Battle Creek Sewer Construction

Project Update March 4, 2021

Construction activities and schedules are subject to change due to weather and other unforeseen impacts.

The regional trail between Ruth St and Park Entrance Rd and the parking lot on Park Entrance Rd are closed. Satellite trails for bike and pedestrian use are closed or limited. Construction activities in the coming days and weeks include placement of inserts in manholes, CCTV sewer inspection, and installation of cured-in-place pipe into the existing sewer pipe. Upon completion of these tasks, crews will begin removal of some of the temporary conveyance lines along the Battle Creek Regional Trail north of and south of Upper Afton Rd. Crews will continue installing temporary conveyance lines for the second phase of work that occurs at the lower half of the Battle Creek Trail and along Point Douglas Rd.

What are the temporary wastewater conveyance pipes for?
The temporary pipes ensure there are no disruptions to sanitary sewer service while crews reconstruct and rehabilitate existing sewer pipe and structures through Battle Creek Regional Park. When in operation, 24/7 pump and security watch person(s) will be onsite to monitor the conveyance system.

Safety reminder
Trail users, for your safety, please remember to follow posted detour signs and do not cross the fenced-off/barricaded areas.
