Brookdale Drive
During the next two weeks, crews plan to finish installing the temporary wastewater conveyance pipes between West River Road and MCES Lift Station 32. Brookdale Drive in this area will continue to be temporarily closed through April – local traffic only. Driveway closures will occur on the south side of the street and driveway impacts on the north side of the street. Residents have been notified and encouraged to park on side streets during their closure dates.

Brookdale Drive residents between Highway 252 and West River Road may park in their driveways. Pipes have been buried under these driveways, but these areas have not been repaved yet. Repaving will occur by May 1. This process will only take a few hours and residents will be notified before it occurs.

What To Expect
- Construction equipment will continue to arrive at Jewell Park and locations along the project sites.
- Removal of marked trees will continue along both project sites.
- Construction of the temporary wastewater conveyance pipe will continue.
- Digging and fence installation will continue at Jewell Park.

Thank You for Your Patience
While we work hard to keep our crews and community members safe during this time, we’re adapting our communications methods and moving tasks around in our construction schedule to keep the project on schedule. We appreciate your flexibility and patience as this occurs. We’ll do our best to keep you informed!

Stay Informed
