Battle Creek Sewer Construction

Project Update April 9, 2021

Construction activities and schedules are subject to change due to weather and other unforeseen impacts.

The regional trail between Ruth St and Park Entrance Road is closed. Park Entrance Road is closed to vehicular traffic and the parking lot on Park Entrance Road is also closed. Satellite trails for bike and pedestrian use are closed or limited. Construction activities in the coming days and weeks include manhole rehabilitations, pipe replacement, installation of cured-in-place pipe into existing pipelines, finishing manholes with inserts, cleanup and restoration upstream of Upper Afton Road, boulder retaining wall work, and erosion control work. Crews will continue installing temporary conveyance lines for the second phase of work that occurs at the lower half of the Battle Creek Trail and along Point Douglas Road.

What are the temporary wastewater conveyance pipes for?
The temporary pipes ensure there are no disruptions to sanitary sewer service while crews reconstruct and rehabilitate existing sewer pipe and structures through Battle Creek Regional Park. When in operation, 24/7 pump and security watch person(s) will be onsite to monitor the conveyance system.

Safety reminder
Trail users, for your safety, please remember to follow posted detour signs and do not cross the fenced-off/barricaded areas.
