Brooklyn Park Regional Sewer Rehabilitation
Construction Update December 18, 2019
Issue 6

Brooklyn Park site work begins
The Brooklyn Park Sewer Rehabilitation project is on schedule to begin this month. A contractor was selected in late November and the Metropolitan Council conducted a neighborhood meeting on December 4 to update residents about the start of the construction work. Please see the updated project information sheet for additional information on the project, impacts, timeline, and more.

What to expect
This week a trailer and portable restroom will be set up at Lift Station 32 (near the intersection of Mississippi Ln. and Brookdale Dr.) on Metropolitan Council property. This will be the onsite construction office for the project team throughout the project. Neighbors can expect to see slightly more traffic to and from this site. See the map for the general office location.

This month crews will be onsite checking alignments, collecting measurements, and taking photos throughout the project area.

Construction is expected to begin in spring 2020 with restoration occurring in summer 2021. Crews will be installing temporary conveyance pipes in February prior to spring. More information will be provided as construction begins.

Safety
Please keep your distance from any materials and equipment – only authorized personnel are permitted in our work areas. We want you and our crews to stay safe during construction.

Stay Informed
For more information, to sign up for project e-mail/text updates, or to view past project updates visit the project website.
