Battle Creek Sewer Construction

Project Update September 3, 2021

Construction activities and schedules are subject to change due to weather and other unforeseen impacts.

Overview
The project is approaching its final stages, but the project area remains an active construction site. The regional trail between Ruth St and Park Entrance Road remains closed. Park Entrance Road remains closed to vehicle traffic. The parking lot on Park Entrance Road is also closed. The bike trail next to Lower Afton Road from Battle Creek Road to Park Entrance Road is closed until Fall 2021. Trail users are detoured on Lower Afton Road. Read more information on mountain biking trails in Battle Creek on the next page.

Construction has started to wind down, but the area remains an active construction site. Please remain vigilant of posted signs, barricades, and closures. Construction activities in the coming weeks include placing topsoil around Upper Afton Road, paving trails and touching up parking lots, guardrail installation, bench placement, and seeding.
**Temporary Trail Closures**
Temporary trail closures are necessary to protect public safety during underground sewer construction. Bike trails north and south of the ravine will often not connect during construction. The bike trail connection near the Lower Lot will be closed while there is active construction in the area. Please see the trail map for more detail. Please be aware of bike and walking trail closures and plan your visit accordingly. For the most up-to-date status report, please visit the Battle Creek Mountain Biking Facebook Page: https://www.facebook.com/battlecreekmountainbike/

**Safety Reminder**
With the increase in summer park users, it remains important to be mindful of construction. Trail users, for your safety, please remember to follow posted detour signs and do not cross the fenced-off or barricaded areas.

For the safety of park users and construction crews, do not attempt to handle or move construction equipment.
