

# Regional Plant Improvements: Program 8078

## *Description:*

This Program provides funding to address small near-term capital improvements at 8 regional plants (see table below).

## *Purpose and Justification:*

The project provides for the implementation of improvement and renewal projects for components and systems at the regional plants. These projects are outside of the realm of major plant expansion. The projects may also be in response to items that were missed or not fully optimized in other major regional plant replacement/renewal projects.
