Project Overview
Metropolitan Council Environmental Services (MCES) is making improvements to aging and deteriorating sanitary sewer facilities that serve homes and businesses in Champlin. Work will include rehabilitating the sanitary sewer through existing manholes.

June Construction Work
During the month of June, crews will be lining the sewer pipe under Xylon Avenue. This will require placing a large, 80 x 20 ft tent in the middle of Xylon between 115th and 116th Avenues N. There will also be trucks and other large construction equipment near manhole 38, similar to the example pictured below.

What to Expect
While we do our best to minimize impacts during construction, some temporary inconveniences such as 24-hour lighting, noise, and odors may occur as this work takes place.

Traffic
- Xylon Avenue will be closed except for local traffic between 114th and 117th Avenues N.
- Xylon Avenue will be blocked to all traffic between 115th and 116th Avenues in front of 11534, 11541, 11542, and 11549 Xylon Avenue.

Parking
- Parking permits will be given to residents of 11534, 11541, 11442, and 11549 Xylon Avenue to allow for city street parking 24/7 while driveway access is blocked.

Garbage and Recycling
- Garbage and recycling service will continue throughout construction. Simply put your bins on the end of your driveway on your garbage/recycling day and our crews will take them to the designated pick-up location and return them once they are emptied.
- NOTE: Please label garbage and recycling bins with your address to ensure the same bins are returned to you.

Mail
- Mail service will continue throughout construction. Residents with mailboxes inaccessible during construction will be provided with a temporary mailbox.

ADA & Health Concerns
- Residents in need of special ADA or health accommodations are encouraged to call the hotline number below so accommodations can be made.
