

Metro Plant Solids Management Improvements Project

SUSTAINABLE INCINERATION

Metropolitan Council Environmental Services (MCES) plans to add capacity and renew existing wastewater solids processing facilities at the Metropolitan Wastewater Treatment Plant (Metro Plant).

Project Overview

The project includes construction of a fourth incinerator, followed by renewal of existing incineration facilities. The fourth incinerator includes energy recovery, air pollution control, and related solids processing equipment. The Metro Plant incinerates 75% of the regions wastewater solids and is critical infrastructure for protection of public health and the environment.

Project Background

MCES employs the newest environmentally sustainable methods for processing solids removal from wastewater at the Metro Plant. The process eliminates bacteria, generates energy, and reduces solids disposal. The Metro Plant incineration system continues to have an exceptional track record of environmental compliance and the Metro Plant has had zero odor complaints for the last five years. During public outreach held in 2018, there were no concerns expressed in regards to odor, noise, and traffic.

Project Location

The Metro Plant treats 180 million gallons of wastewater every day for 66 communities (green area on map) and processes 850 wet tons of solids every day for 73 communities. The Metro Plant receives wastewater solids from four other MCES wastewater treatment plants.

Project Need

The Metro Plant needs additional wastewater solids processing capacity to:

Preserve Existing Wastewater Treatment Plant Infrastructure

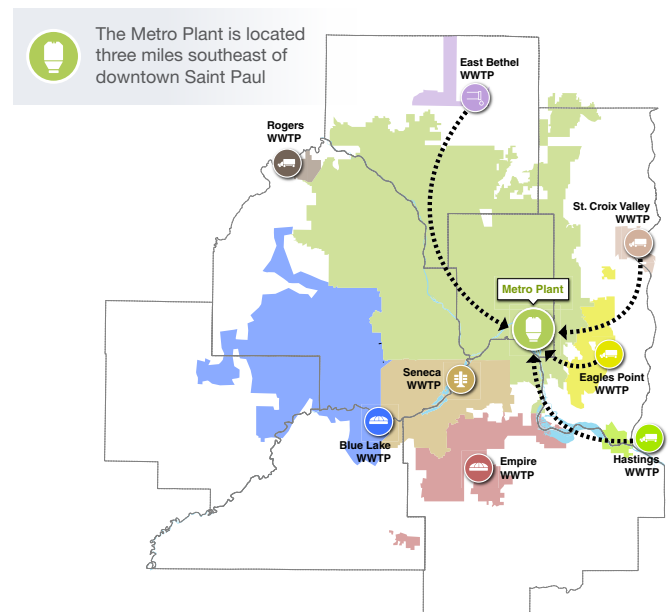

Planned renewal projects will require extended downtime of the existing incinerators.

Serve Regional Population Growth

500,000 new residents in the Metro Plant service area by 2050.

Air Permitting & Environmental Review

The fourth incinerator requires a major air permit amendment which has been submitted to the Minnesota Pollution Control Agency (MPCA) for review. MCES will voluntarily complete an environmental assessment worksheet (EAW) with the MPCA.

Project Schedule

MCES completed planning and engaged in outreach at the end of 2018. The fourth incinerator is planned to be constructed by the end of 2026, followed by renewal of existing facilities.

MCES Mission

Provide wastewater services and integrated planning to ensure sustainable water quality and water supply for the region.

How To Participate

To register for and attend the virtual meetings, go the project website www.metrocouncil.org/metrosolids and select the EVENTS & MEETINGS at the bottom of the page. Then select the meeting you would like to attend.

To participate by phone,

call 408.418.9388

Access Code: 187 676 1270

To participate by phone,

Times

OPTION 1

Tuesday, June 15, 2021

Beginning at 12:00 PM (Noon)

OPTION 2

Wednesday, June 16, 2021

Beginning at 6:00 PM

Metropolitan Council Environmental Services (MCS) will host virtual meetings to discuss the status of the Metro Plant Solids Management Improvements project.
