LIFT STATION SUSTAINABLE LANDSCAPE L68 RESTORATION PROJECT – OPEN HOUSE WEDNESDAY

OVERVIEW

Metropolitan Council Environmental Services is undertaking a sustainable landscape restoration project in your area. The work includes replacing high-maintenance lawn and invasive plants with drought-tolerant turf, bee lawn, and Minnesota native grasses, flowers, trees, and shrubs. These landscapes need less water, reduce runoff, and provide a habitat for birds, bees, and butterflies. This project helps fulfill the Met Council's mission to improve water quality and ensure a sustainable water supply for the region.

Reminder: this Wednesday, please join project team members for an open house to learn more about the project progress:

- Wednesday, October 8, 2025; 5:00 p.m. - 6:30 p.m. Project team members will lead walking tours at 5:10 p.m. and 5:40 p.m.
- Bayport L68 Site: 498 Maine Street South, Bayport, MN 55003
- Project team members will discuss our commitment to maintaining the sustainable landscape and how the site is expected to look in the future.

Please reach out to the project team with any questions:

- Phone: 651-286-8452
- Email: MCESnativelandscapes@WSBeng.com
- Website: metro council.org/SustainableLandscapes

FUTURE WORK

This is the third year of the project, and final assessments of the landscape progress will take place in late fall. The work will then transition into long-term maintenance of an established native landscape. Check the website for the most recent update: www.metrocouncil.org/SustainableLandscapes
