Brooklyn Park Regional Sewer Rehabilitation
Construction Update January 15, 2020
Issue 7

Brooklyn Park Work Underway
The Brooklyn Park Sewer Rehabilitation project is underway. Construction crews will be doorknocking and reaching out to residents who may experience impacts near or on their property during the project. If your household receives a door hanger, please promptly follow the instructions for contacting the project team. This will help us keep you informed and help the project stay on schedule. Crews anticipate surveying and marking trees in January for trimming or removal in February. You will be contacted before the work begins if trees near your property will need to be trimmed or removed. Please see the project information sheet for additional information on the project, impacts, timeline, and more.

What to Expect
Crews will be onsite, checking alignments, collecting measurements, taking photos, and marking trees for trimming or removal.

Crews will also be reaching out to residents about pre-construction surveys of homes and right-of-entry permits needed to connect sanitary sewer lines.

A trailer and portable restroom have been set up at Lift Station 32 (near the intersection of Mississippi Ln. and Brookdale Dr.) on Metropolitan Council property. This is the onsite construction office for the project team. Neighbors can expect to see slightly more traffic to and from this site. See the map for the general office location.

Looking Ahead
Construction is expected to begin in spring 2020 with restoration occurring in summer 2021. In the coming months, crews will begin installing temporary conveyance pipes as well as tree trimming and removal. More information will be provided as construction begins.

Safety
Please keep your distance from any materials and equipment—only authorized personnel are permitted in our work areas. We want you and our crews to stay safe during construction.

Stay Informed
For more information, to sign up for project e-mail/text updates, or to view past project updates visit the project website.
