Lift Station 32 Rehabilitation Project
Construction Update January 2019
Issue 7

Project Description
Metropolitan Council Environmental Services (MCES) is making improvements to Lift Station 32, located at the corner of Mississippi Ln. and Brookdale Dr. in Brooklyn Park. Updates are being made to station structures and the odor control system to maintain a safe work environment for MCES employees. These improvements may also decrease noticeable odors emitted from the station. Construction is scheduled through April 2019.

Project Updates
The Operation Readiness Testing took place in October 2018 and was successful. Now that we have lower winter flows, the final concrete repair work and coating in the wetwell has started. Crews are currently wrapping up on the HVAC improvements.
