Restoration complete at Emery Farms Park
Metropolitan Council crews have completed construction and restoration at Emery Farms Park. We ask that neighbors continue to stay off the new grass until there is snow cover so it can become established.

Completed Emery Farms Park restoration including installation of new sod and park entrance.

All Metropolitan Council work at this Champlin project site is expected to wrap up in November, weather and schedule permitting. The final piece of this project will include limited work around the Xylon Avenue maintenance holes to finish coating and restoration.

What to expect
While we do our best to minimize impacts during restoration, some temporary inconveniences such as dust, noise, and vibrations may occur as this work takes place.

Safety
Please keep your distance from any materials and equipment. We want you and our crews to stay safe during restoration.

Stay Informed
