

## Parc Drive construction activities begin in early September

The Metropolitan Council Environmental Services (MCES), operator of the metro-area wastewater collection and treatment system, is making improvements to the aging and deteriorating regional sanitary sewer system that serves homes and businesses in the City of Burnsville.

Construction activities for Site 1, along Parc Drive and in Terrace Oaks East Park, are scheduled to begin in early September. This phase of the project will improve an approximately 200-foot section of a regional sanitary sewer. Parc Drive will be down to one lane near the Burnsville Parkway intersection but will remain open during the utility work. Terrace Oaks East Park will remain open during construction. Construction is anticipated to be completed by late fall 2019.
