough gap exists between themselves and oncoming vehicles to cross safely. The proposed project will enhance safety by separating trail users from vehicular traffic and eliminating risk.

Access: Since the underpass is in a census tract that is above the regional average for population in poverty or population of color, underserved populations will benefit from improved access to increasing employment opportunities in the project area. This includes more direct access to the Target Northern Campus Expansion and growing employment areas such as Gateway Business Park (300 jobs +), and NorthPark Business Park (300 acres currently under construction). The project area is forecast to have an additional 10,000 jobs by 2040.

Transit/Multimodal: The project facilitates and leverages regional transit connections by connecting to CSAH 103/Winnetka Ave N trail improvements planned as part of the future METRO Transit Blue Line LRT project. This enables safe and continuous connections between the Rush Creek Regional Trail and Oak Grove Parkway LRT station, park-and-ride facility, and two existing METRO Transit bus routes 722 & 724. These benefits are especially important for equity populations near the project area, including persons of color (over 60 percent), persons born outside the U.S. (20 percent) and persons who speak a language other than English (25 percent). Each of these groups disproportionately rely on public transit and benefit from improved bicycle and pedestrian access to transit stations.

Public Health: Trail corridors provide an important active transportation option while promoting exercise, family or social recreation and improved air quality. Studies show that biking 3x/week reduces odds of metabolic syndrome (46%), obesity (31%) and hypertension (28%).

Destinations: This grade separated crossing allows residents to utilize entire trail corridor and its connections (Mississippi Gateway Regional Park, Elm Creek Park Reserve, Shingle Creek and West Mississippi Regional Trails and many local parks e.g., Oak Grove, Orchard Trail and North Trail Parks). This project will not displace or negatively impact the disadvantaged populations present in the project area.

Measure C: Affordable Housing Access

Describe any affordable housing developments?existing, under construction, or planned?within ½ mile of the proposed project. The applicant should note the number of existing subsidized units, which will be provided on the Socio-Economic Conditions map. Applicants can also describe other types of affordable housing (e.g., naturally-occurring affordable housing, manufactured housing) and under construction or planned affordable housing that is within a half mile of the project. If applicable, the applicant can provide self-generated PDF maps to support these additions. Applicants are encouraged to provide a self-generated PDF map describing how a project connects affordable housing residents to destinations (e.g., childcare, grocery stores, schools, places of worship).

Describe the project?s benefits to current and future affordable housing residents within ½ mile of the project. Benefits must relate to affordable housing residents. Examples may include:

- specific direct access improvements for residents
- improved access to destinations such as jobs, school, health care or other;
- new transportation services or modal options;
- and/or community connection and cohesion improvements.

This is not an exhaustive list. Since residents of affordable housing are more likely not to own a private vehicle, higher points will be provided to roadway projects that include other multimodal access improvements. A full response will support the benefits claimed, identify benefits specific to residents of affordable housing, identify benefits addressing a transportation issue affecting residents of affordable housing specifically identified through engagement, and substantiate benefits with data.
According to the MTC's 2021 Housing Performance Scores, Brooklyn Park has a score of 100, the highest score available. This score recognizes their overall local effort in developing and maintaining housing affordable to low and moderate-income households. A grade-separated crossing at CSAH 103/Winnetka Ave N will significantly improve the multimodal safety, access, and mobility of the Rush Creek Regional Trail for the surrounding residential properties that include a high percentage of BIPOC populations (48.5 percent) that may not own a vehicle, and rely on transit, bicycling and walking as their primary mode of transportation.

The project, part of a larger Rush Creek Regional Trail corridor, is a spot improvement in a developing area of Brooklyn Park. There are residential homes directly northeast of the proposed project, senior housing (610 West apartments) located approximately 1 mile east and residential in surrounding Maple Grove and Osseo. There are several destinations located near or along the 10-mile Rush Creek Regional Trail including churches, daycares, schools, and shopping areas. The Rush Creek Regional Trail also provides an important connection to several parks and recreational facilities.

Additionally, METRO Transit is planning to construct an extension of the Blue Line LRT that terminates at the Oak Grove Parkway station 1-mile south of the proposed project. The future LRT project will complete CSAH 103/Winnetka Ave N connections to 109th Avenue and LRT to the south. There are several areas of concentrated poverty located along the Blue Line LRT transit route, connecting the region’s most diverse communities to transit reliant residents to jobs, education, and opportunities. By directly connecting to METRO Transit’s Blue Line LRT, this project builds upon the anti-displacement and community wealth building strategies being advanced to leverage existing community assets.

Measure D: BONUS POINTS

Project is located in an Area of Concentrated Poverty:
Project’s census tracts are above the regional average for population in poverty or population of color (Regional Environmental Justice Area): Yes
Project located in a census tract that is below the regional average for population in poverty or populations of color (Regional Environmental Justice Area):
Upload the “Socio-Economic Conditions” map used for this measure.

Measure A: Bikeway Network Gaps, Physical Barriers, and Continuity of Bicycle Facilities

PART 1: Qualitative assessment of project narrative discussing how the project will close a bicycle network gap, create a new or improved physical bike barrier crossing, and/or improve continuity and connections between jurisdictions.

Specifically, describe how the project would accomplish the following: Close a transportation network gap, provide a facility that crosses or circumvents a physical barrier, and/or improve continuity or connections between jurisdictions.

Bike system gap improvements include the following:

- Providing a missing link between existing or improved segments of a local transportation network or regional bicycle facility (i.e., regional trail or RBTN alignment);
- Improving bikeability to better serve all ability and experience levels by:
  - Providing a safer, more protected on-street facility or off-road trail;
  - Improving safety of bicycle crossings at busy intersections (e.g., through signal operations, revised signage, pavement markings, etc.); OR
  - Providing a trail adjacent or parallel to a highway or arterial roadway or improving a bike route along a nearby and parallel lower-volume neighborhood collector or local street.

Physical bicycle barrier crossing improvements include grade-separated crossings (over or under) of rivers and streams, railroad corridors, freeways and expressways, and multi-lane arterials, or enhanced routes to circumvent the barrier by channeling bicyclists to existing safe crossings or grade separations. Surface crossing improvements (at-grade) of major highway and rail barriers that upgrade the bicycle facility treatment or replace an existing facility at the end of its useful life may also be considered as bicycle barrier improvements. (For new barrier crossing projects, distances to the nearest parallel crossing must be included in the application to be considered for the full allotment of points under Part 1).

Examples of continuity/connectivity improvements may include constructing a bikeway across jurisdictional lines where none exists or upgrading an existing bicycle facility treatment so that it connects to and is consistent with an adjacent jurisdiction’s bicycle facility.
This project includes construction of a grade-separated underpass along Three Rivers Park District's Rush Creek Regional Trail at CSAH 103/Winnetka Ave N in Brooklyn Park. The proposed project is within a Tier 2 RBTN Alignment, a priority alignment for regional investment given its ability to attract the most users, connect to growing concentrations of employment and circumvent a physical barrier (CSAH 103/Winnetka Ave N) in the regional bikeway system. Mitigating physical barriers such as the CSAH 103/Winnetka Ave N regional trail crossing with a safe, multi-modal bicycle and pedestrian underpass will increase the flow of seamless and accessible travel throughout the trail's corridor (accessed by 281,000 users annually).

Barriers/Safety: The proposed project will eliminate the existing mid-block, bicycle and pedestrian at-grade crossing of CSAH 103/Winnetka Ave N, a high-speed arterial roadway carrying 7,000 vehicles per day at 50 MPH. CSAH 103/Winnetka Ave N serves as an alternative vehicular route to TH 169 and is experiencing rapid growth due to development in the immediate area (NorthPark Industrial Park, future METRO Transit's Blue Line Extension: Oak Grove Parkway LRT station, and Target Northern Campus) and along the greater TH 169 corridor. As a result, traffic volumes on CSAH 103/Winnetka Ave N are expected to increase and the known safety issues will continue to exacerbate. These safety issues at the trail crossing have caused Three Rivers Park District to install specific signs on the trail approaches to CSAH 103/Winnetka Ave N which read, "This crossing is not a crosswalk. State law requires all trail users to stop and yield to vehicles," yet vehicles still regularly yield, resulting in multiple crashes and near-misses near the trail crossing. Similar accidents across the Twin Cities region have occurred when stopped vehicles are rear-ended or improperly passed by other cars. These crashes jeopardize the safety of both trail users and people in vehicles, but especially those who are most vulnerable: people walking, biking, or rolling.

Continuity/Connectivity Between Jurisdictions: The 10-mile Rush Creek Regional Trail connects Mississippi Gateway Regional Park in Brooklyn Park to the Elm Creek Park Reserve in Champlin, Dayton and Maple Grove. The proposed project creates a continuous 3.7 mile grade-separated greenway between the two regional parks and will create a more continuous connection to numerous north-south trails in multiple cities: Jefferson Highway (3.0 m), Noble Parkway (2.8 m), Douglas Drive North (4.0 m), Shingle Creek Regional Trail (8.4 m) connecting to Brooklyn Center, West River Road (4.0 m) connecting to Brooklyn Center, and Medicine Lake Regional Trail (15.6 m) connecting to Maple Grove and Plymouth.

PART 2: Regional Bicycle Barrier Crossing Improvements and Major River Bicycle Barrier Crossings

DEFINITIONS:

Regional Bicycle Barrier Crossing Improvements include crossings of barrier segments within the "Regional Bicycle Barrier Crossing Improvement Areas" as updated in the 2019 Technical Addendum to the Regional Bicycle Barriers Study and shown in the RBBS online map (insert link to forthcoming RBBS Online Map). Projects must create a new regional barrier crossing, replace an existing regional barrier crossing at the end of its useful life, or upgrade an existing barrier crossing to a higher level of bike facility treatment, to receive points for Part 2.

Major River Bicycle Barrier Crossings include all existing and planned highway and bicycle/pedestrian bridge crossings of the Mississippi, Minnesota and St. Croix Rivers as identified in the 2018 update of the 2040 Transportation Policy Plan. Projects must create a new major river bicycle barrier crossing, replace an existing major river crossing at the end of its useful life, or upgrade the crossing to a higher level of bike facility treatment, to receive points for Part 2.

Projects that construct new or improve existing Regional Bicycle Barrier Crossings or Major River Bicycle Barrier Crossings will be assigned points as follows: (select one)

Tier 1
Tier 2 Regional Bicycle Barrier Crossing Improvement Area segments & any Major River Bicycle Barrier Crossings

Tier 3
Tier 3 Regional Bicycle Barrier Crossing Improvement Area segments

Non-tiered
Crossings of non-tiered Regional Bicycle Barrier segments

No improvements
No Improvements to barrier crossings

Yes
Measure B: Deficiencies corrected or safety problems addressed

Response:

The existing trail crossing of CSAH 103/Winnetka Ave N creates a significant safety concern for both trail users and vehicles. Currently, trail users cross CSAH 103/Winnetka Ave N mid-block and at-grade. The two-lane undivided roadway has a 50 MPH speed limit with 7,000 AADT and causes trail users to make the difficult decision to determine if a large enough gap exists between themselves and oncoming vehicles to cross safely. These crossing types are challenging due to bicyclists not obeying traffic signs requiring them to stop at roadway crossings and confusion between the motorists and bicyclists on who has the right-of-way as some believe this crossing to be a crosswalk, creating hazards to all users.

Within the project area, there have been two vehicle-pedestrian/bicycle crashes reported in the last three years. In 2021, there was a vehicle crash reported at the existing at-grade crossing of the Rush Creek Regional Trail. A vehicle was stopped on CSAH 103/Winnetka Ave N to allow a bicyclist to cross the roadway. A second vehicle swerved and hit a trail crossing sign to avoid rear ending the first vehicle. In 2019, there was a minor injury vehicle-pedestrian crash reported just west of the proposed project. A vehicle turned onto the Rush Creek Regional Trail from the existing at-grade crossing at CSAH 103/Winnetka Ave N and was driving on the trail when it struck a pedestrian. In addition to the reported crashes, the City of Brooklyn Park, Three Rivers and Hennepin County regularly receive complaints and calls every year regarding close calls at the Rush Creek Regional Trail crossing of CSAH 103/Winnetka Ave N, with reports of motorists unable to see trail users, trail users not stopping before entering the crossing and vehicles abruptly stopping to allow trail users to cross - causing close calls for rear-end crashes.

A grade-separated crossing, as included with the proposed project, would have prevented these crashes and close calls from occurring by eliminating vehicle-pedestrian/bicycle conflicts and ensuring the safety of the bicyclists, pedestrians and drivers. Trail connections along CSAH 103/Winnetka Ave N fill a critical gap, allowing access to nearby destinations such as LRT and Target Campus etc.

The underpass is the safest solution and will result in the least disruption to motorists and people walking, biking and rolling. Underpasses have proven to be effective in facilitating pedestrian/bicycle movements along the Rush Creek Regional Trail, such as the existing underpasses at Douglas Drive (CSAH 14) and Noble Parkway (CSAH 12). Plus, underpasses are less stressful for bikers. Additional underpass safety features include lighting, straight approaches with clear sightlines and designated ADA compliant local trail connections.

Measure A: Multimodal Elements
The Rush Creek Regional Trail (RCRT) crosses CSAH 103/Winnetka Ave N at-grade and mid-block. Grade-separating this crossing and adding new local trail connections greatly improves the safety and connectivity of bicyclists, pedestrians, transit users and motorists by purposefully integrating several modes of transportation to create 3.7 continuous trail miles without any road crossings. This is critically important as the project area is not directly served by transit and safe connections to existing transit stops for people walking, biking or rolling do not yet exist.

The project includes 10' trails on both sides of CSAH 103/Winnetka Ave N which tie into planned trails to the north/109th Avenue and to the south/future METRO Transit Blue Line LRT Extension: Oak Grove Parkway Station (LRT station). These new trails will provide direct, safe, multimodal connections to two existing METRO Transit bus routes 722 and 724 and the future LRT station. Additionally, all neighborhoods along the 10-mile RCRT will have improved access to transit via the regional trail and new grade-separated crossing.

This multimodal connectivity will benefit area residents by providing transit access/options which connect to downtown Minneapolis, Brooklyn Center, Eden Prairie, Maple Grove, Chaska, and Chanhassen. Additionally, the LRT station will include a public park-in-ride which will likely also serve as a defacto trailhead in the evening and on weekends during peak trail times (opposite peak transit times) due to RCRT proximity and new trail/sidewalk connections.

The project also anticipates future roadway expansion needs due to the LRT, related TOD and existing area growth, and calls for expanding CSAH 103/Winnetka Ave N to a 52' roadway. Anticipating and including this expansion as part of the project will minimize any future potential impacts and trail closures at which time the greater road corridor is expanded to 3-4 lanes.

The primary project component, the grade-separated crossing, serves and improves the safety and efficiency of active transportation for all trail user groups by eliminating vehicle-pedestrian/bicyclist conflicts and removing a stop condition. Trail users will no longer need to wait and gauge when a large enough gap in high-speed/volume traffic (50 MPH, 7,000 AADT) is available to cross; this is especially important to some of the trails most vulnerable users, older adults and persons with disabilities that are also more likely to be transit users. In addition, vehicle vs. vehicle conflicts (typically rear-end crashes) will be eliminated/reduced as motorists will no longer be stopping in an unpredictable manner and against proper right-of-way rules to allow for trail users to cross CSAH 103/Winnetka Ave.
If the applicant is completing a transit application that is operations only, check the box and do not complete the remainder of the form. These projects will receive full points for the Risk Assessment.

Park-and-Ride and other transit construction projects require completion of the Risk Assessment below.

Check Here if Your Transit Project Does Not Require Construction

---

**Measure A: Risk Assessment - Construction Projects**

1. **Public Involvement (20 Percent of Points)**

Projects that have been through a public process with residents and other interested public entities are more likely than others to be successful. The project applicant must indicate that events and/or targeted outreach (e.g., surveys and other web-based input) were held to help identify the transportation problem, how the potential solution was selected instead of other options, and the public involvement completed to date on the project. The focus of this section is on the opportunity for public input as opposed to the quality of input. NOTE: A written response is required and failure to respond will result in zero points.

Multiple types of targeted outreach efforts (such as meetings or online/mail outreach) specific to this project with the general public and partner agencies have been used to help identify the project need. 

Yes

100%

At least one meeting specific to this project with the general public has been used to help identify the project need.

50%

At least online/mail outreach effort specific to this project with the general public has been used to help identify the project need.

50%

No meeting or outreach specific to this project was conducted, but the project was identified through meetings and/or outreach related to a larger planning effort.

25%

No outreach has led to the selection of this project.

0%

Describe the type(s) of outreach selected for this project (i.e., online or in-person meetings, surveys, demonstration projects), the method(s) used to announce outreach opportunities, and how many people participated. Include any public website links to outreach opportunities.

Response:
In 2015, the Brooklyn Park Pedestrian and Bicycle Plan identified the Rush Creek Regional Trail pedestrian and bicycle barrier at the CSAH 103/Winnetka Ave N crossing through:

- 5 pop-up events and community workshops
- Online survey (142 responses)
- Online mapping application (175 responses)

In 2017/2018 the City of Brooklyn Park completed an update to its 2040 Comprehensive Plan which identified the Rush Creek Regional Trail grade separation at CSAH 103/Winnetka Ave N as a priority to be completed by 2028. Public engagement included:

- 26 member Community Advisory Team (CAT)
- 40 member Community Outreach Team (COT)
- Youth Facilitators
- Online and in-person surveys (3,701 responses)
- Public events and gatherings
- 20 pop-up events
- Individual meetings with community groups

Additionally, Three Rivers was a partner in the 2040 Hennepin County Bicycle Transportation Plan. Engagement activities included:

- 10 community listening sessions
- 3 community events and small group discussions (160 engaged people)
- Online survey (1,944 survey responses)
2. Layout (25 Percent of Points)

Layout includes proposed geometrics and existing and proposed right-of-way boundaries. A basic layout should include a base map (north arrow; scale; legend;* city and/or county limits; existing ROW, labeled; existing signals;* and bridge numbers*) and design data (proposed alignments; bike and/or roadway lane widths; shoulder width;* proposed signals;* and proposed ROW). An aerial photograph with a line showing the project?s termini does not suffice and will be awarded zero points. *If applicable

Layout approved by the applicant and all impacted jurisdictions (i.e., cities/counties/MnDOT. If a MnDOT trunk highway is impacted, approval by MnDOT must have occurred to receive full points. A PDF of the layout must be attached along with letters from each jurisdiction to receive points.

Yes

A layout does not apply (signal replacement/signal timing, stand-alone streetscaping, minor intersection improvements). Applicants that are not certain whether a layout is required should contact Colleen Brown at MnDOT Metro State Aid ? colleen.brown@state.mn.us.

100%

For projects where MnDOT trunk highways are impacted and a MnDOT Staff Approved layout is required. Layout approved by the applicant and all impacted local jurisdictions (i.e., cities/counties), and layout review and approval by MnDOT is pending. A PDF of the layout must be attached along with letters from each jurisdiction to receive points.

75%

Layout completed but not approved by all jurisdictions. A PDF of the layout must be attached to receive points.

Yes

Layout has been started but is not complete. A PDF of the layout must be attached to receive points.

50%

Layout has not been started

25%

Attach Layout

Please upload attachment in PDF form

Additional Attachments

Please upload attachment in PDF form

3. Review of Section 106 Historic Resources (15 Percent of Points)

No known historic properties eligible for or listed in the National Register of Historic Places are located in the project area, and project is not located on an identified historic bridge

Yes

There are historical/archeological properties present but determination of ?no historic properties affected? is anticipated.

100%

Historic/archeological property impacted; determination of ?no adverse effect? anticipated

80%

Historic/archeological property impacted; determination of ?adverse effect? anticipated

40%

Unsure if there are any historic/archaeological properties in the project area.

0%

Project is located on an identified historic bridge

4. Right-of-Way (25 Percent of Points)

Right-of-way, permanent or temporary easements, and MnDOT agreement/limited-use permit either not required or all have been acquired

100%

Right-of-way, permanent or temporary easements, and/or MnDOT agreement/limited-use permit required - plat, legal descriptions, or official map complete

50%

Right-of-way, permanent or temporary easements, and/or MnDOT agreement/limited-use permit required - parcels identified

Yes

25%

Right-of-way, permanent or temporary easements, and/or MnDOT agreement/limited-use permit required - parcels not all identified

0%

5. Railroad Involvement (15 Percent of Points)

No railroad involvement on project or railroad Right-of-Way agreement is executed (include signature page, if applicable)

Yes

100%

Signature Page
Railroad Right-of-Way Agreement required; negotiations have begun
50%

Re: Support for 2024 Regional Solicitation Application
Rush Creek Regional Trail Grade Separation Project

Dear Ms. Koutsoukos,

Hennepin County has been notified that the City of Brooklyn Park is submitting a funding application as part of the 2024 Regional Solicitation through the Metropolitan Council. The proposed project: Rush Creek Regional Trail Grade Separation Project is anticipated to improve conditions for people walking and biking across CSAH 103 (Winnetka Avenue).

The Rush Creek Regional Trail Grade Separation Project is anticipated to impact CSAH 103 (Winnetka Avenue), currently under Hennepin County jurisdiction. At the time of application submittal, county staff would like to notify the city of the following planned improvements in the vicinity of the proposed project, understanding that these improvements, and others not yet programmed, are subject to change.

- Reconstruction along CSAH 103 (West Broadway Avenue) from TH 610 to 101st Avenue, tentatively scheduled for 2028 as part of the Blue Line Extension LRT Project (CP 1005877 & CP 1010467)
- Pavement preservation along CSAH 103 (Winnetka Avenue) from 101st Avenue to CSAH 12 (West River Road), tentatively scheduled for 2024 (CP #4630000)

Hennepin County supports this funding application and agrees to operate and maintain the impacted county roadway facilities for the useful life of improvements. Based on the results of the county’s 2023 Cost Participation & Partnerships Request Process, it’s anticipated that $500,000 will be reserved within the county’s 2024-2028 Transportation Capital Improvement Program (CIP) for the Rush Creek Regional Trail Grade Separation Project. If the city is successful in receiving an award through the 2024 Regional Solicitation, we ask that you notify the County Engineer in a timely manner to discuss the utilization of federal funds on the project. Additionally, we kindly request that the city includes county staff in the project development process to ensure project success. We look forward to working together to improve the accessibility, safety, and mobility of people walking and biking along the Rush Creek Regional Trail.

Sincerely,

Carla Stueve, P.E.
Transportation Project Delivery Director and County Engineer

RE: 2023 Regional Solicitation: Confirmation of Snow and Ice Removal
Rush Creek Regional Trail – Winnetka Ave. N Grade Separated Crossing

Dear Ms. Koutsoukos,

Three Rivers Park District is excited to partner with the City of Brooklyn Park on the Rush Creek Regional Trail – Winnetka Ave. N Grade Separated Crossing project.

The Park District recognizes that this trail segment will fail to fully serve its intended purpose if not operational throughout the entire year.

This letter is to confirm that, in addition to traditional maintenance of our regional trail system through the warmer months, Three Rivers Park District, in partnership with the City of Brooklyn Park, intends to provide winter maintenance to ensure that the trail remains accessible for all bicyclists and pedestrians, including persons with disabilities on a year-round basis.

Three Rivers intends to continue its current winter maintenance arrangement with Brooklyn Park. Under this arrangement the City provides all winter maintenance responsibilities and Three Rivers provides an annual stipend to the City for the associated work.

Sincerely,

Boe R. Carlson
Superintendent and Secretary to the Board
Three Rivers Park District

Transit Market areas: 3
Rush Creek Regional Trail
Winnetka Ave. N Grade Separated Crossing

Project Description
This off-road, multi-use trail, non-motorized active transportation project includes construction of a grade-separated underpass along Three Rivers Park District’s Rush Creek Regional Trail at Winnetka Ave. N (CSAH 103) in Brooklyn Park. Currently, this at-grade trail crossing crosses a two lane, undivided roadway with a posted speed limit of 50 mph which carries 7,000 vehicles per day and has difficult sightlines at the crossing location. This road, Winnetka Avenue (CSAH 103), serves as an alternative vehicular route to TH 169 and is experiencing growth due to development in the immediate area (NorthPark Industrial Park, future METRO Transit’s Blue Line Extension: Oak Grove Parkway LRT Station, and Target Northern Campus) and along the greater TH 169 corridor.

Project Elements
- Install a 10’ high x 14’ wide box culvert with lights at Winnetka Ave. N (CSAH 103) reconstruct existing regional trail (10’ wide, off-road/protected, multi-use bituminous trail), approaches and construct local trail connections to the future LRT station area trail network
- Expand width of Winnetka Ave. N (CSAH 103) to 52’ roadway in anticipation of future three or four lane

Project Benefits
- Provides a safe, active transportation grade-separated crossing of Winnetka Ave. (CSAH 103) for people of all ages, abilities, and active transportation modes and for those without access to a vehicle or whom choose to commute by foot, bike or non-motorized wheels.
- Eliminates conflicts between people walking, biking, and rolling (existing 281,000 annual trips on the regional trail) with people driving vehicular traffic (7,000 AADT) and results a 3.7 miles corridor completely separated from vehicular traffic.
- Improves conditions for community members with limited mobility, impaired vision, and other disabilities, families with strollers, and less experienced cyclists.
- Supports recent and anticipated investment within and adjacent to the project corridor including Metro Transit’s Blue Line LRT Oak Grove Parkway Station and park-and-ride facility, Target Northern Campus Expansion, Gateway Business Park, and NorthPark Business Park.
- Provides a protected bikeway to 15,390 people - connecting them to 7,497 jobs within 1 mile of the project area as well as to existing users (281,000 annual trips).

Existing Winnetka Ave. N Crossing Conditions

Winnetka Ave. N (CSAH 103): Currently trail users cross the 50 MPH county road, mid-block, and at-grade. Area growth is resulting in a more challenging and dangerous trail crossing for people walking, biking, and rolling.

RE: Letter of Support: 2024 Regional Solicitation Grant Application
Rush Creek Regional Trail – Winnetka Ave. North (CSAH 103)
Grade Separated Crossing

Dear Ms. Koutsoukos,

Three Rivers Park District fully supports the City of Brooklyn Park’s 2024 Regional Solicitation federal transportation funding request for the Rush Creek Regional Trail – Winnetka Ave. North (CSAH 103) Grade Separated Crossing. When complete, this project will provide a grade-separated multi-use crossing of CSAH 103 in Brooklyn Park serving both regional trails users and motorists alike.

The project is consistent the Park District’s 2040 System Plan and Regional Trail Crossing Study and is located on a Tier 2 alignment of the Regional Bicycle Transportation Network. It is also consistent with the City of Brooklyn Park’s Comprehensive Plan.

Three Rivers Park District is intending to provide a portion of the local match and will ultimately operate and maintain the regional trail and will work in partnership with the City via a winter use permit to ensure snow and ice removal is completed to ensure opportunities for year-round bicycle and pedestrian use. Three Rivers will provide the necessary operations and maintenance of the grade-separated facility and associated trail segments to maintain a state of good repair.

Three Rivers fully support this application and requests that you give this grant application your full consideration and support.

Sincerely,

Boe Carlson
Superintendent
