The preparation of this document has been funded in part by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration. The contents of this document reflect the views of the Metropolitan Planning Organization (MPO), which is responsible for the facts or accuracy of the data presented herein. The contents do not necessarily reflect the official views of the U.S. Department of Transportation. The report does not constitute a standard, specification or regulation.

## 2024 - 2027 TRANSPORTATION IMPROVEMENT PROGRAM

### SUMMARY

The Metropolitan Council, which serves as the Metropolitan Planning Organization for the Twin Cities Metropolitan Area, is required by federal law to produce a four-year Transportation Improvement Program (TIP) that outlines funded highway, transit, bicycle, and pedestrian projects within the metropolitan planning area. The 2024 through 2027 TIP responds to procedures required by the Infrastructure Investment and Jobs Act (IIJA) and the United States Code of Federal Regulations (23 CFR 450.326). The legislation requires that all transportation projects that are either wholly or partially funded with federal monies as well as regionally significant local- and state-funded projects within the metropolitan planning area (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties plus the contiguous urbanized areas<sup>1</sup> in parts of Sherburne and Wright Counties along with Houlton, Wisconsin, in St. Croix County) be included in the region's TIP. The TIP must be consistent with the projections of federal funds and local matching funds for this time period.

The 2024-2027 TIP for the Twin Cities Metropolitan Area includes highway, freight, transit, bicycle, and pedestrian projects valued at approximately \$6.1 billion. Highlights of the TIP include the following:

- Approximately 56% (or \$3.4 billion) of the total spending shown in the TIP is from federal sources, with 10% from state sources and 34% from local/other sources.
- The \$6.1 billion program includes \$2.9 billion (47%) for transit, \$2.6 billion (41%) for highways/roads, \$311 million (5%) for non-motorized transportation, and \$386 million (7%) for travel demand management, other projects, and yet-to-be-programmed set-aside funds.
- Six major projects are included in the TIP for the first time: (see projects 11 15 on Table 20 and project 23 on Table 21).

The Transportation Advisory Board (TAB) to the Metropolitan Council hosts a public comment period on the TIP prior to adoption. Notice of the public comment period is printed in the Minneapolis Star Tribune newspaper and emailed to groups representing a diverse set of stakeholders. The notifications and process are carried out consistent with the Council's Public Participation Plan. A "virtual" public meeting was held on June 20, 2023. The TAB considered public comments received on the draft TIP prior to adopting the final TIP.

The 2024-2027 TIP implements, and is consistent with, the region's metropolitan transportation plan (MTP), titled the Transportation Policy Plan (TPP), adopted by the Metropolitan Council on November 18, 2020, with FHWA/FTA conformity determination established on December 4, 2020. The inclusion of a specific project in the TIP does not imply an endorsement of the specific design alternative or engineering details. Inclusion in the TIP is a funding commitment that assumes the project's development process has addressed all local, state, and federal requirements.

The 2024-2027 TIP is fiscally constrained, is consistent with the TPP, and its development process provided acceptable opportunity for public involvement.

<sup>&</sup>lt;sup>1</sup> For definitions, see <u>Highway Functional Classification Concepts</u>, <u>Criteria and Procedures</u>, <u>2013 Edition</u>, U.S. Department of Transportation Federal Highway Administration

## **1. INTRODUCTION**

The 2024-2027 Transportation Improvement Program (TIP) for the Twin Cities Metropolitan Area (shown in Figure 1, including Houlton, Wisconsin, and parts of Wright and Sherburne counties) is the multimodal program of highway, transit, bicycle, and pedestrian projects and programs proposed for federal funding throughout the metropolitan planning area over the fouryear period. The TIP is prepared by the Metropolitan Council and its Transportation Advisory Board (TAB) in cooperation with the Minnesota and Wisconsin Departments of Transportation (MnDOT and WisDOT, respectively). The projects listed in the TIP are consistent with and implement the region's transportation plan and priorities.

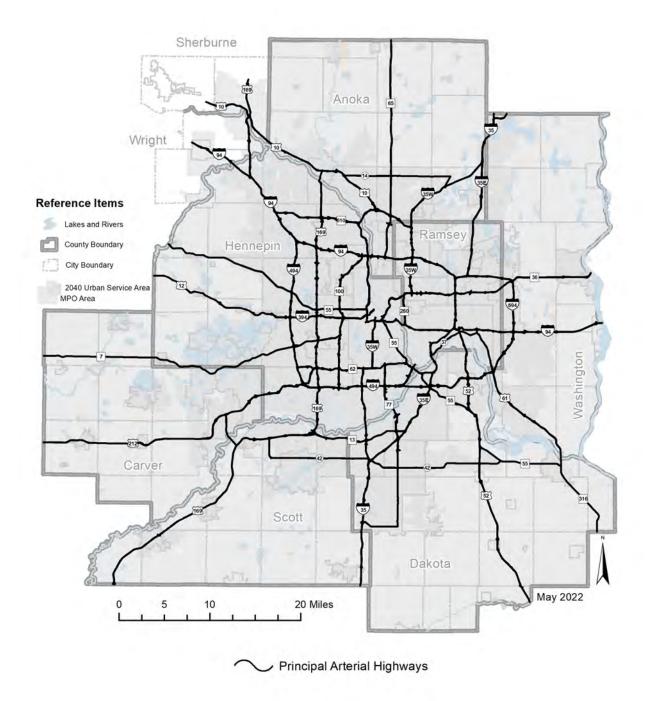

#### Federal Requirements and Regional Planning Process

Federal regulations require that a Transportation Improvement Program:

- Be developed and updated at least every four years.
- Cover a period of at least four years.
- Be a product of a continuing, comprehensive, and cooperative (3C) planning process.
- Be consistent with regional land use and transportation plans and the State Implementation Plan (SIP) for air quality.
- Fulfill requirements of the March 14, 2012, final rule as required by the U.S. Environmental Protection Agency (EPA), Transportation Conformity Rule.
- Identify transportation improvements proposed in the region's metropolitan transportation plan (MTP, titled the Transportation Policy Plan) and recommended for federal funding during the program period.
- Contain projects that are from a conforming regional MTP that is fiscally constrained. The TIP must be approved by the Federal Highway Administration and the Federal Transit Administration.
- Be fiscally constrained, which means that total project costs and anticipated revenues balance.
- Be initiated by locally elected officials of general-purpose governments.
- Include both highway and transit projects.
- Allow opportunities for public participation.
- Reflect the priorities in the metropolitan planning area.
- Indicate the years in which initial contracts will be let.
- Identify the sources of federal funds.
- Include realistic estimates of total costs and revenues for the program period.
- Fulfill requirements of the Executive Order 12898 on Environmental Justice.
- Include a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan.

The 2024-2027 TIP for the Twin Cities Metropolitan Area meets all of these requirements and was submitted to the Minnesota and Wisconsin Departments of Transportation for inclusion in their respective State Transportation Improvement Programs (STIPs) approved by the Governors' designees, the Commissioner of Transportation (MN) and the Secretary of Transportation (WI).

The Twin Cities Metropolitan Area Metropolitan Planning Organization (MPO) certifies that it is in conformance with the provisions of 49 CFR Part 20 regarding lobbying restrictions on influencing certain Federal activities.

The following information is provided for each project in the TIP in Appendix A:

- Program year
- Parent project
- Route
- Project number
- MnDOT program category
- Description of the project scope
- Estimated total funding in each year of the TIP along with the amount of federal funds proposed to be obligated
- Amount of advanced construction (AC, see Table 12) funds dedicated to the project in the program year
- Amount of federal, state, and other (usually local) funds dedicated to the project
- Name of the state, regional, or local agency receiving the federal funding and responsible for carrying out the project
- Air quality analysis category

The transportation planning process in the Twin Cities Metropolitan Area is based on Minnesota statutes and requirements of federal rules and regulations on urban transportation planning that first became effective June 30, 1983, when they were published in the Federal Register. The Metropolitan Council is the designated MPO for the Twin Cities metropolitan area and is responsible for completing the continuing, comprehensive, and cooperative (3C) transportation planning process, as defined in <u>Title 23</u>, <u>Section 450.306 of the US Code of Federal</u> <u>Regulations</u> (CFR). Since transportation planning process is integrated from land use and development planning, the transportation planning process is integrated with the total comprehensive planning program of the Metropolitan Council. With the advent of Intelligent Transportation Systems (ITS), the planning process has been expanded to include technology deployment. As of 2005, as defined in <u>23 CFR 450.306</u>, the coordination of ITS with the planning process is now required.

The Twin Cities regional transportation planning process is defined in the 2018 Memorandum of Understanding between MnDOT and the Metropolitan Council. Administered and coordinated by the Metropolitan Council, this process is a continuing, comprehensive, and cooperative effort, involving municipal and county governments, the Metropolitan Airports Commission (MAC), MnDOT, the Minnesota Pollution Control Agency (MPCA), transit operators, the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA). Local elected government officials participate in the process through the TAB. The TAB is a forum for the cooperative deliberation of state, regional, and local officials, intermodal interests, and private citizens. Metro Transit and suburban transit provider representatives are members of the TAB's Technical Advisory Committee (TAC). They participate in planning through the capital and service improvement planning processes coordinated by the Metropolitan Council.

In 2018, MnDOT updated the <u>Statewide Regional ITS Architecture</u>, which was subsequently adopted by all MPOs in Minnesota, including the Metropolitan Council. A Regional ITS Architecture provides a vision of how ITS and ITS projects can be deployed to satisfy the goals and objectives outlined in the TPP and serves as a visible demonstration of the institutional dependencies that exist in a region and how agencies can benefit from each other's activities. As needed, the Council coordinates with MnDOT and regional partners to ensure successful ITS integration. The Architecture relates to Title 23, Section 450.306 of the CFR, specifically

that the metropolitan transportation 3C planning process shall provide for consideration and implementation of projects, strategies, and services that will address a list of factors, including:

- Subsection (b)(6): Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight.
- Subsection (d) (4) (vii): An MPO shall integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under <u>49 U.S.C. chapter 53</u> by providers of public transportation, required as part of a performance-based program including the congestion management process as defined in <u>23 CFR 450.322</u>, if applicable.
- Subsection (g): The metropolitan transportation planning process shall (to the maximum extent practicable) be consistent with the development of applicable regional intelligent transportation systems (ITS) architectures, as defined in <u>23 CFR 940</u>.

Similarly, <u>23 CFR 450.208</u> calls for the coordination of data collection and analyses with MPOs and public transportation operators to support statewide transportation planning and programming priorities and decisions.

The Minnesota Statewide Regional ITS Architecture:

- Provides MPOs with a useful planning tool for managing ITS funding decisions (Implementation Volume: ITS Initiatives and Project Concepts for Implementation).
- Improves continuity across the project life cycle, from planning through project development and operations.
- Meets the intent of 23 CFR 940.9.b ("Any region that is currently implementing ITS projects shall have a regional ITS architecture by April 8, 2005.").
- Formal adoption promotes consistent use of the Regional ITS Architecture and allows planners to use aspects of the regionally agreed upon ITS architecture.
- By establishing the process, tools, and support for architecture use and maintenance in these plans, the MPO can ensure compliance with Federal requirements and be eligible for financial support for these critical activities.

### Public Participation Opportunities in Preparation of the Transportation Improvement Program

A concerted effort is made to ensure all interested and concerned parties are offered an opportunity to participate in the preparation of the TIP. TAB accepted public comments on the draft TIP. The following is the schedule of public comment opportunities prior to adoption of the 2024-2027 TIP.

- May 17, 2023 At its monthly meeting, the TAB released the draft TIP for the purpose of soliciting public comment.
- May 19 through July 3, 2023 The TAB accepted comments submitted by email, telephone, and mail.
- June 20, 2023 Council transportation and communications staff hosted a virtual public meeting.
- August 16, 2023 The TAB reviewed public comments and recommended the TIP for adoption, forwarding it to the Metropolitan Council.

In preparation, the Metropolitan Council published a public notice in the Minneapolis Star Tribune and on metrocouncil.org. In addition, staff notified a diverse set of stakeholders about the public comment period. Interested parties can sign up to see email alerts at <u>www.metrocouncil.org</u>.

For TIP amendment requests (discussed on pages 10 and 11) public input opportunities are offered at board and committee meetings, during which they are presented as business items. Amendment requests that impact regionally significant elements of regionally significant projects require a 21-calendar-day public comment period to begin after TAB releases the amendment for public comment. The comment period is only required for regionally significant projects that are not currently in the TIP or are changing any project element that requires a new conformity determination.

Metro Transit is using the TIP's public involvement process to satisfy the public participation requirements of the FTA Section 5307 projects. The TIP serves as the FTA Section 5307 program of projects.

### Development and Content of the Transportation Improvement Program

The TIP is an integral part of the overall regional transportation planning and implementation process. TIP preparation is a cooperative effort among local units of government and metropolitan and state agencies.

The planning base from which projects are identified and developed for the TIP includes the following plans:

- <u>Thrive MSP 2040</u> establishes the regional outcomes and physical and development policy framework for seven counties within the Twin Cities Metropolitan Area (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties). Thrive MSP 2040, adopted in 2014, serves as the metropolitan development guide that provides the overarching vision for development of the region.
- The region's MTP, the <u>2040 Transportation Policy Plan</u> (TPP), is one of the four system plans within Thrive MSP 2040. It sets the regional transportation policy for all of the Council's planning area including urbanized portions of Sherburne and Wright Counties and Houlton, Wisconsin (St. Croix County) and identifies the major, long-range transportation investments. The 2040 TPP addresses all applicable federal requirements and considerations.
- The Council's **Public Participation Plan**.
- The <u>Minnesota State Highway Investment Plan 2018-2037</u> (MnSHIP), developed by the Minnesota Department of Transportation, includes the district work plans, which set the investment priorities for the state highway system in the eight-county MnDOT Metro District (includes Chisago County).
- Local comprehensive plans and transportation programs, which include transportation plans that – within the seven-county region only – must be consistent with the regional transportation plan developed by the Metropolitan Council.

More information about these plans and planning processes is available in the <u>Transportation</u> <u>Planning and Programming Guide for the Twin Cities Metropolitan Area</u>.

As illustrated in Figure 3, projects are selected for inclusion in the TIP in several ways: selection by Congress of federal High Priority Projects; the TAB's Regional Solicitation; MnDOT Metro District selection; and the Council selection for regional transit providers, including projects in

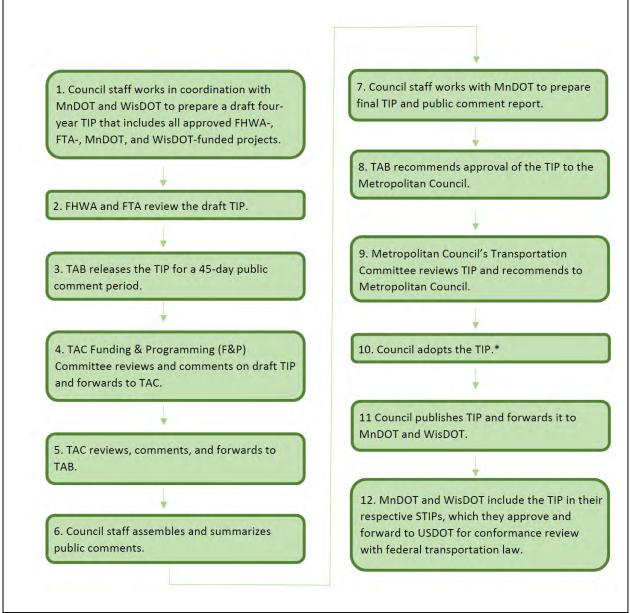

the FTA Capital Investment Grants program as selected by Congress. These selection processes are discussed in Chapter 4. While most projects are programmed by MnDOT, the projects selected through the TAB's Regional Solicitation are programmed every other year, by the Council through a competitive selection process.

The funding percentages in Figure 3 represent the approximate share of total funds of all projects in the TIP (federal, state, and local), but it should be emphasized that the funding percentages in Figure 3 are not reflective of the total funding package for transportation. The TIP includes MnDOT's entire program within the MPO area, including projects that do not have any federal funding participation. The TIP does not include locally funded transportation projects for the Metropolitan Council, Metro Transit, Metropolitan Transportation Services, suburban transit providers, counties, or cities. It also does not include the significant amounts of funding required for planning, design, engineering, and right-of-way acquisition that local governments typically pay for projects receiving federal construction funding.

The TPP provides a framework for the development of specific projects managed by MnDOT, the Metropolitan Council, and county and local governmental units and agencies that are responsible for planning, constructing, and operating transportation facilities and services. All projects listed in this TIP must be consistent with the TPP. Many of the highway construction projects included in this TIP are under MnDOT jurisdiction. They originate from ongoing MnDOT planning and programming activities. The projects that lead to the completion of the metropolitan highway system, along with the projects on other major arterials, are based on the region's TPP and on MnDOT's Highway Safety Improvement Program (HSIP) and programming process. The Metropolitan Council identifies transit service needs and objectives, planned transit service and capital improvements, and the costs and funding sources that help implement the TPP.

The TPP is further refined through more detailed studies, including corridor studies and alternatives studies. These studies, including the needed environmental reviews, lead to specific project recommendations that are included in implementation programs. Other projects, such as those concerned with resurfacing, bridge improvements, and safety, arise from continuous monitoring and evaluation of existing highway facilities through MnDOT's pavement and bridge management plans.

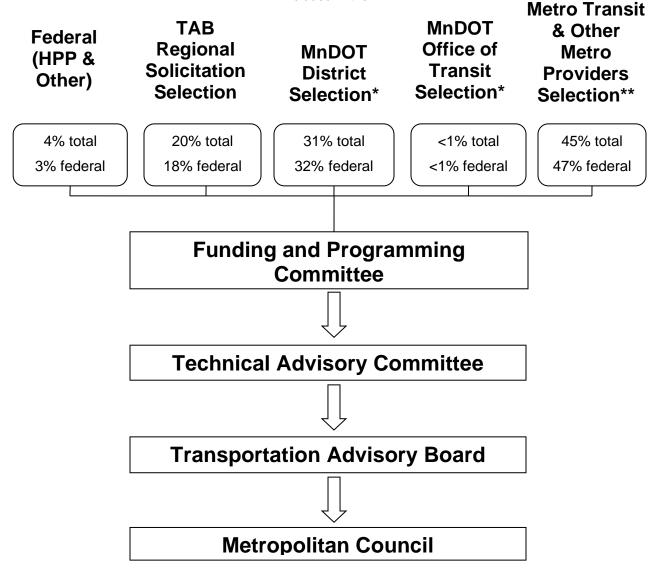

City and county federal aid projects are products of local comprehensive and transportation planning programs and reflect local and regional priorities. These projects are determined to be consistent with regional plans before being included in the TIP. Such plans must also be consistent with the TPP.

\* The TAB's recommendation is returned for revision only if the Council finds the TIP inconsistent with Council policy.

# Figure 2: Transportation Improvement Program (TIP) Development and Approval Process

Percentage of funding identified in the TIP by selection process for all projects (federal and state), 2024-2027. Top number represents share of total TIP; the bottom number represents share of federal funding included in the TIP.

\*This TIP includes all projects selected by MnDOT, including those without federal funding. Most projects are selected by Metro District, but Sherburne County and Wright County projects are selected by MnDOT District 3. \*\*Metro Transit numbers include projects funded with FTA Capital Investment Grants funding.

Figure 3: Project Selection Processes for Inclusion in the Twin Cities Transportation Improvement Program

## Estimating Project Costs

Projects beyond the first program year of the TIP will most likely be subject to inflation. Projects in the TIP are estimated in recognition of this reality in an attempt to determine the cost in terms of year of expenditure. Each programming agency has its own approach to estimating inflated project costs. These approaches are:

- Metro Transit: Inflation is built into project amounts during the process of creating the six-year Capital Improvement Program for Transit divisions at the Council.
- MnDOT: Each year, a revised inflation adjustment table is used to update construction estimates and produce an inflated estimate for each project.
- Metropolitan Council-programmed Regional Solicitation projects and MnDOT-Programmed HSIP projects: For the 2024-2027 TIP, projects to be administered by FHWA awarded via the 2022 Regional Solicitation were adjusted at two percent per obligation year, with 2022 as the base, from their original cost estimate submitted in their funding application. The adjustments are entirely reflected in the local contribution, as the federal contribution is set at the time of award. The two percent per year adjustment derives from the Federal Reserve present target for inflation. Following this initial placement in the TIP, MnDOT monitors project costs and adjusts them as discussed in the above bullet. For FTA-administered projects, inflation is an assumption in the yearly <u>Metropolitan Council Transit CIP</u>.

## Amending or Modifying the TIP

Over the course of the year, it sometimes becomes necessary to amend or modify the TIP. Reasons include the addition of a new project, a significant change of scope that alters a project's description, and significant cost changes.

A change to the TIP can go through one of four processes, depending on the nature of the project and the degree to which the project is proposed to change. These changes include the following:

- Administrative Modification. An administrative modification requires no board action and is reserved for minor changes, including program year changes, minor cost changes, funding source changes, technical corrections, and splitting a project into multiple projects. This also applies to action on projects with no federal funding, with the exception of regionally significant projects.
- Formal TIP Amendment. A formal TIP amendment is a more substantive change such as the addition of a new federally funded project, a change to the type of work on a project, a significant cost change, or a change in project termini. Formal TIP amendment requests must be approved by the Metropolitan Council following recommendation from TAB. Formal TIP amendments follow one of three processes:
  - Standard TIP amendment request. Standard TIP amendment requests are provided to the Funding & Programming Committee and TAC for technical recommendations before going to TAB for a recommendation. Once a TIP amendment is recommended by TAB, the Transportation Committee provides a recommendation to the Metropolitan Council on whether to approve the amendment request. The Council then determines whether or not to approve the amendment request.
  - TIP amendment request to amend a regionally significant project. A project is considered regionally significant if it adds one or more travel lanes for over one mile, involves the addition of an interchange, or involves the reconfiguration of an

interchange for which a movement is added or eliminated. TIP amendments involving regionally significant projects follow the standard amendment process with the addition of a 21-day public comment period. TAB releases the amendment for public comment. After the 21-day period is over, the amendment goes back to TAB for recommendation. A TIP amendment request to a regionally significant project may not have to go through this process if the change does not impact regionally significant project elements.

 Streamlined TIP amendment request. The streamlined amendment process was established in 2014 and updated in 2020 to expedite routine amendments. Streamlined amendments are first reviewed by TAC and are included on TAB's consent agenda for recommendation to the Council. In order to be eligible for the streamlined process, a proposed amendment must be consistent with the TPP; must not add a new regionally significant project to the TIP; and must not relate to a scope change through TAB.

The Metropolitan Council follows FHWA and FTA guidance in determining whether a proposed change requires a formal amendment to the State TIP (STIP). That guidance can be found on <u>MnDOT's website</u>. Streamlined TIP amendment guidance can be found in Appendix B. Cost change thresholds are shown in Table 1.

| Table 1: TIP | Amendment and | <b>Modification Co</b> | ost Change | Thresholds* |
|--------------|---------------|------------------------|------------|-------------|
|--------------|---------------|------------------------|------------|-------------|

| STIP Total Project Estimated Cost | Modification   | Amendment      |
|-----------------------------------|----------------|----------------|
| <\$1,000,000                      | Not required** | Not required** |
| \$1,000,001 to \$3,000,000        | 20%            | 50%            |
| \$3,000,001 to \$10,000,000       | 20%            | 35%            |
| \$10,000,001 to \$50,000,000      | 10%            | 20%            |
| \$50,000,001 to \$100,000,000     | 10%            | 15%            |
| >\$100,000,000                    | ***            | 10%            |

\*FHWA projects. FTA projects use a 20% threshold for an amendment. No threshold exists for a modification.

\*\*Applies when total project cost estimate is less than \$1 million AND the proposed total estimate cost remains less than \$1 million.

\*\*\*Processing an administrative modification for high-profile projects (greater than \$100 million), when the change impacts financial constraint, requires prior collaborative discussion with FHWA.

#### Federal Legislation Changes

The Infrastructure Investment and Jobs Act (IIJA) was signed into law on November 15, 2021, as a five-year surface transportation authorization. Funding for specific programs is shown in Tables 13, 15, and 16.

In the spring of 2012, the U.S. Census Bureau released the updated 2010 urbanized area (UZA) boundaries for metropolitan areas across the country. This data included portions of Wright and Sherburne counties in Minnesota and Houlton in St. Croix County, Wisconsin in the Minneapolis-St. Paul urbanized area. As the metropolitan planning organization for the Twin Cities, the Metropolitan Council is required by federal law to become involved in the transportation planning efforts of these areas. Therefore, the 2024-2027 TIP must include projects within the contiguous urbanized areas of Wright and Sherburne counties and in Houlton, Wisconsin. There are no projects in the Houlton, WI urbanized area.

The U.S. Census Bureau recently released the updated (2020) UZA boundary. Due to changes in the methodology for determining urbanized areas, Wisconsin is no longer within the Council's urbanized area. The updated boundary must be adopted by the Council before it is official; it is anticipated that this will happen in late 2023.

*Federal Program Areas in the Transportation Improvement Program* Highway and transit funding programs are described below.

**Surface Transportation Block Grant (STBG) Program.** This program accommodates funding for projects on any roads (including those along the National Highway System, or NHS) that are not functionally classified as local or rural minor collectors, along with pedestrian projects, recreational trails, and Safe Routes to School projects. Bridge projects paid for with STBG Program funds may be on any public road. Transit capital projects are also eligible. Included in the program is a setaside for the Transportation Alternatives Program (TAP), which is primarily used for bicycle, pedestrian, and Safe Routes to School projects in the TIP.

**Congestion Mitigation and Air Quality Improvement Program (CMAQ).** CMAQ directs funds toward transportation projects in non-attainment and maintenance areas for ozone, carbon monoxide (CO), and particulate matter. These projects contribute to meeting or maintaining the attainment of national ambient air quality standards. Historically in the Twin Cities region, CMAQ funds have been used for travel demand management, transit service expansion, or highway traffic management technology projects (such as traffic signal coordination).

**Highway Safety Improvement Program (HSIP).** This program is designed to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-state-owned public roads and roads on tribal lands. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. Railway-Highway Grade Crossing Safety funds, which are safety-focused, are part of this program.

**Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT).** This program is aimed at helping make surface transportation more resilient to natural hazards such as climate change, flooding, extreme weather events, and other natural disasters.

**Carbon Reduction Program (CRP).** This provides funding for projects designed to reduce transportation emissions, defined as carbon dioxide  $(CO_2)$ , from on-road highway sources.

**Bridge Funding Program.** This program provides funding for the rehabilitation and replacement of existing bridges. This program applies to bridges under the jurisdiction of a public authority, located on a federal aid roadway (i.e., on the federal aid system) and open to the public.

**National Highway Performance Program (NHPP).** The National Highway System (NHS) consists of 161,000 miles of major roads in the United States and 5,356 miles in Minnesota. Included are all Interstate highways and a large percentage of urban and rural principal arterials, the defense strategic highway network, and strategic highway connectors. All NHS routes in the region are eligible to use NHPP funds. NHPP provides support for the condition and performance of the NHS, for the construction of new facilities on the NHS, and to ensure that investments of federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a state's asset management plan for the NHS.

**National Highway Freight Program (NHFP).** The IIJA's precursor, the Fixing America's Surface Transportation Act (FAST) Act, established the National Highway Freight Network. The NHFP funds projects that contribute to the efficient movement of freight on that designated network.

**Transit Section 5307 Urbanized Area Formula Grants.** This program provides assistance with transit capital and operating costs, including job access and reverse commute activities. This now includes job access and reverse commute activities formerly funded under Section 5316, which was rescinded in MAP-21.

**Transit Section 5309 Capital Investment Grants Program.** This program funds major new and expanded rail and bus rapid transit system projects.

**Transit Section 5310 Mobility of Seniors and Individuals with Disabilities Program.** This program funds the purchase of lift-equipped vehicles by nonprofit organizations that provide transportation for seniors and individuals with disabilities. This can include projects specifically designed to meet the needs of seniors and individuals with disabilities, transit projects that exceed ADA standards, and transit projects that improve access to fixed-route transit and decrease reliance on paratransit.

**Transit Section 5311 Program.** This program is available for planning, operating, and capital assistance to areas with populations below 50,000 in rural areas.

**Transit Section 5337 State of Good Repair Program.** This program is designed to maintain public transportation systems in a state of good repair, focusing on fixed guideway and high-intensity bus systems.

**Transit Section 5339 Bus and Bus Facilities Program.** This program provides funds for capital projects to replace, rehabilitate, and purchase buses and bus-related equipment and construct bus-related facilities.

#### **Other Funding Sources**

Other funding sources outside of the above funding programs include those listed below.

Miscellaneous Federal Funds. Less frequently used programs include:

- Bridge Replacement Off-System (BROS): A federally funded bridge replacement program intended to reduce the number of deficient off-system bridges within the state. This program applies to bridges under the jurisdiction of a public authority, located on a non-federal aid roadway and open to the public.
- Highway Rail Grade Crossings and Rail Safety (RRS): included with the HSIP projects.
- Federal Land Access Program (FLAP).

**Demo/High Priority Projects.** High priority projects, National Corridor Improvement Program, and projects of regional and national significance.

State Funds. Projects funded almost exclusively with state funds.

Bond Funds. Projects funded almost exclusively with bond funds.

**Other.** Many projects include funding amounts in the "other" field. Funding identified as "other" could include funding from state or federal grants or other funding sources including local funds.

### 2. REGIONAL PLAN AND PRIORITIES

All projects in the TIP are reviewed for consistency with the Transportation Policy Plan (TPP). The Metropolitan Council adopted the TPP on November 18, 2020, with FHWA/FTA conformity determination established on December 4, 2020. The Plan is in balance with anticipated revenues over the 20-year planning period. The Council carried out an extensive public participation process and held a public hearing on the TPP prior to adoption.

#### Conformity to the Clean Air Act Requirements

The Minneapolis-Saint Paul region is within an EPA-designated attainment area for all transportation related pollutants. In the past, portions of the region had unacceptably high measured concentrations for carbon monoxide and for PM<sub>10</sub>. The region has been in full attainment for carbon monoxide since November 29, 2019, and for PM<sub>10</sub> since September 24, 2022. Formal conformity requirements under the federal Transportation Conformity Rule no longer apply to the TIP.

#### Thrive MSP 2040

The TIP is consistent with the 2040 TPP, which is a system plan under the umbrella of Thrive MSP 2040, adopted by the Metropolitan Council on May 28, 2014. Thrive MSP 2040 is the vision for the Twin Cities metropolitan area. It reflects concerns and aspirations, anticipates future needs in the region, and addresses responsibility to future generations. The region's investments provide an important economic foundation, so all residents can prosper.

Thrive MSP 2040 works towards five outcomes: stewardship, prosperity, equity, livability, and sustainability. It is also guided by three principles for how the Council should implement its policies: integration, collaboration, and accountability.

## **3. FEDERAL PERFORMANCE MEASURES AND TARGETS**

Pursuant to Title 23, Section 450.326(d) of the Code of Federal Regulations (CFR), the Metropolitan Council is required to incorporate a performance-based planning approach when developing the TIP. This includes an analysis of the anticipated effect the TIP may have towards achieving the performance targets adopted for the Council's MPO planning area. Specifically, the regulation states: *The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.* 

This approach was first established in 2012 with the federal Moving Ahead for Progress in the 21st Century Act (MAP-21), which established performance-based planning and identified the federal performance measures for safety, pavement and bridge condition, reliability, freight, congestion mitigation and air quality improvement (CMAQ), transit asset management, and transit safety. The requirements continue through the federal IIJA. The following are the broad performance measure categories that must be included in the 2024-2027 TIP:

- Highway Safety Performance
- Pavement Condition
- Bridge Condition
- System Reliability
- Congestion Mitigation and Air Quality (CMAQ)
- Transit Asset Management (TAM)
- Transit Safety Performance (PTASP)

### Highway Safety Performance Measure

#### **Council Activities and Progress**

The Transportation Policy Plan (TPP), which serves as the metropolitan transportation plan (MTP) for the Council, includes an overarching goal related to safety—the Safety and Security Goal, as well as objectives and strategies (actions) the Council will employ to ensure that the desired safety outcomes are met. In addition, the five federally required safety performance measures and targets are included in the TPP in the Performance Outcomes chapter.

The region has implemented a number of proactive and reactive strategies to improve the safety for users of all modes within the metro area. These include a commitment to aggressively reduce the number of crashes involving fatalities and serious injuries annually, with the ultimate aspirational goal of achieving zero fatalities and serious injuries. The Council must annually adopt federally required safety performance targets for the region.

Table 2 shows the adopted targets for 2023.

| Measure                                                 | 2023 Target |
|---------------------------------------------------------|-------------|
| Number of Traffic Fatalities                            | 90          |
| Fatality Rate (per 100 million VMT)                     | 0.33        |
| Number of Serious Injuries                              | 600         |
| Serious Injury Rate (per 100 million VMT)               | 2.18        |
| Number of non-motorized fatalities and serious injuries | 147         |

In addition to the TPP, the Council and its regional partners have completed several studies that directly address safety issues and propose strategies to improve safety in the metro area. These studies and plans include the <u>Minnesota Strategic Highway Safety Plan</u>; the <u>Congestion Management and Safety Plan (CMSP) IV</u>; the <u>Intersection Mobility and Safety Study (formerly Principal Arterial Intersection Conversion Study</u>); and applicable modal and county-produced safety plans. The Council completed a regional Pedestrian Safety Action Plan in the Fall of 2022. In addition, the Council is starting the Regional Safety Action Plan in 2023.

Efforts like <u>Towards Zero Deaths</u> and <u>Vision Zero</u> strive to achieve the long-term goal of eliminating fatalities and serious injuries on the transportation network. The Council supports these goals and will consistently work towards reducing fatalities and serious injuries.

#### Anticipated Effect of the Safety Performance Measures

The 2024-2027 TIP is anticipated to have a positive effect towards meeting the region's established safety performance targets. The TIP reflects \$116.4 million in FHWA Highway Safety Improvement Program (HSIP) funds, in addition to state and local match funding of \$4.9 million and \$41.9 million, respectively. These projects address both existing locations (reactive projects) and the design of newer projects (proactive projects) that pre-emptively address safety in their designs. Further, safety is a key scoring criterion for the strategic capacity, spot mobility/safety, roadway reconstruction/modernization, traffic management technology, multiuse trails and bicycle facilities, pedestrian facilities, and Safe Routes to School funding categories in the biennial Regional Solicitation for Transportation Projects. In addition to federal funding sources, the region has used a number of other revenue sources to improve transportation safety in the metro area. Examples include a number of county- and city-funded safety projects as well as MnDOT's CMSP funding set aside each year.

#### **MPO Investment Priorities**

The Council has adopted objectives and strategies intended to improve transportation safety. As outlined in the Transportation Policy Plan, a key objective is to reduce fatal and serious injury crashes and improve safety and security for all modes of passenger travel and freight transport.

Specific strategies the Council and its partners will use and implement to meet the safety objective include:

- Regional transportation partners will incorporate safety and security considerations for all modes and users throughout the processes of planning, funding, construction, and operation.
- Regional transportation partners should monitor and routinely analyze safety and security data by mode, severity, and location to identify priorities and progress.
- Regional transportation partners will support the state's vision of moving toward zero traffic fatalities and serious injuries, which includes supporting educational and

enforcement programs to increase awareness of regional safety issues, shared responsibility, and safe behavior.

- The Metropolitan Council and regional transit providers will provide transit police services and coordinate with public safety agencies to provide a collaborative approach to safety and security.
- Regional transportation partners will use best practices to provide and improve facilities for safe walking and bicycling, since pedestrians and bicyclists are the most vulnerable users of the transportation system.
- The Council and its regional transportation partners will work to ensure that police and public safety agency enforcement programs and actions on the region's transportation system do not create or perpetuate racial inequities.

## Pavement and Bridge Condition Performance Measures

#### **Council Activities and Progress**

The Council reviews and adopts pavement and bridge condition performance targets. As an MPO, the Council has the option to either plan and program to support the adopted MnDOT statewide targets or choose to adopt targets specific to the region. In the past, due to the difference in urban and rural areas, the Council chose to adopt metro-specific targets for non-interstate NHS pavement in good and poor condition. However, due to the uncertainty of the data from the COVID-19 pandemic, the Council chose to adopt the same targets as MnDOT. Table 3 depicts the existing metro area performance as well as the targets adopted by the Council in 2023.

| Measure                                               | Existing<br>Performance | Council<br>2025 Target |
|-------------------------------------------------------|-------------------------|------------------------|
| Bridges                                               |                         |                        |
| 1. % of bridges by deck area in good condition        | 28%                     | 35%                    |
| 2. % of bridges by deck area in poor condition        | 5%                      | 5%                     |
| Pavement                                              |                         |                        |
| 1. % of interstate pavement in good condition         | 70%                     | 60%                    |
| 2. % of interstate pavement in poor condition         | 2%                      | 2%                     |
| 3. % of non-interstate NHS pavement in good conditi   | ion 57%                 | 55%                    |
| 4. % of non-interstate NHS pavement in poor condition | on 0.5%                 | 2%                     |

#### **Table 3: Existing Conditions and Adopted Condition Targets**

#### Anticipated Effect of the Pavement/Bridge Performance Measures

The 2024-2027 TIP is anticipated to have a positive effect on the pavement and bridge performance measures, as there are projects programmed specifically for the purpose of improving bridge and pavement conditions. While both interstate and non-interstate NHS pavement conditions within the metro area are performing at a level greater than the targets, resources must be provided to ensure they continue to meet the needs of the region.

Currently, the metro area is not meeting the adopted target for the percent of bridges by deck area in good condition. Moving forward, the Council will continue to monitor bridge deck condition and explore mechanisms to ensure the future targets are met. Projects in the TIP that will help address bridge needs include:

• Kellogg Avenue / 3rd Street Bridge in St. Paul (164-158-028 and 164-158-028PRO)

- CSAH 158 over CP Railroad in Edina (027-758-006)
- Rehabilitation of 14 bridges on I-394 in Minneapolis and two bridges at the I-394 and I-94 interchange (2789-174)
- Rehabilitation of I-94 Bridge at Marion Street in St. Paul (6282-224)
- Repair I-94 bridges over St. Croix River (8281-06)
- US 169 at 36th Avenue in New Hope and Plymouth (2772-125)
- I-35W in Burnsville (1981-140, 1981-140S, 1981-140N, 1981-140TR, 1981-140BFP)
- Replace Pillsbury Avenue S. historic bridge over Midtown Greenway in Minneapolis (141-597-001)
- Replace 10<sup>th</sup> Avenue S. bridge over Midtown Greenway in Minneapolis (141-597-002)
- Replace I-35E bridge over Shepard Rd (6280-419)
- Replace US 169 bridge at 63<sup>rd</sup> Avenue in Brooklyn Park and Maple Grove (2772-124)
- Repair nine bridges, paint two bridges, and replace the superstructure on two bridges on I-94 and. I-35E in St. Paul (6282-216)
- Rehabilitation of 13 bridges on MN 280 (6242-83)
- Flood-sealing St. Anthony Bridges I-35W over Mississippi River in Minneapolis (2783-228)
- Repair 12 bridges on MN 100 from St. Louis Park to Brooklyn Center (2735-212)
- Redeck two US 52 bridges over I-494 in Inver Grove Heights (1928-91)
- Replace University Avenue and 4<sup>th</sup> Street bridges over I-35W (2783-168)
- Redeck Penn Avenue bridge over I-394 in Minneapolis (2789-196)
- Replace Nicollet Avenue Bridge over I-94 in Minneapolis (2781-552)
- Rehabilitate Nicollet Avenue Bridge over Minnehaha Creek and Minnehaha Parkway in Minneapolis (141-430-012)
- Replace CSAH 77 bridge over commercial railroad in New Brighton (062-677-035)
- Replace Bass Lake Road Bridge over Twin Lakes inlet in Brooklyn Center and Crystal (027-610-034)
- Replace Eden Prairie Road Bridge over TC&W Railroad in Eden Prairie (027-604-017)
- Replace Pioneer Trail Bridge over HCCRA Railroad in Eden Prairie (027-601-047)
- Replace two Central Avenue Bridges over Coon Creek and a box culvert bridge in Spring Lake Park and East Bethel (0208-165 and 0208-165S)
- Replace CSAH 1 bridge over HCCRA Railroad in Eden Prairie (027-752-039)

## System Performance Measures and Congestion Mitigation and Air Quality

## **Council Activities and Progress**

The Council adopted both the initial system reliability (shown on Table 4) and congestion mitigation and air quality (CMAQ) (Table 5) targets for the region during in early 2021. All of the targets associated with these measures are specific to the metro area.

The existing metro area performance for the percent of reliable person-miles traveled on the interstate system is approximately 91%. MnDOT established a state-wide target of 82%, which the Council also adopted for the metro area. Because almost all congestion within the State of Minnesota occurs within the Metro Area, the Council will usually adopt targets specific to the region that differ from the state-wide targets. However, the Council did not do so for 2023 due to the use of pandemic-era data, which likely inflates the existing reliability data. In the future, post-pandemic data will enable a better evaluation of system reliability and greater ability for the Council to establish a 2025 target.

For the same reason, the Council has also elected to adopt MnDOT's targets for the truck travel time reliability index measure. The use of pandemic-era data leads these targets to appear to aspire to declining performance. However, pre-pandemic data performance was only 69.5% for reliable person-miles traveled on the Interstate, 79.6% for of reliable person-miles traveled on the Interstate, 79.6% for of reliable person-miles traveled on the non-Interstate NHS, and a truck-travel time reliability index of 2.32. Post-pandemic data is likely to bring performance closer to these numbers. There is no consequence for the Council for not meeting these targets, and the State of Minnesota as a whole is likely to meet its adopted targets. The Council has chosen these targets as a mechanism to aim for improvement in reliability (versus likely post-pandemic performance) in the immediate future and prioritize highway projects integrated within the TIP thusly.

#### Table 4: Existing Conditions and Adopted System Reliability Targets

| Measure                                                           | Existing<br>Performance | Council<br>2023<br>Target | Council<br>2025<br>Target |
|-------------------------------------------------------------------|-------------------------|---------------------------|---------------------------|
| % of reliable person-miles traveled on the Interstate             | 91%                     | 82%                       | 82%                       |
| % of reliable person-miles traveled on the non-<br>Interstate NHS | 95%                     | 90%                       | 90%                       |
| Truck travel time reliability index                               | 1.49                    | <1.4                      | <1.4                      |

#### Table 5: Existing Conditions and Adopted CMAQ Targets

| Measure                                                                                                                                          | Existing<br>Performance | Council<br>2023<br>Target | Council<br>2025<br>Target |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------|---------------------------|
| On-road mobile source emissions – sum of<br>emissions reductions of pollutants, in kilograms<br>per day, for all projects funded with CMAQ funds | 0.0 kg/day              | 0.0 kg/day                | 0.0 kg/day                |
| % of non-single occupancy vehicles                                                                                                               | 27%                     | 28%                       | 29%                       |
| Peak hour excessive delay – annual hours of<br>delay per capita (delay is travel at less than 20<br>MPH or 60% of the posted speed               | 8.5                     | 8.5                       | 8.5                       |

Anticipated Effect of the System Reliability and Congestion Reduction Performance Measures In total, there is over \$115 million in CMAQ funding programmed for projects in the 2024-2027 TIP. Because the metro area spent less than three months with only a small area not in attainment, no mobile-source performance is shown. Nevertheless, CMAQ projects are valuable for air quality. The CMAQ projects included in the TIP include arterial bus rapid transit projects, the purchase of a number of transit vehicles; activities to market and incentive the use of carpools, vanpools, and ride matching programs; and projects aimed at retiming and optimizing traffic signal coordination.

The 2024-2027 TIP also includes projects that are anticipated to have a positive effect on mobility and system reliability. This includes a number of spot mobility enhancements as well as large set-asides for future mobility projects. Two examples include construction of a grade separation at US 212 and CSAH 51 in Carver County (010-596-013) and construction of a roundabout at CSAH 11 and Burnsville Parkway in Burnsville (019-611-013).

## Transit Asset Management (TAM) Performance Targets

Transit asset management (TAM), a best practice and a requirement under federal law, is a business model that prioritizes funding decisions based on the condition of transit assets. Transit providers are required to assess, track, and report on their assets to FTA, and develop annual targets for asset management to ensure a state of good repair. Transit providers also develop transit asset management plans that document the implementation actions for asset management within their transit systems. TAM plans must be coordinated with the Council, which is the region's MPO. The four FTA-required performance measures for transit asset management are:

- Rolling stock (buses and trains used for serving customers): The percentage of revenue vehicles (by type) that exceed the useful life benchmark.
- Equipment (vehicles used in a support role): The percentage of non-revenue service vehicles (by type) that exceed the useful life benchmark.
- Facilities: The percentage of facilities (by group) that are rated less than 3.0 on the <u>Transit Economic Requirements Model (TERM) Scale</u>.
- Infrastructure: The percentage of rail track segments (by mode) that have performance restrictions. Track segments are measured to the nearest one-hundredth of a mile.

The region's transit operators established regional performance targets in 2022. Table 6 summarizes the adopted targets:

| Measure                                                     | Target |
|-------------------------------------------------------------|--------|
| Rolling Stock: % exceeding useful life                      |        |
| Articulated Bus                                             | 18%    |
| Over-the-Road Bus                                           | 0%     |
| Bus                                                         | 14%    |
| Cutaway                                                     | 39.92% |
| Light Rail Vehicle                                          | 0%     |
| Other                                                       | 0%     |
| Commuter Rail Locomotive                                    | 0%     |
| Commuter Rail Passenger Coach                               | 0%     |
| Equipment: % meeting or exceeding useful life               |        |
| Automobiles                                                 | 29%    |
| Trucks/other Rubber Tire Vehicles                           | 21%    |
| Facility: % rated below 3 on condition scale                |        |
| Passenger/Parking Facilities                                | 0%     |
| Administrative/Maintenance Facilities                       | 0%     |
| Infrastructure: % of track with performance<br>restrictions |        |
| Light Rail                                                  | 1%     |

#### **Table 6: Adopted Transit Asset Management Targets**

#### Transit Investment Priorities

The Council's Transportation Policy Plan (TPP) outlines the goals, objectives, and strategies that are used to set transit investment priorities for the region. These factors, in turn, directly

guide the investment plan and transit projects programmed within the TIP. The TPP guides transit investments through the following objectives and strategies:

- Efficiently preserve and maintain the regional transit system in a state of good repair;
- Manage the regional transit network and respond to demand as deemed appropriate based on the Transit Market Area;
- Provide transit police services and coordinate with other public safety agencies to ensure the safety and security of the transit system;
- Promote alternatives to single-occupant vehicles and ensure transit services reach major job and commercial activity centers;
- Expand and modernize transit service, facilities, systems, and technology to meet demand, improve customer experience, and increase transit access to destinations.

The Council's <u>Fleet Management Procedures</u> provide guidance for minimum vehicle life and inform the TAM performance targets established by the region's transit providers. This document outlines the conditions used to determine if the replacement of assets is necessary or can be deferred, including the point at which fleet vehicles are eligible for mid-life rehab procedures. The Fleet Management Procedures also set the principles used for determining the end vehicle's useful life, a preventative maintenance schedule, and the process for the purchase of new vehicles.

Key pools of funds used to replace aging assets is FTA Sections 5337 and 5339, which are prioritized via the Regional Transit Capital Improvement Program (CIP), developed by Metro Transit and the suburban transit providers.

## Transit Safety Performance Measures Targets (PTASP)

#### Measures Overview

In order to reflect the broad and varied nature of public transportation, the FTA has identified standard Safety Performance Measures that can be applied to all modes of public transportation and are based on data currently submitted to the National Transit Database.

As part of transit provider agency safety plans (ASPs), the FTA requires transit providers to establish, by mode, safety performance targets in four Safety Performance Measure categories, shown in Table 7.

| Safety Performance Measure Category | Safety Performance Measure                            |
|-------------------------------------|-------------------------------------------------------|
| Fatalities                          | Total number of reportable fatalities                 |
| Fatalities                          | Fatality rate per total vehicle revenue miles         |
| Injuries                            | Total number of reportable injuries                   |
| Injuries                            | Injury rate per total vehicle revenue miles           |
| Safety Events                       | Total number of reportable safety events              |
| Safety Events                       | Rate of safety events per total vehicle revenue miles |
| System Reliability                  | Mean distance between major mechanical failures       |

 Table 7: Safety Performance Categories and Measures

The FTA provides the following definitions for safety performance measures in the National Transit Database:

- Reportable fatalities: These are fatalities reported to the NTD (deaths confirmed within 30 days) excluding deaths in or on transit property that are a result of illness or other natural causes. These include deaths due to collision, derailment, fire, hazardous material spill, act of God, system or personal security event, or other safety event.
- Reportable injuries: These include instances of damage or harm to persons that require immediate medical attention away from the scene because of a reportable transit safety event. Serious, injuries, which are defined based on severity, are always reportable, even if a person was not immediately transported from the scene for medical attention. This excludes injuries from assaults and other crimes.
- Reportable safety events: These include incidents (including accidents and derailments) meeting NTD major reporting thresholds for transit rail, bus, and paratransit. These events may occur on transit right-of-way or infrastructure, or at a transit revenue facility, maintenance facility, or rail yard. They may take place during a transit-related maintenance activity or otherwise involve a transit revenue vehicle. Examples of these events include:
  - o Collisions
  - o Fires
  - o Derailments (mainline and yard), including non-revenue vehicles
  - Hazardous materials spills
  - Acts of God<sup>2</sup>
- Major mechanical failures: The NTD defines major mechanical failures as "a failure of some mechanical element of the revenue vehicle that prevents the vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip because actual movement is limited or because of safety concerns. Examples of major

<sup>&</sup>lt;sup>2</sup> FTA. *National Transit Database Safety and Security Policy Manual*. January 2020. Accessed March 29, 2021 at https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/ntd/146986/2020-ntd-safety-and-security-policy-manual.pdf, pg. 18.

mechanical failures include breakdowns of brakes, doors, engine cooling systems, steering, axles and suspension.

#### **Targets Overview**

The Federal Transit Administration has requirements and provides some guidance for transit providers in setting their Safety Performance Targets (SPTs). Transit agencies are required to set SPTs by mode. Agencies are allowed to set targets for mode categories as broad as "fixed-route bus," "non-fixed-route bus," and "rail" when setting SPTs. Each of these mode categories corresponds to the variety of modes reported to the NTD.

Transit agencies are required to set targets for total number of incidents and rates of incidents. When establishing SPTs for total numbers of incidents, transit providers may consider the total number of incidents they expect to experience per year as they define it. They may choose calendar, fiscal or NTD reporting year. When defining rates for SPTs, agencies may base rates on per vehicle revenue mile, or any multiple thereof, such as per 100,000 or million vehicle revenue miles.

When establishing SPTs, transit providers may choose to set aspirational SPTs or targets that represent improvement over current safety performance levels, among other options. To the extent possible, the FTA recommends that transit providers set realistic SPTs that consider relevant safety goals and objectives. While transit providers may select SPTs that reflect an improvement in safety performance, they do not necessarily have to do so and could focus on maintaining current safety performance.

Transit providers are not required to report their SPTs to the FTA at this time. However, the FTA will ensure that transit agencies comply with the PTASP regulation by reviewing safety plans through the existing Triennial Reviews and State Management Reviews. The FTA has not established, and does not impose, penalties for transit providers that do not meet the SPTs they set.

#### **MPO** Responsibilities

The PTASP rule requires that transit providers make their SPTs available to states and MPOs. These providers must also coordinate with states and MPOs as the MPO sets the regional transit safety performance targets. MPOs must incorporate regional transit SPTs into their planning processes and documents, as is required for targets for all federal performance areas. In general, the Metropolitan Council can consider how the projects and programs it selects to receive federal funding improve transit safety outcomes. The Metropolitan Council would also have to incorporate regional transit safety performance targets into the Transportation Policy Plan. The Metropolitan Council would also have to incorporate the regional TSPs into the TIP and "to the maximum extent practicable, provide a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan," with the intent of linking investment priorities to regional transit safety performance targets.

#### Regional Transit Agency Safety Targets: Metro Transit

Metro Transit monitors performance and sets federally required targets for rail and fixed-route bus service. The Strategic Initiatives department of Metro Transit works with data collected from many sources to identify significant risk factors and trends in accidents and injuries, leading to informed recommendations for accident reduction programs and more efficient use of limited resources.

| Performance Target                                                    | Bus                            | Light Rail                     |
|-----------------------------------------------------------------------|--------------------------------|--------------------------------|
| Collisions                                                            | 3.8 per 100k Vehicle<br>Miles  | 0.6 per 100k Vehicle Miles     |
| Annual Fatalities from Vehicle<br>Operations                          | 0 per 100k Vehicle Miles       | 0 per 100k Vehicle Miles       |
| Annual Injuries from Vehicle<br>Operations                            | 62 per Calendar Year           | 100 per Calendar Year          |
| Rate of Injuries                                                      | 0.31 per 100k Vehicle<br>Miles | 2.08 per 100k Vehicle<br>Miles |
| Number of Safety Events                                               | 68 per Calendar Year           | 122 per Calendar Year          |
| Rate of Safety Events                                                 | 0.34 per 100k Vehicle<br>Miles | 2.54 per 100k Vehicle<br>Miles |
| Total Major Mechanical Failures                                       | 2,364                          | 192                            |
| System Reliability – Vehicle Mean<br>Distance Between Failures (MDBF) | 8,460 miles MDBF               | 25,000 miles MDBF              |

#### Table 8: Metro Transit Bus and Light Rail Safety Performance Targets

**Regional Transit Agency Safety Targets: Metropolitan Transportation Services Contracted Services** The Metropolitan Council's Metropolitan Transportation Services Contracted Services arrived at its transit safety performance targets in the development of its Agency Safety Plan. Safety performance targets are based on past performance of each mode that MTS Contracted Service operates.

| Performance Target                                              | Fixed-Route | Demand Response | Vanpool |
|-----------------------------------------------------------------|-------------|-----------------|---------|
| Estimated Annual Vehicle Revenue<br>Miles (VRM) (2021)          | 3,000,000   | 26,000,000      | 700,000 |
| Annual Fatalities                                               | 0           | 0               | 0       |
| Fatalities per 100k VRM                                         | 0           | 0               | 0       |
| Annual Injuries                                                 | 3           | 11              | 0       |
| Injuries per 100k VRM                                           | 0.1         | 0.042           | 0       |
| Annual Safety Events                                            | 4           | 34              | 0       |
| Safety Events per 100k VRM                                      | 0.133       | 0.13            | 0       |
| Annual Major Mechanical Failures                                | 5           | 300             | 0       |
| System Reliability – Miles Between<br>Major Mechanical Failures | 600,000     | 86,667          | 700,000 |

## Table 9: Metropolitan Transportation Services Fixed-Route, Demand Response, and Vanpool Safety Performance Targets

#### Regional Transit Agency Safety Targets: Minnesota Valley Transit Authority

MVTA's transit safety performance targets are based on the five-year average of performance metrics submitted to the National Transit Database. Performance metrics that formed the base

line for the agency's performance metrics were gathered from annual reports submitted between 2015 and 2019.

| Performance Target                   | Fixed-Route Bus |
|--------------------------------------|-----------------|
| Fatalities (Total)                   | 0               |
| Fatalities (per 100 thousand VRM)    | 0               |
| Injuries (total)                     | 8.4             |
| Injuries (per 100 thousand VRM)      | 0.236           |
| Safety Events (total)                | 11.6            |
| Safety Events (per 100 thousand VRM) | 0.326           |
| System Reliability (VRM/failures)    | 9.000           |

#### Regional Transit Agency Safety Targets: Southwest Transit

Southwest Transit's transit safety performance targets are based on the five-year average of performance metrics submitted to the National Transit Database. Performance metrics that formed the base line for the agency's performance metrics were gathered from annual reports submitted between 2015 and 2019.

## Table 11: Southwest Transit Fixed-Route and Demand Response Safety Performance Targets

| Performance Target                  | Fixed-Route | Demand Response |
|-------------------------------------|-------------|-----------------|
| Annual Fatalities                   | 0           | 0               |
| Fatalities per 100k VRM             | 0           | 0               |
| Annual Injuries                     | 1           | 1               |
| Injuries per 100k VRM               | 1           | 1               |
| Annual Safety Events                | 2           | 1               |
| Safety Events per 100k VRM          | 1           | 1               |
| System Reliability (VRM / Failures) | 25,000      | 53,000          |

The Council supports the efforts to move towards a performance-based planning approach, and will continue to work closely with regional, state, and federal partners to proactively establish and monitor both the required federal and the regionally adopted performance measures over time. Moving forward, the Council will continue to devote substantial resources to this effort and work closely with stakeholders to assess the federal targets and the regional performance measures and adjust to changes in the performance of the system by shifting regional investment priorities.

# 4. PROJECT SELECTION PROCESSES AND CONSISTENCY WITH FINANCIAL RESOURCES AND ADOPTED TRANSPORTATION PLAN

This chapter discusses the sources (federal, state, regional, local) and amount of transportation funds available for projects and programs in the region; the processes used to select projects and programs for inclusion in the TIP; the balance between costs for selected projects and resources; and project consistency with the region's MTP, the Transportation Policy Plan (TPP). A key element in the TIP fiscal constraint analysis is the balance between anticipated revenues and project costs.

#### Processes to Allocate Federal and State Transportation Funds

Several processes are used to allocate federal and state transportation funds to the Twin Cities Metropolitan Area. Projects have been selected for inclusion in the TIP by Congress (federal High Priority Projects and FTA Capital Investment Grants program), the TAB Regional Solicitation, MnDOT Metro District, and Council selection for regional transit providers.

Federal highway funding that goes to the TAB's Regional Solicitation and to MnDOT Metro District is allocated by federal and state formulas. For federal and state highway funding, MnDOT uses a process to allocate the funds to the state's eight Area Transportation Partnership (ATP) regions, one of which covers the MnDOT Metro District. This process ensures the regional TIPs and the State Transportation Improvement Program (STIP) meet the federal fiscal constraint requirement. The MnDOT fund allocation process has four steps:

- The MnDOT Office of Transportation System Management (OTSM) identifies the amount of funds available to each ATP for the TIP period from the STBG Program, CMAQ, and HSIP programs. This funding amount is called the "funding target." The funding targets are sent to the ATPs for comment along with guidance for draft TIP preparation.
- 2. The ATPs, of which TAB is one, develop their draft ATP TIPs (ATIPs) using their funding targets. MnDOT Metro District completes most of this work.
- 3. ATIPs are provided to the MPOs, who create their TIPs.
- 4. OTSM reviews the draft TIPs, confirms the total highway funding amount programmed matches the total expected funding, and confirms fiscal constraint for the highway funding. All of the draft TIPs contribute to the draft State Transportation Improvement Program (STIP).
- 5. OTSM circulates the draft STIP to the ATPs. Each ATP may then modify and adopt its final TIP and submit it to MnDOT for inclusion into the final STIP.

Some transit funding is allocated by federal formula (Section 5307, Section 5310, Section 5311, Section 5337, and Section 5339), but funding for the FTA Capital Investment Grants program (Section 5309) is secured through a national competition. Section 1 (Introduction) includes a list of each federal transit funding program and describes eligible projects. Section 5337 and 5339 funds are provided to the Council as the region's designated federal recipient and used to maintain the rail system and purchase fleet for all regional providers. Section 5307 is allocated among regional providers according to principles adopted by the Council through action 2001-49. Section 5309 is discretionary Capital Investment Grants (e.g. New Starts and Small Starts) funding appropriated by Congress to major transit capital projects. The funding is awarded to the Metropolitan Council after a major competitive process involving environmental review, preliminary engineering and design, and obtaining commitments of 50 percent of the total cost of the project by local cost-sharing partners. Section 5310 and Section 5311 funds are provided to the MnDOT Office of Transit as the State's designated agent.

#### Resources Available 2024–2027

All federally funded projects require a local match provided by the sponsoring agency. This local match can come from state trunk highway funds, state general funds, state bond funds, motor vehicle sales tax (MVST) funds, regional transit capital bond funds, city or county general funds, county transportation sales tax funds or from funding from other agencies. The local match funds add to the resources available to pay for projects in the TIP.

Transportation resources available to the region for highway, transit, and non-motorized projects are just over \$6.1 billion over the 2024 to 2027 period (See Tables 13, 14, and 15). These funds include capital investments for highway, transit, and non-motorized modes and some operating funds for the metropolitan transit systems. Highway programs such as the Surface Transportation Block Grant (STBG) Program also provide funding for non-motorized investments listed as well as bicycle and pedestrian elements of roadway projects.

The approximate amounts programmed by mode are displayed in Figure 4. These numbers are approximate because many projects, particularly roadway projects, include investments designed for more than one mode and are listed with the primary mode served. The percent of the region's TIP funding being invested in transit is slightly higher than highways/roads. This is largely due to the fact that several large transitways, including the Green Line Extension, Blue Line Extension, and Gold Line are included in the TIP years.

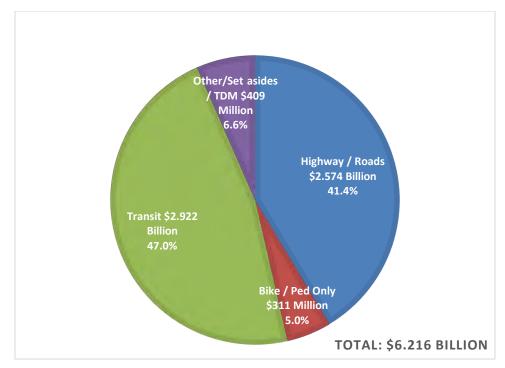

Figure 4: Approximate Amount Programmed by Primary Mode Served.

Many highway projects include significant bicycle and pedestrian elements such as trails, sidewalks, streetscape improvements and dedicated bike lanes and shoulders. The costs of these elements are not allocated to "Bike/Ped Only" in this figure. Overall spending on bicycle and pedestrian infrastructure is higher than reflected in the "Bike/Ped Only" figure, which is the approximate sum of funds for projects dedicated solely for bicyclists and/or pedestrians. "Other/Set-asides" include all projects that do not directly serve a mode such as right-of-way purchase or environmental work.

#### Highways and Roads

The traditional highway funding sources available to the region are summarized in Table 14. The four-year total is approximately \$3.3 billion and includes \$1.5 billion of federal formula funds and \$511 million of Minnesota State Trunk Highway funds.

MnDOT also uses the advanced construction (AC) process to extend its available resources. MnDOT constructs federal aid projects in advance of the apportionment of authorized federal aid funds. MnDOT has to meet a number of conditions to use the AC process. MnDOT can commit future federal funds to projects as long as they go through the normal FHWA approval and authorization process. The projects using AC must be fully encumbered in the state budget for both the amount of state funds and the federal AC amount. The state funds available at contract letting must equal 100% of the local match of federal funds. This is normally 10 or 20 percent of the project costs. The AC amounts must be shown in the TIP (The detailed tables in Appendix A identify AC by project.). The AC must be shown in the year incurred and in each year the conversion takes place. Sufficient cash must exist to make project payments until AC is converted or the amount of work to be undertaken in a given construction season that does not exceed the actual federal funds available for that year. The AC funds that will be used by the region by year are shown in Table 12.

|      | Advance Construction | Possible AC Payback |
|------|----------------------|---------------------|
| 2024 | 28                   | 67                  |
| 2025 | 22                   | 27                  |
| 2026 | 45                   | 28                  |
| 2027 | 35                   | 45                  |

#### Table 12: Advanced Construction Funds (Millions)

Local funds are necessary to match the federal transportation funds. The majority of the projects on the trunk highway system are matched with trunk highway funds included in the targets and not in the local match figure. In all other cases, the federal funds are matched by city or county funds, regional transit capital or operating funds, or funds from other agencies such as the Minnesota Department of Natural Resources. At a minimum, these funds represent 20 percent of the project cost (aside from HSIP, which requires a 10 percent non-federal match), although this can be significantly higher. Local funding represents \$816 million over four years.

#### Transit

Transit funds available to the region in 2024-2027 are summarized in Table 15. Included are federal transit funds and regional capital bonds used to match federal funds. This table does not show any highway funds allocated to transit. An estimated \$1.7 billion in federal transit funds will be received by the region in the next four years.

The region generates transit capital and operating funds from four principal sources: fares, the state motor vehicle sales tax for operations, regional property taxes dedicated to repaying bonds that fund capital projects, and state general funds that are directed to the region's ADA service, the regular transit service or to repay state bonds for transit projects. The suburban

transit providers<sup>3</sup> may also use local general fund money to subsidize operating cost or to match federal funds. Regional Capital Bonds and other local funds of \$1.1 billion will be used to match federal transit funds (including Section 5309) and to locally fund various transit capital investments.

| Table 13: Twin Cities Transportation Improvement Program; Four-Year Summary by |
|--------------------------------------------------------------------------------|
| Funding Source                                                                 |

| Advanced Construction (additional authorization available against future funds) |         | \$131 Million  |  |  |
|---------------------------------------------------------------------------------|---------|----------------|--|--|
| TOTAL:                                                                          |         | \$6.1 Billion  |  |  |

## Project Selection Processes and Criteria

The sources of federal transportation funds that come to the region are summarized in Table 16, along with the processes followed for project selection and the agency that is responsible for each selection process. These processes are described on the following pages.

| Funding Category                                     | Project Selection Process Followed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Program (NHFP)                                       | MnDOT Central Office process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Surface Transportation Block<br>Grant (STBG) Program | Federal funding program that accommodates projects on any roads<br>that are not functionally classified as local or rural minor collectors,<br>along with pedestrian projects, recreational trails, and Safe Routes to<br>School projects. Bridge projects may be on any public road. Includes<br>Transportation Alternatives Program (TAP), which is primarily used<br>for bicycle, pedestrian, and Safe Routes to School projects in the<br>TIP. Some STBG Program funding is distributed through a<br>competitive solicitation process conducted by TAB while other<br>funding is distributed by MnDOT. |
| Congestion Mitigation and Air                        | Federal funding program that funds projects that will contribute air                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Quality Improvement (CMAQ)                           | quality improvements or provide congestion relief. Funding is                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Program                                              | distributed through the competitive regional solicitation process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Promoting Resilient Operations                       | Federal funding program aimed at building resiliency to natural                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| for Transformative, Efficient,                       | hazards and disasters. 2024 – 2027 funds were distributed through                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| and Cost-Saving Transportation                       | the Regional Solicitation while distribution for future-year funds will                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| (PROTECT)                                            | be decided upon in the future.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Carbon Reduction Program<br>(CRP)                    | Federal funding program to fund projects that will help reduce<br>transportation emissions, defined as carbon dioxide (CO2), from on-<br>road highway sources. 2024 – 2025 funds were distributed through<br>the Regional Solicitation while distribution for future-year funds will<br>be decided upon in the future.                                                                                                                                                                                                                                                                                     |
| Bridge Funding Program                               | Federal funding aimed at bridges both on and off the federal aid<br>system. Many 2024 – 2026 funds were distributed through the<br>Regional Solicitation while distribution for future-year funds will be<br>decided upon in the future. The program is not assumed to continue<br>beyond the end of IIJA (2026).                                                                                                                                                                                                                                                                                          |
| Highway Safety Improvement<br>Program (HSIP)         | Federal funding program aimed at reducing traffic fatalities and<br>serious injuries. Some HSIP funding is distributed through a<br>competitive solicitation process conducted by MnDOT and TAB while<br>other HSIP funding is distributed by MnDOT. The Highway Rail<br>Grade Crossings & Rail Safety program is included in this category.                                                                                                                                                                                                                                                               |
| Miscellaneous Federal Funding<br>Programs            | Less frequently used programs including Bridge Replacement Off-<br>System (BROS) and Federal Land Access Program (FLAP).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| FTA Section 5307                                     | Regional Transit Capital Improvement Program (CIP) developed by Metropolitan Council with regional transit provider assistance                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| FTA Section 5309                                     | Selected and appropriated by Congress                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| FTA Section 5310                                     | MnDOT Office of Transit/statewide competitive process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

 Table 16: Summary of Federal Project Funding Categories and Selection Processes

## Project Selection Process for Additional Federal Highway Funds by MnDOT Metro District with Assistance from the Capital Improvement Committee

MnDOT Metro District, with guidance from its partners through the Capital Improvement Committee (CIC), identifies and selects projects on the state trunk highway system to be funded using National Highway Performance Program (NHPP) funds and included in the TIP. The CIC's membership includes representation from MnDOT Metro District, the TAB, the Metropolitan Council, and six representatives of the TAB's Technical Advisory Committee (TAC). The CIC discusses project programming, coordination, and timing issues for MnDOT Metro District leadership (in the Metro District Program Committee) and the TAC Funding and Programming Committee. Investment decisions with statewide impacts may be elevated to the Transportation Program Investment Committee (TPIC) for consideration. TPIC membership includes the Metro District Engineer and other agency-wide leadership.

The Metropolitan Council and MnDOT have cooperatively identified priorities to be used in the selection of major projects to be included in the TIP. The priorities and projects are drawn from the TPP and the <u>Minnesota State Highway Investment Plan (MnSHIP)</u>, 2018-2037. Investments and specific projects are identified consistent with priorities outlined in those plans, which over the next 10 years focus primarily on preservation of existing infrastructure with other investments in safety, bicycle/pedestrian facilities, and highway mobility.

### Competitive Regional Solicitation Project Selection Process

The Metropolitan Council and its Transportation Advisory Board (TAB) conduct a competitive process for the selection of local projects for federal funding and inclusion in the TIP. The process, known as the Regional Solicitation, was designed by the region's partners to help the region implement its plans and high priority projects and programs. The TAB's Regional Solicitation allocates approximately 18 percent of the federal funds that are available to the region. The Regional Solicitation process directs federal funds to a variety of locally initiated projects that meet regional transportation needs. These locally initiated projects must be consistent with the region's TPP. Projects using STBG, CMAQ, PROTECT, and HSIP funds are selected through the Regional Solicitation process. The priorities for project selection are based on the goals and policies in Thrive MSP 2040 and Transportation Policy Plan.

#### **Regional Solicitation Development**

The Regional Solicitation has been conducted roughly every other year since the early 1990s. It has been in its present form since 2014, when TAB selected prioritizing criteria. Each two-year cycle includes a public comment period in the months leading up to finalization of the Solicitation. See the 2022 <u>Regional Solicitation Public Comment Report</u>.

The 2022 Regional Solicitation selected projects for federal highway funding primarily in program years 2028 and 2029 in the following categories:

- Roadways Including Multimodal Elements
  - Traffic Management Technologies
  - o Spot Mobility and Safety
  - Roadway Strategic Capacity
  - o Roadway Reconstruction and Modernization
  - o Bridges
- Bicycle and Pedestrian Facilities
  - o Multiuse Trails and Bicycle Facilities

- Pedestrian Facilities (Sidewalks, Streetscaping, and ADA)
- o Safe Routes to School (Infrastructure Projects)
- Transit and Travel Demand Management
  - Arterial Bus Rapid Transit
  - o Transit Expansion
  - o Transit Modernization
  - Travel Demand Management
- Unique Projects
- Highway Safety Improvement Program (HSIP)

Qualifying and prioritizing criteria, used to evaluate each project, vary by mode and category. The evaluations produce a score and category ranking for each project, based on the project's anticipated performance for each prioritizing criterion. The qualifying and prioritizing criteria were developed consistent with, and for the purposes of, implementing regional transportation priorities and plans. Examples of qualifying criteria and prioritizing criteria are listed below.

Scoring committees, comprised of local partners, state agency staff, and Metropolitan Council staff evaluate and rank all categories of projects for the Regional Solicitation. Recommended projects are reviewed and approved by the Funding and Programming Committee, which, using the scoring committee rankings, recommends funding allocation options to be considered by TAC and recommended to TAB. TAB approves a list of projects and funding allocation developed through the Regional Solicitation process and the Metropolitan Council concurs with the list of projects.

While the assigned scores differentiate the projects within each funding category, how many projects to fund within each category needs to be decided. Following scoring evaluation, TAB, with the assistance of TAC and the TAC Funding & Programming Committee, considers "funding scenarios" as a way to determine how many projects to fund from each funding category. These scenarios are shown as themes, such as following historic modal distribution, funding more (lower-cost) projects, assuring projects are funded in each county, favoring modernization over expansion, and focusing on a particular mode. Some parameters, such as a range of funds to be dedicated to each mode, are set prior to release of the Regional Solicitation.

The 2024 Regional Solicitation applications are due to be released in September of 2023.

The HSIP projects are evaluated and awarded funds through a process administered by MnDOT Metro District. TAB reviews and approves the criteria MnDOT develops for HSIP project evaluation along with the prioritized list of projects for funding.

#### Examples of Qualifying Criteria

- The project must be consistent with the policies of Thrive MSP 2040 and the region's Transportation Policy Plan, adopted by the Metropolitan Council.
- The project must implement a solution to a transportation problem discussed in a local or county comprehensive plan and/or in an approved Capital Improvement Program (CIP) of a local, regional, or state agency.
- The proposer must show that the project has been coordinated with all affected communities, the appropriate transit operator, and other levels of government.

 Public agency sponsors must either have a current Americans with Disabilities Act (ADA) self-evaluation (for those that employ fewer than 50 people) or transition plan (for those that employ 50 or more people) that covers the public right of way/transportation, as required under Title II of the ADA.

#### **Examples of Prioritizing Criteria**

- Role in the regional transportation system and economy
- Current or potential usage
- Equity and housing performance
- Infrastructure age
- Congestion reduction and air quality
- Safety
- Multimodal facilities and existing conditions
- Risk assessment
- Cost effectiveness

#### Environmental Justice and Prioritizing Criteria

To assist with addressing Executive Order 12898, Federal Actions to Address Environmental Justice in Minority and Low-Income Populations, as well as *Thrive MSP 2040*, equity, including affordable housing, was included in the 2014 Regional Solicitation as part of the prioritization criteria. This criterion has continued to be used with some refinement through the 2022 Regional Solicitation. In November 2019, the Council hosted workshops for potential applicants on engaging underrepresented populations. The socio-economic equity measure asks applicants to address engagement with, benefits for, and impacts on people of color, people with low incomes, people with disabilities, youth, and older adults.

#### **Regional Solicitation Selected Projects**

A summary of the federal funding allocated by category through the Regional Solicitation process is shown in Table 17. This table reports only the federal funds allocated to the projects and does not include the local match.

| Program Category                          | 2024    | 2025  | 2026  | 2027  | Total |
|-------------------------------------------|---------|-------|-------|-------|-------|
| Congestion Mitigation Air Quality (CMAQ)  | \$29.8  | 37.7  | 43.8  | 4.4   | 115.7 |
| Transportation Alternatives (TA)          | \$22.5  | 6.2   | 2.9   | 0     | 31.6  |
| PROTECT                                   | \$5.0   | 0     | 0     | 0     | 5.0   |
| Carbon Reduction Program (CRP)            | \$8.2   | 8.5   | 0     | 0     | 16.7  |
| Surface Transportation Program (STP)      | \$76.6  | 94.2  | 87.1  | 143.9 | 401.8 |
| Highway Safety Improvement Program (HSIP) | \$16.5  | 16.1  | 19.6  | 24.3  | 76.5  |
| TOTALS                                    | \$158.6 | 162.7 | 153.4 | 172.6 | 647.3 |

Table 17: Summary of Federal Funding Allocated through the TAB'S Regional Solicitation for Projects in State Fiscal Years 2024-2027 (In millions; Federal Amount only)

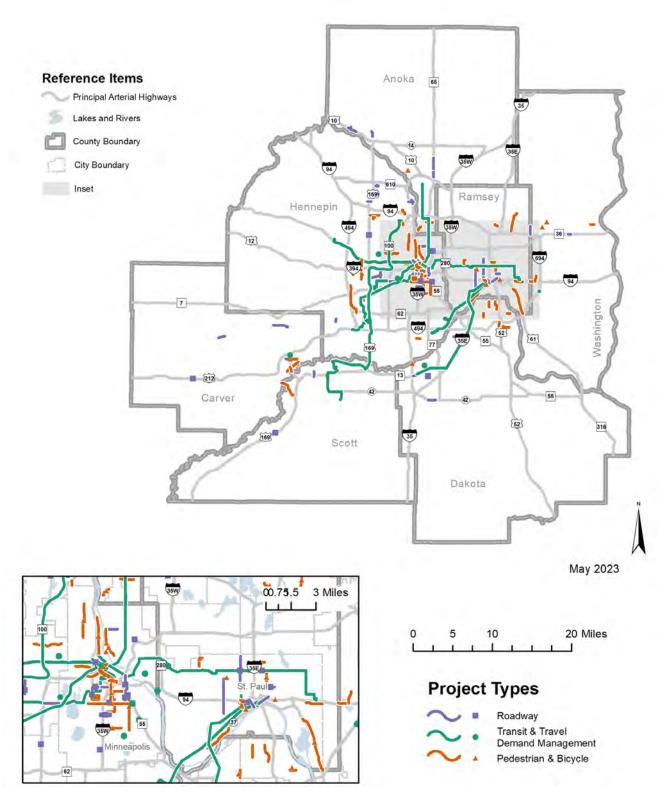

Figure 5: 2020 and 2022 Regional Solicitation Selected Projects

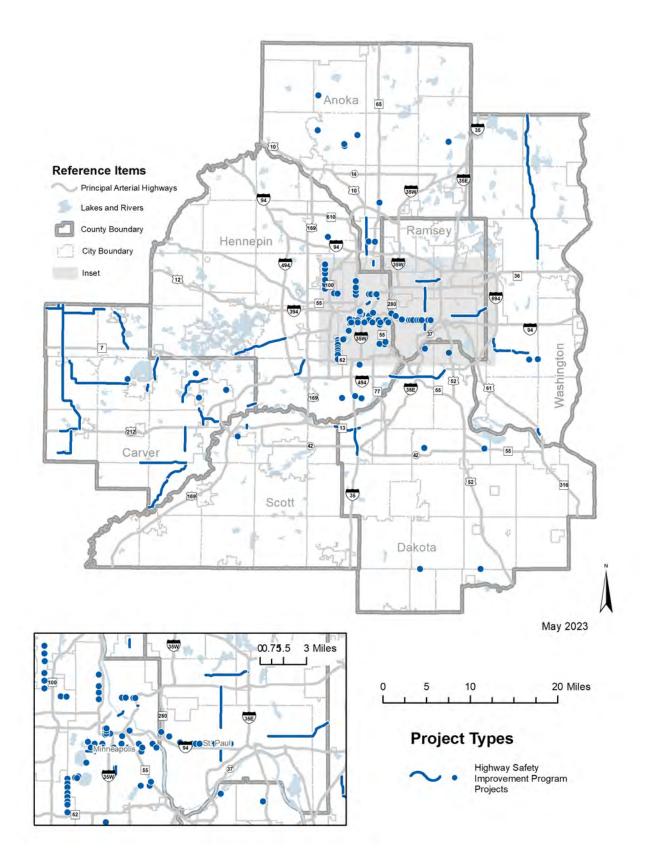

Figure 6: 2020 and 2022 HSIP Regional Solicitation Selected Projects

# Transit Project Selection for Sections 5307, 5337, and 5339 Capital Investment Grants Program Funding

Federal transit funds come to the Metropolitan Council as the designated federal recipient for the region. The Council uses the federal funds for regional provider bus, light rail vehicle, and locomotive purchases; bus and rail vehicle rebuilding; shelters; garages; guideway improvements such as shoulder bus lanes, light rail track and systems; and maintenance and operations. These projects are identified in the Council's six-year Capital Improvement Program, which is a tool used to implement the regional transportation plan, with regional transit provider assistance. The Council also submits projects for funding with federal transit funds and Regional Capital Bonds.

# Transit Project Selection for Section 5309 Capital Investment Grants Program Funding

Capital Investment Grant (section 5309) funding is discretionary federal funding that is appropriated directly to projects by Congress. These projects are identified in the region's Transportation Policy Plan in coordination with local partners, who often lead the early planning efforts, and with the implementing agencies, usually the Council through its operating division, Metro Transit.

# Transit Project Selection for Sections 5310 and 5311 Funding

Federal Transit Administration (FTA) Section 5310 and 5311 funds are allocated by MnDOT's Office of Transit. Section 5310 funds are competitively allocated through a statewide process to non-profit agencies for vehicles. Projects are selected annually so each year the TIP is revised or amended and a new list of projects is included for the next fiscal year. Section 5311 allocates operating funds for small city transit service. There are three transit services in the region that receive funds.

#### Balance of Selected Projects with Available Financial Resources

The IIJA requires that the region's TIP must be consistent with funds reasonably expected to be available. This is called fiscal constraint and means the projects recorded in the TIP cannot significantly exceed expected revenues.

For federal and state highway funding, the state and region have agreed on a process that ensures a balance exists between federal highway funding resources and expenditures as discussed at the beginning of Chapter 3. The highway project program costs identified in Table 18 for 2024 to 2027 closely match the funds available as shown in Table 14, and the highway project program costs identified in Table 19 for State Fiscal Year 2024 closely match the funds available as shown in Table 14. Anticipated highway revenues balance with expenditures and demonstrate fiscal constraint.

For federal, state, and regional transit funding, federal guidance requires transit funds match the approved project costs in the TIP. The projects funded with federal transit and local matching funds for 2024 have a total value of approximately \$403 million (Table 15).

#### State Highways and Local Transportation Operations and Maintenance

MnDOT and metro area cities and counties are able to fund the maintenance and operations of the region's highway system over the course of the 2024-2027 TIP. The 2040 TPP forecasts \$10 billion in spending for preservation of existing state highway assets and \$26 billion for local roadway capital expenditures from 2015 to 2040. The TPP's increased revenue scenario shows an additional unfunded state highway need of \$3-5 billion during this time frame.

\*\*Advanced construction is shown in Tables 18 and 19 but the AC amounts are not included in the totals.

# Consistency with the Regional Transportation Plan and Priorities

All projects in the TIP must be consistent with the region's <u>2040 Transportation Policy Plan</u> (<u>TPP</u>). The region's transportation goals are:

- Transportation System Stewardship: Sustainable investments in the transportation system are protected by strategically preserving, maintaining, and operating system assets.
- Safety and Security: The regional transportation system is safe and secure for all users.

- Access to Destinations: People and businesses prosper by using a reliable, affordable, and efficient multimodal transportation system that connects them to destinations throughout the region and beyond.
- Competitive Economy: The regional transportation system supports the economic competitiveness, vitality, and prosperity of the region and state.
- Healthy Environment: The regional transportation system advances equity and contributes to communities' livability and sustainability while protecting the natural, cultural, and developed environments.
- Leveraging Transportation Investments to Guide Land Use: The region leverages transportation investments to guide land use and development patterns that advance the regional vision of stewardship, prosperity, livability, equity, and sustainability.

The TPP contains lists of short- and long-range transportation projects programmed from 2020 through 2029. The projects identified in this TIP are either programmatically or specifically identified in the TPP adopted by the Metropolitan Council on November 18, 2020, with FHWA/FTA conformity determination established on December 4, 2020. See the TPP on the *Metropolitan Council's website*.

# Plan Implementation Progress

# Status of Major Projects

Federal TIP guidance requires the progress made on implementing the region's transportation plan be reported annually. Tables 20 and 21 and Figure 7 identify the major highway and transit projects in the 2024-2027 TIP, cost, and status of each. In recent years, major projects obligated (and, therefore, not included in this TIP) include:

- <u>I-94 Oakdale to St. Croix long term pavement preservation project</u> includes safety and traffic flow improvements. Construction started in 2022 with completion expected in 2024. (Project 3 on Table 20)
- <u>MN 52 Hampton project extends the pavement life.</u> Construction began in 2022 and completion is expected in 2024. (Project 9 on Table 20)
- <u>Conversion of US 169 in Elk River to a Freeway</u>. Construction started in 2022 and completion is expected in 2024. (Project 4 on Table 20)
- <u>I-494 MnPASS and Directional Ramp</u> includes MnPASS lane and interchange work.
- <u>US 10 interchange construction at CSAH 56 (Ramsey Blvd NW) and CSAH 57 (Sunfish</u> <u>Lake Blvd NW) in Ramsey</u> over BNSF railway and adjacent frontage roads. Construction started in 2023 and completion is expected in 2025. (Project 11 on Table 20)
- <u>US 10 bridge replacement and reconstruction of MN 47 / US 169 / Ferry Street</u> interchange, auxiliary lanes, noisewalls, ADA improvements. Construction started in 2022 and completion is scheduled in 2024. (Project 2 on Table 20)
- <u>Metro E Line Arterial Bus Rapid Transit</u> is targeted to open in 2025. (Project 20 on Table 21)

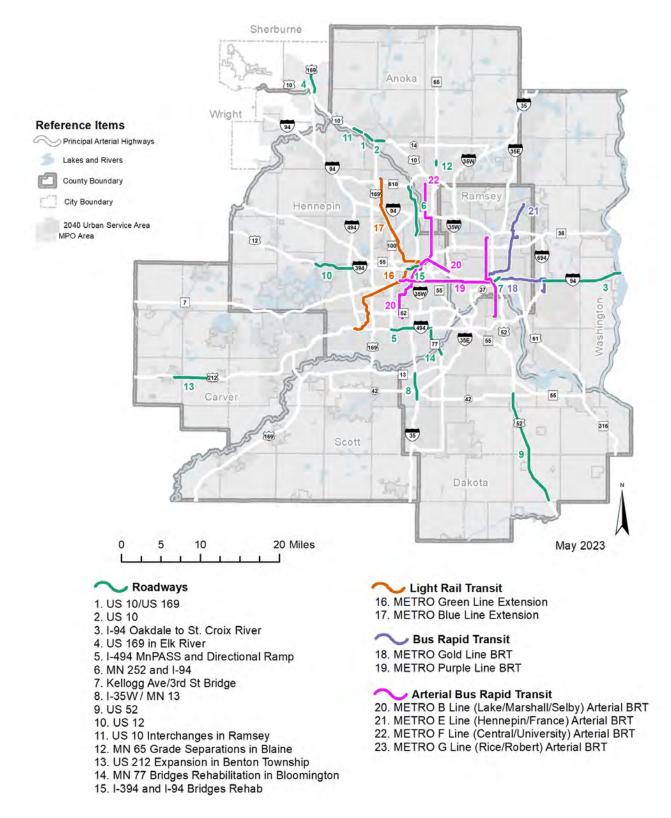

During the past year, construction was completed on the following major projects (Projects no longer included in Table 20 or 21):

- Bridge Rehabilitation on Minnesota Highway 65 at 3<sup>rd</sup> Avenue South over the Mississippi River in Minneapolis. Construction was completed in 2023.
- <u>Metro D Line Arterial Bus Rapid Transit</u> is in operation.

The following major project is being included in the TIP for the first time:

• Maintenance and reconstruction on five bridges on Minnesota 77 in Bloomington

All of the major projects are either specifically included in the region's Transportation Policy Plan or are consistent with the Plan's policies.

# Figure 7: Major Projects Shown in Tables 20 and 21

# Table 20: Status of Major Highway Projects

| Project                                                                               | Cost<br>Estimates                            | Year of<br>Last SP# | Project Status/Comments                                                                                                                                                                 |
|---------------------------------------------------------------------------------------|----------------------------------------------|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# Key to Tables

The tables are broken into the various "most likely" funding categories and are sorted by: Local/MnDOT, Agency, Trunk Highway, and State Project Number. The description of each column is shown below.

Yr The state fiscal year the project is scheduled to be let.

PRT The major ("parent") project this project is a part of - see attached list.

Route The highway the project is located on. A "999" means multiple routes or a location has yet to be determined.

Proj Num The TIP project number.

Prog MnDOT Program categories

Project Total Total estimated cost of project.

- FHWA \$ or FTA \$ Federal funding for the project.
- DEMO \$ Total federal demonstration funding for the project.
- AC \$ Funding to be reimbursed in a future program year.
- State \$ MnDOT state funding for the project.
- Other \$ Total contribution from the local agency involved in the project.
- Agency The agency with jurisdiction over the project.
- RS Regionally significant projects are denoted with "RS" in this column.

# **MnDOT Metro District Construction Projects**

# 2024-2027 Parent Projects

These are significant projects that will be constructed over a number of years and divided into numerous small projects. The Parent number is provided in a separate column on the tables in Appendix A to help the reader identify these projects.

| Parent<br>Number | Highway | Location                                         | Description                                                                         | Expansion | Lanes<br>Before | Lanes<br>After |

# **APPENDIX B**

# TRANSPORTATION IMPROVEMENT PROGRAM (TIP) AMENDMENTS: STREAMLINED PROCESS (ADOPTED BY TAB: FEBRUARY 19, 2020)

# **Conditions for Using a Streamlined Amendment Process**

A TIP amendment request can be streamlined if it meets all of these criteria:

- 1) The project is consistent with the adopted Transportation Policy Plan.
- 2) The project is not a regionally significant project\* (as defined in the adopted Transportation Policy Plan) or is a regionally significant project currently in the TIP but is not changing in any way that will impact the regional significance of the project.
- 3) The project does not relate to a formal scope change (per the Transportation Advisory Board's Scope Change Policy) before the committee.

# Process

For projects in the PM10 maintenance area, the Minnesota Interagency Air Quality and Transportation Planning Committee will, in its review of the project for air quality conformity determination; any amendments involving changes unable to be exempted from an air quality conformity determination will be deemed regionally significant. If the project meets the three criteria described above, Metropolitan Council staff prepares an action item for Transportation Advisory Committee (skipping TAC Funding and Programming Committee). The item will be discussed at the TAC Executive Committee prior to TAC. If approved by TAC, the action item will be placed on the consent agenda for TAB, Transportation Committee, and the Metropolitan Council. Information about streamlined amendments shall be presented as information to the Funding and Programming Committee.
