

Seneca Interceptor System Rehabilitation: Program 8080

Description:

This project consists of the rehabilitation of portions of the interceptors that serve the Seneca WWTP. It includes Interceptors 7030, 7033, 3-BV-35 and 3-BV-39 in the City of Burnsville; Interceptors 7031, 7804, 3-BN-496, and 3-BN-499 in the City of Bloomington; and Interceptor 3-ET-37 in the City of Eagan. The project will use cure-in-place pipe or slip lining to address pipe corrosion. The project also includes improvements to the maintenance access structure (MAS) in the Seneca interceptor system.

Purpose and Justification:

Inspections of the interceptors that serve the Seneca WWTP have revealed corrosion damage. The corrosion is extensive and has resulted in significant damage to the interior concrete surfaces of the interceptors and maintenance structures.

Current Projects:

Project Title	Project ID
Bloomington Interceptor Rehab.	808060
Burnsville Interceptor Improvements	808065
Maintenance Access Structures	808070
Seneca WWTP Inlet Repair / Replacement	808080
