

River Hills Drive southbound lane closures

On Tuesday, May 14 and Wednesday, May 15 the southbound lanes of River Hills Drive will be closed as crews install a bypass pump in preparation for pipe lining, weather permitting. Motorists should continue to use Cliff Road and Highway 13 during the lane closures.

Pipe lining begins May 14

Beginning Tuesday, May 14 crews will be lining the pipe (CIPP) along River Hills Drive between Cliff Road and Highway 13 as part of the project's interceptor improvements process. This work is anticipated to be completed in approximately two weeks.

About the pipe lining process

The method to repair the pipe is Cured-in-Place-Pipe (CIPP) lining. The liner is inserted down into the sewer pipe and spreads out into the pipe by filling the liner with large volumes of water or steam. Hot water or steam is added until the heat-activated resin in the liner hardens to form a rigid new pipe inside the existing pipe.

Upcoming River Hills Drive/Cliff Road intersection closure

Once the pipe lining is complete crews will remove the temporary wastewater conveyance pipes that were placed along River Hills Drive at the beginning of the project. A 24-hour closure of the intersection of River Hills Drive and Cliff Road is needed to remove the conveyance pipes that were buried under the intersection. **The intersection closure is tentatively scheduled for Saturday, June 1.**

MCES crews bury temporary wastewater conveyance pipes at intersections to maintain traffic access during sewer work
