Lift Station 32 Rehabilitation Project  
Construction Update October 5, 2018  
Issue 6

Project Description
Metropolitan Council Environmental Services (MCES) is making improvements to Lift Station 32, located at the corner of Mississippi Ln. and Brookdale Dr. in Brooklyn Park. Updates are being made to station structures and the odor control system to maintain a safe work environment for MCES employees. These improvements may also decrease noticeable odors emitted from the station. Construction is scheduled for January 2018 through April 2019.

Project Updates
Landscaping is now complete. Crews will continue to work on the minor exterior items that remain, including painting and caulking. A new odor control system was installed and has been running well. The Operation Readiness Testing is tentatively scheduled for October 16. The final restoration work in the wetwell is scheduled to begin mid-November. Check out the photo below to see the most recent progress.
