

**Construction Update: August 28, 2020**

**Web: [swlrt.org](http://swlrt.org)**

**Twitter: [@SouthwestLRT](https://twitter.com/SouthwestLRT)**

**Construction Hotline: 612-373-3933**

**Highway 100 Closure: Labor Day Weekend Work in St. Louis Park and Minneapolis**

Just west of Wooddale, and just west of France Avenue in St. Louis Park, at Lake Street and 21<sup>st</sup> Street in Minneapolis, construction work over the Labor Day weekend will focus on getting freight rail shifted onto new permanent track. In Minneapolis the focus will be on replacing existing track and utility work. In St. Louis Park freight is being shifted within the corridor. The work requires a full closure of Highway 100. The closure will begin on Saturday, September 5 at 5:00 AM and will reopen for morning rush hour on Tuesday, September 8. Residents should expect work overnight through the weekend beginning the morning of Saturday, September 5. More details are below for each project segment.

**Weekly Construction Photo: Oxford Street in St. Louis Park**

Eden Prairie

**Eden Prairie Construction: Map 1 of 2**

**Eden Prairie - SW Station to Eden Road** | Construction Activities from August - October 2020

*There are two Eden Prairie maps with each illustrating where construction crews are working today and approximately through August. General activities are highlighted for your convenience. Please refer to text descriptions in this section for more details on major elements being constructed in specific areas.*

**SouthWest Station Area**

In this area crews are building a new park-and-ride ramp adjacent to the existing ramp and constructing the joint bus and LRT station. Crews are working on excavation, utilities, and pile supports for foundations for the structures, the bus loop and utilities. Some of the new structure is just starting to take shape. A stationary tower crane is assisting crews with ongoing work. The right-turn lane on the eastbound Highway 212 ramp to Prairie Center Drive remains closed.

**Prairie Center Drive LRT Bridge**

The Prairie Center Drive LRT bridge begins by SouthWest Transit station, crosses over Technology Drive, follows the east side of Purgatory Creek Park and then crosses Prairie Center Drive to land north of Bachman's on the east side of the road. The bridge structure will be under construction until fall 2020, however all of the piles to support the bridge pier are installed. There are close to 500 piles supporting the bridge, making the completion of piling a major milestone. Bridge deck work is well underway with the installation of rebar and falsework. Over the past two weeks crews have placed all of the beams. Prairie Center Drive is now open to vehicle traffic, however, expect ongoing lane closures. [See upcoming detour information here.](#)

Sidewalks near the intersection of Prairie Center Drive and Technology Drive remain closed, please follow signage to ensure your safety. ([See the SouthWest pedestrian detour map](#)).

### **Eden Road Area**

Work on retaining walls as well as utility work continues in the area. Eden Road is closed just west of Glen Lane as construction is advanced in that area. Work includes tree and ground cover removal, the installation of erosion control, and preliminary utility work.

Just west of Eden Road, preparation work and utility construction are beginning for the Eden Prairie Town Center Station.

### **Eden Prairie Construction: Map 2 of 2**

### LRT Bridge at I-494/Flying Cloud Drive

LRT will travel on a bridge over I-494, parallel to Flying Cloud Drive. Work to complete the bridge deck is ongoing. An overnight closure of I-494 to pour concrete for the bridge deck has been scheduled for September 9 from 10:00 PM to 5:00 AM.

### Flying Cloud Drive

Along Flying Cloud Drive, between Eden Road and Valley View Road, crews are conducting major utility work while the roadway is under construction. Crews are grading for the LRT track guideway and building retaining walls.

Traffic is shifted to the south or east side of Flying Cloud Drive between Eden Road and Valley View Road until early-to-mid September and then will be swapped to the north. The intersection of Technology Drive and Flying Cloud Drive will remain closed until early September. The off-ramp from I-494 to Flying Cloud Drive remains closed into the fall. [See Eden Prairie detour maps here](#). Access to area businesses on the north of the roadway remain open, follow posted signage.

Overall, there will be four phases of temporary traffic changes, specifically lane reductions and closures to complete the construction of LRT and associated utility work. We are currently in phase two. These four phases will last into the 2021 construction season.

### **Valley View Road**

Deck work on the Valley View Road LRT bridge is ongoing. Work at this time can be completed without impacting the roadway below.

### **Nine Mile Creek**

Pile driving for the LRT bridge structure at Nine Mile Creek will continue through the fall. Many of the piers are complete with piers and deck work underway. The sidewalk on the west side of Flying Cloud Drive is closed; pedestrians should use the east side. In September Flying Cloud Drive near West 70<sup>th</sup> will have a short-term closure to set bridge beams for the Nine Mile Creek bridge. Notice will be posted in advance of the closures.

West 70<sup>th</sup> at Flying Cloud Drive closed the week of August 24 for two months to advance LRT infrastructure through the roadway. Access to businesses in the area will be maintained.

### **Golden Triangle Station**

Throughout the 2020 construction season, crews will advance work on the Golden Triangle Station, the land bridge for the LRT north of the station, and the LRT bridge that will transition to cross over Shady Oak Road and Highway 212. Crews are working on details for the Golden Triangle Station and completing the construction of area bridge piers.

### **Shady Oak Road/Flying Cloud Drive**

Three lanes on the north side of Shady Oak Road are closed for pier construction for the LRT bridge that will span Shady Oak Road and Highway 212. This lane closure will remain in effect into the fall. Work in the median of Highway 212 will start in September to advance the LRT bridge, expect lane shifts. The off-ramp from west

bound Highway 212 to Shady Oak Road will close later this summer for a few months. Expect construction activities on the west side of Highway 212 in the coming months, as work progresses north.

## Minnetonka

### Minnetonka Construction: Map 1 of 1

*This Minnetonka map illustrates where construction crews are working today and approximately through August. General activities are highlighted for your convenience. Please refer to text descriptions in this section for more details on major elements being constructed in specific areas.*

## Highway 62

Construction of the LRT tunnel under Highway 62 is ongoing through the 2021 construction season. The work is divided into two phases, work on the north then the south side of the highway. Traffic lanes have been shifted to the south side of the highway corridor to accommodate LRT tunnel construction on the north side of the

highway. This traffic configuration will be in place through the fall of 2020. Crews finished constructing the bottom leveling slab of the north tunnel section, have advanced concrete and waterproofing work, and are forming the concrete for the tunnel walls and base slab. Work to construct the tunnel roof has also started and crews will begin to backfill sections.

### **Red Circle Drive and Yellow Circle Drive**

Yellow and Red Circle Drives have been reconfigured to allow for ongoing tunnel construction at Highway 62. Yellow Circle Drive is temporarily dead ended with a cul-de-sac where it connects to Red Circle Drive. Yellow Circle Drive has temporarily become a two-way roadway in the area south of Blue Circle Drive. A temporary bypass road is complete on Red Circle Drive. This roadway configuration will be in place until mid-September 2020.

[See Minnetonka roadway changes here.](#)

Additional work has begun on Red Circle Drive for bridge reconstruction. The southern portion of Red Circle Drive is modified temporarily to accommodate two-way traffic. Red Circle Drive is a dead ended cul-de-sac where it connects with the other Red Circle Drive access. Yellow Circle traffic connects to the southern portion of Red Circle Drive to travel west until the cul-de-sac closure point. [See Minnetonka roadway changes here.](#)

Additional information about area activities is also available on the city's website [here](#).

### **Opus Station Area**

The station's form has emerged and will continue to advance in the coming months. Retaining wall work is ongoing north of the station area, including a significant portion of the LRT alignment to Smetana and Feltl Roads.

Bren Road West, just west of Green Circle Drive to Bren Road East, is closed to vehicles and pedestrians through the 2020 construction season. [See Minnetonka detour map here.](#) Crews are advancing utility work in the area. Piling for retaining walls near the roadway continues.

From Bren Road West to Smetana Road, crews are also grading and doing other preparation work for LRT track construction. Expect earth moving equipment in the area.

### **Smetana Road**

In this area, the project includes two roadway bridges to accommodate LRT travelling underneath the Smetana and Feltl roadways. Utility work is ongoing in this area. Excavation continues for bridge abutments and approach

walls. Sheet piling installation is occurring and piling for the bridge abutments continues. Expect noise and vibration from pile driving in the area.

Smetana Road from Feltl Road to Nolan Drive is closed through 2020. A temporary bypass is in place west of the intersection of Smetana and Feltl Roads to accommodate local traffic. [See Minnetonka detour maps here.](#)

### **Minnetonka-Hopkins LRT Bridge Area**

The Minnetonka-Hopkins LRT bridge is located east of Nolan Drive and west of the Hopkins Landfill and will cross over the freight tracks to the north. The bridge will take multiple years to complete. Excavation and pile driving continue at the north end of the bridge near K-Tel Drive. Work on the bridge piers will move south towards Smetana Road. Piling work for the bridge piers will be ongoing through the 2020 construction season. Expect noise and vibration from pile driving activities, which includes work on Saturdays. Clearing and ground cover removals also continues intermittently in the area, moving south.

### **Hopkins**

#### **Hopkins Construction: Map 1 of 1**

*This Hopkins map illustrates where construction crews are working today and approximately through August. General activities are highlighted for your convenience. Please refer to text descriptions in this section for more details on major elements being constructed in specific areas.*

### Shady Oak Road Station

Shady Oak Station construction is underway, and the station structure has emerged.

### 11<sup>th</sup> Avenue South

Work is underway at the future LRT track crossing at 11<sup>th</sup> Avenue South. LRT crosses the roadway just north of 5<sup>th</sup> Street South, south of Excelsior Boulevard. The roadway is reduced to one lane in each direction. The LRT crossing panels to transverse the roadway have been placed on the east side. Traffic is swapped to the east side of the intersection so work can advance on the west. The LRT tracks will be pulled across the intersection at a later date. The lanes will reopen the week of after the Labor Day weekend.

Once work on 11<sup>th</sup> Avenue South is complete, the reconstruction of 5<sup>th</sup> and 8<sup>th</sup> Avenues will begin. Reconstruction of 5<sup>th</sup> Avenue is anticipated to occur in September and 8<sup>th</sup> Avenue to follow.

On 5<sup>th</sup> Street South, utility work is expected to begin later this fall. Roadway impacts are anticipated. More detail will be provided as the closure dates nears.

### **Downtown Hopkins Station**

Station work continues. Crews have built the walls, advanced utility work and poured the base slab.

### **Excelsior Boulevard Area**

Crews continue building the LRT bridge over Excelsior Boulevard. With the LRT bridge piers nearing completion, the structural forms to take the bridge over the roadway and freight rail are starting to take shape. Crews are building “pier tables”, which taken quite literally means the base or “table” for the bridge to be placed on the piers. Concrete work for the top of the piers is advancing and concrete work for the spans is upcoming in the next months. The bridge structure is a post-tensioned box girder. This type of bridge can efficiently span long distances. The initial shape of the box girder is now visible from the roadway. Using a piece of equipment called a form traveler the bridge will begin to span the roadway in September.

### **Blake Road**

The project is improving bike safety in the area by building a regional trail underpass. Crews are constructing the trail underpass on the west side of Blake Road. Sheet piles have been driven to the center of the roadway. The southbound lanes on Blake Road are closed to vehicle traffic and will remain closed through the summer. Vehicle traffic continues to be permitted in one lane in the northbound direction. Pedestrians can access the sidewalk on the east side of Blake Road. [See Hopkins detour maps here](#). After some finishing details, traffic will be swapped to the other side and a single lane will be allowed in the southbound direction so crews can complete the underpass.

### **St. Louis Park**

**St. Louis Park Construction: Map 1 of 1**

*This St. Louis Park map illustrates where construction crews are working today and approximately through August. General activities are highlighted for your convenience. Please refer to text descriptions in this section for more details on major elements being constructed in specific areas.*

**Minnehaha Creek**

Work on the new freight and regional trail bridges continues in the area. Crews are finishing details of the bridges and area retaining walls. Earthwork activities to prepare for permanent freight rail track is ongoing.

**Louisiana Avenue**

In the Louisiana Avenue area, the project is constructing the following elements: Louisiana Station and park and ride areas, reestablishing the regional trail, LRT and freight bridges, a pedestrian/bicyclist underpass (which connects the regional trail to the station), and a new Southerly Connector for freight rail to connect to the MN&S freight line. View the area’s [visualization](#) to see how this all comes together.

Crews are working on the trail underpass. Shoring and sheet pile driving work for the southerly freight rail connection, that will replace the current wye freight track, along Oxford Street is well underway with the abutment taking shape.

The abutments for the regional trail and freight rail bridge at Louisiana Avenue are complete and bridge beams have been placed across the roadway.

### **Wooddale Avenue**

For the new regional trail underpass structure and freight rail infrastructure, the majority of the work that will impact the roadway is now complete. An additional closure will be needed at a future date to install LRT infrastructure through the intersection.

Just west of Wooddale, and just west of France Avenue crews are finishing freight rail preparation so that the tracks can be shifted to their new permanent location over Labor Day weekend.

### **Highway 100**

The project will re-position the existing freight rail bridge and build a new LRT bridge over Highway 100. A closure of Highway 100 is currently on track for Labor Day weekend to pick-up and shift the freight rail bridge to newly constructed abutments. The closure is expected to begin at 5:00 AM, Saturday, September 5 and the roadway will reopen by 5:00 AM, before the morning rush hour, on Tuesday, September 8. Area residents should expect 24-hour construction activities through this period. During nighttime hours there will be construction lighting as well as noise from heavy machinery working to prepare and move the freight bridge.

The inside lanes of Highway 100 will close on Saturday, August 28 for a concrete pour from 5:30 AM to 9:00 AM.

### **Beltline Boulevard**

Beltline Boulevard is being improved by the addition of a regional trail bridge over the roadway. The main truss for the regional trail bridge has been set and work on the trail bridge deck continues. To complete the bridge, crews will need to move the freight rail tracks to their final location. Preparation for that move is ongoing.

Reconstruction of Beltline Boulevard in this area continues. Beltline Boulevard is open to traffic with one lane in either direction. The LRT track crossing will be completed at a future date.

# Minneapolis

## Minneapolis Construction: Map 1 of 5

There are five Minneapolis maps with each illustrating where construction crews are working today and approximately through August. General activities are highlighted for your convenience. Please refer to text descriptions in this section for more details on major elements being constructed in specific areas.

Throughout Minneapolis expect construction and rail equipment moving through the corridor over the Labor Day weekend.

### Chowen Avenue to Lake Street

For the 2020 construction season, this area will experience major utility work, soil correction activities, pier protection work on the Lake Street Bridge, West Lake Street Station construction and the realignment of Chowen/Abbott roadways.

West Lake Street Station construction is upcoming in the fall.

Right at the Lake Street Bridge, work over the Labor Day weekend will focus on rebuilding track. Crews will be working between 9:00 AM and 10:00 PM on Sunday, September and between 7:00 AM and 10:00 PM on Monday, September 7.

### **Kenilworth Tunnel Area Construction**

From the Lake Street Bridge to just south of the Cedar Lake Channel, construction of the LRT tunnel is ongoing through 2022. Sheet pile installation for the tunnel is expected to last through 2020.

Two press-in-pilers are working south of 28<sup>th</sup> Street. One piler is on the track side of the tunnel moving south. The other is working near Lake Street.

Crews have installed a tunnel cell bulkhead south of 28<sup>th</sup> Street, which will allow them to excavate and construct the LRT tunnel itself. In the coming weeks excavation activities will commence. Crews will begin shallow excavation activities and installing bracing. Deeper excavation and concrete work will follow. Expect additional truck traffic moving through the corridor as the need to remove and bring in materials increases. In addition to the press-in-pilers and associated cranes, additional heavy construction equipment and more crew members have begun arriving in the corridor.

For more information about tunnel construction, see the [tunnel FAQ](#) information under the construction tab of our webpage: [swlrt.org](http://swlrt.org). A short [video](#) of the press-in-piler construction technique that is being used for the tunnel is also available.

### **Minneapolis Construction: Map 2 of 5**

### Cedar Lake Parkway

A six-month closure of Cedar Lake Parkway will be needed at a later date to complete tunnel excavation and construction.

### Burnham Road

The closure of the northbound lane of Burnham Road is planned for Monday, August 31. This closure will last for approximately three weeks. During this time crews will perform additional utility work on the east side of the roadway. This is follow-up work from the activities that occurred earlier in 2020. [Detour information.](#)

### Cedar Lake (Kenilworth) Channel

Three bridges will be constructed over the channel for freight, LRT, and the Kenilworth Trail. Construction for the freight rail bridge is complete and the LRT then trail bridges will follow in sequence.

Freight rail is now on the new track alignment and bridge over the Cedar Lake Channel. Demolition of the old freight bridge could begin in early September, as soon as track crews are available. It will take approximately a week to remove the bridge. Construction of the new LRT bridge over the channel will follow the removal, expected after the Labor Day weekend. A closure of the channel is currently not anticipated to be needed to complete this next phase of work. Flagger for water traffic will be present when the old freight rail bridge is removed, and traffic may be required to wait for a short period. If a closure is needed notice will be posted at least 14 days in advance. Expect noise and vibration for piling and sheeting activities beginning in September.

### Minneapolis Construction: Map 3 of 5

## **West 21<sup>st</sup> Street**

The surcharge has reached its intended compaction level and the soil beneath can now support station construction. Work to remove the excess materials has begun. Expect excavation equipment and more dump trucks in the area.

West 21<sup>st</sup> Street Station construction is expected to begin this fall after surcharge removal.

Replacement of the freight track crossing and utility work is planned during a 36-hour freight rail outage over the Labor Day weekend at West 21<sup>st</sup> Street. This work can only be accomplished during an extended freight track outage due to the complexity of the freight crossing and drainage work. As part of an agreement with TCWR, this work has been scheduled for Labor Day weekend to coincide with a planned freight rail outage for bridge work over Highway 100 and freight rail realignment in St. Louis Park. This will require a closure for vehicle traffic on 21<sup>st</sup> Street to East Cedar Lake beach; residential vehicle access to homes along South Upton Avenue and pedestrian/bike access will be maintained

This work will include preparation work the week prior and on Saturday, September 5 and continuous activities, including nighttime work, during the freight rail outage starting Sunday, September 6 into Tuesday morning, September 8. Here are the details of the extended work hours:

- Saturday, September 5, 9:00 AM to 6:00 PM
- Sunday, September 6 starting at 9:00 AM continuously through Tuesday, September 8 at 7:00 AM
- Crews will work overnight through this period of time. Normal workday hours on will resume on Tuesday September 8.

## **Minneapolis Construction: Map 4 of 5**

### Bryn Mawr Station Area

To accommodate the LRT station, crews will construct a pedestrian bridge on the northern bluff (near Penn Avenue and Highway 394) to the station. In addition, crews need to do a significant amount of earthwork in the area to construct the new trail alignment, regrade the contours of earth in the area and build a stable foundation for the LRT tracks.

The surcharge has reached its intended compaction level and the soil beneath can now support station construction. Expect excavation equipment and more dump trucks in the area as excess material begins to be removed in the coming weeks.

## I-394/Cedar Lake Trail

Construction to move the trail to its permanent location in the area will occur later this fall.

## Linden Yards

Utility work continues in the area. Construction of the Bassett Creek Valley Station will begin later this year.

## Minneapolis Construction: Map 5 of 5

## Glenwood Avenue

When the project is complete, LRT will cross Glenwood Avenue at grade. To make that happen three bridges need to be constructed, freight rail shifted, and extensive retaining walls built. Glenwood Avenue between Lyndale Avenue North and North 12th Street is closed until mid-2021. The roadway is closed to vehicle,

pedestrian, and bicycle traffic. [See detour map here](#). Local access to businesses is maintained. Crews are finishing retaining walls in the area. Work on the west abutment is nearing completion with crews removing supports for excavation. Grading work is also proceeding to shift the BNSF track.

### **Royalston Avenue**

This area will see the development of the Royalston Avenue/Farmer's Market Station, an LRT bridge crossing over North 5<sup>th</sup> Avenue and North 7<sup>th</sup> Street and connecting to the Target Field Station. The Holden/Royalston/Border loop will also be reconstructed.

Expect pile driving activities in this area as bridge and retaining wall work advances. Work on the bridge piers that follow 6<sup>th</sup> Street are starting. Lane closures along 6<sup>th</sup> Avenue to complete pier work are upcoming in September. Beam setting along Royalston is also anticipated in September.

The southbound travel lane on Royalston Avenue from North 5<sup>th</sup> Street to Holden Street is closed; the closure will last until summer 2021. Business access is available via the northbound lane. [See the roadway impact map here](#).

### **Regional Trails**

#### **Minnesota River Bluffs Regional Trail**

The Minnesota River Bluffs Regional Trail in Hopkins is closed between Shady Oak Road and 5<sup>th</sup> Avenue South. [See detour map here](#).

- The section between Shady Oak Road and 11th Avenue South is closed due to storm sewer construction activities. This portion of the trail is closed through early 2021.
- The section between 11th Avenue South and 5th Avenue South is closed until fall 2021.

#### **South Cedar Lake LRT Trail**

The South Cedar Lake Trail from just east of the North Cedar Lake Trail connection in Hopkins to France Avenue in St. Louis Park is closed until fall 2021. The South Cedar Lake Trail will remain open between France Avenue in St. Louis Park and Kenilworth Trail/Midtown Greenway intersection in Minneapolis. The Midtown Greenway will remain open. Currently, cross streets remain open to automobiles, bikers and pedestrians, with separate closures of roadways upcoming at various dates. [See detour maps here](#).

Utility work near the West Lake Street Station is almost complete. Crews have begun grading work to construct the new permanent trail alignment under the West Lake Street bridge. Pedestrians and cyclists can use the new trail once completed. The trail will be fenced off and separated from construction activities. Until that work is complete expect flaggers in the area directing pedestrians and cyclists. Be mindful of construction equipment in the area and the directions given by the flaggers. Flagging activity is allowing the trail in this connecting segment to remain open during this phase of construction.

### **Kenilworth Trail Closure**

The Kenilworth Trail is closed in Minneapolis at the intersection with the Midtown Greenway to just south of West 21<sup>st</sup> Street until summer 2022. Access for automobiles, bikers and pedestrians remains open at Cedar Lake Parkway and at West 21<sup>st</sup> Street. [See detour map here.](#)

### **North Cedar Lake Trail in Minneapolis**

The North Cedar Lake Trail in Minneapolis from Linden Yards located west of Van White Boulevard to east of Royalston Avenue is closed until mid-2021. [See detour maps here.](#)

Please note, construction vehicles cross the trail as they enter and exit staging areas. Construction vehicles yield to trail users but please be aware that you may encounter construction traffic in this area.

The Cedar Lake Trail by Highway 394 and Linden Yards is detoured to Kenwood Parkway into August. The connection to the Luce Line Trail will remain open, accessible via the connection under I-394 by Spring Lake. [See trail detour maps here.](#) Crews are conducting utility work in the area.
